(197) An amendment requiring the Postmaster General to submit a report to Congress each year on how the Postal Service spent its public service appropriation and how it planned to spend it in the coming year. No. Failed.

(198) Postal Service Act, final passage. Yes. Passed.

(199) International Banking Act, which established Federal regulation for foreign banking operations in the U.S. Yes. Passed.

(201) Authorizing funds for programs under the Marine Mammal Protection Act. Yes. Passed.

(202) A bill authorizing the Commerce Department to embargo wildlife products from foreign countries that do not cooperate on conservation of endangered species. Yes. Passed.

(203) A bill authorizing for conservation programs on military reservations. Yes. Passed.

(204) A bill to implement programs under the Fishery Conservation and Management Act. Yes. Passed.

(205) A bill authorizing $3 million per year for the Council on Environmental Quality through Fiscal Year 1981. Yes. Passed.

(206) A bill authorizing and approving changes in Small Business Administration programs. Yes. Passed.

(208) A bill allowing judicial settlement of Riverside County, California, land claims. Yes. Passed.

(209) A bill to restore federal recognition of certain Oklahoma Indian tribes. Yes. Passed.

(210) A bill authorizing $1 million for the Navajo-Hopi Relocation Commission. Yes. Passed.

(211) Creation of the Lowell, Massachusetts, National Historical Park. Yes. Passed.

(212) Adoption of the Conference Report on the Overseas Private Investment Corporation Amendments which extend authority until September 30, 1981. Yes. Passed.

(214) Adoption of Conference Report on Emergency Agricultural Act of 1978, setting flexible target prices and higher loan rates, and increasing borrowing authority of the Commodity Credit Corporation. Yes. Failed.

(215) Adoption of the rule on a bill to reduce the basic work week of Federal firefighters. Yes. Passed.

(216) A bill to reduce the regularly scheduled administrative work week of Federal firefighters from 72 to 56 hours. Yes. Passed.

(218) Adoption of the rule on the White House Personnel Authorization. Yes. Passed.

(219) An amendment to reduce the number of White House office employees authorized at levels GS 16 and above from 100 to 75. No. Failed.

(220) An amendment to require each President to submit a new authorization request for White House office staff and related expenses within one year of assuming office. No. Failed.

(221) An amendment to prohibit White House personnel from lobbying state legislatures on proposed amendments to the Constitution. No. Failed.

(222) White House personnel authorization allowing a total of 148 staff positions at or above GS 16 and requiring a report to Congress on the number of experts, consultants and detailees employed at the White House. Yes. Passed.

(223) A motion to exclude the public from Conference Committee meetings on the natural gas pricing provisions of the National Energy Act. No. Failed.

(224) A bill approving House nominations to the Merchant Marine Academy. Yes. Passed.

(225) Authorization of the National Sea Grant Program providing colleges and universities funds for research. Yes. Passed.

(226) Authorization of the National Advisory Committee on Oceans and Atmosphere. Yes. Passed.

(227) Authorization of $1.4 billion for daily operations and maintenance of the Coast Guard in Fiscal Year 1979. Yes. Passed.

(229) The establishment of an office of an Inspector General in 12 departments and agencies to audit and investigate programs and operations. NV. Passed.

(230) Authorization of $5 million for the Hubert H. Humphrey Institute of Public Affairs and $2.5 million for the Everett McKinley Dirksen Congressional Leadership Research Center. NV. Passed.

(231) A bill to direct the Department of the Interior to acquire from New Mexico 618

acres surrounding and including the Zuni Salt Lake to be held in trust for the Zuni Tribe. NV. Passed.

(232) An amendment to add $3.2 million to the $1 million authorized to study the feasibility of converting the Glomar Explorer into a deep sea drilling vessel. No. Failed.

(233) An amendment to cut $6 million from the National Science Foundation's $158 million budget for biological behavioral and social science research. No. Failed.

(234) A bill to authorize $934.4 million for NSF in Fiscal Year 1979. Yes. Passed.

(235) To adopt the rule on Public Disclosure of Lobbying Act. Yes. Passed.

(236) Public Disclosure of Lobbying: to broaden the exemption in the bill for communications to Members of Congress. No. Failed.

(237) Public Disclosure of Lobbying: to require registered organizations to report lobbying solicitations which were made or paid for by the organization or by an affiliate not required to be registered under the Act. Yes. Passed.

(239) To resolve itself into the Committee of the Whole House for further consideration of the Public Disclosure of Lobbying Act. Yes. Passed.

(240) To table a motion to reconsider the vote by which the House agreed to resolve itself into the Committee of the Whole House. Yes. Passed.

(241) Public Disclosure of Lobbying: to include Federal departments and agencies and the White House within the definition of the word "organization" to be covered by the bill. NV. Failed.

(242) Public Disclosure of Lobbying: to require each registered organization to disclose the names of organizations from which it received $3,000 or more in dues or contributions in a calendar year if it spent the money on lobbying and if it spent more than 1 percent of its total income on lobbying activities. Yes. Passed.

(243) Public Disclosure of Lobbying: to end all debate. Yes. Failed.

(244) To adopt the rule for consideration of National Aeronautics and Space Administration Authorization for Fiscal Year 1979. Yes. Passed.

(245) A substitute amendment to the Agricultural Credit Act which would have provided through December 1979 only small, short-term loans to farmers and ranchers to cover operating expenses or installment payments on existing debts. No. Failed.

(246) The Agricultural Credit Act authorizing $4 billion for 2-year economic emergency loan program for farmers and ranchers. Yes. Passed.

(247) To resolve into the Committee of the Whole House for consideration of National Aeronautics and Space Administration Authorization for Fiscal Year 1979. Yes. Passed.

(248) Authorization of $4.4 billion for NASA research and development programs. Yes. Passed.

(249) Peace Corps Authorization: Amendment to prohibit the use of funds for programs in the Central African Empire. Yes. Passed.

(250) Authorization of $96.1 million for the Peace Corps in Fiscal Year 1979. Yes. Passed.

(251) A resolution disapproving Reorganization Plan No. 1, which would consolidate certain Federal Equal Employment programs into the Equal Employment Opportunity Commission. No. Failed.

(252) A resolution denouncing the government of Cambodia for its disregard of basic human rights. Yes. Passed.

(253) Approval of the Journal of the proceedings of April 25. Yes. Passed.

(254) Authorization of $18.4 million for the operations of the Arms Control and Disarmament Agency. Yes. Passed.

(255) Public Disclosure of Lobbying: Amendment to direct the GAO to report on lobbying activities by all levels of government and by associations of state or local elected officials. No. Failed.

(256) Public Disclosure of Lobbying: Amendment to exempt communications which deal only with the existence or status of an issue, or which seek only to determine the subject of an issue. No. Passed.

(257) Public Disclosure of Lobbying: Passage of the bill repealing existing law and replacing it with a comprehensive statute covering registration and reporting by lobbying organizations. Yes. Passed.

(258) Motion to resolve into the Committee of the Whole House for consideration of the Environmental Protection Agency Authorization for Fiscal Year 1979. Yes. Passed.

(259) Authorization of $432.9 million for environmental research and development programs of the Environmental Protection Agency. Yes. Passed.

(260) Resolution providing $13 million in supplemental appropriations for adminstrative expenses of the U.S. Railway Association in Fiscal Year 1978. No. Passed.

(262) A bill to increase from $3 million to $6 million the authorization for development of the tuna and other fishery resources in the Central Western and South Pacific Ocean through Fiscal Year 1979.

(263) A bill to establish a Hubert H. Humphrey Fellowship in social and political thought at the Woodrow Wilson International Center for Scholars at the Smithsonian Institute. NV. Failed.

(264) A bill to extend the authority of the Federal Reserve Banks to purchase U.S. obligations of up to $5 billion directly from the Treasury until April 30, 1979. NV. Passed.

(265) Adoption of the rule for consideration of Civil Rights of Institutionalized Persons Act. NV. Passed.

(267) An amendment to eliminate the Attorney General's authority to initiate or intervene in civil actions on behalf of inmates of jails, prisons or correctional institutions in order to redress systematic deprivation of rights. NV. Passed.

(269) SBA Solar Energy Sources Loan Program, which authorizes the SBA to make direct loans of up to $30 million in loan guarantees of up to $45 million to businesses involved with solar energy renewable energy resources and conservation. Yes. Passed.

(270) A bill to provide the Ak-Chin Indian Tribe of Arizona with a stable water supply in exchange for which the tribe would waive all claims against the U.S. for its previous failures to supply water to meet the tribe's needs. Yes. Failed.

(271) Adoption of Senate Amendments to the Security Investor Protection Act. Yes. Passed.

(272) To cite Claude Powell, Jr., for contempt of Congress for not responding when the House Select Committee on Assassinations subpoenaed him to testify in the Martin Luther King, Jr., assassination investigation. Yes. Passed.

(273) Motion to resolve into the Committee of the Whole House for consideration of the First Budget Resolution for Fiscal Year 1979. Yes. Passed.

(274) First Budget Resolution: To set budget authority at $546.8 billion, outlays at $488.3 billion, revenues at $440.1 billion and a deficit at $48.2 billion. Yes. Failed.

(275) First Budget Resolution: To add $2.4 billion in budget authority to the defense function. No. Failed.

(276) First Budget Resolution: To transfer $4.8 billion in budget authority and $2.8 billion in outlays from defense to employment and economic development programs. No. Failed.

(277) First Budget Resolution: To reduce the revenue target by $3.2 billion to accommodate a $29.7 billion net tax cut rather than the $19.4 billion net tax cut assumed in the Resolution. No. Failed.

(278) First Budget Resolution: To add $1 billion in budget authority and $844 million in outlays for new entitlement authority for veterans programs. Yes. Passed.

(279) To increase authority by $435 million in outlays by $390 million to expand job training programs for youths and other Americans. No. Failed.

(280) First Budget Resolution: To reduce budget authority and outlays by $255 million so the federal salary increase could be rolled back from 6% to 5.5%. Yes. Failed.

(281) To approve the Journal of the proceedings of May 3. Yes. Passed.

(282) Adoption of the rule of the Conference Report on the Emergency Agriculture Act. Yes. Passed.

(283) Conference Report on the Emergency Agriculture Act, which authorized the Agriculture Department to increase target prices on wheat, feed grains and cotton crops. Also encouraged the use of gasohol, increased borrowing authority of the Commodity Credit Corporation and established a raise in marketing order program. Yes. Passed.

(284) First Budget Resolution: Substitute amendment to reduce the revenue target by $635 million to accommodate a tuition tax credit for college, elementary and secondary school costs. Yes. Passed.

(241) First Budget Resolution: Agreement to the amendment as altered by the previous amendment. Yes. Passed.

(287) Authorization of programs and projects for Guam, the Virgin Islands, Northern Mariana Islands, American Samoa, and trust territory of the Pacific Islands. No. Failed.

(288) A resolution expressing the sense of Congress that the President should instruct Secretary of State to request the Secretary General of the United Nations to work through existing UN agencies for a full accounting of American MIAs in Southeast Asia. Yes. Passed.

(289) Supplemental Appropriation providing $758 million for disaster relief activities of the SBA in Fiscal Year 1978. Yes. Passed.

(290) Motion to resolve itself into the Committee of the Whole House for consideration of the First Budget Resolution. NV. Passed.

(291) First Budget Resolution: To reduce budget authority and outlays by $3.15 billion for programs of the Department of Health, Education and Welfare. NV. Passed.

(292) First Budget Resolution: Adjustment of revenue and spending targets to reflect that Panama Canal tolls be funneled through the U.S. Treasury. NV. Passed.

(293) First Budget Resolution: To reduce the total budget authority target by $8 billion and the total outlays target by $7 billion to accommodate an across the board cut in all government programs. NV. Failed.

(294) First Budget Resolution: To reduce outlays by $195.4 million and budget authority by $178.2 million to accommodate reductions in funding for various regulatory agencies. NV. Failed.

(295) Motion to resolve itself into the Committee of the Whole House for consideration of the First Budget Resolution. Yes. Passed.

(296) First Budget Resolution: An amendment to reduce budget authority and outlays by $56 million to accommodate deletion of Food for Peace funds for South Korea. No. Failed.

(297) First Budget Resolution: Substitute amendment calling for a balanced budget with no new tax cuts. No. Failed.

(298) First Budget Resolution: An amendment to reduce the outlays target by $36.8 billion to $464.6 billion, and increasing the revenue target by $21.3 billion to $464.4 billion, thus achieving a balanced budget. No. Failed.

(299) First Budget Resolution: To reduce budget authority and outlays by $3.5 billion

for programs of the Department of Health, Education, and Welfare. No. Failed.

(300) First Budget Resolution: Final adoption, setting revenue targets for fiscal year 1979 by budget aggregates and by functional categories, as guidelines to congressional action prior to the start of Fiscal Year 1979. Set aggregate budget targets as follows: Budget authority at $569.5 billion, outlays at $500.9 billion, revenues at $433 billion, and the deficit at $57.9 billion. No. Passed.

(301) Approval of the Journal of the proceedings for May 10. Yes. Passed.

(302) A resolution denouncing the assassination of Aldo Moro. Yes. Passed.

(303) Amendment reducing the authorizations for the population planning in International Disaster Assistance Program and for the Economic Security Fund. No. Failed.

(304) Amendment prohibiting assistance to nations that did not make reasonable progress towards eliminating domestic impediments to agriculture production. NV. Failed.

(305) An amendment to limit U.S. aid to Panama to 25% of the revenues Panama received from the Canal. NV. Failed.

(307) Motion to resolve itself into the Committee of the Whole House for further consideration of the International Development and Food Assistance Act. NV. Passed.

(308) An amendment making tobacco and tobacco products ineligible for the Food for Peace Program. NV. Failed.

(309) Substitute amendment to prohibit direct aid to Vietnam, Cambodia, Uganda, and Cuba. NV. Failed.

(311) Passage of the International Maritime Satellite Organization authorization. Yes. Passed.

(312) An amendment to cut funding for most programs under the International Development and Food Assistance Act by 5%. No. Passed.

(313) International Development and Food Assistance Act: final passage authorizing $3.7 billion for Fiscal Year 1979 for international development and economic support assistance programs. Yes. Passed.

(314) Establishment of a Hubert H. Humphrey Fellowship at the Woodrow Wilson International Center to be awarded annually to a distinguished scholar, statesman or cultural figure. Yes. Passed.

(315) Authorization of $20.5 million for the National Fire Prevention and Control Administration and $5.1 million for the Fire Research Center in Fiscal Year 1979. Yes. Passed.

(316) Ordering a second on a motion to suspend the rules and pass Private Foundations' holdings in public utilities. Yes. Passed.

(317) Passage of the Comprehensive Older Americans Act Amendment. Yes. Passed.

(318) Passage of private foundations holdings and public utilities, which would have established specific conditions under which a private foundation and its donors together could hold up to 51% of the stock of a qualified public utility company. No. Failed.

(319) Approval of the Journal of proceedings for May 12, 1978. Yes. Passed.

(320) Comprehensive Rehabilitation Services Amendments of 1978, which authorizes funds for handicapped individuals, establishes a Community Service Employment Program for the handicapped under the Labor Department, and authorizes HEW to provide financial and technical assistance to organizations in order to remove barriers to handicapped. Yes. Passed.

(321) A motion to table a motion to concur in the Senate Amendment to the Conference Report on the District of Columbia Fiscal Year 1978 appropriations providing $27 million for capital outlays for a Washington. D.C. civic center. Yes. Failed.

(322) Motion to concur in the Senate Amendment to the Conference Report on the D.C. Fiscal Year 1978 appropriations which provides $27 million for capital outlays for a Washington Civic Center. No. Passed.

(323) Adoption of the rule for consideration of the Energy Department National Security Authorization for Fiscal Year 1979. Yes. Passed.

(324) Motion to resolve into the Committee of the Whole House for consideration of the Energy Department National Security Authorization for Fiscal Year 1979. Yes. Passed.

(325) Energy Department National Security Authorization: An amendment to prohibit the use of any funds for production or deployment of neutron weapons. Yes. Failed.

(326) Energy Department National Security Authorization: Final passage, which authorizes $2.9 billion for Energy Department research development and for production of nuclear weapons, production of strategic and critical materials and military applications of nuclear energy. Yes. Passed.

(327) First Budget Resolution: Adoption of the Conference Report, setting spending and revenue targets to serve as guidelines for congressional action in Fiscal Year 1979 budget. Targets are as follows: Budget authority at $568.9 billion, outlays at $498.8 billion, revenue at $447.9 billion, and the deficit at $50.9 billion. No. Passed.

(328) Adoption of the rule for consideration of Temporary Public Debt Limit Extension. Yes. Passed.

(329) To increase the debt limit by $97.1 billion to $849.1 billion, the level set in the Conference Report on the First Fiscal Year 1979 Budget Resolution. No. Failed.

(330) Adoption of the rule for consideration of the Alaska National Interest Lands Conservation Act. Yes. Passed.

(331) Resolution promoting observance in the Soviet Union of the Helsinki Amendment. Yes. Passed.

(335) Alaska Lands: An amendment to remove five million acres from the proposed additions to the nation's parks, refuges, and forests so the State of Alaska could select these lands. No. Failed.

(336) Alaska Lands: An amendment to reduce lands to be designated as wilderness from approximately 66 million to 33 million acres. No. Failed.

(337) Alaska Lands. Motion to resolve into the Committee of the Whole House for further consideration of the bill. NV. Passed.

(338) Alaska Lands: An amendment calling for a Department of Interior study of mineral deposits in Alaska. NV. Passed.

(339) Alaska Lands: A motion to recommit the bill to the Interior Committee for further consideration. NV. Failed.

(340) Alaska Lands: Final passage, which designates approximately 102 million acres of federal lands in Alaska as national park, national forest, wildlife refuge and wild and scenic rivers. NV. Passed.

(291) Resolution expressing the House's objection to the proposals of the Commissioner of Education to consolidate several education advisory councils. No. Passed.

(343) Cooperative Forestry Assistance Act. Yes. Passed.

(344) Forest and Range Land Renewable Resources Act. Yes. Passed.

# SENATE—*Wednesday, September 6, 1978*

*(Legislative day of Wednesday, August 16, 1978)*

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by KANEASTER HODGES, JR., a Senator from the State of Arkansas.

## PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Let us pray:

God of our fathers and our God, from age to age the same yet ever new, be to us now the pillar of a cloud by day and the pillar of a fire by night to guide this Nation from strength to strength in these uncertain and perilous times. Give wisdom and strength to the President and those with whom he confers for the peace of the world, to the end that all deliberations may be lifted into the higher order of Thy kingdom and that the land in which the Master walked may at last be a holy land to all men who dwell on this Earth as children of Thy creation.

We thank Thee for the persistent call to duty in this place where daily we pause to renew the oath of office and to reaffirm our vows to Thee. Order our lives according to the pattern of the Master, in whose holy name we lift our prayer. Amen.

## APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
*Washington, D.C., September 6, 1978.*

*To the Senate:*

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable KANEASTER HODGES, JR., a Senator from the State of Arkansas, to perform the duties of the Chair.

JAMES O. EASTLAND,
*President pro tempore.*

Mr. HODGES thereupon assumed the chair as Acting President pro tempore.

## RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. Under the standing order the majority leader, the Senator from West Virginia, is recognized.

## THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## NATURAL GAS POLICY ACT CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, the nations of the world will be watching with vital interest the developments in the U.S. Senate as we take up the Natural Gas Policy Act conference report in the coming days.

This is an issue that has defied resolution for four decades, going back to 1939, with enactment of a Natural Gas Act. It is an issue that has been around for 40 years. This Congress has now considered it for 16 long months.

Now, because we face an energy shortage, because the U.S. dollar is weak and growing weaker, because this Nation will be perceived as one that shrinks from its problems if we do not face this issue, I consider it "must" legislation.

In a letter sent August 31, 1978, to a number of Senators, I outlined my views, and my reasons for those views.

Mr. President, I ask unanimous consent that the contents of my letter to Senators be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD as follows:

DEAR COLLEAGUE: The Natural Gas Policy Act of 1978 has perhaps been the most divisive, emotional, and controversial issue that has faced the Senate (as we saw last fall) during the 95th Congress; yet, in many ways it is the most important legislation that has confronted the 95th Congress.

In the first place, it is an issue that has been before Congress, off and on, for almost 40 years. Presidents Truman and Eisenhower vetoed bills dealing with the subject. The Natural Gas Act of 1939 is the controlling law; yet, in the four decades that have since intervened, the gas industry and the energy market have greatly changed. The old law of the late 1930's does not meet the conditions and circumstances of the late 1970's—as witnessed during the energy crisis of the winter of 1977.

The Natural Gas Policy Act of 1978 has been before the 95th Congress now for 16 months. Senate and House conferees spent many months in hammering out a conference report. On an issue so surrounded with controversy and complexity, and so involving regional, parochial, and vested interests, it is impossible to devise a solution that is completely pleasing and agreeable, in every respect, to any single one of us. But the conference report is the best that was practicably possible under the circumstances.

To reject that conference report now would be to admit that the Senate is unable or unwilling to deal with a growing problem—a problem that simply will not go away. To reject the conference report would be an admission to the American people that the Senate cannot rise above regional differences to deal with a problem that is vital to the interest of the nation. To reject the conference report would be to see 16 months of onerous, hard work—literally thousands of man hours—go down the drain.

To reject the conference report would be to say to the OPEC countries, to our industrial and NATO allies, and to the world that the United States cannot discipline itself to deal with the energy problem at home, and, thus, is incapable of providing world leadership in dealing with a global problem. This bill is a symbol abroad of American self-discipline, fortitude, and determination to solve our energy needs.

To reject the conference report will have an adverse impact on the dollar abroad, on our international trade balance, on the fight against inflation, and on our ability to increase production of energy and meet consumer needs.

I respectfully urge support of the conference report. Any effort to recommit the conference report will effectively kill the bill. In the first place, the recommittal proposal which has been circulated would be ineffective as a solution to the problem, even if the House conferees would agree. Moreover, the Emergency Natural Gas Act of 1977 was enacted on the promise that national energy policy legislation would be subsequently proposed by the Administration. The Administration kept that promise in submitting its legislative proposal on April 20, 1977. The Senate made several changes in the Administration's legislation, but the Natural Gas Policy Act of 1978—albeit not perfect—is a linchpin of that policy. To reject it now would be to admit that the Senate cannot, or is willing to, adopt a national energy policy.

Finally, to recommit the conference report at this late hour in a Congress that will, hopefully, adjourn sine die before many more weeks, would be to deliver the coup de grace to the bill. If the Senate is going to kill the bill, it would be better to deliver the death stroke directly, and thus make it indubitably clear to the American people precisely what we have done, than to kill the bill by the indirect procedurally fatal approach of recommittal of the conference report.

I write this letter with the utmost respect for all Senators who may disagree with the position I have taken above, but I respectfully and urgently hope that you will support it.

Sincerely yours,

ROBERT C. BYRD,
*Majority Leader.*

## CAMP DAVID SUMMIT

Mr. ROBERT C. BYRD. Mr. President, an historic opportunity exists at the Camp David summit to take an important step along the path toward peace in the Middle East.

President Carter is to be commended for extending invitations to President Anwar Sadat of Egypt and Prime Minister Menachem Begin of Israel to join him at a face-to-face meeting.

The President's decision to take the initiative and bring both sides together may end a deadlock in the negotiations and provide the needed momentum to seek a solution to the Arab-Israeli conflict.

Bold action was needed to keep alive the best chance for Mideast peace in 30 years.

But, it would be unrealistic to believe that President Carter, with a single, swift swordstroke, can cut the Gordian knot of historical and political complexities in the Middle East.

Nonetheless, President Carter will try to help the two leaders to find mutually acceptable ground that satisfies Egypt's territorial concerns and Israel's security concerns.

I would hope that both sides will show flexibility and good will in narrowing their differences so that further negotiations can result in a fair and lasting peace.

This is not the time for ultimatums or rigid postures. This is a time for quiet talk, realistic expectations, and for compromise.

The isolated setting of Camp David provides an atmosphere for serious, open and uninterrupted discussions of these vital matters.

As a friend to both Israel and Egypt, the United States can play a full part in the talks, outlining areas of agreement and disagreement and suggesting fresh ways to break impasses.

The task before these leaders is momentous and it is not without risk. But, there is too much at stake to let peace negotiations collapse and to face the prospect of slipping into a major conflict in the area once again.

I hope that, when the final chapter is written in the Middle East peace process, the Camp David summit will receive more than a footnote. It is my hope that the summit will be noted as the turning point on the road to peace in the Middle East.

Mr. President, I have no further requirement of my time. I reserve the remainder of my time.

## RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. Under the standing order the acting minority leader, the Senator from Nebraska, is recognized.

## NATURAL GAS POLICY ACT CONFERENCE REPORT

Mr. CURTIS. Mr. President, it is not too late for the President to send an energy program to Congress that will serve our economy. This has not been done. We need a program of conservation, yes. That has received attention, whether it be urging people in making incentives for them to put on storm doors, or drive slower, or whatnot. That is important.

The administration's energy program does not have a word in it toward increasing production.

Less than 5 percent of the area of the United States has been explored for oil and natural gas. We have undeveloped resources offshore. Yet we are faced with a situation where we pay for imported oil $12 to $14 a barrel. Yet our domestic produced oil is under a price ceiling, much of it for as low as $5.

Is there any businessman in the land who thinks that price controls and regulations are the way to production?

We need an energy program that faces up to production. We need not only to produce more oil and natural gas, and it can be done, but we need to pursue all alternatives. A program of gasohol would add materially to our motor fuel. We can produce alcohol from products from the soil that can be renewed year after year. A 10-percent blend of such alcohol in gasoline causes motors to run better. It would extend the available motor fuel by 10 percent. Yet the administration has not turned a hand to support such efforts in Congress.

The administration's energy program has stalled for months and months because it is not a good program. It is not in the interest of the country.

At the present time there is pressure on businessmen and others to support the bill. "Got to have a bill. Got to have a bill."

It is not a good bill. It is based upon regulation and price controls with a promise down in the future that they are going to take regulation and price controls off, but if their thinking goes along the present line it will never be done.

While we need conservation and saving of energy, I remind the Senate that it is by using energy that jobs are provided.

Oh, we could save energy by closing every factory. We could save more energy by stilling every farm tractor. We could save energy by all riding a bicycle.

However, think how much the economy and the jobs of this country are tied around the automotive industry.

Mr. President, I hope that instead of pressure on this Senate to approve a so-called energy program that is half a program only, half a program—it deals with the conservation of energy alone, and does nothing to encourage production of energy—I hope that instead of pressure to enact such a failing formula we will have some cooperation and that there can be laid before this Congress an energy bill that will serve the country. But we are faced with power.

I hope it will not be ruthlessly used to fool the American people, make them think that our energy problems are being solved when we are perpetuating the current failure.

Mr. President, I reserve the remainder of my time.

The ACTING PRESIDENT pro tempore. Does the majority leader wish to use any of his additional time?

Mr. ROBERT C. BYRD. Mr. President, while this Congress has been wrestling with the energy problem for 16 months, the problem has been around for almost 40 years. Only 4 months remain in this calendar year, and I do not think we can do anything about that.

A new Congress will convene on January 3 of next year. So it is either this bill or it is nothing. If Congress cannot resolve this problem in 16 months, if it rejects this conference report, the matter is dead, d-e-a-d, for the remainder of this Congress, and probably for a long time to come.

I know this conference report does not please everybody. It probably pleases no one in its entirety; but it is the product of 16 months of toil, sweat, and perseverance, and it is the best we can get.

There are those who are opposed to it, and I respect their viewpoints. I am not here to argue the pros and cons of it; but I am simply here to say that if we cannot resolve this matter after 16 months, I do not think we are going to resolve it in the remaining 16 weeks, give or take a few days, of this year. The American people expect an answer to the energy problem; they expect the Congress to produce an answer; the Congress has gone over the administration's package in considerable detail.

The administration proposal lacked a great deal when it came up here. I think it has been improved. While it is not a perfect solution, it is the handiwork of thousands of man-hours of grueling labor on the part of the conferees and all the Members of the House and Senate.

So, with no disrespect to anyone, let me simply repeat that it is this gas bill or it is nothing this year, and maybe for a long time to come. To those who are hoping for something better in the event this conference report is rejected, I would suggest that they not pin too much reliance on that hope.

Mr. METZENBAUM. Mr. President, will the distinguished majority leader yield?

Mr. ROBERT C. BYRD. Yes; I yield to the Senator from Ohio.

Mr. METZENBAUM. Let me say there is nobody on the floor of the Senate for whom I have greater respect both as to his ability, his integrity, and his knowledgeability than the distinguished majority leader, Senator BYRD.

In this instance, however, I wish to take issue because I believe we can indeed have an energy bill, including a natural gas bill, and we can have it by the end of next week, a bill which would include the enactment of the utility rate reform bill, which has been awaiting enactment for about 9 months and then held hostage until the natural gas bill is passed; the conservation measure, coal conservation measure, both of which have been held hostage by the efforts of the administration and the House leadership in order to get a natural gas bill.

Those of us who have now joined together for diverse reasons do not want to kill the natural gas bill; we have consistently said, and said in our Dear Colleague letter, that we want a natural gas bill when the natural gas bill would be a bare bones bill, giving the President emergency authority, giving the Federal Energy Regulatory Commission special authority, making it possible to move intrastate gas into interstate pipelines without it becoming subject to Federal regulation.

I believe all of this would be helpful. The fact is that the natural gas bill that has come out of the conference committee is truly a piece of legislation without a constituency.

I have not been in the Senate nearly as long as many other Members, and certainly not as long as the distinguished majority leader, but I would venture to say there has never been a piece of legislation as controversial as this one which has had as little public support as has this bill. This bill is now opposed by the Energy Action Committee; it is opposed by the Environmental Policy Center; it is opposed, on the one side, by the Consumer Federation of America and the American Conservative Union, by the Independent Petroleum Association of America, by the American Farm Bureau Federation, by the AFL–CIO, by the United Auto Workers——

The ACTING PRESIDENT pro tempore. The majority leader's time has expired.

Mr. METZENBAUM. Mr. President, I ask unanimous consent for 3 minutes more.

Mr. ROBERT C. BYRD. Mr. President, I object.

Would the distinguished acting Republican leader yield some time?

The ACTING PRESIDENT pro tempore. The minority leader has 3 minutes left.

Mr. GARN. I would be happy to yield 3 minutes to the distinguished Senator from Ohio.

The ACTING PRESIDENT pro tempore. The Senator from Ohio.

Mr. METZENBAUM. I thank the distinguished Senator from Utah.

This bill really does nothing. It will not produce substantially more natural gas. Even the best estimates indicate it would only be 3 to 4 percent more between now and 1985.

It will cost the American people between $29 billion and $41 billion in additional costs.

It will provide such a complex morass for the producers to wade through that even as distinguished an advocate of the producers as Senator RUSSELL LONG has indicated that he finds no fault with the pricing provisions—as I do, I might say—but he finds that the price is just too high to pay for the bill because it will require the producers to hire batteries of lawyers in order to defend their position.

It creates a situation where the residential users will be bearing the brunt of the additional costs in contradistinction to the industrial users as the bill left the House and Senate.

It will provide an unfair advantage for industrial users in the producers' States as against industrial users in the nonproducing States.

It is a bill that should not pass. We want a piece of legislation, we are prepared to support a piece of legislation, and we believe if the House and the administration will put their shoulders to the wheel, as those of us who are supporting this move to recommit with instructions to return with a bill that will provide the President with the necessary emergency powers, and the ability to use the emergency powers, we will have a bill by which we think the national interests will be served, as well as the interests of the world, and I think we will have a decent national energy plan.

I thank the distinguished majority and minority leaders.

## ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business not to extend beyond 10 minutes, with statements limited therein to 2 minutes each.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## NATIONAL GAS POLICY ACT CONFERENCE REPORT

Mr. ROBERT C. BYRD. Let us, if we are against this conference report, deliver the coup de grace right here. Vote it up or down—and let us witness its expiring agonies right here on this floor.

Let us, by so doing, frankly admit to the American people that Congress is either unable or unwilling to rise above regional, sectional, and parochial differences to deal with a matter that is of vital interest to the Nation. Let us not kill the conference report by recommitting it. Mr. President, it would be a cop-out to recommit it with instructions to report

it back. Everybody knows that will kill the bill. We have no assurance that the House would agree to those instructions.

Time is running out. We have spent all these months. Are we going to tell the American people that after 16 months of sweat, toil, and perseverance, the Senate is unable to reach a decision in the national interest that rises above sectional, parochial, and regional concerns? And are we going to admit to the world that the United States is unable and unwilling, through its Federal legislative body, to reach a decision on the energy problem, the most vital issue concerning this country today?

If we are going to kill the bill, let us kill it up or down directly. Let us administer the knife to the heart of it, and say to the American people, "We cannot come to grips with the problem of natural gas pricing; we have tried and we are unwilling or unable—take your choice—to do it." But let us not kill it by the parliamentary procedural move of recommitting it with instructions to report it back. That erects a tombstone over it just as final as killing it by voting it up or down. But at least the people then will know, if we kill it up or down, where the fault lies. They will know that the Senate just did not have the courage and the decisiveness to act on this question; and then we can just forget about it, because there will be no more time left in this Congress.

So, I say if we are going to kill it, let us make no bones about it, but say what we are doing. Admit to the American people that we are killing it, rather than attempting to do so by a procedural mechanism that leaves a good many people thinking we tried to do something and did not. That will not work.

## CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

## SECOND CONGRESSIONAL BUDGET RESOLUTION, 1979

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume the consideration of Senate Concurrent Resolution 104, which the clerk will report.

The legislative clerk read as follows:

A concurrent resolution (Senate Concurrent Resolution 104) revising the congressional budget for the U.S. Government for the fiscal year 1979.

The ACTING PRESIDENT pro tempore. Under the law, the total time for debate on this resolution is limited to 15 hours, with a time limitation on each amendment, which is to come out of the overall total, of 1 hour, by unanimous consent to be controlled by the mover of such and the manager of the resolution.

The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I yield the time that is, under the law, allocated to the majority leader or his designee the Senator from Maine (Mr. MUSKIE), the chairman of the Committee on the Budget.

Mr. GARN. Mr. President, on the minority side, we yield the time to the Senator from Oklahoma (Mr. BELLMON).

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, and I ask that the time be charged against the overall time on the resolution.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. BELLMON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BELLMON. Mr. President, I ask unanimous consent that the following members of the Budget Committee staff be allowed to remain on the floor during the consideration of and all votes on Senate Concurrent Resolution 104: Robert Boyd, Charles McQuillen, William Stringer, Paul Carttar, Becky Davies, Carol Cox, Robert Fulton, Barry Kinsey, Joyce Purcell, and Gail Shelp.

Also, Jack Nutter, of Senator DOLE's staff; Jim Streeter, of Senator MCCLURE's staff; Charles Gentry, of Senator DOMENICI's staff; Jan Olson, of Senator HAYAKAWA's staff; Mike Kintner, of Senator HEINZ's staff, and Mike Shorr, of Senator JAVITS's staff.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the following members of the Budget Committee staff be allowed to remain on the floor during consideration of and all votes on Senate Concurrent Resolution 104: John McEvoy, Sid Brown, Karen Williams, Van Ooms, Dan Twomey, George Merrill, Rodger Schlickeisen, Ira Tannenbaum, Liz Tankersley, Jill Scheu, Bob Sneed.

Charles Flickner, Tony Carnevale, Rob Fersh, Gale Picker, Brenda Tremper, Tom Hogarty, Charles Riemenschneider, Don Campbell, Porter Wheeler, Barbera Levering, Anne Lockwood, Lewis Shuster, and Rick Brandon.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MUSKIE. I ask unanimous consent that Lynn Boyd, of Senator HODGES's, staff, be granted the privileges of the floor during the consideration of the concurrent resolution.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MUSKIE. As is the usual request, Mr. President, I ask unanimous consent to use small electronic calculators on the floor during the consideration of this concurrent resolution.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, today the Senate begins consideration of the second concurrent resolution on the budget for fiscal year 1979.

This resolution will bind all further congressional spending and tax decisions for 1979. A point of order will lie against bills which exceed this budget.

This is an anti-inflationary budget.

Its totals are significantly lower than those in either the first resolution or the President's budget.

Compared to the first resolution, it cuts projected Federal spending for 1979 by $9.3 billion. It reduces the projected deficit by $8.6 billion, nearly 17 percent.

At the same time, it contains room for tax reductions of up to $23.4 billion in the coming fiscal year.

This second budget resolution takes account of the two major changes which have occurred in the economy since the first budget resolution.

These major changes are lower unemployment and higher inflation than were foreseen when the first budget resolution was formulated.

Unemployment, forecast last spring to remain over 6.2 percent until the end of this year, has fallen below that rate, reaching 5.9 percent in August.

Inflation, forecast last spring to average 6.1 percent during the coming year, has increased to an annual rate of 9.9 percent.

So employment has improved more rapidly than could be anticipated last spring. But inflation has worsened.

These changes call for modifications in the budget we adopted last spring. They call for a more restrictive budget, designed to help reduce inflation without increasing unemployment.

This second budget resolution meets those requirements.

We intend it as a signal to our citizens and to the private economy that the Federal Government will lead the way toward reducing inflation without sacrificing jobs.

This second budget resolution reduces Federal outlays in 1979 by $9.3 billion compared to the first resolution, and by $11.5 billion compared to the President's January budget.

The resolution also reduces budget authority for 1979 by $11.1 billion compared to the first resolution, and by $11.4 billion compared to the President's January budget.

The level of budget authority enacted this year helps to determine the level of future Federal spending. So this 2 percent cut in budget authority will translate into a very real reduction in the future cost of Government.

### REVENUES

This second budget resolution reaffirms the tax cut recommended in the first resolution.

This recommendation to cut taxes by $23.4 billion reflects the committee's determination to provide substantial relief to taxpayers, without raising the risk of higher inflation.

These tax cuts are also needed to sustain economic growth in the coming year. They will help offset the loss of purchasing power which would otherwise occur as inflation drives wages into higher tax brackets.

These tax cuts will also offset the negative effects of the new social security taxes scheduled to take effect January 1, 1979.

### DEFICIT

The spending reductions contained in the budget resolution will substantially reduce the 1979 deficit.

The deficit projected in this resolution is $8.6 billion lower than the deficit projected in the first resolution.

It is more than $18 billion lower than the deficit projected in the President's January budget.

Much of this deficit reflects lower revenues from an economy still operating below capacity. The deficit also includes the cost of programs enacted to provide jobs and income support to our citizens during the recession. If unemployment stood at 5 percent today, for example, this deficit would be less than $15 billion, as a result of increased tax collections on higher wages and profits.

But, not Congress, nor the President, nor the public can take any comfort from the fact that after 3 years of economic recovery, the Federal deficit remains over $40 billion.

And the risk of adding to the recent resurgence of inflation will be substantially increased by excessive spending as the economy approaches its capacity.

The present economic situation forces us to resist enactment and enlargement of programs which do not fit within this reasonable and carefully constructed budget.

Such spending will add directly to the deficit and to the risk of further inflation.

THE SECOND RESOLUTION, THE ECONOMY, AND JOBS

Mr. President, this budget is designed to preserve the present economic expansion under the very difficult circumstances we confront.

The revenue and spending levels recommended in this resolution are designed to promote moderate economic growth without increasing inflationary pressures.

The general tax reduction proposed in this budget resolution will offset the negative economic effects of higher payroll taxes and the increased income tax burdens caused by inflation.

These tax cuts will also stimulate much needed business investment.

The spending proposed in this budget resolution will not increase the present level of Federal stimulus to the economy. In fact, such stimulus would fall slightly from current levels, because that is the prudent course in the present mature stage of our economic recovery.

This budget will support economic growth at an annual rate of 3½ to 4 percent in 1979. This expansion will create about 800,000 new jobs during 1979. It will preserve our gains against unemployment, without generating inflation-causing excess demand.

This growth will support a further decline in unemployment to about 5¾ percent during 1979.

The creation of jobs for American workers during the present economic recovery has been remarkable. From the worst days of the recession in 1975 to July 1978, 9.9 million new jobs were created.

During this 3-year period, the overall unemployment rate fell by more than a third—from 8.9 to 5.9 percent.

This jobs expansion would not have occurred without the support of the anti-recessionary congressional fiscal policy we have pursued.

This improvement, however, has not been uniform across demographic groups. For example, the unemployment rate for men 25 years of age and older, a "prime" segment of the labor force, fell from 8.5 to 3.3 percent. But among minority teenagers, unemployment was 36.9 percent in the second quarter of 1978, essentially unchanged from 3 years ago.

This severe unemployment which burdens many of our citizens, especially minority youth, has not been reduced by the general economic recovery which has benefited most of our citizens. Surely, these disadvantaged jobseekers would be worse off without continued economic expansion. But economic growth, by itself, cannot solve their problem.

To reduce this intolerable rate of unemployment among large segments of our population, so-called structural employment programs, effectively targeted to serve those most in need, must be designed and adequately funded.

INFLATION

But even as we act—and act we must—to deal with structural unemployment, we must recognize that inflation is the overriding problem we face today. The recent acceleration of inflation to an annual rate of nearly 10 percent threatens the morale and standard of living of every American.

This new inflationary surge results primarily from higher food prices, higher import prices, higher interest rates, and higher wage settlements.

It does not appear to be the result of either excess demand for goods and services or shortages of labor and capital.

Fiscal restraint by Government at all levels is vital to limit spending which could result in excess demand and further inflation in the economy.

AN ANTI-INFLATION BUDGET

The Budget Committee urges the adoption of this pared-down budget as a public symbol of our intention to reduce inflation and to reduce deficit spending.

For, if the Federal Government, representing all the people, does not clearly signal restraint, who else will?

This budget is intended as a clear signal that inflation control requires cooperation from all sectors and participants in the economy.

This budget will signal our citizens and the private economy that Congress is prepared to reduce Government growth as part of the fight against inflation, both this year and in the years ahead.

BALANCING THE BUDGET

The policies recommended in this second budget resolution are designed to achieve a balanced budget and full employment within the next 5 years.

Although the economic outlook now is less favorable than it was in the spring, the committee still believes that spending restraint during the next 5-year period will permit budget balance to be reached by 1983, with no greater than 4½ percent unemployment at that time.

At the same time, noninflationary tax reductions can be enacted and the size of Federal spending as a percentage of the gross national product can be reduced.

With spending restraint, outlays will fall to slightly less than 20 percent of GNP by 1983.

Attempts to balance the budget at an earlier date will be paid for by American workers through higher unemployment.

But, if we are ever to balance the budget, spending on most new programs must be financed through savings or reduction of spending levels in current programs which have lower social value.

As the report accompanying the first budget resolution made clear, presently identifiable new spending programs could add another $416 billion to the Federal budget within the next 5 years.

And that may be just the tip of the iceberg.

Congress cannot balance the budget if it continues to enact new programs without appropriate reduction and elimination of those programs which are inefficient, obsolete, or of lower priority.

A balanced budget will be imperiled by congressional actions which exceed the narrow margin available for future year tax and spending decisions.

The exact mix of future tax reductions and spending increases cannot and need not be determined now. Congress can and should make such determinations as the events of future years unfold. The budget process provides Congress with an appropriate and flexible mechanism for making those determinations annually.

Under any foreseeable circumstances, however, Congress will face substantial pressure in this and future years to increase deficit-deepening expenditures which will threaten the balanced budget this second resolution is designed to reach.

Such increases will also kindle higher inflation in future years, as increased Federal spending competes for resources with a stronger private economy.

THE 5-YEAR BUDGET

Mr. President, the second budget resolution continues the multiyear budgeting approach the Budget Committee installed in its first budget resolution last spring.

This system is unparalleled in the Federal Government. It allows Congress to set the coming year's budget with a clear set of goals and a reasonable estimate of costs for an entire 5-year period.

Deciding the budget in a 5-year context helps us to control the budget in those future years.

Through the congressional budget process, Congress develops its own fiscal policy, shapes Federal efforts to address major national needs, and controls the budget.

But none of these goals can be achieved if budgeting is pursued 1 year at a time.

Viewed in a 1-year context, three-fourths of the budget is "uncontrollable," unless existing laws are repealed and existing commitments are terminated.

In a 1-year time frame, future directions and costs of new programs are nearly impossible to determine. A single year's budget may, in fact, include many new commitments which will expand unforeseeably in the future.

Our new 5-year budgeting system will help us to meet the shortcomings of single-year budgets.

THE BUDGET BY FUNCTION

Now, Mr. President, let me describe more fully some priorities set by this second budget resolution.

FUNCTION 050: NATIONAL DEFENSE

Mr. President, the priority this second budget resolution assigns to defense reflects our continuing concern that we maintain an effective deterrent against war and the means to defeat an enemy who would risk war.

The spending ceilings for defense recommended in this resolution are based on the same three congressional perceptions underlying the first resolution.

First, Congress supports a level of defense spending adequate to maintain and modernize our strategic forces.

Second, Congress endorses an increase in our tactical arms strength to improve our capacity to participate in the defense of Western Europe.

Third, Congress believes the Federal Government should assume leadership against inflation by restraining the size of Federal pay increases through a 5.5-percent pay cap and substantial absorption within existing agency budgets of the costs of any pay increases.

The second budget resolution does reflect reductions from the first resolution of $1.7 billion in budget authority and $3.2 billion in outlays due to technical reestimates of program requirements and savings identified in the appropriations process.

FUNCTION 150: INTERNATIONAL AFFAIRS

The first budget resolution targets for international affairs were sufficient to fund two congressional objectives. These two objectives are the provision of adequate long-term capital flows for economic development in order to sustain world economic growth, and economic and military assistance for some of our allies and other friends abroad.

Much of this assistance will be used to purchase American goods and services.

The second budget resolution ceilings reaffirm these objectives. In particular, they reaffirm the expected full appropriation to cover the United States' participation in the International Monetary Fund's proposed Witteveen Facility.

They also reflect an upward reestimate of outlays which results from the recently announced acceleration of previously enacted economic support assistance for Israel.

FUNCTION 250: GENERAL SCIENCE, SPACE, AND TECHNOLOGY

For general science, space, and technology, both the first and second budget resolutions support current levels of activity as reflected in the Senate-passed appropriation bills.

For future years, the committee assumes less than a full allowance for inflation, requiring increased efficiency in order to maintain current program levels. In the civilian space program, for example, real reductions will be required over the next 5 years in some programs, if a fifth Space Shuttle orbiter is required.

FUNCTION 270: ENERGY

The second budget resolution continues the priority the first resolution gave to energy.

The first budget resolution reflected a high priority for energy funding. Significant increases over fiscal year 1978 were assumed for energy supply, energy conservation, and the strategic petroleum reserve.

The committee recommends continuation of significant Federal efforts to stimulate the supply of energy through support for new technologies.

For energy conservation, the recommended ceilings would allow for appropriations that have passed the Senate as well as funding for further initiatives expected under the National Energy Act.

The level of Federal support for energy conservation is projected to trend downward over the next 5 years as national conservation goals are achieved over that time period.

For emergency energy preparedness, the committee's recommendations would continue full support over the next 5 years for a 750-million-barrel strategic petroleum reserve. Both budget authority and outlays for fiscal year 1979 are reduced from the first budget resolution as a result of delays in achieving the planned fill rate, although these delays are expected to be made up over the next 5 years.

Other activities in this function are sustained at current policy levels in fiscal year 1979 and over the next 5 years.

FUNCTION 300: NATURAL RESOURCES AND ENVIRONMENT

For Natural Resources and Environment, both the first and second budget resolutions reflect increases over previous years' spending based on the importance the Congress attaches to the preservation and utilization of the Nation's natural resources and the improvement of the environment.

For water resources, the committee recommendations will support ongoing planning and construction activities as well as new starts approved in the appropriations process.

For conservation and land management, current programs are assumed to continue and there is some room for additional initiatives in fiscal year 1979. But no significant increases are assumed in future years.

For recreational resources, the committee recommendations will permit some real growth in fiscal year 1979, including an allowance for new initiatives such as urban parks. Over the next 5 years any real increases would have to come from greater efficiencies or reductions in existing programs.

For pollution control and abatement, the committee recommendation continues support at approximately constant real levels for fiscal year 1979 and future years.

The committee recommendation can accommodate a new oilspill pollution liability fund.

FUNCTION 350: AGRICULTURE

The committee recommendations for the second budget resolution reflect continued strong Federal support for the agricultural sector, but recognize the improvement in agricultural economic conditions that has occurred since the first budget resolution.

For farm income stabilization, the resolution allows for the first CCC borrowing authority increase in many years.

It limits the allowance for new initiatives to agricultural trade legislation that is now pending.

For the next 5 years, the resolution assumes continuation of these agricultural policies, with an additional allowance for international emergency wheat reserve acquisition in fiscal year 1980.

For agricultural research and services, the resolution reflects a lower allowance for new initiatives than contained in the first budget resolution, reflecting Senate appropriations action.

FUNCTION 370: COMMERCE AND HOUSING CREDIT

For commerce and housing credit, both the first and second budget resolutions provide the financial support necessary to insure an adequate supply of mortgage credit.

Funding for GNMA's mortgage purchase activities is assumed at the level of the President's request.

The Federal payment to the Postal Service is continued in accordance with existing law, which anticipates that the Postal Service will make steady progress toward financial self-sufficiency.

For Small Business Administration programs, this budget is designed to accommodate the recommendation of the President and the Senate Select Committee on Small Business that in the future more emphasis should be placed on the use of loan guarantees.

This second budget resolution does reflect reductions from the first resolution as a result of projected increases in loan sales by the Farmers Home Administration, and the expected transfer of Federal Financing Bank surpluses to the Treasury.

FUNCTION 400: TRANSPORTATION

Both the first and second budget resolutions reflect continued high levels of assistance for transportation activities.

For highways, the second resolution increases funding to allow for accelerated interstate construction and to permit a significant expansion in assistance for highway bridge repair and replacement as recommended by the Senate Environment and Public Works Committee.

This budget supports the current program levels of the Federal Railroad Administration. It accommodates additional investment in ConRail equal to the minimum needs estimate of $1.3 billion, including $600 million in fiscal year 1979.

This budget contemplates funding significantly in excess of the President's request in most categories of Federal activity, including mass transit construction, bus purchases, and operating subsidies.

An allowance is included for establishment of a new "second tier" mass transit operating subsidy program.

Mass transit spending totals in the second resolution have been adjusted downward since it no longer appears that prior-year contract authority will be replaced with appropriated budget authority this year.

In air transportation, both resolutions assume an allowance to support initial

funding for a new program of airport and aircraft noise reduction. For water and other transportation, both resolutions continue assistance at current program levels.

FUNCTION 450: COMMUNITY AND REGIONAL DEVELOPMENT

For community and regional development programs, the first budget resolution accommodated funding for several new initiatives in addition to current programs.

This second resolution differs significantly.

Budget authority has been reduced to reflect the committee's judgment that changed conditions since the first resolution warrant the removal of funding in fiscal year 1979 for National Development Bank grants, State incentive grants, Round 3 of local public works, and a major "soft public works" initiative.

Outlays are higher, primarily because of upward reestimates caused by unexpectedly high lending and slow disbursements in fiscal 1978 for SBA disaster loans.

Other activities in this function remain at the levels assumed in the first resolution.

FUNCTION 500: EDUCATION, TRAINING, EMPLOYMENT, AND SOCIAL SERVICES

For education, training, employment, and social services programs, the first budget resolution accommodated the President's proposal for increased funding under title I of the Elementary and Secondary Education Act, increased Federal funding for handicapped education, and an allowance for middle income tuition assistance.

The first resolution also assumed continuation of 725,000 public service jobs, with increased targeting of such jobs in the structurally unemployed. It also assumed funding for the President's private sector jobs initiative. An expansion of social services and child welfare services programs was also assumed.

The second budget resolution continues the policies of the first resolution except as follows:

No provision is made for a middle income tuition assistance program.

A reduction is assumed in funding for public service jobs for the cyclically unemployed in view of the anticipated continued improvement in the employment outlook. This reduction would reduce by 60,000 the average number of public service jobs funded in fiscal year 1979.

Only half the funding requested by the President for a private sector jobs initiative is assumed, due to likely slippage in establishing that program.

FUNCTION 550: HEALTH

For health programs, the first budget resolution provided for medicaid program expansions proposed by the President, the cost of which would be more than offset by savings in medicare and medicaid as a result of the hospital industry's voluntary cost containment efforts, and by savings in medicaid from the administration's quality control program.

The first resolution also assumed increases over current law for discretionary health services programs, and reductions below current law in funding for health professions education assistance.

The second budget resolution differs from the first resolution primarily due to downward CBO reestimates of the cost of both the medicare and medicaid programs.

FUNCTION 600: INCOME SECURITY

In the income security function, the second budget resolution adjusts the first budget resolution in three ways:

First, it makes room for increased costs associated with the Senate-passed child nutrition bill.

Second, it assumes a higher level of funds for an expanded earned income credit, while making no provision for fiscal relief to States to offset public assistance costs.

And third, it provides for a lower level of budget authority for housing programs consistent with Senate appropriations action.

FUNCTION 700: VETERANS BENEFITS AND SERVICES

For veterans programs, the second resolution basically continues the policies assumed in the first resolution.

The second budget resolution does provide for increased costs for veterans' pension and compensation legislation as passed by the Senate. These increases are partially offset by downward CBO reestimates of the current low cost of these programs.

Legislative initiatives assumed in the first budget resolution pertaining to veterans' readjustment benefits are no longer assumed. Lower funding for the VA medical system reflects Senate appropriations action.

FUNCTION 750: ADMINISTRATION OF JUSTICE

In the area of law enforcement, the first and second budget resolutions generally support current levels of program activity by the Department of Justice and other agencies to control organized crime, public corruption, drug trafficking, and illegal immigration, and to prevent racial and ethnic discrimination.

This budget also assumes continued aid to State and local governments through LEAA at about present activity levels, with a small allowance for a number of limited new program initiatives.

FUNCTION 800: GENERAL GOVERNMENT

For general government, the first budget resolution supported current levels of program activity for the legislative and executive branches, with partial allowance for inflation in future years.

The second budget resolution recommendations are the same as those in the first resolution, with the single exception that outlays have been reduced to reflect a CBO reestimate of activity under GSA's Federal buildings fund.

FUNCTION 850: GENERAL PURPOSE FISCAL ASSISTANCE

For general purpose fiscal assistance, the first budget resolution assumed continued funding of general revenue sharing at current levels, and continued assistance to distressed localities under a supplementary fiscal assistance program at levels requested in the President's urban initiative.

The second budget resolution recommendations are the same as the first resolution with regard to general revenue sharing.

In light of significant improvements in the national unemployment rate, supplementary fiscal assistance in the second resolution has been reduced to about $0.5 billion, one-half the amount assumed in the first resolution.

FUNCTION 900: INTEREST

In function 900, interest, both budget authority and outlays have increased by $1.1 billion since the first budget resolution, largely to reflect increased interest rates on the public debt.

FUNCTION 920: ALLOWANCES

Function 920, allowances, continues the anti-inflationary assumptions of the first resolution regarding the upcoming comparability pay increase for Federal employees.

As with the first budget resolution, this resolution assumes that these raises will be limited to 5.5 percent, and that employing agencies will be required to absorb 20 percent of the costs of the pay raise through savings in other activities.

Function 920 in this second resolution also includes an estimation of savings expected to result from the across-the-board cuts which Congress has adopted in several appropriations bills. We would have attributed these savings to the priority functions to which they belong if anyone could now predict where these across-the-board cuts will actually occur, but no one can.

Let me emphasize that in reflecting these assumed savings in its recommended ceilings, the Budget Committee does not intend any endorsement of meat ax reductions of this type as a responsible way to control Federal spending. The committee believes that congressional spending should reflect congressional priorities, and that Congress should make the hard choices among programs to be cut. To buck that responsibility "upstream" to the President is to revert to the kind of Government by Presidential impoundment which led to the creation of the budget process in the first place. The committee will seek to allocate these reductions to the appropriate functions in the conference with the House, in order to preserve the congressional control of the budget, the budget process is intended to provide.

FUNCTION 950: UNDISTRIBUTED OFFSETTING RECEIPTS

For function 950, undistributed offsetting receipts, the recommended ceilings are the same as the first budget resolution targets and reflect no policy changes.

1978—A YEAR OF TESTING

Mr. President, this second budget resolution comes before the Senate in a climate of support for the budget process which has significantly improved since last spring.

Our first budget resolution for 1979 was debated just a month after the Budget Act had been purposefully trampled upon during consideration of the so-called emergency agriculture bill.

This second resolution comes to the floor just a month after the Senate overwhelmingly upheld the Budget Act

against an attempt to suspend it during the tuition tax credit debate.

Last spring, we warned the Senate that on the record of excess and impulsive spending in the energy tax bill and the agriculture bills that Congress faced a clear resurgence of the free spending mentality.

Last spring I warned that—

> This year's budget resolution presents a critical test case of the Senate's willingness to accept budget reform as more than political propaganda.

I am pleased and proud to be able to report that, so far this year, the Senate has passed that test.

The budget process, which seemed to be clearly on the ropes last spring, has received a strong infusion of Senate support this summer.

Major landmarks in budget control have been set. Let me mention just a few.

In July, the Senate voted 67 to 0—in connection with the Witteveen bill—to assure full appropriations process review of future U.S. commitments to international financial organizations, such as the International Monetary Fund.

The Senate also voted 60 to 21 to eliminate housing assistance funding that was $5 billion in excess of the congressional budget resolution and the President's budget request.

And, in August, the Senate voted to provide much greater flexibility for the appropriations process to control funding under the Elementary and Secondary Education Act.

Prominent and important Senate precedents to control back door spending have been set by rulings from the Chair and sustained by Senate votes.

After a very bad beginning, it has been a good year.

The Senate has not only lived within the budget we adopted last spring, but also, through a prudent pruning of new programs and appropriations, actually allowed us to reduce it substantially in this resolution.

The appropriations process is completing its work nearly on schedule, despite two major filibusters which brought the legislative process to a standstill for more than 2 months.

The Budget Committee has pioneered mission and multiyear budgeting to make the budget more comprehensible and more controllable.

The Budget and Appropriations Committees have worked more closely than ever to limit Federal expenditures and to eliminate back door spending.

And the Senate has supported our efforts.

Credit for this success belongs to every Senator who has voted to support us this year.

Particular credit belongs to Senator WARREN MAGNUSON, chairman of the Appropriations Committee, whose tightfisted approach to Federal spending this year has shaved hundreds of millions of dollars off Federal spending and the deficit.

The majority leader has continued his constant support for the budget process and fiscal responsibility in both his budget votes and his meticulous observance of Budget Act procedures.

The constant cooperation of the leadership staff, exemplified in the efforts of our good friend Tom Hart, have made our budget work and that of the Senate much easier to conduct.

And what more can I say—that I have not previously said—about my friend and partner in this budget process, Senator HENRY BELLMON. He has been accurately described as the Vandenberg of the budget process.

His determination to make the budget process work and his courageous votes for fiscal responsibility should be a matter of great pride to the people of his State. They are a credit to him and to the Senate.

We are encouraged by the progress toward budget control so far this year.

But the year is not over.

Further tests remain—on the mass transit bill for example—before a final appraisal can be made.

The temptation to backslide into irresponsibility is always present.

But I am much more hopeful now—than I thought I could be last spring—that the budget process is really taking hold in this Congress.

And that when we adjourn in October, we can say, "well done."

Mr. President, I yield the floor to my good friend from Oklahoma.

The ACTING PRESIDENT pro tempore. The Senator from Oklahoma.

Mr. BELLMON. Mr. President, I thank my friend from Maine for yielding the floor and also for his very kind comments.

I am sure the Senate is now aware, as the country should be, of the remarkable job Chairman MUSKIE and the able staff, both on the majority and minority sides, have done in making the budget process work as well as it has. It has been a real pleasure to be associated with him in this endeavor.

There is a lot of comment now in the country about the so-called taxpayers' revolt and the emphasis that seems to be emerging on tighter fiscal controls on the way we use the tax money entrusted to the Congress. Senator MUSKIE has been in the vanguard of this effort for several years. He has been well out in front of those who now see that this is the popular position so far as taxpayers are concerned.

I congratulate him for the leadership he has given throughout these difficult years in getting the budget process in place and making it work as well as it has.

Mr. President, last May this body adopted spending and revenue targets for fiscal year 1979 that reflected economic circumstances and national priorities as we judged them to be. In the subsequent 4 months, however, several changes have occurred that have demanded adjustments in the budget, as it affects both next year and those following. The budget resolution before us includes the adjustments necessary to address the changes in the economy. The net result of the budget resolution, when adopted by Congress, will set us clearly on the road toward balancing the budget. It is possible that with the adoption of this resolution Congress will be making the goal of balancing the budget attainable a full year earlier than previously expected.

The country is in a more difficult economic period than previously believed. Employment has risen dramatically—an incredible 3.7 million new jobs have been created during the past year; however, inflation also has turned decidedly upward. In the present environment of declining unemployment and volatile inflation, the economy is particularly sensitive to the fiscal policies of the Federal Government. Ill-conceived, irresponsible actions could send us into an inflationary spiral leading the country into another recession. However, conscientious, pragmatic policies will allow us to perpetuate the present expansion, already the longest sustained peacetime recovery of this century. Clearly, this is not the occasion to rock the economic boat.

In light of national attitudes expressed in California and elsewhere, an appropriate economic policy must give particular attention to unanticipated acceleration of inflation. Recognizing full well that there are no simple solutions to a problem of such complexity, there are, nevertheless, significant steps that the Federal Government can and should take. Foremost among these is a reduction of the budget deficit from the unprecedented levels of the past several years, a move that would ease the current pressures on monetary authorities to raise interest rates and reduce excessive public demand for goods and services. While the first budget resolution recognized this problem and was a step in the right direction since its deficit was significantly lower than the President proposed in January, the second budget resolution as reported recommends an even smaller deficit for fiscal year 1979, one that is $8.6 billion below the figure adopted by Congress last May and a full $18.3 billion lower than the President proposed in his January budget.

The level of Federal spending for fiscal year 1979 recommended by the second budget resolution is $9.3 billion below the first resolution mark and some $10.7 billion below the level in the President's original budget. As our chairman has said, that indicates real progress.

In the development of the fiscal year 1979 budget, efforts have been made to balance concerns for inflation with the desire to promote economic stability. The economic drag effects of tax increases from inflation and mandated social security changes have been anticipated. The resolution prescribes new tax cuts of $15.2 billion, plus another $8.2 billion to extend expiring tax cuts. This tax relief should be sufficient tc offset the effects of inflation on personal income taxes and the $3.3 billion increase in social security taxes.

Regarding the question of national priorities, it has become very clear in the past few months that a large portion of the American public is angered by the very size of the Federal Government—the amount of one's paycheck taken in taxes, the increasing encroachment of the public sector on the private domain, the apparent waste and inefficiency. As a result, the levels of Federal taxes and

spending have become issues in their own right, completely apart from that of fiscal policy.

The distribution of these spending reductions also reflects greater awareness of and concern for what the American public is buying with its tax dollars. These cuts fall into three broad categories:

First, the resolution recommends program reductions which correspond to the current state of congressional action. For example, EPA construction grants have been cut by $250 million in budget authority and $800 million in outlays. In addition, spending levels for various energy programs were decreased by $1.5 billion in budget authority and $900 million in outlays. While the EPA cuts are designed to eliminate some planned program activities, the energy-related reductions are intended merely to keep in the U.S. Treasury money which the agencies could not effectively spend out in fiscal year 1979.

Second, the resolution recommends reductions to be accompanied by shifting the emphasis of some current programs, a shifting that responds in great part to the changing economic environment. Most noteworthy in this regard are CETA and the antirecessional fiscal assistance program.

In response to the changing nature of our country's unemployment problem, which has increased the importance of focusing more attention on those Americans who simply do not possess marketable job skills, the budget resolution recommends reorienting available resources to emphasize structural rather than cyclical unemployment. The resolution anticipates a start should be made in fiscal year 1979 on phasing down the countercyclical part of the CETA public service employment program, a move that would save some $500 million next year alone. Another $500 million savings will be achieved through greater targeting of the antirecessional fiscal assistance program so as to provide aid only to those State and local governments with the most severe fiscal distress.

Finally, the resolution recommends the termination of several new initiatives proposed by President Carter which the Congress has not yet considered or approved at this late date. A total of $2.2 billion in budget authority and $300 million in outlays will be saved by eliminating funding for the soft public works program, national development bank grants, phase three of the local public works program and State incentive grants.

I should emphasize at this point that these reductions are consistent with the administration's stated desire to work with Congress to limit the growth of Federal spending. This desire was stated by OMB Director James McIntyre when he testified before the Senate Budget Committee on July 25th that:

> The Administration is ready and willing to work with the Budget Committees, the Appropriations Committees, and others in the Congress to limit the growth in Federal Spending . . . and that . . . a target of total outlays in the neighborhood of $491–$492 billion for a cut of about $5 billion would be an appropriation objective.

The administration has called on Congress to cut spending by $5 billion.

However, it has not provided Congress with a list of specific areas for reduction. We have done our job in cutting $9.3 billion from the outlay total contained in the first budget resolution. I am somewhat dismayed, however, that there have been reports of White House lobbying to have money added back to fund administration initiatives. To include money in this resolution for the President's "soft" public works program, for example, would be inconsistent with Mr. McIntyre's testimony. If we are to achieve budget reductions, we must deny funding for new program initiatives which have not yet received congressional approval and cannot be adequately justified at this time.

Mr. President, the budget presented in this resolution should be adequate to guide the Congress as it confronts the problems of today. There are, however, two additional steps that the Congress should take—and can take within the confines of this budget—to insure that today's problems do not become those of tomorrow.

Since one of the primary causes of our current economic troubles has been deficient business investment, which has led to inadequate capital formation and productivity, I believe the Congress should consider a multi-year approach to tax cuts similar to that suggested by the Roth-Kemp proposal.

Mr. President, experience on the Budget Committee has indicated to me that budget discipline cannot be instilled a year at a time. Rather, we must view the budget each year as a single component in a multi-year spending and revenue plan. The Budget Committee in its report has offered 5-year budget numbers, and even though they are not binding, it is important that we place single year numbers in this longer-run perspective. The Roth-Kemp notion of a multi-year tax cut is in keeping with this concept of multi-year budgeting, and, as a result, would have several advantages.

Such a cut—announced now but phased in over a number of years—would have a more favorable effect on the economy than a series of cuts announced 1 year at a time. It would bolster consumer and producer confidence by insuring that aftertax income will be proportionally greater in the next several years than under current policy. It would boost lagging investment and reduce the risks of making long-term consumer commitments. In short, it would lend greater certainty to an economy now suffering from the lack of that very thing.

The second step Congress should take is to exercise disciplined spending restraint next year and in future years. We must carefully examine new spending proposals and determine how necessary they are likely to be, in light of the short and long run costs and effects. Indeed, only by resisting the temptation to enact additional costly programs can we finally reestablish the historic norms for the size and scope of the Federal Government and bring the budget into conformity with the wishes of the American people.

Again, I believe this resolution points us in the right direction. If we accept it and continue to exercise prudent judgment in the next few years, we can finally accomplish by 1982 the balanced budget that the country needs and desires.

Mr. President, again, I wish to pay tribute to the distinguished chairman of the Budget Committee. He has consistently worked to bring us to the point that we can now have a balanced budget in view. Without his leadership and without the budget process I am convinced that that objective would have been absolutely unattainable, and I hope to see the day before too long when we can bring to the Senate a budget resolution that is in balance with our income and I know that without the leadership of Senator MUSKIE and an able staff that will be impossiole.

So I am very proud to support this resolution because I believe it aims us in the right direction and if we continue on this course we will very quickly have the Nation's fiscal affairs in good order.

Mr. MUSKIE. Mr. President, I thank my good friend from Oklahoma for his statement and for his compliments.

I wish to add my compliments to the staff, both the majority and minority staff, and what we call the core staff of the Budget Committee. I think that they have supplied us with increasingly improving information and analysis which has simplified our work and improved our understanding of the options available to us as we seek to bring this enormous budget under control and in balance.

The whole Senate, if it were possible to conduct seminars extensive enough and long enough, would I am sure agree with Senator BELLMON and myself on the quality of the staff work and the enlightenment that that work can provide with respect to the operations of this Federal establishment, the momentum that drives it and the difficulty of bringing it under control.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BUMPERS). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, I yield to the majority leader such time as he may desire.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from Maine (Mr. MUSKIE).

Mr. President, in its consideration of the second concurrent resolution on the budget for fiscal year 1979, Congress must do its part to help the Nation avoid the horns of the inflation-recession dilemma. Excessive spending or too large a tax cut would overheat the economy and further unleash inflationary pressures. Too restrictive a fiscal policy—that is, too little economic stimulus or too precipitous a decline in the deficit—at the very time that the economic recovery

has begun to slow may tip our economy back into recession.

The current economic forecast by the Congressional Budget Office reflects the consensus view that economic growth will continue to slow. Specifically, CBO projects that constant dollar gross national product (GNP) will increase by 3.5 percent to 4.5 percent during 1978 and by 2.7 percent to 4.2 percent during 1979. By comparison, real GNP increased by 4.9 percent in calendar year 1977.

The projected slowdown is largely accounted for by expectations of reduced spending on residential construction because of the tightening of credit markets; slower growth in consumer spending as the result of the rise in the level of personal debt; and reduced spending on plant and equipment by business. According to a recent forecast, real business fixed investment will grow at only about 4.5 percent in 1978, compared to 9.2 percent in 1977.

In such an economic situation, a large tax cut would seem to be the proper fiscal course—the argument being that such a cut would provide Americans with additional incentive to work and thereby increase productive capacity. The national income would rise and all would seemingly benefit.

This might be the case if slow growth were the only large economic problem we were facing. It is not. At the same time that growth has begun to slow, we are plagued by a high rate of inflation which appears most resistant to current policy.

The facts are these: American prices—the CPI—accelerated at a 10.4 percent annual rate over the first half of the current calendar year. In July, the rate of increase slowed to a 6.0 percent annual rate.

The forecast is for only slight moderation in the rise of prices during calendar year 1979. Unless there is increased private sector support for moderating inflation, we are likely to be caught in a situation similar to the one we are currently experiencing: Wages will be playing catch-up with prices and both will contribute to a continuation of high inflation.

In such a situation as this—with slowing growth and high inflation—a large tax cut would not be as salutary as its proponents believe it would be. One study suggests, for example, that under a much larger tax cut—known as Roth-Kemp—the deficit would soar to $100 billion by 1983. At the same time, the rate of inflation could be as much as 2 percentage points higher with such a cut by 1982.

These are among the reasons why I feel that in fiscal year 1979 there is a need for a moderate tax cut, such as has been assumed by the second concurrent budget resolution recommended by the Budget Committee. It would be sufficient to offset on an aggregate basis the bulk of the 1979 calendar year increases in tax burdens on individual incomes and social security taxes. The second resolution, like the first, assumes a $19.4 billion general reduction made effective January 1, 1979. The CBO estimates that it would reduce fiscal year 1979 revenues by some $14.0 billion.

Most important, it would allow for improved economic performance both in real growth and employment without unleashing inflationary pressures. In addition, unlike the large, multiyear tax cut known as Roth-Kemp, it would leave Congress with the flexibility it needs to set fiscal policy in later years in light of the economic situation.

At this point, let me emphasize that a moderate tax cut should not be read as a sign that we can slacken our efforts to further reduce unemployment, the overall rate of which was recorded at 5.9 percent in August. The clear need is to lower the level of joblessness, especially among youths and minority groups in our society—without exacerbating inflationary pressures. This can best be accomplished by specific job creation measures which are targeted to the groups experiencing high levels of joblessness. Such measures expand economic capacity without encouraging inflationary wage increases for regular workers.

Mr. President, I believe that the budgetary course set in the second resolution is the right one for our economy at this time. I have focused my remarks on the size of the tax reduction—on which the second resolution appears right on target. I might also have emphasized that the resolution recommended by the Budget Committee is on target in its call for the Senate to maintain its commitment to spending restraint. The outlays or spending total of $489.5 billion represents a 2-percent cut under the spending level in the first resolution. It represents a $11.5 billion reduction in the outlays level in the President's January budget.

The reduction in Federal spending together with a moderate tax cut will allow for a significant reduction in the level of the deficit—something that we all want to see. It should contribute to a moderation in inflationary expectations on the part of business and labor communities and, it is hoped, increased support by them for moderation in wage and price increases.

Again, I suggest that the spending and taxing recommendations of the committee are right on target, reflecting the sentiment of the Senate and the mood of the Nation. The American people want to see lower inflation and continued economic growth. The second resolution as reported by the Budget Committee will move us toward the realization of those goals.

Mr. President, the chairman of the Budget Committee, Mr. MUSKIE, and the ranking minority member, Mr. BELLMON, are to be commended for their contribution to formulating our Nation's budgetary policy. Their task is a most difficult one, but one which it is perilous to neglect. Their exemplary contribution is matched by their colleagues on the committee. They are all deserving of our commendation.

Mr. President, I yield the floor.

Mr. MUSKIE. Mr. President, I thank the majority leader for his thoughtful statement both with respect to the condition of the economy, as he views it, and the relevance of the budget resolution before us to those circumstances.

His statement is a further indication of his commitment and dedication to the budget process and the attempt to make Congress a full partner in the establishment and development of fiscal policy, and especially as it relates to the other instruments for Government influence on economic conditions.

In his presence I wish to express my gratitude to him for the support of myself, Senator BELLMON, the budget process, and the often frustrating, from the point of the leadership, procedures which could starve and delay action on the floor, but which, with the cooperation of his excellent Policy Committee staff headed by Tom Hart, I think has worked very smoothly to minimize delay without denigrating the procedures. I want to say "thank you," to him for that at this point.

Mr. ROBERT C. BYRD. I thank the able chairman of the Budget Committee.

Mr. MUSKIE. Mr. President, I ask unanimous consent that Rhona Weaver of Senator BUMPERS' staff have the privilege of the floor during the consideration of this resolution, as well as Karen Mandan of Senator CRANSTON'S staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, I would be remiss if I did not at this point express my appreciation to and extend my compliments to the Congressional Budget Office, headed by Alice Rivlin. The Congressional Budget Office has steadily improved in its capacity to serve the needs of the Budget Committees of the House and the Senate, as well as the Senate as a whole.

I am most grateful for the expertise, insights, information, and analyses which they have produced for us, and I would like to say "thank you" to them at this point for that service.

Mr. BELLMON. Mr. President, will the Senator yield?

Mr. MUSKIE. Yes, I yield.

Mr. BELLMON. Mr. President, I would simply like to join the chairman of the Budget Committee in paying tribute to the Congressional Budget Office. They have been an invaluable resource. We simply could not have made the budget process work as well as it has without their help and, as the chairman has said, they have become more and more proficient as the years have gone by, and they are now an absolutely invaluable resource for the Congress, and I am sure as time passes they will become even more so.

Mr. MUSKIE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, I yield my colleague from Maine (Mr. HATHAWAY) such time as he may require.

Mr. HATHAWAY. I thank my distinguished colleague for yielding.

Mr. President, I just wanted to ask a few questions and make a comment in regard to the second budget resolution.

First, I am concerned about the size of the recommended tax reduction and the revenue estimates which underlie it. It is my understanding that the second budget resolution assumes, first, a reduction of $8.2 billion to accommodate extension through fiscal year 1979 of temporary income tax reductions; second, additional general income tax reductions to become effective on January 1, 1979, which would reduce revenue collections by $14 billion during the fiscal year; and, third, structural tax law changes which, together, would reduce fiscal year 1979 revenues by $1.2 billion.

Furthermore, the resolution provides that the $14.0 billion of general income tax reductions representing $19.4 billion of reductions on a full-year basis become effective on January 1, 1979, 3 months after the beginning of the fiscal year. The first resolution assumed a $19.4 billion annual reduction made effective January 1, 1979, which would reduce fiscal year 1979 revenues by $15.0 billion. I understand that the $1.0 billion smaller fiscal year 1979 revenue loss for the second resolution general reductions represents a CBO reestimate of the extent to which a full-year tax reduction is reflected in the tax collections for the first 9 months of the annual period.

The report on the second resolution states that:

The Committee assumed an expansion of $0.5 billion in refundable earned income credits payable to recipients in excess of their tax liabilities. The Committee believes that contemporaneous expansion of nonrefundable earned income credits which reduce recipients' income tax liabilities is to be accommodated as part of the tax reductions allowed for in the Second Budget Resolution.

Now, all of these tax changes are anticipated to result in total revenue collections of about $447 billion in fiscal year 1979, rising to $726 billion in fiscal year 1983.

There has been a great deal of speculation concerning revenue estimates after tax changes are made. I understand that generally, only the first tier affects, that is, without so-called "feedback" are taken into account in the initial revenue loss projections. Is this correct?

Mr. MUSKIE. My colleague has raised an important issue, Mr. President, with respect to the techniques employed in estimating the impact of tax legislation on Federal revenue collections. Some of the questions relate particularly to possible proposed changes in capital gains taxation.

I believe some clarification is necessary as to the methods currently used to calculate the revenue effects of tax legislation.

For all tax bills estimators calculate the extent to which revenue collections will change if the legislation had no other effects on the economy or on taxpayer behavior. Apparently, there is some belief that this type of so-called static estimate is the only type of estimate used in conjunction with tax legislation. That is the point which the Senator's question raises.

In fact, two different types of secondary effects or feedback effects are taken into account by estimators:

First, estimates of aggregate budget receipts made for budget resolutions take into account additional receipts resulting from the impact of the overall level of tax reductions assumed in those resolutions. These additional receipts are the feedback from the increased economic activity which results from providing taxpayers in the aggregate with increased after-tax income to spend. Estimates for specific, particular tax law changes do not include feedback effects for these general changes in overall economic activity. To include them would be to count their effects twice.

On the other hand, and now I sound like my good friend Senator HOLLINGS' typical economist, secondary or feedback effects that reflect specific behavioral changes have been taken into account by revenue estimators in recent years when there is some degree of consensus on the part of the experts as to what the behavioral effects of such changes are likely to be.

However, it often is extremely difficult for experts to agree on the likely secondary behavioral effects of the same tax law changes. In some cases, however, these assumptions are made. For example, when new tax expenditures are developed, assumptions are made as to the likely level of their usage, as, for example, the use of recently proposed tax credits for home heating insulation. So, occasionally, behavioral effects and secondary effects are taken into account, but even then only if a consensus among expert estimators is developed.

Mr. HATHAWAY. If the Senator will yield further, one specific area in which this debate has occurred is in the proposal to "rollback" capital gains taxes to the pre-1969 level.

In this context several econometric studies have been made of the possible effects of the change.

Chase Econometrics projected a net Treasury gain of $16.6 billion by 1985. Data Resources, Inc. projected a revenue gain of $33 billion for the period 1979–83. The Merrill Lynch study does not project a revenue effect. A slightly different version developed by Norman Ture projects a $1 billion Federal revenue gain in 1987.

Clearly the analysis is all over the ball park.

Mr. President, I ask unanimous consent that a summary of the results of these models on capital gains and a comparison of economic models be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY OF STUDIES ON CAPITAL GAINS TAX REDUCTION EFFECTS

A number of recent studies have been prepared in response to proposals to reduce the highest rate of tax applicable to capital gains. These studies generally have focused on the possible impact of such a change on the stock market, and have utilized a feedback, rather than a static, analysis, *i.e.*, they assume that certain responses will occur as a result of a change, and that these responses, in turn, will trigger additional reactions.

A simulation prepared by Chase Econometric Associates, Inc., projected that the provisions (to be effective January 1, 1980) would have the following effect (in constant dollars, and over currently estimated levels): (1) increase new jobs by 440,000 by 1985, (2) increase plant and equipment expenditures by 1 percent annually for the period 1980–1985; (3) increase the average annual GNP growth role by 0.2 percent for the period 1980–1985; (4) increase nonresidential construction by 2.5 percent annually for the period 1980–1985; and (5) increase Federal tax receipts by $0.7 billion in 1980, and by $15.6 billion in 1985. These projections were based on the assumption that the enactment of S. 3065's provisions would increase stock market prices by 40 percent by 1982, relative to the price level which otherwise might be anticipated. This assumed price rise was projected to increase stock market transactions, and thereby more than offset any anticipated Federal revenue loss attributable to a reduction in the capital gains tax rate through increased tax receipts generated by the greater volume of capital gains transactions.

(The Chase simulation projected that a reduction in the capital gains tax rate would stimulate economic activity through the following combination of assumptions: (1) a reduction in capital gains taxes raises stock prices; (2) increased stock prices lead to a greater rate of growth in capital spending; (3) increased stock prices lead to more equity financing, which reduces corporate debt/equity ratios, thereby decreasing interest rates; (4) increased investment creates higher employment, income, and output levels, and reduces inflationary pressures by increasing productivity and raising the maximum potential GNP; and (5) increased economic activity raises Federal revenues, reduces the budget deficit, and leads to lower inflation and interest rates.)

The Treasury Department has criticized the Chase simulation as being based on unrealistic economic assumptions. Treasury argues that neither the study's postulated 40-percent increase in stock prices by 1982, nor its assumed increase in taxpayer propensity to realize gains, can be supported. Moreover, it notes that the Chase study proceeded upon the incorrect assumption that the 1969 Act's increase in capital gains tax rates was effective for 1969, rather than beginning in 1970 (and becoming fully effective in 1972).

A study made by Data Resources, Inc. (DRI), based on assumptions supplied by the Securities Industry Association (SIA),[8] projected that the provisions (to be effective January 1, 1980) would have the following effect (in 1978 dollars, over baseline forecasts) for the period 1979–1983: (1) increase employment by more than 1.6 million manhours; (2) increase GNP by $98 billion; (3) increase personal consumption by $56 billion; (4) increase investment by $46 billion; (5) decrease Federal tax revenues by $0.8 billion in 1979 (assuming a 10-percent postponement of capital gains expected to be realized in 1979), and generate a Federal tax revenue increase of approximately $33 billion for the period; and (6) increase the rate of inflation of about 0.2 percentage points. The DRI study assumes that a change in the tax treatment of capital gains will increase the propensity to realize such gains by 10 percent, and that monetary policy accommodates the changes. (Under such an assumption, the money supply must expand to keep interest rates constant. If monetary policy does not accommodate the change, DRI's projections would shift downward.) It also assumes a 10-percent rise in the Standard and Poor's Index of stock prices, and a 5-percent decrease in corporate dividend-payout ratios.

The Treasury Department has criticized the DRI study as being based on unrealistic economic assumptions. It argues that neither the study's postulated 10-percent increase in the Standard and Poor's Index, nor its as-

sumed 10-percent increase in taxpayer propensity to realize capital gains can be supported. Moreover, Treasury notes apparent inconsistencies between the conclusions reached by the DRI model and those projected by the Chase simulation. In addition, it argues that there is no conclusive support for the proposition that reduced capital gains tax rates will cause overall tax revenues to rise.

While the Treasury criticisms have been repeated, it also has been noted that the projections of the DRI study are heavily dependent on monetary policy. For example, under an accommodating monetary policy assumption, the DRI model projected a net Federal tax revenue increase of approximately $33 billion for the period 1979–1983, but under a non-accommodating monetary policy assumption, the model projected a net Federal tax revenue increase of approximately $10.5 billion for the same period. Thus, it is argued that the model is highly dependent upon factors entirely outside the tax system.

A model used by Merrill Lynch Economics, Inc. projected that the enactment of provisions (to be effective in the third quarter of 1978) would have the following effect through 1980: (1) increase employment by 205,000; (2) increase the average growth of real GNP from 3.3 percent to 3.5 percent; (3) increase business investment for the period by $3.2 billion; and (4) decrease the Federal budget deficit by $2.3 billion in 1980. According to the study, these projections were based on assumptions made about factors which are either nonquantifiable or, at best, difficult to assess." The Merrill Lynch study assumes a stock price use of 4 to 6 percent in response to the capital gains tax change.

A model developed by Norman Ture, Inc. for the National Association of Manufacturers Tax Impact Project (TIP) projected that the enactment of provisions in early 1978 (to be effective January 1, 1980) would have the following effect (in constant 1977 dollars, and over present law), (1) increase full-time equivalent employment (over currently estimated levels) by 90,000 in 1978, and by 150,000 in 1987; (2) increase wages by $80 per year in 1978, and by $150 per year in 1987; (3) increase gross capital outlays by $8 billion in 1978, and by $13 billion in 1978; (4) increase consumption by $4 billion in 1978, and by $14 billion in 1987; and (5) decrease Federal tax revenues by $2 billion in 1980 (the first year for which the provisions would be effective), and by $3 billion in 1987. However, assuming an economic feedback, the TIP model projects a 1978 net Federal tax revenue gain of $3 billion, and a net 1987 Federal tax revenue gain of $1 billion.

The Ture study differs from the other three studies in several respects. It assumes no increase in stock prices in response to the capital gains tax cut on the grounds that sales of assets in response to reduced capital gains tax rates will tend to drive down stock prices while greater attractiveness of stocks to investors will tend to raise stock prices, leaving the net effect indeterminate. Rather, the beneficial economic effect of the capital gains tax cut in the Ture study is assumed to come from an increase in saving, which leads to more investment by businesses, greater productivity and higher wages.

The Treasury Department, on the other hand, estimates that adopting the changes proposed would reduce annual tax revenues by $2.2 billion at 1979 levels of income. This total would consist of the sum of $0.5 billion from removing the $50,000 ceiling on the application of the 25-percent alternative tax rate for long-term capital gains; $1.3 billion attributable to the elimination of long-term capital gains as a preference item subject to the minimum tax, and as an offset against the amount of personal service income eligible for the application of the maximum tax; $0.4 billion allocable to the reduction of the corporate capital gains tax rate from 30 percent to 25 percent and removing corporate capital gains as a preference item subject to the minimum tax.

---

## A Comparison of Econometric Models

(By L. Douglas Lee)

### Introduction

In the process of decisionmaking, a policymaker sometimes will pose the following question: "If we adopt this particular policy, how will it affect the economy?" Analysts will often use an econometric model to answer this question. By changing the policy assumptions which are fed into the model, an analyst can explore the probable outcome of various policy options.

There are three large macroeconomic models of the U.S. economy which are commercially marketed and widely used by analysts in government and private industry. These models were developed by Chase Econometric Associates, Inc. (Chase), Data Resources, Inc. (DRI), and Wharton Econometric Forecasting Associates, Inc. (Wharton).

Each of these models is an attempt to describe the U.S. economy using a group of mathematical equations and statistical relationships. Not surprisingly, since there is disagreement among economists on the economic theory which underlies the models and disagreement among statisticians and econometricians on the best equations to capture the statistical relationships, the three models are quite different.

The following paper is divided into two sections. The first is a description of the model structures. It is an effort to translate the mathematical equations into words. It also points out the economic theory underlying the equations. The second part of the paper discusses some of the theoretical issues surrounding this particular approach to economic analysis. In recent years this approach has come under attack by some economists who argue that it is not justified on fundamental theoretical grounds.

### The Econometric Models

Since the commercially available models undergo constant revision and updating, careful attention must be paid to the specific version being used. The version of the DRI model discussed in this paper is designated 77y. It was reestimated and revised in 1977 and is described in the collection of papers, "The Data Resources Model, 1977 Edition" (mimeo) edited by Otto Eckstein. The Chase model discussed is the version in effect in December 1977. Most of the equations in the Chase model were estimated in 1976 or 1977. The discussion which follows is based on a listing of those equations. The Wharton Mark IV quarterly econometric model was constructed in 1974. While various sections have been updated and changed, the model has not undergone a complete revision since that time. The equations in the version used in this paper were estimated in 1974–77, and the discussion comes from a listing of these equations.

A few general comments are in order before plunging into the model structures. First, one should note that these general equilibrium models have grown increasingly large and complex in recent years. For example, the models designed in the 1940's and early 1950's by Lawrence Klein contained 12 equations. By contrast, today's DRI model contains some 800 equations. Similarly, the Wharton model uses 669 equations while the Chase model contains about 455 equations.

Second, these models are best used in combination with the judgment of an economist. Whether the model is used for forecasting or for policy analysis its results are always subject to modification by the analyst if they appear "unreasonable." [1] This means that different analysts may derive different results from the same model if they alter the model's output to conform to their own judgment. Several evaluations of the accuracy of these judgmental forecasts have been published.[2]

Third, the models described in this paper are all quarterly models which are typically used for analyzing 8–12 quater time period. Other models using annual data or focusing on long-term analysis are not considered. This distinction is not especially important for Chase and DRI because their long-term projections are produced by merely extending the quarterly model. For Wharton, however, the annual model is different both in structure and in the level of aggregation.

#### *Fiscal policy*

The fiscal policy variables in the DRI model correspond closely to the broad divisions used in the National Income and Product Accounts. Exogenous variables are government purchases (divided into military and nonmilitary), grants-in-aid to State and local governments, foreign transfers, wage accruals less disbursements,[3] and subsidies. Endogenous spending variables are transfers to persons and net interest. All receipt categories are determined endogenously and are broken into the following broad categories: Personal tax and non-tax payments, corporate tax accruals, indirect business taxes, and social insurance contributions.

A unique feature in the fiscal policy section of the DRI model is the option of specifying government purchases in either current dollar or constant dollar terms. When the analysis covers a longer time period, it is sometimes easier to estimate purchases in real terms.

The spending side of fiscal policy is much more disaggregated in the Chase model than in the DRI model. Although purchases are nominally endogenous (that is, determined within the model), the aggregate level is the summation of several exogenous components (that is, determined by some unspecified source outside the model): Purchases of durables, nondurables, services, structures, and Commodity Credit Corporation payments for surplus crops. Subsidies, wages, and grants-in-aid are also exogenous. Transfer payments are a summation of many individual components—veterans benefits, retirement and health benefits, foreign transfers, medical payments, aid to families with dependent children, business transfers, unemployment insurance—with all components, except unemployment insurance being exogenous. Interest payments are endogenous .While the Chase model provides a high degree of disaggregation of the spending components, the fundamental structure is quite similar to that of DRI.

The level of most receipt categories is determined endogenously in the Chase model. It contains these components: Personal tax

---

[1] The only nonjudgmental model of which this author is aware is the model developed by Ray Fair. For a more complete discussion of it see Ray C. Fair, *A Short-Run Forecasting Model of the United States Economy* (Lexington: D.C. Heath & Co., 1971).

[2] See, for example, the following series of articles by Stephen K. McNees: "How Accurate Are Economic Forecasts," *New England Economic Review* (Boston: Federal Reserve Bank of Boston, November/December 1974); "An Evaluation of Economic Forecasts," *New England Economic Review* (Boston: Federal Reserve Bank of Boston, November/December 1975); "The Forecasting Performance in the Early 1970's," *New England Economic Review* (Boston: Federal Reserve Bank of Boston, July/August 1976); "An Evaluation of Economic Forecasts: Extension and Update," *New England Economic Review* (Boston: Federal Reserve Bank of Boston, September/October 1976).

[3] This is a time-balancing item assumed to be zero throughout each forecast period.

payments, corporate tax accruals, individual contributions for social insurance and employer contributions for social insurance. Federal indirect business taxes are exogenous.

Government spending in the Wharton model is handled in much the same manner as in the DRI model with roughly the same level of disaggregation. There are exogenous variables for defense and non-defense purchases, subsidies, wage accruals less disbursements, transfers other than unemployment compensation, and grants-in-aid. Unemployment compensation and net interest are determined by behavioral relations.

The tax side of the Wharton model contains a theoretically nice and unique feature. Personal income is divided into seven tax brackets with a separate equation used to generate the proportion of income taxed in each bracket. These proportions are then used, in addition to an income variable, in the Federal personal tax equation.

Although the Wharton model offers the possibility of changing personal income taxes in various tax categories, this option is very complicated to use. As a practical matter, policy analysts frequently do not have the detailed information necessary to fully use this feature of the model. Corporate, indirect business, and social insurance receipts are reach generated by a behavioral relationship.

*Monetary policy*

The monetary sector of the DRI model is an attempt to describe the many components of each financial market in terms of supplies and demands. There are equations to describe the behavior of households, businesses, financial institutions, State and local governments, and the Federal Government. The household and nonfinancial corporate sectors share a common structure with the demands for financial assets and liabilities and the stock of assets being modeled in sufficient detail to construct a complete balance sheet. From a policy perspective the major instruments are nonborrowed reserves, the Federal funds rate, deposite rate ceilings and legal reserve requirements. Money supply is determined endogenously. Interest rates are determined in each of the individual markets through a flow of funds approach. Inflation expectations are explicitly modeled and play a role in the determination of long-term rates.

Like the DRI model, the Chase model uses a flow-of-funds approach to the financial sector. It is, however, much more highly aggregated, using 20 behavioral equations as compared to 110 for DRI. The principal policy instrument is nonborrowed reserves less currency. While both models use a lag structure with past price levels to model expected inflation, these lag structures are quite different in both weight structure and the length of the lags.

The financial sector of the Wharton model most closely resembles the traditional Keynesian model. The major interest rate comes from a liquidity preference schedule, and currency demand depends on the level of transactions. Again the model is highly aggregated, containing 24 behavioral equations. Price expectations enter the utility and corporate bond rates through a distributed lag structure although short-term interest rates are the primary explanatory variables in the long-term rates. The Wharton model also contains another variable which some consider desirable—a proxy for wealth. Once again nonborrowed reserves are the primary policy instrument.

Interest rates are, of course, the major elements linking the IS and LM structures in the models. The DRI model contains the closest ties between the financial and real sectors since it tries to model the business and the household balance sheets, and the mortgage market. In the Wharton model the interest rate links are through the influence of user cost of capital on investment, and through the housing sector. The most important linking variable in the Chase model is an index of credit rationing which is a weighted average of the real money stock, real deposits in thrift institutions, and a loan to deposit ratio. It works largely through the housing sector but also affects other components of aggregate demand, notably the durable portions of consumption. The only direct effects of interest rates in the Chase model are in the equipment and nonresidential structures equations which depend partially upon the Aa bond yield.

Anyone familiar with the extreme or very unusual financial conditions which have often characterized the 1970's might question how these conditions have influenced the econometric models. More specifically, would a shifting money demand equation invalidate the results of this analysis? The answer is surely no. Model builders typically reestimate and, if necessary, respecify the equations frequently enough to capture and model any demand shifts. Second, as pointed out elsewhere, the analysis is valid only to the extent that the model accurately describes the economy. Only if the change in fiscal policy being simulated were so radical that it caused money demand to shift, would the analysis be affected. In this event, the interpretation of the econometric results would be heavily weighted by the analyst's judgment.

*Foreign sector*

The foreign sector in the three models ranges from very small to practically nonexistent. The underlying problem in this area is the asymmetry between information available relating to exports and that available for imports. Export prices are largely determined domestically while import prices are determined abroad. Conversely, import demand functions can use a variety of domestic variables while there are few variables available for use in an export demand function.

The DRI model has the most disaggregated foreign sector of the three models examined here, although it is still small. The sector as a whole impacts the domestic economy through the balance on goods and services which relates by definition to the underlying end-use categories. Real merchandise exports are divided into six end-use categories while imports are divided into seven categories. Fuel imports are exogenous. There is a single equation for service exports and another for service imports. Import prices are determined primarily by a composite index of the wholesale prices of our major trading partners; export prices are related to domestic wholesale prices.

The Chase foreign sector consists of two equations—one to estimate exports of nonagricultural goods excluding petroleum and one to estimate imports of nonagricultural goods excluding petroleum. Other variables relating to the foreign sector, including import prices, are exogenous. The implicit price deflator for exports is related to domestic prices and the import deflator.

The foreign sector in the Wharton model is similar to DRI's. Endogenous imports are divided into four categories of goods and three categories of services. Most equations include a final demand variable, a terms of trade variable spread over a lengthy period by a polynomial distributed lag, and a dock strike dummy. The export sector is divided into three groups of goods and three groups of services. Generally they are related to a world trade index, a relative price term, and a strike dummy. Fuel imports are exogenous. Again export prices are related to domestic variables while import prices are exogenous.

*Supply*

Turning to the supply side of the models, equations for production in 75 industries form the heart of the DRI system. Production is the key determinate of investment and employment. The model begins by using an input-output matrix to produce a generated output series. Standard regression techniques are employed in comparing actual and generated output to model the implicit coefficient changes. Additional information is used to alter the coefficients if the 1967-based information is judged atypical or if structural changes have substantially altered interindustry relationships.

Industry employment is derived from a straightforward production function of the form

$$Q = \alpha L^{\beta} e^{(time)}$$

where Q is output, L is labor input growing at the rate $\beta$, and $e^{(time)}$ represents a time trend. This formulation produces a desired level of employment which corresponds to the production levels calculated earlier. Equations translating desired employment to actual employment capture any recognition delay. Military employment is exogenous and spending is the proxy for production in the civilian government employment equations. Total employment is not derived by summing the various industry employment levels. Instead, it comes from the relationship between the unemployment rate and the civilian labor force. The unemployment rate is derived using an Okun's law relationship and the labor force depends on population and participation rates. Unlike the other models which derive total man-hours from a production function then convert them into employment, in the DRI model man-hours are an uncalculated residual.

Investment is estimated using a neoclassical capital stock adjustment equation. It generally takes the form

$$I = F(K^* - K_{t-1})$$

where $K^*$, the target capital stock, comes from a Cobb-Douglas production function. In other words, investment is determined by the difference between the desired capital stock and the observed capital stock in the previous time period. To a large extent, aggregate investment is determined prior to production while industry-specific investment is determined directly by the rate of production and other factors. Aggregate production influences aggregate investment through capacity utilization rates and, less directly, through its impact on prices, profits, and the general level of economic activity. Financial variables, shortfalls in expected sales, and capacity utilization play less important roles.

The Chase model focuses on the macroeconomic approach to production. While there is no input-output matrix automatically solving for industry level production, Chase does have a 200 equation input-output model which can be linked to the macro model to produce a joint forecast. The macro model does contain a few equations to independently estimate certain components of special interest (i.e., manufacturing, metals, autos, construction, etc.).

Employment in the Chase model is derived from the usual Cobb-Douglas production function of the form

$$Q = \alpha L^{\beta} K^{\gamma} e^{(time)}$$

The only difference between this production function and the one specified in the earlier description of the DRI model is the addition of a capital stock variable, K, growing at the rate $\gamma$.

Unlike the DRI model where productivity is estimated by a time trend, Chase has done some special analysis of the historical data and constructed a series which shows cyclical as well as secular movements. For forecasting purposes productivity is entered exogenously. Unemployment is a residual, calculated as the difference between labor force

and the level of employment estimated for six sectors.

Normally one might expect production variables to be influential in the investment equations—certainly they play a major role in the DRI model. Chase argues that since investment is used as an independent variable in the production equations, a high degree of spurious correlation prevents the use of production variables in the investment equations. Instead, the independent variables represent rental cost of capital, an index of credit rationing, new orders, and consumption. As a result of this specification, changes in corporate taxes have a very large impact on investment.

Aggregate supply in the Wharton model is the sum of output originating in 12 industries. The 12 equations are designed to respond to demand changes, although there is substantial variation among them. For example, current consumption of food and beverages is the dominant factor in determining output originating in agriculture, forestry, and fisheries, but output originating in manufacturing durables is determined by consumption, fixed investment, government purchases, inventory stock, exports and imports, the unemployment rate, and an auto strike dummy.

Employment estimates have often been a problem in the Wharton model. Basically each industry's production function is solved twice—once for man-hours and once for employment. The conversion from man-hours to employment seems to cause problems, and as a result these equations are frequently changed. Note that the Wharton model uses only real variables in the determination of employment demands—wages and prices are not considered. Unemployment—the difference between the civilian labor force and employment—is a residual.

The investment equations in the Wharton model are an outgrowth of the same neoclassical theory which underlies the DRI model. The common explanatory variables used in these equations are level of output, the ratio of final product price to user cost, and capital stock. Business fixed investment is generated separately for each of nine sectors. Tax rates and depreciation enter through the user cost of capital variable. Separate equations divide the totals into various subgroups such as equipment and structures.

*Income determination*

To this point, the discussion has focused on the fiscal and monetary aspects of the models and the IS–LM structure. Approaching these models through their method of income determination provides a different perspective and highlights some of their differences. One must remember that in these simultaneous models the income and product sides fully interact.

The income side of the national income accounts is divided as follows:

Gross National Product

Less: Capital consumption allowance.

Equals: Net national product.

Less: Indirect business taxes; Business transfer payment; Statistical discrepancy.

Equals: National income.

Less: Corporate profits and inventory valuation adjustment; Contributions for social insurance.

Plus: Government transfer payments to persons; Interest; Dividends; Business transfer payments.

Equals: Personal income.

Less: Personal taxes.

Equals: Disposable personal income.

The DRI model follows this table quite closely. GNP is an identity and personal income is derived as a residual. The large piece that comes from a behavioral equation is profits. Profits are modeled as a function of capacity utilization, final sales, the wholesale price index, and the ratio of compensation to output. The capital consumption allowance derivation follows the methodology used by the Bureau of Economic Analysis which depends upon the price deflator and the average life of business investment. The inventory valuation adjustment depends upon constant dollar inventories and the price level changes. Interest payments by consumers and the Government are simply a function of interest rates and the amount of debt. For corporations they are a function of interest rates and corporate credit outstanding. Dividends are largely a function of past dividends and after-tax profits. The important government-related variables are explained elsewhere.

Despite the fact that personal income is determined as a residual, some of its components are modeled explicitly. For example, wages and salaries are determined fundamentally by an equation for average hourly earnings. It depends heavily on the change in prices to adjust for inflation and contains the inverse of the unemployment rate as a measure of labor market tightness.

Tracing through the same table for the Chase model, one finds that the capital consumption allowance, rather than using the BEA methodology, is modeled as a function of several dummy variables and the implicit price deflator. The specification of the corporate profits equation is also quite different in detail but not necessarily different in theory. Chase models profits primarily as a function of investment, consumption expenditures, net exports, prices, change in unit labor costs, interest rates, and government purchases. The inventory valuation adjustment equation contains no real variables—only prices. Interest payments by consumers depend primarily upon changes in the 4–6 month commercial paper rate; government interest payments depend upon the Treasury bill rate and the government deficit. Dividends are a function of profits, capital consumption allowances and taxes. Personal income is an identity built of its various components. The wage equations depend heavily upon previous changes in the CPI and changes in the money supply, with the unemployment rate having little impact. Cyclical fluctuations are captured by including an industrial production index.

Turning to the Wharton model, one finds a sharp difference in wage determination. Here wage rates are determined by labor market tightness, lagged changes in the CPI and social insurance contributions. While this resembles the DRI specification, it is actually much closer to a pure Phillips curve relationship. Other components of the above table are determined along the lines dicussed for the other models with this major exception: The capital consumption allowance is entered exogenously and corporate profits are a residual.

*Prices*

The final broad component of the models which cannot be ignored is price determination. Experience in recent years has stimulated new work aimed at improving the very poor performance observed in the 1973–75 period.

The DRI model includes 15 behavioral equations for wholesale prices with the farm products index entered exogenously. There are equations for the deflators in 19 categories of final demand and 3 components of the CPI. In general, unit labor costs are the driving force behind price increases. Wage and material costs enter with a lag structure designed to represent the stage of processing. Other variables include vendor performance, capacity utilization, and special factors.

The price sector in the Chase models is more disaggregated, but it follows the same basic approach. The components of the WPI are determined as functions of unit labor costs, capacity utilization, and other special factors. The components of the WPI along with demand factors and unit labor costs determine components of the CPI. Components of both the WPI and CPI are used to determine sector deflators. As mentioned earlier, both import prices and farm product prices are exogenous.

The price sector of the Wharton model begins with sector prices needed to deflate the output originating in the various industries. These are basically markup equations over unit labor costs. The mining deflator (which includes energy costs) is exogeneous. Final demand prices are determined by 18 behavioral equations with the dependent variable expressed as the ratio of the price deflator to a weighted average of all sector prices. These weights are determined separately from an input-output matrix. Wholesale prices are built up by stage of processing

THEORETICAL ISSUES

Having examined the structure of the models, let us turn to some of the more controversial issues surrounding this method of analysis. The first concerns the theoretical basis for using large-scale macroeconometric models and some of the criticism raised by "rational expectations" theorists, particularly Robert E. Lucas. The second concerns the limitations inherent in this approach to economic analysis.

The three econometric models described in this paper were constructed primarily for economic forecasting purposes. However, since government policy variables are exogenous inputs to the models, using the model to analyze the impact of alternative policies is a natural extension.[1] This use of models has been criticized by Robert E. Lucas and others.[2]

Lucas' criticisms can be summarized in his own words:

I shall argue that the features which lead to success in short-term forecasting are unrelated to quantitative policy evaluation, that the major econometric models are [well] designed to perform the former task only, and the simulations using these models can, in principle, provide no useful information as to the actual consequences of alternative economic policies. These contentions will be based not on deviations between estimated and "true" structure prior to a policy change but on the deviations between the prior "true" structure and the "true" structure prevailing afterwards.[3]

To put it in more operational terms, Lucas is arguing that as policy changes, the parameters of the model equations will also change. Since econometric policy analysis, according to Lucas, assumes that these parameters are fixed, the simulation is bound to yield inaccurate, results.

Lucas' criticisms have been challenged on several grounds. First, Robert Gordon has argued, while—

The mechanical extrapolation of a model with fixed parameters cannot provide useful information on the effects of *all* policy changes, on the other hand the effects of *some* policy changes can be determined if parameter shifts are allowed and are either (*a*) estimated from the response of parameters to policy changes within the sample period or (*b*) are deduced from a priori theoretical consideration. * * * Thus, the practical importance of Lucas' critique varies for each specific case.[4]

Gordon is arguing that while Lucas' criticisms may be correct, the degree of such parameter shifts is sufficiently small that the analysis remains valid. It is quite possible that Lucas is theoretically correct yet the approch to policy analysis remains useful from an empirical perspective. The degree of parameter shift is important in determining its practical significance.

A second criticism of the Lucas-type model is that it assumes perfect wage and price

Footnotes at end of article.

flexibility and symmetrical behavior. As Gordon points out, in the real world "a firm has a single option in a boom, to attract more labor input by raising its wage offer, and two options in a recession, either to reduce the wage offer or to discharge employees." [5] If firms choose to lay off employees rather than lower wages, wages and therefore prices will be sticky downward. This situation is further aggravated by prices which are fixed by law (e.g., interest rate ceilings, regulated prices, minimum wages) and by timing inflexibilities introduced by contractual arrangements. In addition, the assumption that adjustments take place instantaneously is undoubtedly an exxageration since time is required for the labor force to move from one market to another. The validity of this criticism is currently being debated within the economics profession. There are some who argue that Lucas' flexibility and timing assumptions are unnecessary and that relaxing these assumptions does not alter the conclusions.

In addition to the specific criticisms Gordon makes, the basic assumption of rational expectations can be questioned. In general terms, rational behavior means incorporating all available information into the formation of expectations about the future and acting upon those expectations. It is quite possible that this assumption may not be a good guide to individuals' actual behavior. Voluntary overwithholding of personal income taxes in 1972 is an example of behavior that seems to be nonrational. If individuals do not behave rationally they may still behave predictably and past actions may provide a good guide for making such predictions.[6]

I would raise two additional points. First, the "black box" approach to policy analysis is an inappropriate description of how these econometric models are (or at least should be) used. Lucas has argued that the reasons econometric models are successful in forecasting is that their managers adjust them for systematic bias in the residuals, frequently reestimate them, and ignore extreme values. In other words the combination of an econometric projection and an economist's good judgment and additional knowledge can produce a good forecast. This same combination is necessary to produce a good policy analysis. Further, Lucas' argument that models produce good forecasts but bad policy analysis is inconsistent with the fact that the models are typically used to generate several forecasts based on alternative policy assumptions.

For the most general types of policy change and for examining the resultant aggregate multipliers, the econometric models should work fairly well. However, for example, to analyze the impact of a temporary personal income tax cut, it would be necessary to examine the income concepts used in the consumption equations to see whether they accurately reflect current knowledge about the impact of such changes. Similarly, to analyze the impact of a government expenditure program designed to create jobs by directly hiring people, one could not simply increase the exogenous level of government expenditures. Among other things, one would need to examine the micro literature to answer questions such as how much of the expenditure will be offset by reductions in spending by other levels of government?; how much is a net addition to total government expenditure?; how much will be absorbed in administrative costs and how much will show up in wages of new workers?; will the program cause workers to move out of the private sector and into the public sector?; how rapidly can the funds be spent?; etc.

To properly use an econometric model, the analyst must be willing to apply outside information to those areas where the structure of the model is inadequate for the particular purpose. As Eckstein has argued, the most difficult and time-consuming part of policy analysis is the preparation necessary to properly plan an econometric simulation.[7] He argues that "The model exercise turns out to be a harsh discipline for the policy analyst." [8] For this reason the combination of econometric simulations and the good judgment of a policy analyst can consistently produce better analysis than would be otherwise possible.

The second point is that econometric simulations are frequently used by policymakers to influence their decisions. This factor alone makes policy simulations important regardless of whether their results are in fact "true." If I look out in the morning and decide that it is going to rain, I will wear a raincoat and carry an umbrella. Whether it actually rains is unimportant—my belief has influenced my behavior. Similarly, when econometric policy analysis predicts that a certain consequence will result from a policy change, that prediction will influence the decision to change policy. Certainly econometric analysis is not the only factor influencing policy decisions, but judging from congressional use of econometric models, it has become increasingly important in recent years.[9]

It should also be noted that even if the rational expectations theorists are correct in their criticisms of the large scale macroeconomic models, the theory will only allow one to reject the conclusion that a policy change results in a change in the growth path of the economy. The theory cannot reject the conclusions that policy changes produced no significant change in economic growth.

Having accepted the proposition that econometric model simulations are a useful tool for policy analysis, one must always keep in mind the limitations of such analysis. The most important limitation has already been implied: in order for the simulation to accurately describe the impact of alternative policies, the models must accurately describe the economy. The availability of numerous models with different characteristics indicates a lack of agreement on the best description of the economy. Therefore, to be completely correct, one must realize that simulation results show how alternative policies would affect the model and, only to the extent that the model describes the economy, how they would affect the economy.

Another limitation on all analysis of this type deserves mention. When a dynamic economic system gives rise to oscillations, they will normally be damped. In attempting to explain why this is not always observed, Frisch showed that erratic shocks, or in this case the random errors associated with the model's equations, can become an independent source of cycles.[10] Nevertheless, one can observe that econometric models based on historical averages tend to produce cycles which are weaker than those actually experienced. This suggests that random errors are not a major source of cyclical fluctuation despite the theoretical possibility raised by Frisch's analysis.

Mr. HATHAWAY. My question to the chairman is this: What provision is made for the feedback effect of capital gains in the second resolution?

Mr. MUSKIE. May I say to my colleague that the second resolution contains no specific assumption with respect to capital gains legislation. The resolution does assume $1.2 billion of reductions as an allowance for structural tax changes which could encompass capital gains reductions. However, this allowance of $1.2 billion does not assume any specific level of capital gains changes, nor does it assume any specific behavioral responses of capital gains tax reductions. At this time there is certainly no consensus as to the behavioral feedback effects of recently discussed capital gains tax law changes. I understand the Congressional Budget Office is preparing a study of the revenue effects of such changes, and that the report will be completed by the end of next week prior to Senate consideration of the forthcoming tax bill. Only after I have studied the CBO analysis, and after specific capital gains changes have been reported by the Finance Committee, will I be prepared to give the Senator my view as to the budgetary effects of these capital gains reductions.

In contrast to the still unclear behavioral effects of capital gains changes, the second budget resolution does include additional receipts resulting from the impact of the overall level of reductions

assumed in the resolution. These additional receipts from the increased general economic activity resulting from the tax reductions would be derived from either capital gains reductions or general rate reductions that would reduce tax collections directly in fiscal year 1979. Thus, the macroeconomic effects of possible capital gains reductions, as contrasted to the behavioral effects, already are taken into account in the second resolution.

Mr. HATHAWAY. If the Senator will yield further, I am extremely concerned that if we begin making second and third round assumptions about fiscal impact of tax changes then we might as well scrap the budget process.

If we say, "Well, whatever you assume, is the effect, is fine," then I believe we have lost control.

The present revenue estimating is imperfect and imprecise but it is at least consistent. We should not project results on assumed behavior change over time unless there is strong evidence of the results on a gross basis.

In his testimony before the Senate Finance Committee, 2 weeks ago, Secretary Blumenthal discussed feedback effects and revenue estimated. He stated:

Treasury policy to include multiplier effects when overall positions of fiscal policy are being established, as described earlier, is consistent with excluding multiplier effects when alternative programs are being considered that do not markedly alter the desired fiscal posture. The assumption is made that each separate tax proposal being considered is designed to be incorporated into a comprehensive package of proposals, with net tax reductions consistent with the overall fiscal policy. In this framework, it is clearly incorrect to include offsetting multiplier effects in revenue estimates for individual tax proposals. This is because the budget receipt estimates already include the feedback effect of the aggregate change in taxes. To again include feedback effects, as each component of an overall tax package is being considered, would be to double count induced revenue changes and misguide policymakers as to the size of the budget deficit or surplus.

I ask unanimous consent that his full remarks be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

APPENDIX: FEEDBACK EFFECTS AND REVENUE ESTIMATION

The term "revenue feedback effect" refers to the fact that the actual change in revenues resulting from a tax revision will depend upon economic responses to that revision. There is general agreement that such feedback effects can be important. To understand more clearly the implications of feedback effects for revenue and receipts estimation, it is useful to separate economic responses into three types.

First, there are short-run responses to changes in spendable income that results from tax increases or reductions. A tax cut, for example, will raise the amounts of after-tax income available to households and to business firms. If there is sufficient additional capacity, higher after-tax incomes will lead to increased consumption and investment which in turn will generate higher incomes and higher revenues. A number of standard macro-economic forecasting models are usually employed to estimate the magnitude of these short-run income effects.

A second type of feedback effect deals with long-run factor-supply responses to tax changes. Taxes alter the after-tax returns for work effort and for saving and thus will influence the supply of labor and capital offered to the market. The size of the capital stock and labor force will in the long run determine economic capacity and, therefore, the income base potentially available for future revenues.

The third type of feedback effect is the behavioral response to price increases or decreases brought about by tax changes. As tax changes alter relative prices, households and business firms tend to shift patterns of consumption and investment away from those activities that have increases in price or cost toward those that have decreases. That is, taxpayers will move into activities which have been granted a tax benefit and away from activities which have lost such a benefit. The result influences the allocation or composition of economic activity and also the volume of Federal revenues.

Therefore, to estimate all potential revenue feedbacks requires determination of (1) the increase or reduction in spending due to changes in income, (2) the changes in economic capacity due to changes in the supply of labor and capital, and (3) the substitution of lower cost for higher cost activities. In general, estimating procedures currently used by the Treasury do incorporate such feedback effects. Budget receipts for each fiscal year include the impact of tax changes on aggregate demand. Longer-run receipt projections allow for the likelihood of tax-induced changes in the capacity of the economy. Furthermore, whenever it is reasonable to do so, the allocation effects of price changes resulting from tax revisions are incorporated into revenue estimates. Each of the three types of feedbacks is discussed in more detail below.

MACRO-ECONOMIC RESPONSES

According to the macro-economic models, tax law changes which reduce government revenues will, over time, increase demand, resulting in higher GNP, personal incomes and corporate profits and higher tax receipts. Consequently, estimates which do not take into account these short-run multiplier effects tend to overstate revenue losses resulting from proposals which reduce tax rates or narrow the tax base and overstate revenue increases resulting from proposals to raise taxes. Treasury estimates are alleged to suffer from this defect.

However, this criticism is based on a misunderstanding of the longstanding Treasury practice to provide two types of revenue estimates for proposed changes in tax law. The first type of estimate is made for the complete program of tax changes in the President's budget. Feedback effects on incomes and tax receipts resulting from short-run multiplier effects are always incorporated in these figures to show the actual impact of the President's program on the economy.

For example, Treasury estimates of total tax receipts during the 1963–1968 period incorporated such feedback effects. The stimulative effects of the Kennedy tax cut along with anticipated growth in the population, the labor force, prices and productivity were more than enough to fully offset the reduced revenues resulting directly from lower income tax rates. While total receipts were projected to rise over this period, it is generally agreed that the 1964 tax cut by itself, could not have induced an economic response sufficient to restore the initial revenue loss. The figures in Table 1 demonstrate that Treasury anticipated the feedback revenues. The estimating errors taken from the annual budget documents for that period ran about 4½ percent, far too close to the mark for estimates which did not accurately include short-run feedback effects.

In the context of the current tax debate, Table 2 illustrates the impact on receipts of short-run multiplier effects resulting from the President's proposed $20 billion tax reduction program. The Midsession Review of the 1979 Budget shows estimated unified budget receipts of $448.2 billion in 1979 and $507.3 billion in 1980. These figures include proposed tax reductions of $14.1 billion and $21.8 billion, respectively. However, in the absence of these proposed tax reductions, revenues are estimated to be $459.3 billion in 1979 and $521.1 billion in 1980. Thus, the net cost to the Treasury of the President's proposed program is $11.1 billion in 1979 and $13.8 billion in 1980. These net tax program figures include $3 billion and $8 billion of offsetting revenues attributed to short-run multiplier effects. These feedback revenues are included in the receipt totals but are not separately identified in the published Midsession Budget Review.

The estimation of multiplier effects requires making a number of critical assumptions, including actions the Federal Reserve may take to adjust the money supply and interest rates. These assumptions can influence the multiplier effects on the economy and the resulting revenue feedback. However, there are no plausible assumptions under which induced feedback effects from tax cuts will lead to an increase in tax receipts over what they otherwise would have been. In fact, none of the macro-economic models of the United States economy predict revenue feedback sufficient to offset the initial revenue loss.

The second kind of estimate made by Treasury involves the revenue change from specific proposals without feedback effects (except to the extent Treasury is able to estimate price effects as described below). This kind of estimate is also appropriate for the kind of policy questions which may arise. For example, great attention is focused on the distribution of tax changes among taxpayers at different income levels. For distributional analysis policymakers should look at the direct impact on taxpayers engaged in a particular activity, such as paying private school tuition, or on those receiving a particular source of income, such as capital gains.

In contrast to the tax side of the Budget, there is general agreement that feedback effects are not appropriate for the expenditure side of the budget. Congressional decisions concerning the expenditure side of the budget are also properly made on the basis of gross expenditures. We should not estimate, for example, that a dam, highway, harbor, or even aircraft carrier costs only 60 percent of its initial outlay on the argument that the Federal government recoups the rest in the form of higher revenues. A dollar of outlay costs a dollar in resources used up and a dollar of tax reduction releases a dollar for use in the private sector. The macro-economic feedback effects of both of these changes are important, but it is also important, to evaluate the initial impacts correctly.

Treasury policy to include multiplier effects when overall positions of fiscal policy are being established, as described earlier, is consistent with excluding multiplier effects when alternative programs are being considered that do not markedly alter the desired fiscal posture. The assumption is made that each separate tax proposal being considered is designed to be incorporated into a comprehensive package of proposals, with net tax reductions consistent with the overall fiscal policy. In this framework, it is clearly incorrect to include offsetting multiplier effects in the revenue estimates for individual tax proposals. This is because the budget receipt estimates already include the feedback effect of the aggregate change in taxes. To again include feedback effects, as each component of an overall tax package is being considered, would be to double the count induced revenue changes and misguide policy-

makers as to the size of the budget deficit or surplus.

CAPACITY RESPONSES

Much attention has recently been focused on the potential for increasing economic capacity by reducing rates of tax. Since income taxes necessarily reduce the reward from additional work effort or from adding to savings or investment, reductions in rates of income taxes—especially reductions of the highest marginal rates—would increase significantly the aggregate amount of work effort and capital supplied in the economy. This increased work effort and larger capital stock would provide increased capacity to produce income that is subject to tax, offsetting at least some of the initial revenue lost by tax reduction.

The fundamental logic of this argument is sound, but there are a number of practical considerations that recommend against regularly reporting separate estimates of these aggregate capacity, or "supply side", effects of tax changes. There are presently no economic models that fully incorporate supply effects and that have also developed a track record over a period of years. In fact neither the magnitude nor the timing of such effects is well known and there is consequently wide professional disagreement about their importance. For example, some advocates of the Roth-Kemp tax reductions claim that induced supply responses would be so large that general rate reductions would bring about higher revenues than would occur without them. Some of these advocates argue that the responses would be so rapid that revenue increases from induced supply would occur in the first year. Other analysts, including those who have developed the well-known econometric forecasting models, predict that in the first few years following a tax change, there will be no significant increases in economic capacity resulting from higher wages or increased returns to saving.

In the case of induced labor supply even the direction of change is at issue. Historically, there has been a tendency, as incomes have increased, for the average worker to work shorter hours and to retire at an earlier age. When taxes on labor income are reduced, the positive response to higher after-tax earnings will be offset, perhaps completely, by this tendency to take some of the increased potential earnings in the form of increased leisure.

The greatest weight of professional opinion is that increased capacity in response to reduced tax rates will take effect much more slowly than the demand effects induced by higher incomes. Any tendency for labor supply to respond to increases in after-tax wages will be translated into increased economic capacity only over a period of years. In part, this is because it takes time for households to adjust—to seek out a second job, to arrange for child care, to take more schooling, and the like. More important, however, is that it takes time for businesses to make the additional investment necessary to accommodate the increased labor supply.

Nevertheless, these long-run supply effects are very important since they will help to determine the underlying growth and composition of employment and output in the future. Significant supply side factors are not ignored in derving the long range receipts projections that are included in the budget. These projections show the path of Federal receipts through time that are consistent with attainable increases in capacity and aggregate demand.

The Treasury has been devoting substantial resources to understanding and estimating supply effects. We also closely monitor new research in this area. Analysis of the longer-run implications of tax policy will build upon new research findings as they become available.

*Price Effects*

Tax policy changes have consequences for economic behavior other than their aggregate demand effects and supply side responses. A further important effect of tax policy changes is that they alter the relative prices or costs of particular types of consumption and investment goods. As a consequence, households and firms respond by changing their consumption and investment patterns. Not all tax changes have significant price effects. Changes in exemptions, the standard deduction, and even across-the-board cuts in tax rates do not bring about significant changes in relative prices. However, when such relative price effects do occur and when there is broad agreement as to both the magnitude and the direction of these impacts, revenue estimates incorporate the behavioral responses to the relative price changes. There are numerous examples of such behavioral responses. They include:

TABLE 1.—COMPARISON OF ESTIMATED AND ACTUAL UNIFIED BUDGET RECEIPTS, FISCAL YEARS 1963-68

[In billions of dollars]

| | Fiscal year— | | | | | |
|---|---|---|---|---|---|---|
| | 1963 | 1964 | 1965 | 1966 | 1967 | 1968 |
| 1963 budget (January 1962) | 113.5 | | | | | |
| 1964 budget (January 1963) | 105.4 | 109.3 | | | | |
| 1965 budget (January 1964) | [1] 106.6 | 111.3 | 115.9 | | | |
| 1966 budget (January 1965) | | [1] 112.7 | 114.6 | 119.8 | | |
| 1967 budget (January 1966) | | | [1] 116.8 | 124.7 | 141.4 | |
| 1968 budget (January 1967) | | | | [1] 130.9 | 150.3 | 158.6 |
| Actual receipts | 106.6 | 112.7 | 116.8 | 130.9 | 149.6 | 153.7 |
| Estimating errors: | | | | | | |
| Estimate made 18 mo prior to yearend minus actual receipts | +7.0 | −3.4 | −0.9 | −11.0 | −8.1 | +4.9 |
| Error as percent of actual receipts | +6.5 | −3.0 | −0.8 | −8.4 | −5.4 | +3.2 |

TABLE 2.—PROPOSED TAX REDUCTIONS INCLUDED IN THE ADMINISTRATION'S MIDSESSION BUDGET REVIEW

[In billions of dollars]

| | Fiscal year— | |
|---|---|---|
| | 1979 | 1980 |
| Unified budget receipts published in the Midsession Review | 448.2 | 507.3 |
| Receipt effects of the President's tax reduction and reform proposals: | | |
| Gross change in receipts | −14.1 | −21.8 |
| Offsetting induced receipts | 3.0 | 8.0 |
| Net change in receipts | −11.1 | −13.8 |
| Unified budget receipts in absence of the President's tax reduction and reform proposals | 459.3 | 521.1 |

Source: Office of the Secretary of the Treasury, Office of Tax Analysis.

The taxable bond option, where it is assumed that some fraction of municipal debt will be issued on a taxable basis as a result of the lower interest costs of issuing subsidized taxable debt compared to the prevailing rate on tax-exempts.

The automobile efficiency tax, where consumers are assumed to modify their pattern of automobile purchases in response to the increased prices of gas-inefficient vehicles.

Residential and business thermal efficiency and solar tax credits, where the reduction in prices of the subsidized activities are assumed to induce households and firms to install more insulation and to use lower cost sources of energy;

Any new program such as subsidies for exports (DISC) or for new retirement programs (IRA), where the revenue estimates depend upon the extent to which the new provision will be used;

Integration of corporate and personal taxes, where an increase in corporate dividends would be expected to accompany the reduction in the combined level of personal and corporate taxes on these dividends.

In all of these cases, there may be disagreement over the magnitude of the behavioral responses. Nevertheless, a good faith effort is made to incorporate behavioral responses into the revenue estimates where the behavioral responses will obviously occur and they are believed to be substantial. But we do not try to estimate feedback effects where the predominant responses are unpredictable or where there is no objective basis for making a judgment.

Two specific cases of tax induced price changes are currently of particular interest. They are the cuts of capital gains taxes and the reduction of top marginal tax rates. It has been alleged in both cases that the price effects of the tax change will induce a flood of new revenues to the Treasury, outweighing the initial revenue loss. In the case of capital gains cuts, the claim is made that the increased realizations will be so large as to yield an increase in tax receipts on capital gains. In the case of a reduction in the top marginal tax rates, the switch of investment from sheltered to unsheltered activities along with a vast increase in work effort are the alleged sources of the higher tax receipts.

Claims have been made that solid empirical analysis underlies both behavioral responses. But these claims are greatly overstated. The empirical work to date concerning the response of gains realizations to changes in capital gains tax rates has not distinguished between short-run transitional effects and long-term effects. Further, if the results are interpreted as estimates of permanent long-run effects, they imply such enormous reductions in the average holding periods of assets as to be totally at variance with the observed historical stability of these holding periods. Also, the estimates assume that every investor has an unlimited amount of unrealized accrued gains just waiting to be realized at lower tax rates, an assumption surely contrary to the facts. Moreover, it may be very difficult to separate statistically the effect of the marginal tax rates from the effect of high itemized deductions for medical expenses or casualty losses. Higher realizations of capital gains may be due to high itemized deductions rather than to low marginal rates themselves.

Attempts to adduce the likely responses of high income taxpayers to reductions in their marginal tax rates by examining historical data for the years before and after the 1964 tax cut also are seriously deficient. While it

may be true that at substantially lower marginal tax rates individuals would find tax shelters of much diminished economic advantage and would therefore tend to invest more in fully taxed assets, the likelihood and magnitude of such a response cannot be determined by merely looking at the income taxes paid by those in the upper income classes before and after the tax cuts of 1964. The upper income group did, in fact, pay more in taxes after their marginal rates were cut, but all income classes experienced tax cuts and all realized significant increases in incomes along with the general expansion of the economy in 1964–66. The share of before-tax income reported by the highest income classes was remarkably stable over the entire period from 1952 through 1972. In addition, it should be pointed out that most of the increased taxable income in these income groups was from higher realized capital gains. But the 1964 Revenue Act did not change the 25 percent alternative tax on capital gains. Thus while it may be desirable to reduce marginal tax rates to provide additional incentives to work and to save, there is little evidence for claiming large revenue gains to the Federal Treasury as a result of tax-induced price effects.

CONCLUSION

First, estimates of aggregate budget receipts do include the additional receipts resulting from the impact of tax changes on aggregate demand. However, estimates for particular tax changes, just like estimates for particular expenditure changes, do not include feedback effects. To do so when they are already in the aggregate estimates would be double counting.

Second, projections of long-run budgetary figures also accommodate the impacts of tax changes on economic capacity. As research sheds more light on the nature of these effects, it may be possible to incorporate them more formally into longer-run projections.

Third, Treasury does incorporate estimates of changes in specific types of investment or consumption induced by relative price changes whenever it appears the effects are important and it is possible to make reasonable estimates.

Mr. HATHAWAY. Mr. President, I am troubled by the idea that there is such a concept as a "free lunch." Of course, we know otherwise.

I hope that the Budget Committee and its excellent staff will review the Revenue Act of 1978 when reported by the Finance Committee in light of the mandate in section 311(b) of the Budget Act, and assure the Senate that the bill is in compliance with the second resolution or, if necessary, to challenge the assumptions and the revenue effects.

I say that as a member of the Finance Committee.

Mr. MUSKIE. I appreciate the Senator's concern and interest. He is, of course, correct, that under section 311 of the Budget Act, the Budget Committee has the responsibility to estimate the revenue effects of tax legislation to determine whether the legislation is consistent with the revenue floor in the concurrent budget resolution binding upon Congress. Thus, the views of the committee on the revenue effects of capital gains legislation and other provisions in the forthcoming tax bill could prove particularly important if, under some but not all, assumptions, the bill would be consistent with the second budget resolution revenue floor for fiscal year 1979.

I suspect that because of the interest in the issue the Senator has raised, and I know it has been discussed by the chairman of the Committee on Finance and others, we may well have that question raised at the time the Finance Committee bill comes before the Senate, and we shall try to be ready for it.

Mr. HATHAWAY. I thank the distinguished chairman for his answers to my questions and his assurance that such speculative revenue impacts will be challenged when the bill is brought to the floor.

Mr. MUSKIE. I thank my good friend.

UP AMENDMENT NO. 1813

(Purpose: To cut the level of total new budget authority $17.7 billion)

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE), for himself, Mr. HATCH, Mr. HAYAKAWA, Mr. DECONCINI, Mr. BENTSEN, Mr. ROTH, Mr. STONE, Mr. HARRY F. BYRD, JR., and Mr. THURMOND, proposes an unprinted amendment numbered 1813.

On page 1, line 11, strike out "$557,700,000,000" and insert "$540,000,000,000".

Mr. PROXMIRE. Mr. President, my amendment to Senate Concurrent Resolution 104 would cut the budget authority requested by the President to $540 billion, or approximately 5 percent. The amendment would strike the Budget Committee figure for budget authority of $557.7 billion on page 1, line 11, and insert the figure of $540 billion. That obviously would not cut the budget resolution figure by 5 percent but by 3 percent.

Before I state the major reason I believe my amendment should be adopted, let me make a few preliminary observations.

No. 1, the Budget Committee has done an amazingly good job in cutting about 2 percent from both budget authority and budget outlays from the time of the first resolution. I commend them on that and I want to acknowledge their work.

Second, when one proposes a cut such as is proposed in this amendment, a cut of 5 percent below the President's original proposal and 3 percent below the Budget Committee's proposal in the second concurrent resolution, one is assailed from all sides and with contradictory arguments.

It is said first that one should not propose a general cut but should be specific.

That argument was made at the time of the first budget resolution, when I proposed an identical amendment.

It was on that basis that the managers of the bill, among others, opposed my amendment which, nonetheless, got 33 votes.

However, when the Senator from New Mexico (Mr. DOMENICI) came in with a specific amendment, the hornets descended on him to criticize his specific cuts. In fact, he got fewer votes than I did when he proposed a 1-percent specific, as opposed to a 1 percent general, cut which I proposed.

The answer to those arguments—which have almost nothing to do with the case and have nothing to do with whether or not we should cut the budget—is this:

The best way to cut a budget is to first set an overall limit, which I am doing in this amendment, and then require those proposing the details to keep within that overall limit. That is part of the budget process.

A second answer to these arguments is that we already have the means by which we can keep within the overall ceiling. The Appropriations Committee, and in fact any standing committee, has the authority under the Budget Act to propose rescissions. If we reduce the overall ceiling to $540 billion, or a measly 5-percent cut below the President's original proposal, the Appropriations Committee can go back to the job of making further appropriate cuts to keep within the second budget resolution.

In fact I can think of no more exemplary way to make the Budget Act function as it should than for us to set a $540 billion ceiling and for the appropriate committees and subcommittees to then carry that out by cutting back on appropriate items and making the tough, hard, even cruel choices which are required to be made.

So, far from being against the spirit of the Budget Act, such a procedure is the very essence of that act, namely, a general ceiling voted by the Senate, followed by appropriate particular action of the committees and subcommittees with jurisdiction over the particulars.

Let me make one further general point before getting to the reasons why we should limit budget authority to $540 billion.

When I proposed such a cut on the first budget resolution, it was said by some Senators, "All right, PROXMIRE, if you want to cut, we'll take it out of housing, the area over which you have jurisdiction." That argument may be made again, and I want to meet it head on.

First, as chairman of the Appropriations Subcommittee on HUD-Independent Agencies, I proposed cuts in my own bill. We ended up with an overall cut of 2.7 percent and a cut in housing of 2.07 percent.

Second, I am quite prepared to take a further cut, which would bring the total overall cut to 5 percent. I do not shrink from cutting the funds over which I have jurisdiction. I am willing to take a fair share of the cuts. I am not only willing, but I believe we should do so and I am fully prepared to do so.

Third, one reason Congress has been unable to cut in the past is that if any Senator has the temerity to propose a cut in a public works project or in a subsidy for a particular region of the country, attempts are made to intimidate him by threatening cuts in his projects or in his region's programs no matter how worthy or how economical they might be. That is why we overspend, because Senators soon learn that the best way to get along is to go along and that the "something in it for everybody policy" is easier to live with than rocking the boat.

So, I hope that such arguments will not be used at this time on this bill, because this Senator, at least, is willing

to practice what he preaches and to support a total cut of 5 percent from the areas over which he has jurisdiction.

Now let me turn to this issue of why this amendment should be passed.

INFLATION THE NO. 1 PROBLEM

The problem this country faces, the No. 1 problem—the No. 1 economic problem, the No. 1 domestic problem, the problem that has profound effect on our foreign policy, too—is inflation, roaring, endemic, rising inflation.

Things are not getting better. They are getting worse. Instead of a 5- to 6-percent inflation rate this year as originally predicted, it will be in the 8- to 9-percent range this year.

Interest rates are going up. This has had very little effect on slowing inflation.

The dollar is in deep trouble abroad. Why? Because of inflation here at home.

Wage demands are rising? Why? Because workers want to catch up and at least keep even with the cost of living.

Citizens are revolting against taxes and the high cost of Government. Why? Because of inflation which has cut their real incomes while pushing them into higher and higher tax brackets. At the local level, property taxes go up and up due to the inflated costs of land and buildings. But these increases in value are only paper increases until a home is sold. Meantime they result in higher and higher property taxes.

The inflation fever is here. The psychology must be broken.

The one feasible, possible, effective alternative we have is to cut the budget. That is the message the country has been waiting for. And that is the message we have not yet sent. There are very, very limited alternatives to stop the inflation. Wage and price controls are out.

I do not know of any Member of this body who would argue that we could pass wage and price controls this year, next year, or any time soon. Business does not want them.

Labor does not want them. Neither political party nor its members want them. They are not going to happen. And if they did they would be ineffective, as we found out in 1973.

Some have proposed tax incentives to both business and labor to hold down prices and wages.

I think that is a very promising approach and we have had hearings on it in the Banking, Housing, and Urban Affairs Committee. I hope they will be given consideration. But it is a last desperate choice, and would take a very, very long time to become effective. Even if the President decided today to propose it, it would be months before the details could be worked out and Congress worked its will.

The only real, immediate, effective way we have to combat inflation is to cut the budget and cut it now. That would send a message to the country that Congress means business. It is the one thing that just might turn the inflation around. In fact, it is now virtually our last and our only effective weapon. We had better use it and we had better come to grips with this problem.

The way it works is that if we cut the budget, it in turn cuts the deficit which, in turn reduces the pressure on borrowing and interest rates. Lower interest rates, in turn, can spur private investment and private spending and induce greater economic growth and a healthier economy without adding to or fueling the fires of inflation.

The amendment I propose, to limit budget authority to $540 billion, would certainly help. In fact, if anything, it may not be enough. It is a relatively modest proposal given the present state of affairs.

First, it is only a 5-percent decrease from the original budget proposed by the President and a 3-percent decrease under the Budget Committee's proposal.

In April when I first proposed a 5-percent cut it was argued it could not be done. When that was defeated I proposed a 1-percent cut, and that, too, was said to be impossible to do.

In the meantime, however, the Budget Committee itself has cut 2 percent or twice as much as my modest proposal in April which its leading members said could not be done.

Second, a $540 billion budget authority is still a $37.1 billion or 7.4 percent increase over last year's budget authority of $502.9 billion.

So it still would leave an increase, a 7-percent increase over last year, if we cut as I proposed to $540 billion.

What it means is that in real terms we are holding the line on the budget. We are giving the agencies and institutions which make up the Government of the United States enough extra money to provide for the increase in inflation—or $37.1 billion more than last year. That is not a wild, impossible, impractical, reactionary, conservative proposal. Rather than being too drastic, if anything, it is too modest.

Third, as one who has examined the budgets of at least 40 different agencies in this Government, from my position on the Appropriations Committee, I say there is no agency which could not cut its operating costs by 5 percent and improve its efficiency if it were determined to do so. We all know that. It could be done at the Defense Department, at the State Department, at the Treasury, at Commerce and HUD and at Labor, and Interior, and DOT, and HEW, and Justice, and Agriculture. And it can be done at NASA, and EPA, and the Veterans Administration without harming the muscle of the programs. Further, cutting spending would mean an automatic reduction in the cost of interest on the debt because the debt would both be smaller and interest rates should drop.

In every way it would have a salutary effect.

For all these reasons:

Because inflation is the No. 1 problem we face;

Because cutting the budget is the best, if not the only practical way we have to combat it;

Because a cut of 3 percent below the committee and 5 percent below the President's January budget is possible and do-able;

And because it would send the country a message that Congress finally means business and is acting to bring the country's No. 1 problem under control;

This amendment should be adopted.

(Mr. DECONCINI assumed the Chair.)

Mr. PROXMIRE. Mr. President, before I yield the floor, I want to take this opportunity to answer the very thoughtful and very effective arguments made by Senator MUSKIE. Senator MUSKIE, the manager of the bill, did a superb job last time in beating back all amendments. I hope he is not quite as successful this time. I hope to answer him by meeting some of the arguments he raised to this amendment when I offered it before.

I will give a list of his arguments and then answer each briefly. It will take me only a few minutes.

The manager of the bill said the Proxmire amendment goes to the heart and life of the budget process because it is ambiguous, arbitrary, and indiscriminate.

It was said it does not identify areas to be cut.

It abandons the budget process to balance priorities.

Budget authority does not all spend out at the same rate—housing funds are spent over 40 years while personnel funds are spent in 1 year. There will be little reduction in inflation or the budget if the cuts are applied to housing and tremendous cuts if applied to personnel.

Here is my answer. First. The budget resolution provides for five numbers and asks our approval of them—budget authority, outlays, revenues, the deficit, and the total debt.

This amendment says, "We don't agree with the budget authority figure. It should be lower. It should be $540 billion."

To do that is clearly a part of the budget process, within the budget process, and no more arbitrary than the President's figure for budget authority or the committee's figure for budget authority.

Second. What we are really being told is, "Don't change what the committee has done."

We are told, "Don't take part in the budget process." But proposing an amendment to the committee figure is in fact the very essence of the budget process.

Mr. President, the function of every committee, including the Budget Committee, is to advise the Senate, to serve as the Senate's adviser. The decision is made by the Senate as a whole on the Senate floor, and it should be made here.

We are not, by offering an amendment on the floor, imposing ourselves on the committee. This is where the decision should be made, where it should be discussed, where it should be debated and determined.

Too often, we just come in and whatever the committee proposes we accept. That is wrong. This is the time we should stand up and discuss it and debate it.

People coming to the Senate observe it in action and wonder why there is so little being done. We often say that the job is really done in committee. But I think any thoughtful Member of the

Senate realizes that the committee has one function, one principal function, and that is to advise the Senate, and the Senate makes the decision.

Third. This is the proper way to function. We should set the overall figure and then let the details be worked out both by the Budget Committee and the Appropriations Committees.

We have a process to carry that out. It is called rescission. Each standing committee has that right. If this amendment is passed then the Appropriations Committee goes back and cuts to keep within the overall figure.

The argument is made, the amendment does not tell us specifically where we should cut.

Mr. President, the answer to that is that the committee wants to have it both ways.

When members do that, the committee beats them back.

The McGovern amendment did that on the first budget resolution. It was overwhelmed, 77–14.

The Eagleton amendment was defeated 70–21.

The Byrd amendment was defeated.

The Domenici amendment was defeated. When I proposed a 1-percent general cut, it was argued it was too general. When Senator DOMENICI proposed a specific cut, it was argued that it was too specific.

Another argument against the amendment was that a cut in budget authority does not necessarily translate into a specific cut this year.

But the answer to that is that: First, it is true that some budget authority is for 40 years and some is for 1 year.

However, at least two-thirds of this year's budget authority is spent this year. Therefore, the problem is not that difficult.

Second, we need help both this year and next year and the year after that. We better start now.

Third, but a cut in budget authority keeps flexibility in the budget process by allowing the cuts to be made where they can have the most effect.

For that reason it is not indiscriminate or arbitrary as the chairman stated, but just the opposite. It allows us to work our will in an intelligent and orderly way by selecting those areas where the effects can be most helpful and least damaging.

Another argument against the amendment is that $535 billion of the $566.1 billion of budget authority proposed in the first budget resolution is required merely to carry out laws now on the books. Therefore, cutting to $540 billion allows for no new or expanded programs.

The answer to that is, What is so sacred about existing programs?

First, most of us are committed to what is called zero-based budgeting which says to reexamine every program now on the books each year to determine if it should be kept or cut. There is nothing sacred about programs. Why should we willy-nilly merely keep every program at last year's level plus enough for inflation?

Second, most programs are given more authority or more money is authorized for them than is spent. The Appropriations Committees do not have to fund every program and every item up to its full authorization.

Therefore, existing programs are not sacred and existing programs can be and should be cut.

Another argument is that achieving savings from changes in existing law is a long term business.

The answer is, first, that is no reason why we should not start now.

Some savings can come by cuts under the amounts authorized.

Some savings will or can come from changes in the law.

Some savings come from the effect of the budget itself on general economic conditions. (A 1 percent decline in the rate of inflation itself can bring a 1 percent cut in the cost of Government because Government pays higher prices for its services like everyone else.)

Another argument was that many of these programs are entitlements, uncontrollables, or in the form of contracts.

The answer is that some of the uncontrollables can be controlled or changed. For example:

First. Interest on the debt. If we cut the budget, reduce the deficit, and reduce interest rates, this will reduce the so-called uncontrollable item called interest on the debt.

Second. One uncontrollable or entitlement at HEW is medicare and medicaid. Yet we know there have been huge waste and even fraud involved in those programs. Here is an uncontrollable which can be cut.

Third. There are contracts which the Government must carry out, but most of them have an inflation factor which pays more as inflation rises. This can be changed and costs reduced if inflation is cut, as this amendment would tend to cut inflation.

Furthermore, some can be terminated, at a cost, but at a lesser cost than carrying them out. The SST is one example; the C–5A was another.

Also, GSA has contracts for Government goods and services and buildings, but we know there is a lack of competitive bidding, kickbacks, and fraud. It has been disclosed only in the last few weeks. Big savings can be made here.

Also, retirement pay is indexed.

So cuts can come here, if we can cut inflation. Therefore, the uncontrollables are not entirely uncontrollable.

Mr. President, a final argument is that the best way to cut and the easiest way to cut is to cutback those increases which are above existing law.

The answer is, "Good. Let the Budget Committee and the Appropriations Committee do it, if that is where cuts should be made. Let them carry through the budgetary process and cut."

However, not all new programs or increases are necessarily bad, just as all old programs are not sacred.

My proposal gives the proper committees the chance to cutback on increased programs or on existing programs and to make the choices and choose the priorities.

This amendment simply tells the Senate that we should have a $540 billion budget this year, a 7-and-a-fraction percent increase over last year, enough to allow for inflation, and no more, and that we should stay there.

It seems to me that this is a reasonable and logical proposal, and I hope the Senate will adopt it.

I yield the floor.

Mr. HATCH addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE. Mr. President, I would like to respond to the distinguished Senator from Wisconsin.

Mr. HATCH. I will be happy to wait. I was going to speak in favor of the Senator's amendment. I will be happy to wait until the distinguished Senator from Maine is through.

Mr. MUSKIE. I assure the Senator that I will not take too much time.

Mr. President, as I listened to the statement of my good friend from Wisconsin, I reached several conclusions that bear on the work of the Budget Committee: One, that we are not concerned about inflation; two, that we have not really tried to reduce spending; three, that we are opposed to further reductions where they can be identified.

I heard the same argument last spring. The distinguished Senator from Wisconsin has undertaken to capsulize my response of last spring in ways that I think do not accurately reflect what I said last spring. Therefore, I ask unanimous consent that my colloquy and my statement at that time, which appear on pages 11405–11408 of the RECORD for April 25, 1978, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Mr. MUSKIE. I yield myself 10 minutes.

Mr. President, let me say at the outset that the amendment of the distinguished Senator from Wisconsin is consistent with his long record of concern about Government spending and the need for budgetary restraints and prudence, and I applaud the general thrust of his efforts over the years in this connection.

However, I must say with respect to his amendment that it goes to the very heart and the very life of the congressional budget process, because it is ambiguous, it is—and I say this is the most respectful way—arbitrary and indiscriminate. It's the kind of approach to budget cutting that we tried many times before the establishment of the congressional budget process. It never worked. It never succeeded, because it never identified the areas where real cuts were possible, and where cuts could be achieved without damaging essential and vital areas of governmental activity.

If we want to return to that form of budget cutting, and abandon the congressional budget process, that is all right with me. But after we have gone through the kind of trade-offs and balancing of judgments which the budget process requires, if we are then asked to subject ourselves to an across-the-board cut of this kind, we have wasted a lot of time on identifying priorities, balancing priorities, and undertaking to set them within a rational economic policy. The two approaches to budgeting just do not go together. We tried it the other way and it did not work; and frankly I am getting pessimistic about whether or not this budget process is going to work, because here, too, we are inclined to abandon the discipline when it serves our immediate interest.

But let me get down to this specific pro-

posal, Senator Proxmire's amendment proposing a 5 percent across-the-board cut in budget authority in fiscal year 1979. I repeat, a cut in budget authority.

He would cut budget authority by $26.1 billion, from $566.1 billion recommended by the Budget Committee to $540 billion.

He justifies all of this as a contribution to the fight against inflation and as a contribution to reducing the deficit.

Unfortunately, Mr. President, one cannot judge either of those contributions because one is not told where the cut in budget authority will come. Budget authority does not all spend out at the same rate. Budget authority for housing, for example, requires up to 40 years to spend out. As a matter of fact, in this present budget there is $25.5 billion in budget authority for housing assistance.

(Mr. MOYNIHAN assumed the chair.)

Mr. MUSKIE. If we were to apply the Senator's amendment to housing assistance, and there is nothing in the amendment to prevent us from doing so, we would eliminate the housing program from the budget. But how much of a contribution would that make to inflation? When one considers that the spendout from this program is spread over 40 years, it is very little. There would be almost no reduction in this year's deficit from such a budget authority cut. That $25.5 billion will not spend out in fiscal year 1979 to any measurable degree.

The budget does include outlays of $4.4 billion in housing assistance, but that is driven by budget authority which we provided in previous years.

So if we were to take the proposed $26.1 billion cut out of the housing assistance program, we would hardly make any contribution to reducing the deficit. We would make no contribution to reducing inflation. The size of the deficit which worries the business community and others in the country who are concerned about Government spending, would remain essentially unchanged.

If, on the other hand, one took the cut from budget authority that spends out in 1 year, where would we go?

Well, the Defense Department spends out a lot of budget authority in 1 year, much of it in the form of salaries. So if we wanted to make a maximum impact on the deficit and a maximum signal against inflation, we would cut the $26.1 billion from the defense function and mandate that it be taken out of salaries, which would probably mean that we would decimate the Armed Forces of the country.

That is the range we can consider, but the Senator does not tell us how he would distribute his cut in budget authority. It is for that reason that I call his amendment an arbitrary and undiscriminating approach to budgeting.

Mr. President, the budget process was designed to enable the Congress to make individual spending and revenue decisions in the context of the budget as a whole.

The discipline provided by the process forces Congress to make hard choices among competing national priorities after careful consideration of the issues which are involved and deliberate decisions on how our limited resources will be allocated.

Senator PROXMIRE's amendment proposes, in contrast to this, an anonymous cut of $26.1 billion in budget authority. He does not tell us which areas of the budget he would cut. He does not tell us which national priorities would be affected. He says only that—

"There is not a single agency of government which could not absorb a 5-percent decrease in its funds and actually increase the efficiency of its programs if it were determined to do so."

Well, attractive as that proposition is on its face, when one looks into the facts of individual functions and agencies and programs, one finds it to be debatable.

Rhetoric such as this was common in the Congress prior to the Budget Act. We established a congressional budget process because we found that such rhetoric did not provide effective budgetary control.

The Budget Committee recommends, Mr. President, a carefully crafted spending plan for fiscal year 1979. Of course, there is room for increases or decreases in that plan as the Senate wills. We have just acted on two proposals to cut defense spending and one proposal to increase spending in domestic programs, out of the savings in defense spending. Those are perfectly appropriate amendments. Whichever way the Senate acted upon them, the Budget Committee would live with the result.

But what would Senator PROXMIRE's amend ment do to that plan? It is not focused on specific functions or programs.

The Budget Committee recommended total budget authority for fiscal year 1979 of $566.1 billion. Where did we get that? The authorizing committees requested of us $603 billion in budget authority. We cut those requests, not by $26.1 billion, as proposed by the Senator, but by $36.9 billion. The Senator now says—

"That is not good enough. You ought to add another $26.1 billion in cuts to that $36.9 billion so that we would have a total of $63 billion in cuts."

Where would we get those cuts? From what programs should we get them?

Within the total of $556.1 billion that the Budget Committee recommended, $535 billion—mark the number, $535 billion—is required simply to carry out laws currently on the books. That $535 billion total provides for no new or expanded programs and for only those inflation adjustments that are mandated by law.

Senator PROXMIRE's amendment would cut total budget authority to $540 billion, which is just slightly more than the current law level.

Laws on the books should not be regarded as sacrosanct. Indeed, the Budget Committee recommendation assumes that some reductions through changes in current law can and should be made. But the simple fact is that achieving savings from changes in existing law is a longer term business, and the savings in the first year are small. This is especially true when we realize that within that $535 billion current law estimate there is some $300 billion for entitlement programs. An entitlement program means just that: States, local governments, or individuals are entitled to receive payments under current law.

In the short run, Mr. President, savings in these programs are especially difficult to achieve.

So the truth is that the bulk of Senator Proxmire's budget authority cut in fiscal year 1979 would have to come from those areas of the budget where the Budget Committee recommends carefully considered increases over current law. These increases recommended by the Budget Committee are, as I have said before, considerably less than the increases recommended to us by the other Senate committees.

Mr. CURTIS. Will the Senator yield for a brief question?

Mr. MUSKIE. Yes, for one, and then I would like to finish my statement.

Mr. CURTIS. Does the distinguished chairman agree that to do the job that many in the country feel should be done on the budget, we ought to change some laws?

Mr. MUSKIE. Well, I think there is a recognition that in order to make the kind of cuts some would wish, we would have to change the laws. There is no question about that. The Senator understands that perfectly, and especially in the entitlement area, which is $300 billion.

Incidentally, there is one entitlement program that one should never forget. That is interest on the public debt. The obligation to pay that goes back to legislation which was enacted in the middle of the last century. It amounts to $53 billion in the fiscal year 1979 budget.

That is uncontrollable. That is a contractual obligation.

Mr. CURTIS. It is a contract, yes.

Mr. MUSKIE. And of course, there are defense and nondefense contracts, and other commitments made in prior years totaling, possibly, as much as $80 billion a year which are uncontrollable unless the Government reneges on its promises. Then there are the entitlements. Those commitments plus the entitlement programs form the so-called uncontrollable portion of the budget.

Interest on the debt we cannot reduce by changing the law without breaching a contract, and we would not want to breach other contracts and commitments. So when we talk about reducing the budget by changing existing law, we are talking about changing entitlement programs or changing other programs prior to the time commitments are made.

Of course, if we want to reduce that spending, we have to change the law, the Senator from Nebraska is absolutely correct.

Mr. President, I have a table showing the major increases over current law recommended by the Committee on the Budget. I ask unanimous consent that this table be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MUSKIE. Let me discuss a few salient elements of that table. The Budget Committee recommends a total increase in budget authority of about $32 billion over current law. One-fourth of this increase, $8 billion, is in the area of national defense. Does Senator PROXMIRE mean to eliminate all or most of this increase, which would actually cause the defense budget to decline in real terms and cause us to renege on our NATO commitment?

Agriculture programs, Mr. President, account for $5 billion of the increase. Does Senator PROXMIRE mean to reduce or eliminate this support for America's farmers? I emphasize that this number is significantly below the agriculture bill that was recently passed by the Senate and defeated in the House. So when I say there is an increase, that is not the increase that was mandated by the Senate, and a substantial majority of the Senate, not too long ago.

Energy programs account for $2 billion of the increase. Would Senator PROXMIRE have us cut back on our efforts in this critical area?

Education, employment, and veterans programs together account for $4 billion of the increase in budget authority. Would Senator PROXMIRE recommend that these increases be eliminated?

International affairs programs account for $3 billion of the increase, much of it related to U.S. commitments to the multilateral banks. Does Senator PROXMIRE suggest that these commitments be scaled back or eliminated? I am asking these questions not to prejudge the answer. It is a perfectly legitimate objective for any Senator to propose, by appropriate amendment, the elimination of any of these increases. I identify them so that we may have an answer to them from the author of this amendment, who simply gives us the overall cut of $26 billion and ask us to find the places to cut.

Community and regional development programs account for $2 billion of the increase, much of it related to the President's new urban initiatives. Would Senator Proxmire have us send a signal to our distressed cities that the Federal Government is not interested in their plight?

So, Mr. President, I ask the Senator, in the spirit of an effective budget process, to tell us what programs of the budget he proposes to cut and what national priorities he wishes to affect. When we have the answer to that, we shall have a better answer to the question of how fast the outlays from the proposed cuts in budget authority would flow. When we know how fast the outlays would materialize, we can judge better what the economic impact of those outlay cuts would be in 1979, 1980, or future years.

In other words, as of this moment, the Senator's amendment does not tell us what programs to cut or how fast there would be a reduction in outlays, or when, if ever, the deficit would be affected or what the economic implications would be. We cannot have the answers to those questions until and unless he tells us what programs he would cut. We cannot have an effective debate, indeed, Mr. President, unless we know more clearly the effects of his proposal in these terms. The days are over when we can simply suggest anonymous cuts without spelling out their consequences.

I know my colleagues in the Senate will agree with me on the need to make spending choices after careful consideration of the issues that are involved. The congressional budget process is the instrument for making hard choices with respect to national priorities. Arbitrary spending cuts, as in this proposal, fall unevenly on different areas of the budget, deal capriciously with national priorities, and demonstrate once again the difficulty of attempting to affect the budget in a one-year time frame.

I urge the Senate to reject this amendment. I would like to close as I began, praising Senator Proxmire for his long-held commitment to budget restraint and budget prudence. I hope I have said nothing to denigrate his reputation in that respect. With respect to this amendment, I have tried to be as candid as I can be.

EXHIBIT 1

*Increases above current law proposed in S. Con. Res. 80 as reported*

[Dollars in billions]

| | Fiscal year 1979 budget authority |
|---|---|
| Current law estimate | 534.5 |
| National defense | +8.0 |
| International affairs | +3.1 |
| Energy | +2.2 |
| Agriculture | +5.1 |
| Transportation | +4.2 |
| Community and regional development | +2.2 |
| Education, training, employment, and social services | +2.5 |
| Veterans' benefits and services | +1.4 |
| All other | +2.9 |
| S. Con. Res. 80 as reported | 566.1 |

* * * * *

Mr. PROXMIRE. Mr. President, I am going to yield to the distinguished Senator from Delaware in a moment. Before I do that though, I should like to reply briefly to the Senator from Maine.

I very much appreciate his viewpoint. As I have said before, I think he has done a remarkable job, he and Senator BELLMON, in the Budget Committee in holding down spending. They did make big cuts, as he pointed out, a cut of $37 billion, roughly, in what the authorizing committees requested.

The Senator from Maine argues that this amendment is ambiguous, arbitrary, and undiscriminating. I reply that there is no way, and I think the Senator knows it better than anybody in the Chamber, that a Senator can come in and duplicate the work of the Budget Committee. After all, I have a limited staff. I have two or three people who work on this kind of thing. They work on many, many other things, too. The best that an individual Senator can do, in reality, is to indicate on the basis of the most careful analysis he can give what the level of spending ought to be. To go into meticulous detail on each one of these programs to indicate where the cutback ought to be is something that really is asking too much. If we did it, I think we would be subject to tremendous criticism, because it would be irresponsible.

I am not in a position to hold hearings and to explore in great detail with the Office of Management and Budget and with the various agencies where the cuts could be made. We have some ideas where it is possible. But to do this in detail in this enormously complex budget would be doing far more than would be responsible.

Furthermore, Mr. President, I have great faith in the Budget Committee. I think if we tell them this—after all, this is the first budget resolution; there are three—they will have the opportunity to consider where a reduction should be made in order to comply with this $26 million cutback in obligational authority.

It will not be easy, there is no question about that. It will be difficult, extraordinarily difficult, very painful. There is no way we can make this kind of cut without great difficulty.

Mr. MUSKIE. Will the Senator yield?

Mr. PROXMIRE. Yes, indeed.

Mr. MUSKIE. I do not think it would be difficult at all if the Senator wanted to do it. With respect to spending mandated by current law, you know, you could not do it easily.

But if the Senator wanted to offer an amendment that reflected the table I put in the RECORD this afternoon, it would be very simple to draft the amendment.

National defense, reduce $8 billion; international affairs, $3.1; energy, $2.2; agriculture, $5.1; transportation, $4.2; community and regional development, $2.2; education, training, employment, and social services, $2.5; veterans' benefits and services, $1.4; all other, $2.9.

There is the easiest and quickest way to make the cuts the Senator proposes to, unless he wants it out of housing assistance.

Mr. PROXMIRE. As the Senator knows, there are many ways these cuts can be made and there is a long time to do it.

Mr. MUSKIE. The Senator likes to say that.

Mr. PROXMIRE. It is true.

Mr. MUSKIE. It is not true.

Mr. PROXMIRE. Of course, it is.

Mr. MUSKIE. It is not true and I have given the reasons. These are the only increases in this budget above current law. I want to make that clear.

Mr. PROXMIRE. May I make it clear to the Senator from Maine, there is nothing written in the wind that tells us we have to make the cuts only in areas that have been increased. We can make cuts in old programs.

Mr. MUSKIE. Will the Senator yield so I may make an observation?

Mr. PROXMIRE. I yield.

Mr. MUSKIE. I have been put in as chairman of the Budget Committee in order to acquire some knowledge about how Government money is spent, where it is spent, how fast it spends out. I am saying to the Senator that, when we are talking about this budget, $535 billion of it is mandated by current law.

I am not saying current law cannot be changed, but I am recognizing that it takes some time to change current law when your objective is to run against some of these constituencies built up here in the Senate in support of programs.

So the quickest way to achieve the kind of cut the Senator is talking about is to eliminate the increases over current law that the Budget Committee proposed, and I have given him the areas.

So if the Senator wants to bite the bullet, bite the bullet and make the cuts where they could be effectively made, that is the place.

Mr. PROXMIRE. Mr. President, the Senator from Maine is right. There is no question this is the quickest way to make the cut, but it is not the only way to make the cut.

Let me take the place that is the most difficult of all the issues and examples the Senator gave, that I think every Senator and everybody in the country, would immediately, instinctively say he is absolutely right on—interest on the debt.

He says that cannot be reduced. The fact is that this is something that can be reduced, not much, but it can be reduced some, and because it is so big, it is over $50 billion a year, or $56 billion a year, something of that kind, I think any reduction here is helpful.

How can this amendment possibly result in cutting interest on the debt? We do not have long-term contracts. These are not 20-year bonds. It turns over in about a year. We have a very short term Federal debt, very short term.

The result is that to the extent a cut of this kind results in reduced inflation, results in reduced interest rates, the interest on the debt is reduced.

Now, as I say, it is not a massive reduction, but it is a limited reduction that can be taken into account.

The same thing is true——

Mr. MUSKIE. Well now—

Mr. PROXMIRE. Let me finish on this point—on a number of contracts. A number of the contracts we have written have an inflation clause in them. Almost all do. Almost all our procurement contracts provide, to the extent there is inflation tied to some index, the Federal Government will have to pay more in 1979.

If this amendment results in a lesser rate of inflation, it means the expenditures required under those uncontrollable, apparently, contracts will, in fact, be reduced.

And, of course, Government salaries also are tied to an inflation index, as is the social security tied to the inflation index.

So I do not think it is quite true to say the only way we can make any cuts is to cut the increases that have been proposed.

Mr. MUSKIE. I do not believe that I said that.

I said that when we are talking about cutting what is mandated by current law, we have to change the law. Indexing is in current law and it is reflected in this budget resolution. If we want to propose eliminating indexing for social security benefits, we have to change the law.

Mr. PROXMIRE. I do not propose that.

Mr. MUSKIE. I am not saying the Senator proposed it. But he keeps talking about these other places and every time I come to a specific place, he says, "I am not talking about that." So that every time I come to a specific place, he says, "I am not talking about that." So that every time the Budget Committee mentions specific places, tries to to identify a specific place and identify the difficulties of cutting in a specified place, the Senator says, "Well, I don't mean that specific place, I meant some other places."

Well, what other places? Every specific place I suggest, "Oh, I don't mean that."

In the table I put in the RECORD, there are specific places, and all we have to do is reject the increases proposed by the Budget Committee. They have not yet been approved by the Congress, they are not a part of law.

So, here is the easiest target. But the Senator says, "I don't want the easiest target, there are some other places."

Then he talks about indexing and I remind him that it is part of current law. He says, "I don't mean that."

Mr. PROXMIRE. No; the Senator misunderstands.

Mr. MUSKIE. I would like to know what the Senator means.

Mr. PROXMIRE. I understand indexing is part of the law. I do not say we should change the index. But I say we will have a lesser rate of inflation, in my judgment, if this amendment passes. If we have a lesser rate of inflation, it means we have a reduction in the amount to be paid out under indexing, without changing the law at all.

Mr. MUSKIE. Let me ask this——

Mr. PROXMIRE. That we have to pay out of interest. It means we have a lesser rate we have to pay out in salary increases, because there is a moderation in inflation.

Mr. MUSKIE. Let me ask the Senator this, he has not told us what budget authority he proposes to cut.

I assume without asking that he does not mean to cut $25.5 billion in budget authority from housing assistance. That spends out over as much as 40 years. If we were to cut that, the contribution to the inflation fight would be virtually zero because we do nothing to save outlays in the short run. But if we cut budget authority that spends out in 1 year, like salaries in the defense function, then we could reduce the deficit by $26 billion and that might have an impact on inflation.

It might also trigger unemployment, but, in any case, there we would make a positive impact on inflation if we wanted to cut salaries in the defense function by $26 billion.

But until the Senator tells us where he is going to cut budget authority, we cannot possibly estimate the outlays or the economic effects.

Mr. PROXMIRE. My time is almost up.

Mr. MUSKIE. Well, charge the last 10 minutes to my time, I do not need it.

He may have an estimate in his mind, but we cannot estimate how much reduction in outlays that would mean, and in the national deficit, how much less borowing that would mean, and how much downward pressure on interest rates that would produce.

How will we provide answers like that when the Senator does not tell us where the budget authority is to be cut?

Mr. PROXMIRE. Mr. President, the gist of the argument by the Senator from Maine is that we cannot do it. It cannot be done.

I say it can be done. He says that we can do all right, but only if we eliminate all of the increases that the administration has proposed.

Mr. MUSKIE. Will the Senator yield?

Mr. PROXMIRE. Well, that is what I understood him to say.

Mr. MUSKIE. I have not mentioned cuts from the administration. I have told the Senator of cuts and increases included in this budget resolution, and when he interprets my remarks saying that cuts cannot be made, I say we cut $36.9 billion from recommendations by committees, including the committee of which the Senator from Wisconsin is chairman.

Mr. PROXMIRE. I said that.

Mr. MUSKIE. So do not interpret what I say as meaning it cannot be done. We have done it, but we have done it in a thoughtful, careful rational way, in which we try to give people the facts about what we have done and the implications of what we have done. We have not given the Senator a meat ax. We have given him specific facts.

Mr. PROXMIRE. Mr. President, do I have the floor?

The PRESIDING OFFICER. The Senator from Wisconsin has the floor.

Mr. PROXMIRE. Mr. President, I have indicated that we are making an amendment that would cut obligational authority. We have a right to make that amendment. The Senator from Maine, of course, has indicated that he disagrees with the amendment very strongly.

He has pointed out, and I have agreed with him, that he has made a cut of $36.9 billion, including a cut in what the Banking Committee recommended over my objection. I wanted the committee to recommend a reduction lower than what the President had called for. But the Budget Committee has indeed made those reductions.

It is my position that we can make a 5-percent cut in obligational authority and we can do so responsibly.

The Senator has raised the question as to where cuts of this kind could be made. One is in the nonmilitary personnel in the Pentagon. The Pentagon has almost a million employees. It is proposed that they cut that number by at least 50,000. That would be $500 million. That would be a cut that would have an effect on outlays almost completely, because the military personnel and the pay of nonmilitary personnel would be reflected about 97 percent in an outlay reduction.

Any cut in operation and maintenance would be about 86 percent, reflected in a reduction in outlays.

Procurement would be a much lesser reduction. The cut there, I am told, would result in about a 14-percent cut.

Mr. President, almost every element of the budget is subject to a variation in the percentage of reduction that you get in outlays if you cut obligational authority. We recognize that. We recognize that it would be very difficult, in our view, for us to put together a specific listing of areas we might reduce.

Furthermore, if we did that, I am sure there would be no way we could get reasonable consideration. I think it is perfectly proper—I know that other Senators may not think so, including the Senator from Maine—for a Senator to come on the floor and indicate that he would like to put a limit on obligational authority and make this kind of recommendation. That is what I propose, and that is all I propose.

I think the function of the Budget Committee, if this amendment is adopted, would be extraordinarily difficult; but I think they could do it, and do it in a responsible way.

Mr. MUSKIE. Mr. President, among other things, the Senator from Wisconsin has said that my argument was that it cannot be done. Well, let us look at that. It is not a question of whether or not reductions in spending can be achieved but how best to achieve them.

In that statement of last spring, I reminded the Senator from Wisconsin that authorizing committees had requested of us $603 billion in budget authority. We cut those requests not by the $26.1 billion then proposed by the Senator but by $36.9 billion.

In the second resolution, as I indicated in my statement earlier this morning, we cut budget authority by an additional $11.1 billion because of our concern with inflation, because the Appropriations Committee, in the actions it has taken up to this point this year, has made it possible for us, in conjunction with reestimates of spending provided by CBO, to reduce spending by that much.

To argue that I said last spring that this could not be done, in the face of the fact that subsequently the Budget Committee has cut $11.1 billion additional, is to distort my whole position in this matter.

The Budget Committee spent long days and hours combing the functions, combing the administration's midsession review, combing the Appropriations Committee bills that had been before the Senate, to identify every conceivable cut.

I simply will not yield to the Senator from Wisconsin in my concern to send the clear signal to the country that we intend to reduce Government spending to the maximum extent possible.

The Senator is a member of the Appropriations Committee. Earlier this morning, I praised the Appropriations Committee for holding appropriations below the target set in the first congressional resolution. Because the Appropriations Committee did that, it was possible for us, following on the heels of those actions, to reduce budget authority and outlays in the second resolution. My argument in the spring was that that is the way to do it. If the Appropriations Committee, which goes over these appropriations bills item by item, had found it possible to cut another 5 percent or 10 percent in the budget authority, I assume it would have done so.

I think Senator MAGNUSON, the chairman of the Appropriations Committee, has demonstrated his commitment to reduce spending over and over again in these appropriations bills. We have applauded him; we have supported him in every way we possibly could; and that is the way to do it.

As of this moment, the Senate already has enacted or passed $402 billion in budget authority, leaving yet to be reported in the Senate $156 billion. I take it that, unless we are going to go back and redo the bills we already have passed, what the Senator now proposes will have to come out of the $156 billion. What will it be? Where will we cut?

Let us look at some of the budget authority items in the budget: social security and other retirement, $107 billion; Federal employee retirement, $20 billion; unemployment compensation, $15 billion; medicare, $30 billion; net interest, $39 billion.

Those five items of budget authority total $211 billion. Are we going to cut those, or is this 5 percent cut or 3 percent cut to come out of the remainder? If it comes out of the remainder, what does that total, percentagewise? This is 40 percent of the total budget authority in the budget.

I have told the story many times about the restriction that uncontrollable items in the budget imposes upon efforts to reduce Government spending. Apparently, the Senator from Wisconsin dismisses that as an inconsequential argument. Let me put it in terms of outlays, if I may.

Total outlays recommended in the second budget resolution are $489.5 billion. Let me list some favorite items of various Senators: defense programs total $112.5 billion; net interest, $38.8 billion; social security, $104.5 billion; railroad retirement, $4.3 billion; Federal employee retirement, $12.0 billion; unemployment compensation, $10.4 billion; medicare, $28.1 billion; medicaid, $11.3 billion; veterans' programs, $20.4 billion; farm income stabilization, $6.0 billion.

The total of those items is $348.3 billion; remaining outlays in second budget resolution, $141.2 billion.

The luxury that these across-the-board budget cutters are able to indulge in on the Senate floor is that they do not

have to zero in, in committee, on those particular programs. They just say, "It is possible." Of course, it is possible to cut 3 percent, even though we already have cut $36 billion and then another $11 billion. Of course, it is possible to cut another 3 percent or 2 percent or 1 percent or 5 percent or 10 percent.

It is always possible. But the budget committees and appropriations committees in their deliberations must get down to the items, the programs, and that is when you begin to realize that there are program needs that cannot be further compromised or cut, or whose constituencies are such that there is no practical way to achieve further cuts, and so in the Chamber it is nice—and I used to enjoy that business of just across-the-board cuts in the Chamber—to vote for them and vote for them, and never have to face the wrath of the constituencies interested in specific programs.

I have listed some of the most popular programs. They total $348 billion.

Any Senator who tells me it would be a simple matter to reduce any of those by the amount that is proposed has not faced the problem of program reduction in the same way that the appropriations committees and budget committees have to face them.

To look at it in an even simpler analysis, defense and veterans programs total $132.9 billion, or 27 percent of the budget; contributory insurance and retirement, $159.3 billion, or 33 percent; debt interest $38.8 billion, or 8 percent. That is a total of 68 percent of the budget, leaving $158.5 billion, or 32 percent, for all other programs.

Are we going to focus on those for this cut? Here is a way to offer a cut. The Senator proposes a cut of $17 billion. Why not exempt defense and veterans programs? We are not going to get any cuts beyond those already included in the budget resolution in those areas, whether we take the case to the Appropriations Committee or to the Senate as a whole with specific amendments. Break up the amendment. Offer the same percentage cut in defense and veterans programs in one item. Let us test the Senate's opinion on that. Just break it out, a 3-percent cut in defense and veterans programs. Then break up the amendment into a second one, contributory insurance and retirement. Let the Senate vote on that separately. And then one on interest. Let us break that up and see how the Senate votes on it. And having disposed of that 68 percent of the budget, I would be willing to make a small wager as to what the result would be and then take the total $17 billion out of all other programs and see what the Senate's vote would be. I would be interested in that. That to me would be a more responsible way to approach this business of further reducing the budget below the second resolution than this across-the-board one where you do not have to face the constituency of the programs which have the strongest support.

All you need are four amendments instead of one. It would not take that much longer to vote on them. Then we would know whether the Senate as a whole wants a 3-percent cut in defense and veterans' programs, whether the Senate wants a 3-percent cut in contributory insurance and retirement, whether the Senate wants to renege on its contract to pay interest on the Federal debt by 3 percent. We would have those blockbusters out of the way.

Then the Senator offers his amendment to cut $17 billion from all other programs and see where that goes. That would be a meaningful test.

If the Senate supported the Senator's proposed cuts in those four different categories, then we would have a clear-cut message that could be implemented by the appropriations committees and by the budget committees.

I do not really think there is that much to be added to what I said on this subject last spring. I have put that in the RECORD.

There are only four of us Senators in the Chamber at the present time anyway. There is no point in repeating that argument. It is there, and it is there in the way that I propose it.

Mr. President, I yield the floor.

Mr. PROXMIRE. Mr. President, I wish to yield shortly to my good friend from Utah and good friend from California, but before I do that let me very briefly respond to the manager of the resolution.

The manager of the resolution started out by saying that I indicated that I thought the Budget Committee was not concerned about inflation. Of course they are concerned about inflation. I said they have done a magnificent job in cutting the budget by an additional $11 billion, and I acknowledge now that they did a fine job in reducing the requests of the various committees. I commend them on that and I know they are deeply concerned with inflation. I am sure they are very interested in having further reductions, also, but I get the distinct impression from the distinguished Senator from Maine that when anyone comes in and offers a general kind of amendment we are not responsible, we do not know what we are doing, and we have no basis on which to offer such an amendment.

Mr. President, as I say, it is up to the Senate to decide this, not a committee. The committees do not dictate to the Senate. The committees just advise the Senate. We make the decisions right here.

Mr. President, the distinguished Senator from Maine indicated one of the questions that bothers him is the Budget Committee was concerned with how best to achieve these cuts, and they found out how best to achieve the cuts and they made the cut on the basis of that, and he went on to say that if the Appropriations Committee had found it possible to cut another 3 percent or 5 percent, they would have done so.

I am sure they would have tried to do so. But if the Appropriations Committee and the Budget Committee were mandated by the Senate to cut an additional 3 percent, they would find a way to do it, and that is what I am suggesting here.

As I say, it is not easy. It is tough. It is difficult. We recognize that the advice they give to us is advice we should consider very, very carefully because these are extraordinarily able and thoughtful members and they labored hard with probably the toughest job that the Senate assigns to any committee.

But for us to come in and say that we want to cut further is not an act of effrontery. It is an act of simply saying that we feel that if we are going to confront inflation effectively, if we are going to hold this spending by the Federal Government down to what we think it should be held down to, to the increase in inflation, that is our decision and of course they would have to abide by it.

Mr. STONE. Mr. President, will the Senator yield for several questions?

Mr. PROXMIRE. Yes, I am happy to yield to my good friend from Florida.

Mr. STONE. Is it not the case that this resolution does not do any substantial damage to any particular governmental program?

Mr. PROXMIRE. That is certainly my understanding, and I would be surprised if Senators came in and offered substantial amendments to increase it. Perhaps they will. But I do not know of any program that is damaged by this resolution.

Mr. STONE. Is it not a fact that this approach retains the priority-setting authority to the Budget Committee and the Appropriations Committee?

Mr. PROXMIRE. That is precisely what this does.

Let me point out that the Senator from Maine indicated that we have already passed appropriations amounting to about two-thirds or more, maybe 80 percent. Now what the second budget resolution does is require the Appropriations Committee to propose revisions, and that is what I think we have to do. Otherwise, the second budget resolution would make no sense at all. We would have come in and just accepted it because we have done so much already. We have in an active way said whatever they have done is all right.

Obviously, that is not the case. We have a right to amend it, and I am exercising that right right now.

Mr. STONE. Is it not the case that the Budget Committee itself has made cuts between the first resolution and this resolution and are coming in with some substantial improvements in this resolution?

Mr. PROXMIRE. They have indeed. As a matter of fact, in the spring when the first budget resolution was up I offered an amendment to cut it 5 percent and then 1 percent. It was said that a 1-percent cut could not be made for various reasons or could not be made responsibly without very serious effect on various programs. The Budget Committee cut twice as much as that. They cut no $5 billion but $11 billion.

They did a much better job, and I suggested here on the floor I think they can do it again.

Mr. STONE. I agree.

Mr. HARRY F. BYRD, JR. I think the Senator from Wisconsin makes a very persuasive argument, if the Senator will yield.

Mr. PROXMIRE. I yield.

Mr. HARRY F. BYRD, JR. If the position is taken that the Senate cannot

make any changes in the second concurrent resolution because some appropriation bill has been passed, then what is the purpose of bringing to the Senate the second concurrent resolution?

Mr. PROXMIRE. We have in the law a system by which that can be done by the Appropriations Committee, by simply proposing a rescission which the Senate can act on.

As the Senator points out so well, if we are circumscribed from offering any reductions, any significant reductions, in the resolution, then we might just as well forget about having a budget resolution that does anything except ratify what the committee recommends to us.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator from Wisconsin include me as a cosponsor?

Mr. PROXMIRE. Mr. President, I ask unanimous consent to add the Senator from Virginia (Mr. HARRY F. BYRD, JR.) and the Senator from Texas (Mr. BENTSEN) as cosponsors of the amendment.

I yield to my good friend from Maine.

Mr. MUSKIE. I would be interested in having both Senators tell me when I ever took the position that the Senate cannot change the budget resolution. For 4 years I have been defending the Senate's right to work its will on budget resolutions. Now I have heard the Senator from Wisconsin and the Senator from Virginia putting words in my mouth I do not think I have ever uttered.

Mr. PROXMIRE. Let me answer my good friend from Maine. I do not think he recognizes how tremendously forceful he is and how effective he is when he gets up on the floor.

Mr. MUSKIE. What am I supposed to be?

Mr. PROXMIRE. That is exactly what he should be and what he is. I am praising the Senator. I am not criticizing him but praising him when he makes those statements with so much——

Mr. MUSKIE. It did not come out that way.

Mr. PROXMIRE. With so much force that he gives the Senate the understanding that if we amend this resolution, if we cut by 1 percent or 2 percent or in this case by 3 percent, that somehow we are imposing an act of irresponsible and arbitrary choice on the Budget Committee.

Mr. MUSKIE. In other words, if the suggestion you propose——

Mr. PROXMIRE. That you cannot do it.

Mr. MUSKIE [continuing]. Is arbitrary, I am not supposed to criticize it because I may intimidate you. Is that what the Senator is saying?

Mr. PROXMIRE. No. If the Senator says this is arbitrary, the Senator is wrong in describing this as arbitrary. There is nothing arbitrary about it. It is something that is specific and well within the budget process, and I just say the Senator is wrong, that is all.

Mr. MUSKIE. My job, first of all, as chairman of the Budget Committee is to see to it that the Budget Committee does the best possible job of squeezing every possible wasteful dollar or low-priority dollar out of the budget. That is my job.

Second, my job is to do my best to see that the highest possible priorities are served by the budget. We bring that product to the floor.

I have never been one to believe that committees had the ultimate wisdom, but I do happen to know what we did in the Budget Committee, what problems we ran into, how difficult it was, and I think I have the duty to report that, and I cannot help it if I have a loud voice.

Mr. PROXMIRE. I know.

Mr. MUSKIE. Or if I seem to be intimidating.

Mr. PROXMIRE. I am praising the Senator.

Mr. MUSKIE. Let me just say this——

Mr. PROXMIRE. Let me answer this. I have the floor. I only have a few minutes. My half hour is about up. Let me read what I said. I said that the Budget Committee has done an amazingly good job in cutting about 2 percent in both budget authority and budget outlays from the time of the first budget resolution. That is what I said.

Mr. MUSKIE. After that none of the rest of the Senator's statement sounded like praise. I am not expecting praise.

Mr. PROXMIRE. I think the Senator could have done a better job, and I am trying to impose it on him now.

Mr. MUSKIE. I am not expecting praise. What I am saying is if you really want to be helpful to the process, then I suggest that you break your amendment up into at least four, so that you can get real guidance.

Mr. PROXMIRE. The Senator knows the answer to that. That was tried before on the floor.

Mr. MUSKIE. The Senator is darned right. I know the real answer to that.

Mr. PROXMIRE. And it was overwhelmingly defeated.

Mr. MUSKIE. Exactly.

Mr. PROXMIRE. I think it is something perfectly proper and consistent for the Senate to do. We want a lower budget resolution. We want the Budget Committee to spend the time and expertise to tell us where that reduction can be made most responsibly and most effectively. If we want to hold down spending to $540 billion, I see nothing wrong with that as to what you should be doing.

Mr. MUSKIE. I know you see nothing wrong with it. I see everything wrong with it. When I challenge your premise and offer what I consider real guidance, you back off because it cannot be done that way, and you know it.

Mr. PROXMIRE. Mr. President, I think my time is about up. The Senator from Utah, I understand, has an amendment to my amendment which he will offer. Do I have to yield back time? I guess I do on my amendment for that to be in order.

The PRESIDING OFFICER. All time has to be yielded back.

Mr. HATCH. Mr. President, I wonder if I could ask the distinguished minority manager if he can give me 15 minutes on the bill?

Mr. BELLMON. The Senator is asking time on the bill?

Mr. HATCH. If he could, rather than to call up my amendment.

Mr. BELLMON. I see no objection.

Mr. HATCH. I would also ask unanimous consent that the same be accorded Senator HAYAKAWA immediately following my remarks.

Mr. BELLMON. That will be 15 minutes each or 15 minutes divided?

Mr. HATCH. Fifteen minutes each. I will certainly try to be shorter than that, but I think it might take that time.

Mr. BELLMON. I am glad to yield that time.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. I thank my friend and colleague from Oklahoma.

I rise in support of the distinguished Senator from Wisconsin's amendment, and I associate myself with much of what he said here today.

I notice that once again we have before the Senate a budget resolution with a large deficit and a small tax cut. The reason that spending is out of control is that the Congress does not give as much weight to defending the taxpayer's purse as it does to accommodating the pressure groups and building its spending constituencies. To be sure, few Federal spending programs are entirely without merit. However, the question is not whether the spending does somebody some good, but whether it justifies the higher taxes, added borrowing, or money creation to pay for it.

Apparently, the Budget Committee feels that it is acting responsibly by bringing to the Senate floor a $42 billion deficit in order to accommodate a 9.3-percent increase in Federal outlays over the current high level for fiscal year 1978. Simultaneously, the Budget Committee brings to the floor a tax cut of $15 billion that its own report admits is not a tax cut. I quote from the report:

> The tax reduction of the second budget resolution therefore does not increase fiscal stimulus but simply prevents the revenue side of the budget from becoming more restrictive in fiscal year 1979 than in fiscal year 1978.

I notice also that the budget authority for fiscal year 1979 is more than 11 percent larger than the current level. The Budget Committee has brought to the floor a resolution containing a growth rate in budget authority that is greater than the committee's projected rate of growth in nominal GNP. I would like to point out that the committee's own report states, and I quote: "Budget authority, not outlays, is the real indicator of the trend of Government cost." I see, then, from the committee's report that the real trend of Government cost is at a higher rate than the increase in the growth of the economy.

If we turn to the committee's numbers for the functional categories, we see some truly astounding increases. Between fiscal year 1978 and fiscal year 1979, General Government increases 21 percent in outlays and 14 percent in budget authority; education, training, employment, and social services has a 42-percent increase in budget authority; transportation has a 29-percent increase; agriculture has a 408-percent increase.

Outlays for energy increased 62 percent over last year. And international affairs has a 22-percent increase in outlays and a 31-percent increase in budget authority. Some of the sums represented by these percentage increases are also astounding. At a time when the administration vetoes a defense authorization bill on the grounds that this Nation cannot afford a $2 billion aircraft carrier, the Budget Committee is recommending to the Senate outlays of $41.6 billion and budget authority of $71.3 billion for international affairs for fiscal years 1979–83. I notice that one of the "national needs" addressed by this functional category is, and I quote from the report, "Efforts to improve the quality of life in the developing world." At a time when we are told that we cannot afford national defense or a tax cut, the Budget Committee is able to come up with $49 billion in budget authority and $31 billion in expenditures in its forward planned 5-year budget for foreign economic assistance and financial programs.

I believe we must give equal concern to improving the quality of life in our own country. As the committee's report points out, and I quote, "Neither Congress, the President, nor the public can take comfort from the fact that after 3 years of economic recovery, the Federal deficit remains over $40 billion." We have this deficit in spite of inflation, currently running at 10.4 percent according to the committee's report, which causes Federal tax revenues to increase 1½ times faster than the growth in the economy by pushing taxpayers into higher tax brackets and denying them increases in real income. This same inflation reduces the ability of our economy to grow in real terms because it cuts into capital formation by forcing American firms to pay taxes on costs of production. On this point I want to quote from the committee's report:

> Inflation distorts taxable corporate profits because corporations depreciate capital on the basis of historical rather than replacement costs for tax purposes. During inflationary periods depreciation based on historical costs understates economic depreciation, based on replacement costs, and therefore overstates profits and increases tax liability. Inflation artificially increased corporate profits by about $15 billion at annual rates in 1977 for this reason, resulting in corporate profits tax liability about $6 billion higher than in the absence of inflation.

What the committee report is telling us is that last year firms paid $6 billion in taxes on production costs. That is why rates of return are low and investment is low. With a growing labor force, low investment means low productivity growth, and that means a low growth in real incomes for Americans.

On July 20 Barry Bosworth, Director of the Council on Wage and Price Stability, said that productivity, which increased at a healthy 3 percent annual rate during the 1950's and 1960's, has fallen to about 1.5 percent, half of the former level, in recent years. And this year he said, productivity may not increase at all. He predicted that the productivity growth of the economy "would be awfully close to zero." Mr. Bosworth made it clear that if productivity is not growing, the real income of workers cannot grow either. Mr. Bosworth also pointed out that the lack of productivity growth combined with inflation makes a vicicus circle. Wage increases are eaten up by inflation, which leads to demands for more wage increases, which in the absence of productivity growth are again wiped out by inflation.

In the Budget Committee's report it is stated that the inflation has resulted from supply factors pushing up prices, and the committee report states that since "it accounts for only one-fifth of the gross national product, the Federal Government can neither generate nor eliminate inflation." That is the most fatuous statement I could imagine. The Government is responsible for the deficit and for the overtaxation of savings and investment. It is not possible to discourage investment and to print money to finance our overspending without causing inflation. I ask unanimous consent to have printed in the RECORD a table which vividly demonstrates the harm that the Budget Committee is doing by continually bringing large deficits to the floor in its resolutions. Since 1974 the average output growth rate has been only 3 percent, one-third lower than in the 1960's. Yet the trend growth rate of the money supply has increased 40 to 50 percent. With the money supply growing twice as fast as output, inflation is unavoidable. The resulting high rates of growth in nominal demand mean that a balance-of-payments deficit and a dollar crisis are also unavoidable.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE I.—MONEY SUPPLY AND OUTPUT GROWTH TRENDS

[In percent]

| Period | Output growth rate | Money supply growth rate | | | |
|---|---|---|---|---|---|
| | | $M_1$ | $M_2$ | $M_3$ | Monetary base |
| 1960–68 | 4.5 | 4.3 | 7.4 | 8.0 | 5.6 |
| 1974–78 | 3.0 | 6.3 | 9.5 | 11.4 | 8.3 |
| Change | −33.0 | +47.5 | +28.3 | +42.5 | +48.2 |

Source: Task Force on Economic Policy, House Republican Conference Research Committee.

Mr. HATCH. This is the kind of situation that it is easy to get into but hard to get out of. We go merrily along running up one huge deficit after another, building our spending constituencies, enlarging transfers and entitlements that create more and larger claims to income on the part of people who do nothing to produce income. All the while we are undermining the growth process that creates income. The difference between a dynamic economy and a static economy is found in the growth of capital relative to labor. The growth of capital requires savings. Yet, budget deficits are the antitheses of savings. That we have a $42 billion deficit after 3 years of economic recovery is a clear indication that this Congress has an inordinate appetite for spending. We cannot get away with the argument that we need this $42 billion deficit for the purpose of economic stimulus. If stimulus was all the Congress was after, this $42 billion deficit could represent a tax cut. But it does not. It represents primarily a spending increase.

Why should we be handing out $31 billion in foreign economic assistance when our budget deficits are forcing our corporations to pay taxes on costs? These budget deficits are at the expense of the living standards of American workers. Although some Members of the Congress may fancy that they are representatives of some kind of internationalism, they in fact are not. Nobody in this Congress is elected by the Third World. Everyone of us is elected by Americans. How is it then that we can justify $31 billion for citizens of other countries and nothing for the American taxpayer?

The best way we can benefit the international economy is to get our own house in order. The dollar is an international reserve currency. It is a medium of exchange for international transactions. Foreign interests hold about $600 billion in dollar claims in obligations of the U.S. Treasury and in Euro-dollars. Their willingness to hold dollars is not independent of the rate at which we produce new ones. This year the dollar has dropped about 20 percent in terms of gold, Swiss francs, West German marks, and Japanese yen. The international community is nervous about its dollar holdings.

At a time when foreigners are trying to reduce their dollar holdings, thus driving down the dollar's price in terms of gold and hard currencies, we should not risk making them more nervous by dumping even more dollars onto the $600 billion stock they already have. The deficit in our balance of trade is not independent of our Government budget deficit. When we try to consume more than we produce through budget deficits, the result is an increase in imports. We can expect this $42 billion deficit in this budget resolution to add about $25 billion to foreign holdings. That is an 8-percent increase at a time when the dollar is already slipping badly. The United States is no longer able to legislate domestic budget deficits with no thought to the consequences for the international monetary system. We must face the fact that flight from the dollar will be the result of our inability to curb our spending appetite.

Six hundred billion dollars in liquid dollar holdings abroad is quite a massive external dollar overhang. The potential exists for the rapid unloading of dollars on international currency markets in response to anticipated adverse trends in U.S. economic performance, balance-of-payments position, and the dollar's exchange value.

The administration claims that the problem with the dollar results from our oil imports, not from our domestic deficits. If the administration was right, Germany and Japan would be in even worse condition than we. The fact of the matter is that relative to the size of the economy, the United States has the lowest oil import dependence of any major industrial nation. I ask unanimous consent to have printed in the RECORD at this point a table which shows that U.S. oil imports account for only 24 percent of total

domestic energy consumption, compared to 50 percent for Germany, and nearly 70 percent for Japan.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE II.—RELATIVE OIL IMPORT BURDENS IN 1977 UNITED STATES, WEST GERMANY, AND JAPAN

[In percent]

| | United States | West Germany | Japan |
|---|---|---|---|
| Oil imports as a percent of domestic energy consumption | 24.3 | 49.9 | 69.9 |
| Oil import bill as a percent of GNP | 2.35 | 2.61 | 3.37 |

Source: Task Force on Economic Policy, House Republican Conference Research Committee.

Mr. HATCH. In addition, the drain on national income to finance these imports is far greater in the case of Germany and Japan. Japan's oil import bill relative to the size of its economy is one and one-half times larger than ours. Yet both Japan and Germany have appreciating currencies and balance-of-payments surpluses.

In trying to blame oil imports for the falling dollars, the administration also overlooks that OPEC oil prices were quadrupled in January 1974. The U.S. balance of payments did not shift into a deficit position until the third quarter of 1976, 2½ years later. Furthermore, the volume of U.S oil imports has remained constant since mid-1976, but our balance of payments and the exchange value of the dollar have continued to plummet.

I ask unanimous consent to have printed in the RECORD a table which shows the modest role that increased oil import costs have played in the U.S. balance-of-payments deterioration since mid-1976. During a 20-month period in which the U.S. payments position shifted from a manageable deficit to one of crisis proportions, the rise in oil import costs is responsible for only 17 percent of the increase in imports. The large domestic deficits during this 20-month period meant that we were consuming more than we were producing, the result being that 83 percent of our trade deficit resulted from an increase in nonoil imports.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE III.—ROLE OF OIL IMPORTS IN THE DETERIORATION OF THE U.S. PAYMENTS POSITION SINCE MID-1976

[All figures in billions of dollars at annualized rates]

| Period | Change in import levels | | | Shift in payments balance | |
|---|---|---|---|---|---|
| | Oil | Nonoil | Total | Merchandise | Current |
| 1976:3 | 36.4 | 90.8 | 127.2 | −11.3 | −4.2 |
| 1978:1 | 42.4 | 119.8 | 162.2 | −44.8 | −27.8 |
| Change | +6.0 | +29.0 | +35.0 | −33.5 | −23.6 |

Source: Task Force on Economic Policy, House Republican Conference Research Committee.

Mr. HATCH. The fall in the value of the dollar both at home and abroad and the rapid deterioration in our balance of payments all have their root cause in the large deficits in the Government's budget that the Budget Committee brings to the Senate floor time after time. These budget deficits are the source of our troubles. What we must do is to cut back on future spending by holding budget authority for fiscal year 1979 to $540 billion, as Senator PROXMIRE suggests, and we must hold spending or outlays to $475 billion, as Senator PROXMIRE suggests in the 1978 report of the Joint Economic Committee.

With spending under control, we must provide a real tax cut in order to increase rates of return. We must have higher rates of return in order to increase our capital stock and productivity and in order to attract foreign investment to help offset our trade deficit during the period it takes for the responsible and beneficial economic policies we need to have effect.

I ask unanimous consent to have printed in the RECORD an article by Alan Reynolds titled "Curbing the Federal Spending Spree."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CURBING THE FEDERAL SPENDING SPREE

(By Alan Reynolds)

There is a good deal of justified alarm about the size of the federal deficit, which now looms at $61.4 billion for fiscal 1979, counting off-budget items. Financing it by borrowing from the private sector will drain funds from housing and business investment; printing money will fuel inflation. At the same time, the nationwide clamor for tax relief must be heeded, since the effects of inflation in raising effective tax rates are depriving the private economy of the resources and incentives needed to sustain expansion. The harsh arithmetic suggests that the only effective way to cut both taxes and the deficit is to greatly and promptly reduce federal spending, which is otherwise due to climb by 23 percent in just two years.

Few federal spending programs, to be sure, are entirely without merit. But, in reducing planned expenditures, the question is not whether that spending does somebody some good, but whether it justifies the higher taxes or added borrowing needed to pay for it. Every program should be examined to see whether or not there are more effective ways of accomplishing its intended results, and whether or not those results might not be better accomplished by returning the responsibilities to lower levels of government, or to the voluntary private sector.

If five basic rules of budgetary restraint were applied to the Carter Administration's proposed budget for fiscal 1979, it would be possible to save far more money than most Washington politicians realize or care to admit. The charts on pages 80 and 81 list some $51.4 billion of spending programs that could be sharply curtailed or eliminated with little harm to basic services—and this by no means exhausts the budget-cutting possibilities. The five rules are:

1. Eliminate or reduce subsidies. There is no obvious reason for having taxpayers throughout the nation subsidize services that may not even be available in their own localities. For example, taxpayers in areas not even served by rail finance certain uneconomic passenger and freight services of Amtrak and Conrail through the huge subsidies those corporations receive. And there is ample evidence that using federal money to build hospitals has resulted in excess capacity that has raised hospital costs and fostered uneconomic practices. If a government subsidy is the only way to keep certain cultural activities from shutting down, it should come from state or local governments whose taxpayers actually benefit from them. Consumers pay for farm subsidies in both higher taxes and higher prices, and the higher prices hurt farm exports. There is considerable evidence (including a 1971 Brookings Institution study by Charles Schultze, now chairman of the Council of Economic Advisers) that the benefits accrue to the largest farms and tend to drive up the price of farmland.

2. Eliminate "temporary" programs that no longer serve their purpose. Programs instituted to deal with recession, or other temporary problems, should be terminated within a reasonable period of time. This rule would apply to such items as Emergency School Aid, which became available in 1972 to help finance school integration. There seems to be little justification at this late date for sending money to school districts that are still not in compliance with the Civil Rights Act of 1964. The 725,000 "public service jobs" financed under the Comprehensive Employment and Training Act (CETA) are another example of a permanent emergency measure that favors only a tiny portion of the unemployed. Originally due to expire this year, CETA will apparently be greatly enlarged instead. The temporary jobs are sometimes frivolous, sometimes a source of political patronage, and frequently offered to the least needy of the unemployed. Financing CETA jobs—through taxes, or printing money—tends to displace other public and private employment.

3. Eliminate unnecessary aid to state and local governments. On the general principle that the federal government should not be sending borrowed or printed money to state houses and city halls, the largest single area for potential budget trimming is the $85 billion Washington proposes to distribute in the 1979 budget. General revenue sharing, a major item totaling $6.9 billion, is now a misnomer because Uncle Sam obviously has no surplus revenue to share. Reducing this and other aid would permit a reduction in federal taxing and borrowing, thus making it easier for states and localities to do their own taxing and borrowing.

Among the questionable specific grants to state and local governments is the $4.7-billion aid package to help states and localities construct sewage-treatment facilities. Other grants for the same purpose are available from the departments of Commerce, Agriculture, and Housing and Urban Development. Why should local government compliance with federal water-pollution standards (unlike private compliance) be so generously funded at the federal level?

The matching-grant program for virtually anything that might be called a "social service" got completely out of hand until Congress put a $2.5-billion ceiling on such outlays. That limited abuses but presumably did not end them, nor did it give the program any clearer focus. Community service grants for "innovative" projects are equally vague.

The bills are still coming in for a few notoriously wasteful HUD programs that were wisely discontinued a few years ago. These include "Model Cities," and urban renewal. But the replacement for these programs—community planning and development grants to state and local governments—will devote $2.9 billion to equally nebulous purposes. Consolidating and renaming ineffective programs is not the way to save money.

Federal aid to urban mass transit has fostered some extremely costly and inefficient systems that typically benefit only a few relatively affluent suburbanites. The Bay Area Rapid Transit system in San Francisco and the Washington, D.C., Metro stand as monuments to the waste of such funds. Far more cost-effective solutions to transit prob-

lems include the use of exclusive bus lanes and the easing of local restrictions on taxis and jitneys.

4. Eliminate unnecessary educational programs. Many federal educational programs are just plain redundant or of questionable value. Social Security educational benefits are a good example. Widows receive cash payments to help support sons and daughters up to twenty-two years of age, provided they are enrolled in college; otherwise such payments cease when the children reach eighteen. This kind of educational support is no longer needed, since the government provides many other grants and loans to college students on a more evenhanded basis.

Aid to "impacted" areas, supposedly adversely affected by the presence of federal activities, is another superfluous program; it has long been misused to keep property taxes down in such affluent areas as the suburbs of Washington, D.C. The same is true of the portion of the school-lunch program that aids students who are not poor. We could also do without supplemental opportunity grants to college students, which duplicate basic opportunity grants with less control.

Many studies indicate that the Head Start program of preschool education does not provide lasting improvement in reading achievement. And there are strong reasons for phasing out grants to medical and dental students. Physicians and dentists should finance their own valuable credentials, and loans are available.

5. Eliminate other programs that are dubious in their purposes or effects. Food for Peace has dumped our farm surpluses on developing nations, thus discouraging them from improving their own agricultural productivity. The special supplemental food program is an unnecessary duplication of food stamps; the aid is unevenly available, and over a fifth of the cost is absorbed by administrative expenses. Most Peace Corps and VISTA programs are of questionable value, despite their new name, which is ACTION. The Legal Services Corporation has mainly fostered fanciful class-action crusades.

The agricultural conservation program (REAP) provides small subsidies for loosely defined purposes; the program has been abused (e.g., used to improve the gardens of rural estates) and duplicates others. The WIN program, which trains welfare mothers for jobs, has long been plagued with a very high dropout rate and few lasting placements. Programs such as those of the Economic Development Administration or New Communities Administration that aid development in certain areas must necessarily do so at the expense of other areas that bear the related tax burden. This is a divisive and improper abuse of the federal treasury that permeates many other varieties of federal "aid."

Suppose that only half of the spending in the five tables could be eliminated. The resulting $25.7-billion reduction in the deficit would still permit enough tax relief and easing of financial pressures to improve the economic outlook greatly. Still other savings are possible, however. Indeed, no federal program should be considered sacred or beyond examination.

One example of a program that seems, at first glance, beyond reproach by any humane American is federal spending on the disabled. The federal government alone plans to spend $35.6 billion on various disability benefits in fiscal 1979. Yet the soaring number of recipients of disability payments, and the shrinking percentage who ever recover, suggests that the definition of disability (including such conditions as chronic stiffness, back pain, and drug addiction) may have become too loose.

A promising area for budgetary pruning is the profusion of regulatory agencies and advisory commissions. The price-control activities alone of the $10.1-billion Federal Energy Department, for example, will cost at least $100 million to administer. Decontrolling domestic energy prices would make many other energy outlays unnecessary. The Occupational Safety and Health Administration costs $150 million, and there is no evidence that it has had any favorable effect on job safety or health. There are also numerous apparently superfluous commissions, including the National Center for Productivity and Quality of Working Life ($3 million), the National Institute of Education ($90 million), the Office of Technology Assessment ($10 million), the Advisory Council on Historical Preservation ($1 million), and the myriad regional-development commissions ($3 million).

Another way to save manpower and money is to eliminate duplication and overlap. Do we need an Environmental Protection Agency, a Council on Environmental Quality, and a Temporary Commission on Air Quality? Dumping the latter two could save $7 million. Do we need both a Voice of America and a Radio Liberty? Getting rid of the latter would save $79 million. Antitrust activities of the Federal Trade Commission duplicate those of the Justice Department. And the Council on Wage and Price Stability ($2 million) has apparently become just another agency to blame inflation on fate and private greed, and we already have the Council of Economic Advisers to do that.

The most remarkable thing about these lists of expendable spending is not their size, but the large areas of the budget left untouched. These include such favorite topics of popular ridicule as moviemaking, exotic social-science research projects, and the agencies' self-congratulatory magazines and other public-relations activities. Two enormous programs, making up 47 percent of the budget, emerge completely unscathed in this analysis. These are $119 billion in benefits for the aged and $118 billion for defense. Defense has been left out not because it is untouchable, but because it involves complex technical and strategic considerations that merit another whole article. The Carter defense budget already contains some sensible cuts that Congress has rejected in the past: for instance, reducing active military forces by 25,000, trimming the Naval Reserve, and contracting some housekeeping jobs out to private firms. Efforts to reduce the generosity of military pensions would also be in order, but, like equally necessary reforms of Social Security and civil-service pensions, would not save much money until the 1980's.

Any effort to slow down the increase in federal spending takes considerable political courage. Every dollar spent by the government is, after all, received by someone. Those who benefit from some spending program are easily organized into a political pressure group dedicated to continuing and expanding the program. On the other hand, those who pay the bills—the public at large—remain dispersed and relatively less informed about where their money is going and why.

Spending is out of control because politicians, mainly in Congress, no longer give equal weight to defending the public purse and to accommodating the pressure groups. The main hope of restoring balance—and in steeling the politicians' courage—rests in the the tax revolt now spreading across the country. It also rests in more scrutiny of the budget by independent observers, as has been attempted here.

*Cuttable subsidies*

Spending proposed in fiscal 1979 budget, in millions of dollars:

| | *Million* |
|---|---|
| Amtrak | $660 |
| ConRail | 424 |
| U.S. Postal Service | 1,764 |
| Maritime subsidies | 505 |
| Hospital construction | 739 |
| Airline subsidies | 69 |
| Public power marketing administrations | 163 |
| Farm price supports | 4,276 |
| National Foundation on Arts and Humanities | 238 |
| Grants to museums and public libraries | 65 |
| Total | 8,903 |
| *Interminable "temporary" programs* | |
| Emergency school aid | $305 |
| Comprehensive Employment and Training Act | 11,356 |
| Antirecession financial assistance | 1,050 |
| Local public-works program | 2,001 |
| Cuban-refugee assistance | 52 |
| Total | 14,764 |
| *Questionable grants to State and local governments* | |
| General revenue sharing | $6,852 |
| Sewage-treatment facilities | 4,660 |
| Social services | 2,842 |
| Community services | 558 |
| Community planning and development | 2,864 |
| Urban mass transit | 2,161 |
| Total | 19,937 |
| *Questionable education programs* | |
| Social security education benefits | $1,505 |
| Aid to federally impacted areas | 781 |
| School lunches for nonpoor students | 907 |
| Supplemental opportunity grants | 270 |
| Head Start | 680 |
| Grants to medical and dental students | 604 |
| Total | 4,747 |
| *Other low-priority programs* | |
| Food for peace (Public Law 480) | $1,069 |
| Special supplement food program | 526 |
| ACTION (formerly Peace Corps and VISTA) | 222 |
| Legal Services Corporation | 243 |
| Agricultural conservation program (REAP) | 182 |
| Work Incentive program (WIN) | 365 |
| New Communities Administration | 52 |
| Economic development assistance | 399 |
| Total | 3,058 |

The grand total is $51.4 billion.

The PRESIDING OFFICER. The Senator's 15 minutes have expired.

Mr. HATCH. I ask unanimous consent to proceed for 30 seconds to complete my statement.

Mr. BELLMON. Before I yield any more time to the Senator, I yield myself 5 minutes to ask the Senator a question.

Mr. HATCH. Very well. Let me just ask unanimous consent that the remainder of my speech be printed in the RECORD as though read.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. The U.S. Congress can no longer conduct its domestic spending spree in total disregard of the effects it has on the international monetary system and the exchange value of the dollar. These effects are now too large to be ignored. The spending sprees have definitely weakened the dollar and with it the international monetary system. There is no room in international money markets for any more dollars. The large

depreciation in the dollar that we have already suffered is not going to help our exports, because our domestic prices are continuing to rise. Our trade deficit is not a result of a fall in our exports, but a rise in our imports caused by budget deficits.

Mr. BELLMON. Does the Senator believe that the defense function should be further curtailed?

Mr. HATCH. I disagree with that. I think there are areas in the budget that can be cut. However, I do believe that of the $9.3 billion in reductions in this budget resolution below the figures in the first budget resolution, one-third of that reduction, if I recall correctly, about $3.2 billion, was taken out of defense.

Mr. BELLMON. Does the Senator wish to cut defense further?

Mr. HATCH. I do not know, but I think——

Mr. BELLMON. We have to be specific.

Mr. HATCH. Let me be specific, then.

Mr. BELLMON. How large a cut?

Mr. HATCH. Could I answer the question?

Mr. BELLMON. I wish the Senator would. How large a cut in defense?

Mr. HATCH. I would put it this way: I think there are many areas we can cut as strongly as you have cut defense.

Mr. BELLMON. Let us talk about specifics. We are dealing with a budget resolution in dollars and cents. How large a cut is the Senator recommending in the defense function?

Mr. HATCH. I believe we can cut defense 1 percent.

Mr. BELLMON. That would be $1.2 billion.

Mr. HATCH. That is probably so. But I would want to go into that very specifically.

Mr. BELLMON. Let us get to some other functions.

Mr. HATCH. Let me answer the question.

Mr. BELLMON. The Senator has answered. He wants to cut 1 percent.

Mr. HATCH. No, I have not answered. Let me say what I mean by my answer. I do not mean that defense cuts should be such that we would demoralize our country, but I think that in any huge budgetary expenditure we can find areas not properly administered. I cited with particularity what happened last year when the Budget Committee said, "You cannot cut the budget one ounce," and then Joseph Califano comes out and says there are $7 billion in waste in HEW.

Mr. BELLMON. I want to ask the Senator a question. The $1.2 billion is after the Budget Committee has already recommended a cut of over $2 billion. In social security how large a cut would the Senator recommend?

Mr. HATCH. Let me——

Mr. BELLMON. Let us have some specifics. How large a cut in social security?

Mr. HATCH. I think it is up to the Budget Committee to make the cuts.

Mr. BELLMON. We understand that. We have done our work. How large a cut would the Senator recommend in social security?

Mr. HATCH. I think it is up to the Budget Committee.

Mr. BELLMON. I understand, but I want the Senator's opinion. How large a cut in social security?

Mr. HATCH. I made a suggestion. I have put an article into the RECORD today——

Mr. BELLMON. Let us have the dollars and cents.

Mr. HATCH. I am going to give them. The article is entitled "Curbing the Federal Spending Spree," by Alan Reynolds. He lists a variety of cuts that can be made.

Mr. BELLMON. How large a cut in social security?

Mr. HATCH. I would not cut it a dime.

Mr. BELLMON. How about interest on the Federal debt? How large a cut there?

Mr. HATCH. On the Federal debt?

Mr. BELLMON. The interest on the Federal debt.

Mr. HATCH. That is not going to go down unless we cut the Federal debt.

Mr. BELLMON. So that is zero. That means that of those functions that total $281.9 billion, the Senator has recommended a $1.2 billion cut in defense. This means we have to cut the rest of the budget by $16.5 billion, and there is only $275.8 billion from which to get those cuts. How about energy? There is one that is not an entitlement program. How large a cut would the Senator recommend in energy? The amount there is $8.9 billion. If we took a proportionate cut it would be about $600 million. Does that seem like a reasonable cut to the Senator?

Mr. HATCH. Let me just answer this way: With all due respect to my distinguished friend and colleague from Oklahoma, I will be happy to list the cutable items.

Mr. BELLMON. That is what I am asking.

Mr. HATCH. Then let me list them.

Mr. BELLMON. Let us go through them——

Mr. HATCH. Wait a minute. It is the Senator's job to cut and not mine.

Mr. BELLMON. We have done our job.

Mr. HATCH. No, the Senator has not. You have added 9.3 percent to the actual outlays. You have added to the budget; you have not cut it a dime. Maybe you have cut it from a 15- or 20-percent increase to a 10-percent increase but it is certainly not a cut over last year, so I do not think we should use the term cut. I will be happy to recommend a whole series of cuts if you would like.

Mr. BELLMON. Then let us do that. How much do you recommend in energy? What is the Senator's recommendation in energy?

Mr. HATCH. I would suggest that the Senator read what I have put into the RECORD. I think he can find the information within this article by Alan Reynolds, entitled "Curbing the Federal Spending Spree," in Fortune magazine. He suggests considerably more cuts than Senator PROXMIRE has, and I think we can find within those cuts, within that particular area, enough room to make room for Senator PROXMIRE's reduction.

Mr. BELLMON. I will read the gentleman's article in due time. How large a cut does the Senator recommend in——

Mr. HATCH. To start with HEW, I will recommend $7 billion.

Mr. BELLMON. I will ask the question. How much does the Senator recommend cutting from energy?

Mr. HATCH. I will not play that game. Here is——

Mr. BELLMON. I will not argue further with the Senator, Mr. President, if he does not care to answer the question. The point is that the Budget Committee has to deal with dollars and cents. We cannot deal with theories. We have the entitlement programs, for instance in Agriculture, which we cannot cut any further unless the law is changed.

Mr. HATCH. Can I respond to the Senator?

Mr. BELLMON. The same thing is true in medicare and medicaid, where the law requires that certain entitlements be met. We budgeted $51.9 billion on this. In order to meet the Senator's requirement, we would have to cut $3.3 billion from that.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. BELLMON. I yield myself another 5 minutes. If the Senator would care to respond, for instance, in natural resources, the Senator is a westerner as I am, and represents a State where natural resource development is supported. If we took the 6.4-percent cut across the board for natural resources, that would mean a cut of almost $1 billion. Would the Senator recommend such a cut in that area?

Mr. HATCH. Well, I would say this: The Senator has a 9.3-percent increase in outlays and an 11.5-percent increase in budget authority. That is over last year. Are you telling me that you cannot cut that any further?

Mr. BELLMON. I am telling the Senator if we are going to cut we have to get specific, and I am asking for specifics.

Mr. HATCH. I am not on the Budget Committee. I am saying you added almost 10 percent to last year's actual outlays and 11.5 percent to authorizations.

Mr. BELLMON. How much shall we take from natural resources?

Mr. HATCH. That is up to the Natural Resources Committee, but I presume they will be able to find some areas where they can cut waste. I think Senator PROXMIRE made that quite clear.

Mr. BELLMON. Mr. President, we simply cannot go into this process all over again, after having done what we consider to be the very best possible job, and come up with the kind of money, about $17.7 billion, that this amendment would call for. I consider the amendment to be totally without merit, and I am certain when the votes are cast others will reflect that feeling.

Mr. HATCH. Will the Senator be kind enough to yield me an additional 5 minutes on the bill?

Mr. BELLMON. I have already yielded 15 minutes to the Senator from California, Mr. President.

Mr. HATCH. Will the Senator from California yield 5 minutes to me?

Mr. HAYAKAWA. I am happy to yield 3 minutes to the Senator from Utah.

Mr. HATCH. That will be plenty.

Mr. President, I ask unanimous con-

sent on this particular matter that I may have printed in the RECORD a Wall Street Journal editorial dated July 25, 1978. As I recall, we got into this kind of an approach last year, and I think this particular Wall Street Journal editorial brings out the fallacies that were brought up last year.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BORN AGAIN BUDGET BALANCERS

With pressure mounting in Congress for a tax cut, we are suddenly finding a lot of born again budget balancers.

Treasury Secretary Blumenthal, who earlier this year defended the $60 billion budget deficit, is now busy trying to whip up inflationary concerns about the Steiger amendment by asserting that it would "add $2 billion to the federal budget deficit." To add $60 billion for spending purposes is helpful to the economy, but to add $2 billion for a tax cut is inflationary.

Similarly in the Congress. The Second Budget Resolution for FY 1978 brought to the floor by Sens. Muskie and Bellmon contained a 12.2% increase in federal spending. The $64 billion deficit resulting from this large spending increase was defended as a necesssary stimulus to the economy. In the same breath the same Senators spoke in fiscally responsible tones against Sen. Roth's proposal to amend the budget to provide an $11.4 billion tax cut.

Although "every member of Congress desires relief for the American taxpayer," intoned Sen. Bellmon, "we are equally desirous of balancing the budget and bringing our deficit under control." Down to defeat went the Roth amendment. Sen. Hayakawa then offered an amendment to cut taxes and spending by $11.4 billion. Objections were made to his menu of spending cuts. Down the Hayakawa amendment. Sen. Hatch then offered an $11.4 billion tax cut to be paid for by holding the spending increase to 9.4%. This required only a 2½% cut in the proposed budget and surely, said Hatch as he pleaded for the taxpayer, "there is 2½% waste in every spending program." Not so, said Bellmon. Down the Hatch amendment.

(Shortly after, the Inspector General of HEW reported that HEW alone had "lost" $7 billion in waste, fraud and mismanagement—over 4% of its budget and 61% of the proposed tax cut.)

We get the uneasy feeling from all this that some people become fiscally responsible only when it is time to cut taxes. We wish we could believe that the big spenders, who are increasing government spending at a faster clip than the growth in GNP, have been born again. Such a mass conversion to the ranks of the fiscally sane by so many sinners at once would be nothing short of miraculous. Somehow, though, it doesn't ring true that big spenders are jumping on a fiscal responsibility bandwagon. The Republican efforts to make fiscal soundness a political issue have been unsuccessful for so long that a balanced budget is like a legend from the past. During a period of time corresponding to the median age of the population, Congress has produced $452.4 billion in deficits and $17.2 billion in surpluses. There can only be a few politicians in Washington who can remember the days of the balanced budget. The several generations who have been born into the deficit state must simply take them for granted. After all, they are nothing new.

So why are deficits suddenly alarming to big spenders? We believe the answer lies in the momentum of the Kemp-Roth-Steiger tax rate reductions. Just as conservatives pointed the deficit finger at the growth in spending programs, now that there is a different momentum the big spenders are pointing a deficit finger at the looming tax cuts. What is at issue is not the deficit itself but political power.

A tax cut would reduce the size of government relative to the private sector. It would be an inroad on the power that has been concentrated in Washington, and the prospect of a decline in political clout is not universally cherished. The political careers of many liberals depend on government action replacing private action. Besides, if the tax cut proponents are right and the economy booms, there would no longer be a sluggish economy as one excuse for expanding government.

We would not turn away the truly born again, but before we welcome big spenders to the ranks of the budget balancers we will wait to see if their new-found devotion to smaller deficits applies to restraining spending, or just to preventing tax cuts.

Mr. HATCH. Mr. President, let me say this: It is not my function as a nonmember of the Budget Committee to go down specific items and outline what should be cut.

Mr. BELLMON. Will the Senator yield?

Mr. HATCH. No; I will not yield at this time because I only have 2 minutes remaining. If the Senator wants to yield me some time, I will be happy to yield for any questions he wants to ask. Will the Senator yield 5 minutes?

Mr. BELLMON. I have yielded time to the Senator from California. When he is finished, I will be glad to yield.

Mr. HATCH. Let me finish my statement and I will be glad to answer questions on your time.

Mr. President, I do not think it is my job but the Budget Committee's job. When the Budget Committee comes in and says they have cut taxes when in fact they have increased spending outlays by 9.3 percent and authorizations by 11.5 percent, I do not consider that a tax cut. I think it is up to them to come up with the figures we should cut. Year after year after year we have these deficits. You cannot tell me there is not at least the waste in Government today that Senator PROXMIRE has suggested by his 3-percent cut. I thank the distinguished Senator from California for yielding to me.

Mr. HAYAKAWA. Mr. President, I would also like to speak in favor of the Proxmire amendment. If there is one lesson we should have learned from our constituents in the past few months, it is that they are tired of skyrocketing Government spending.

The committee made some attempt to reflect this attitude by the modest cuts they made from the spending levels in the first concurrent resolution. But they just scraped the surface.

The American people, through the passage of proposition 13 in my State and through tax limitation and spending limitation drives in other States, are telling us that they are ready for massive cuts in Government spending. And I was truly amazed, Mr. President, after all the past rhetoric we have heard about "tight budgets," at the ease and painlessness with which $11.2 billion in budget authority and $9.3 billion in outlays was cut from the levels set in the first concurrent resolution. I think we can cut a lot more before anyone feels any pain.

But, Mr. President, like my colleague from Utah (Mr. HATCH), I am also concerned with the effect the $42.3 billion deficit recommended in this second concurrent resolution will have on the international monetary situation.

(Mr. SPARKMAN assumed the chair).

Mr. HAYAKAWA. In the past, the choices have predominantly been between reducing the burden on our taxpayers versus satisfying the powerful spending constituencies. That is an importance choice, and I have not always been satisfied with our decisions. But we have now reached a much more serious point. We must now choose between satisfying the spending constituencies and the stability of the entire world monetary system. We spend billions of foreign economic assistance. But what will happen to the developing countries if the dollar and consequently the international monetary system collapses?

We are all aware of the recent collapse of the U.S. dollar in the foreign currency markets. Compared to other currencies, the dollar has fallen nearly 20 percent over the last year. This has pushed up prices of raw materials, traded goods of all types, goods in competition with traded goods, and through cost-of-living adjustments, the cost of labor throughout the economy. Much of the increase in the rate of inflation in the last 6 months can be traced to the falling dollar. These spill-over price effects are going to continue to worsen in the months ahead.

The rest of the increased inflation of recent months is due to the expansive rate of money creation of last year brought on by political pressure on the Federal Reserve Board to fund a record peacetime Federal deficit.

Here is the point, Mr. President: These budget deficits, including the one we are going to vote on today, contribute directly to this country's enormous trade deficit, inflation, and the falling dollar.

The United States, as a whole, is running a budget deficit. All of us, as a group—consumers, investors, and Government—are together spending more than the gross domestic product—our total production. And that excess spending creates a balance-of-payments deficit. In other words, we spend more than we earn.

It is not the fault of consumers. Consumers spend only part of their earnings. They save the rest. They save enough to provide $80 billion in investment money each year.

It is not the fault of business. Business saves through retained earnings, and borrows part, but not all, of the money the public saves. Business invests what it borrows to create more production and jobs. In fact, economists of all viewpoints have been disappointed that business could not do more investing in this economic recovery.

The fault lies with the Federal Government. Business and consumers have saved more than they spent and invested. We had a surplus of saving that the Government could borrow and add to taxes to finance Government spending. But the

deficits have been bigger than that. Far bigger. Last year the deficit ate up all of our excess saving and was still $30 billion more, roughly the size of our payments deficit.

When a Government runs a deficit larger than surplus saving, it pushes total national spending ahead of total national production and income. And that means a trade deficit. Only by bringing the Federal deficit under control can we reduce total U.S. demand to levels that match total U.S. income and production.

Last year's deficit was directly responsible for expropriating so much domestic production that it pushed America into a $30 billion trade deficit. To fund that deficit, the Federal Reserve was forced to print money. That lead to inflation.

Foreigners today hold about $600 billion in dollars and dollar bonds. In the same year in which inflation eroded the value of that $600 billion by 6 percent we pushed another $30 billion overseas. With this budget resolution, we will push another $30 billion overseas and erode the value of the more than $600 billion held abroad by 8 to 10 percent with even higher inflation.

As U.S. inflation increases, foreigners find dollars less and less desirable. Not only do they not want an additional $30 billion, they want to reduce their $600 billion present holdings. Thus the run on the dollar.

The magnitude of this problem is much greater than the trade deficit. We now have a full-fledged crisis of confidence. While dollars are flowing out of the United States in the trade deficit, foreigners are also attempting to withdraw capital. However, the accounts must add up to zero. We cannot spend more than we produce without borrowing from other countries. But they have had enough and are calling in even our previous credit. As it is becoming obvious that the United States has surrendered to inflation, the entire $600 billion in dollar assets held by foreigners is losing its value faster than ever, and they are trying to unload it.

Last year, the $30 billion that we added to this amount was absorbed almost entirely by the central banks of Europe and Japan. Their private citizens wanted no part of it. The rest of the capital outflow led to the devaluation of recent months. But instead of humbly accepting this temporary bailout and tightening our belts, we intend this year to continue our profligate ways and hope our friends will bail us out to the tune of another $30 billion. We are becoming the New York City of the world.

How can we handle this problem? Not through currency swaps. They are temporary and have to be repaid. Not through gold sales. We have $55 billion in gold against more than $600 billion in claims. Not with an energy bill that will not produce a drop more oil or gas for at least 5 years when new fields come on line.

The only way to restore confidence in our currency is to fight the deficit in our budget, the deficit in our payments, and the inflation that makes the dollar so unattractive. We can do this with one simple policy step. A vote for this amendment to curb spending and reduce budget deficits can address all of these problems at the same time.

Curbing the growth of spending will help bring the country's total spending into line with its earnings and output. It will fight the trade deficit.

Curbing spending reduces the Federal deficit. This will allow the Federal Reserve to create fewer dollars, while still allowing enough credit for business expansion. This will fight inflation and make the dollar worth holding onto.

A tax cut like the Roth/Kemp bill would also help the situation. By increasing the after-tax rate of return on investment and saving, U.S. investment will become more attractive, reducing the net capital outflow. It would also lead to a greater supply of savings. In fact, the additional saving would exceed any temporary increase in the deficit. The residual would be available to absorb some of the dollars foreigners are trying to shed.

Mr. President, the whole world is watching what we do here today. This is not a routine resolution. And the Proxmire amendment is not just a pro forma protest amendment offered without serious intent. It is in deadly earnest. A vote for this small measure of restraint will reassure our own people and people around the world that we care about the value of the dollar, and that we want economic stability here at home and in world markets. It is a concrete and effective step which gets at the heart of the dollar's problems. It is the only alternative to stopgap measures which the whole world knows to be nothing but a bluff and a device to avoid facing the problem.

Mr. President, I would like to make one final comment about the conventional economic wisdom. The conventional economic thinking of the last few decades is not working. And the American people know it. In California before the vote on proposition 13, all the "economic experts" predicted disaster. The gloomier their predictions, the stronger the support grew for the proposition. It was as if the people were thumbing their noses at the experts. And the people's wisdom is proving to be correct in California today. The real estate market is booming, companies are increasing their expansion plans, predictions for massive job losses are turning into predictions for massive job increases, the projected State surplus is much larger, and the State has found it can help out the localities and still give a $1 billion State income tax cut this year.

I am sure that the conventional thinking would advise against the Proxmire amendment. I say let us keep a good thing going and thumb our noses at the conventional thinking again.

Mr. President, even the administration's economic policymakers are admitting that they cannot understand or forecast the present economic situation. Says Lyle Gramley, a member of the Council of Economic Advisers:

> Our old rules of thumb no longer work, and we haven't been able to develop new ones.

What an admission. Treasury Secretary Blumenthal is quoted in the September 11 issue of Fortune magazine as saying:

> I really think the economics profession is close to bankruptcy in understanding the present situation—before or after the fact.

He admits it. He goes on to say that uncertainties have made the econometric models that policymakers depend on increasingly unreliable:

> I tell the President, when we come to him with predictions about how a certain tax cut will affect unemployment, to listen—then forget it. We can't predict with any certainty what will occur, for the models are as confused as we are about the tradeoffs.

As I have remarked in my minority views on this resolution, the advice of our own CBO has been widely criticized among economists.

Mr. President, it is about time that we throw off the faulty economic thinking of the past. We must accept a new economic wisdom—the economic wisdom of the American people that says we cannot indefinitely spend more than we earn. The day of reckoning has come. We must face up to reality and adopt the Proxmire amendment.

I thank the Chair.

Mr. HARRY F. BYRD, JR. addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. HARRY F. BYRD, JR. Will the Senator from Oklahoma yield the Senator from Virginia 15 minutes on the bill?

Mr. BELLMON. Mr. President, I am happy to yield 15 minutes to the distinguished Senator from Virginia.

Mr. HARRY F. BYRD, JR. I thank the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, I support the pending amendment offered by Senator PROXMIRE, of which I am a cosponsor. It would reduce budget authority by $17 billion.

Senate Concurrent Resolution 104, setting forth the recommendations of the Senate Budget Committee for fiscal year 1979, calls for budget authority of $557.7 billion, outlays of $489.5 billion, revenues of $447.2 billion, with a deficit of $42.3 billion.

While I cannot agree that a deficit of $42.3 billion is appropriate for the coming year, I recognize that the Budget Committee has done a good job in reducing the budget authority by $11.2 billion and the proposed outlays by $9.3 billion below the first concurrent resolution. Furthermore, the committee's figures are substantially below the recommendations of the President.

I commend the committee for these improvements, but I must say that both the first concurrent resolution and the administration's request were much too high.

I must emphasize again, that the pending budget resolution still provides for huge spending increases.

I remain concerned about the size of the budget authority figure. The aggregate total of $557.7 billion is 11.5 percent higher than the level for 1978, the current year. This is more than double the

rate of increase in pay recommended for Federal workers by President Carter, which he called an example.

Interestingly, the President's own mid-session budget recommendations provide for $571.4 billion in budget authority, or 14.3 percent over 1978. They also call for outlays of $496.6 billion, or 10.8 percent over this year. So it seems that the "example" in the Federal Government is to be set only by Federal workers, and does not apply to spending programs.

The rate of increase in spending recommended by the administration is half again as high as its forecast of inflation.

Certainly the Budget Committee has taken a more responsible approach than the administration. But in my view, the 11.5-percent boost in budget authority which it recommends will result in ever-higher spending and more inflation, not just in the year ahead but farther down the road.

For some time, the Budget Committee has been inviting the attention of the Senate to its 5-year projections. Looking at the 5-year estimates in the report of the committee on the pending resolution, I think we can see quite clearly the path down which Senate Concurrent Resolution 104 would lead us.

In budget authority, the level of $500 billion for the current year would rise to $558 billion next year, for an increase of 11.5 percent. In each of the next 3 years, the year-over-year increase would be more than 8 percent.

In outlays, the 1979-over-1978 increase is 9.4 percent. It would be the same for 1980 over 1979, then would dip to 7.3 percent in 1981 and rise again to 8.3 percent in 1982.

In 1983, both budget authority and outlays would go up an additional 7.4 percent over 1982.

Mr. BELLMON. If the Senator will yield for a question, is the Senator using the chart that appears on page 29 of the report; page 29, table 3?

Mr. HARRY F. BYRD, JR. Well, in regard to budget authority.

Mr. BELLMON. And outlays?

Mr. HARRY F. BYRD, JR. And outlays, yes.

Mr. BELLMON. That is the chart the Senator is referring to?

Mr. HARRY F. BYRD, JR. That is the overall chart.

The result of this is that budget authority from 1978 to 1983 would increase by $268 billion, or more than 50 percent.

In outlays, the total would rise from $448 to $669 billion, or just short of 50 percent.

In other words, the course indicated by this resolution will make the Federal Government half again as expensive 5 years from now as it is today.

Nor is this increase entirely due to inflation, in the committee's projections. The average annual increase in the Consumer Price Index, under the committee's analysis, is just over 6 percent, while Government spending increases at an average annual rate of 8.4 percent.

Thus, instead of combating inflation, this budgetary policy would lead the way for it.

I understand all the limitations of the kind of forecasting involved in the committee's long-range projections. I have no intention of holding the committee to its forecasts.

It is the philosophy of these projections to which I want to address myself. In my view, these projections represent tired, outworn, and discredited economic ideas.

When it comes to cost-benefit analysis of Government spending, I think the people are far ahead of Congress.

While the people of California are voting to cut taxes, because they know they are not getting their money's worth for what they are paying, and while the movement to cut taxes and spending is gathering steam all over the country, officials in Washington are slumbering on in the belief that the same old tax-and-spend policies of the last four decades are still appropriate and popular.

In the field of Government finance, the people are far ahead of their representatives in Washington. It is time for Congress and the administration to catch up.

The second concurrent budget resolution calls for a deficit of $42.3 billion. Perhaps more significantly, the report on the resolution projects an even higher deficit—$44 billion—for the following year, fiscal year 1980, and another $30 billion of red ink in 1981.

Thus, the cumulative deficit for the next 3 years would be over $116 billion.

If these projections are correct—and I believe they are, if anything, overly optimistic—the national debt could easily approach a trillion dollars in 1981.

That year—1981—with its projected $30 billion deficit and its possible trillion-dollar Federal debt, was the year that candidate Jimmy Carter promised to balance the budget.

The committee tells us that if all goes well, with no serious recession, we can balance the budget by 1983.

To that I respond: If we pursue the course indicated in this resolution, and follow the same policies in the ensuing years, we shall have high inflation and after that, a very serious recession.

As Senator CHILES stated in his additional views to the committee report on the pending resolution:

> I find it unacceptable to run a deficit in 1980 that is greater than the deficit for 1979. In the fourth year of economic recovery, the deficit ought to be going down—not up. I find it unacceptable to show tax reduction or spending increases of $39 billion in 1982 with a deficit of $13 billion. The Committee expects just to slide down to a balanced budget by 1983 as economic conditions improve.

I do not think we will "slide" toward a balanced budget, or toward a sound economy. If we let matters slide, we shall slide toward disaster.

What we need to do is to stop sliding and start climbing toward fiscal responsibility.

Our hopes for a balanced budget and a strong economy must not be permitted to remain always "somewhere over the rainbow."

We can put our hopes on a sound basis now, if we put the Government's financial house in order.

I was interested to note that the Senator from California (Mr. HAYAKAWA), in his comments a few moments ago, said that the United States is fast becoming the New York City of the world.

For these reasons. I shall support the amendment offered by the distinguished Senator from Wisconsin (Mr. PROXMIRE), of which I am a cosponsor.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 3 minutes remaining.

Mr. HARRY F. BYRD, JR. I yield back the remainder of my time.

Mr. BELLMON. I yield myself 2 minutes.

Mr. President, the Senator from Utah is not in the Chamber, nor is the Senator from California, but I think an explanation is in order as to where the principal areas of growth are and some of the reasons of those large growths.

For example, in agriculture, as has been pointed out, there is a very large growth in budget authority. This large growth is provided in order to give the Commodity Credit Corporation the borrowing authority it needs to conduct properly the price support program of the farm bill. The experience is that every bit of this money, while it has to be loaned out to farmers on their commodities, ultimately will be returned to the Treasury. These are good, solid loans, made on commodities which farmers later will sell, and the money then will return to the Treasury.

So this is not, in effect, a Government expenditure. It simply is a way of operating a program to insure a stable farm economy.

In the education bill, the explanation for the 42-percent growth is that we started with an artificially low base. We had forward funded some of the programs in 1978, so that we had a very low base for that year, and now we are coming back to the more normal level of funding of fiscal 1979. So what looks like a very large growth in budget authority is, in effect, a very moderate growth of about 10 percent.

The health function, where there is a growth of 12 percent, is due to the fact that this is an entitlement program; and unless the law is changed, there is nothing the budget process can do about it. The same is so with respect to the 11-percent growth in the veterans function.

In the area of international affairs, the same practice was followed as was the case with transportation and agriculture. We put the entire function on budget, and $1.8 billion of it was provided to set up the one-time funding for the Witteveen Facility of the International Monetary Fund. There was a recommendation that this be left off budget, but the Budget Committee felt that it was more responsible to put it on budget, and that is why we show that growth.

The point of this explanation is that we feel that the Budget Committee has done the responsible thing by putting all the cards on the table. We could have had a much more attractive resolution if we followed the previous patterns and left some of the items off budget; but the committee is of the opinion—and I endorse it—that we are better off to put the whole Federal spending on budget,

so that we can see where the money is going and make adjustments accordingly.

Mr. President, I reserve the remainder of my time.

Mr. MUSKIE. Mr. President, how much time do I have?

The PRESIDING OFFICER. The Senator has 15 minutes on the amendment.

Mr. MUSKIE. Mr. President, in responding to the distinguished Senator from Wisconsin earlier, I suggested that if it seemed to be the attitude around here that the Budget Committee should administer this across-the-board cut, even though the Budget Committee has done a satisfactory job in what it has dealt with up to this point, we should have some specifics.

I ask unanimous consent to have printed in the RECORD an amendment, which I am not going to offer, but which suggests to Senators where these cuts could be made, function by function. It is a straight 3-percent cut across the board.

Since the approach of this amendment is just that, across the board, without any specifics as to distribution, I think the first attempt the budget resolution should make to implement such a cut, if it is approved by the Senate, is reflected in this amendment.

Therefore, I ask unanimous consent that this proposed amendment be printed in the RECORD, so that members will understand what guidance we would take from such action by the Senate. It would represent a $4 billion cut in defense, and so on. I include it in the RECORD for such guidance as it may be to the Senate.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

On page , line , insert the following:

In lieu of the language proposed by the Senator from Wisconsin, insert the following:

"540,000,000,000.

The 17.7 billion dollar cut provided for in this amendment is to be made in the following categories and amounts:

| | | |
|---|---|---|
| 050: National defense | BA | 123.0 |
| 150: International affairs | BA | 123.0 |
| 250: General science, space, and technology | BA | 5.0 |
| 270: Energy | BA | 8.6 |
| 300: Natural resources and environment | BA | 13.2 |
| 350: Agriculture | BA | 11.8 |
| 370: Commerce and housing credit | BA | 5.3 |
| 400: Transportation | BA | 18.9 |
| 450: Community and regional development | BA | 8.6 |
| 500: Education, training, employment, and social services | BA | 30.6 |
| 550: Health | BA | 50.3 |
| 600: Income security | BA | 185.6 |
| 700: Veterans benefits and services | BA | 20.3 |
| 750: Administration of justice | BA | 4.2 |
| 800: General government | BA | 4.0 |
| 850: General purpose fiscal assistance | BA | 8.6 |
| 900: Interest | BA | 46.6 |
| 920: Allowances | BA | 0.5 |
| 950: Undistributed offsetting receipts | BA | −17.3 |
| Total | BA | 540.0 |

Mr. MUSKIE. The Senator from Utah referred to the fact that this year's budget authority outlay numbers in the resolution are higher than last year's. He expressed complete amazement that that should be the case.

I do not understand his amazement since he made the argument that the big problem was inflation. Inflation has its budgetary impacts. The $41.5 billion increase in outlays between 1978 and 1979 reflects the impact of inflation and of demographics.

Let me explain that briefly. If you were to eliminate the increase, I say to the Senator from Utah, the increase which the Senator criticized earlier today, this is where you would have to cut this budget resolution in outlays in order to eliminate the increase. It would be necessary to cut national defense by $8.5 billion, because that is the amount by which national defense in the 1979 fiscal budget is above that in the 1978 fiscal budget. You would have to cut retirement and disability insurance, which is primarily social security, by $11.2 billion, because it was by that amount that the 1979 budget with respect to those programs exceeds the 1978 budget. You would have to cut health care services, primarily medicare and medicaid, by $4.5 billion for the same reason. You would have to cut interest on the Federal debt by $4.7 billion for the same reason. You would have to cut veterans' programs by $3.4 billion for the same reason. You would have to cut veterans' programs by $1.5 billion for the same reason.

Mr. President, I ask unanimous consent that a table including all programs that would have to be cut in order to reduce outlays in 1979 to the same figure that was established in the 1978 budget be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

EXPLANATION OF $41.5 BILLION INCREASE IN OUTLAYS BETWEEN FISCAL YEAR 1978 AND FISCAL YEAR 1979

($ Billions)

| | Outlays |
|---|---|
| *Estimated fiscal year 1978 outlays* | 448.0 |
| National defense | +8.5 |
| Retirement and disability insurance (primarily social security) | +11.2 |
| Health care services (primarily medicare and medicaid) | +4.5 |
| Interest | +4.7 |
| Energy programs | +3.4 |
| Veterans programs | +1.5 |
| Public service jobs, youth employment, and other employment and training programs | +1.0 |
| Transportation programs | +2.1 |
| Education programs | +1.6 |
| Natural resources and environment programs | +0.9 |
| Farm income stabilization | −1.0 |
| All other programs, net | +3.1 |
| *Recommended fiscal year 1979 outlays* | 489.5 |

Mr. MUSKIE. So, if there is real objection to these increases, then an amendment proposing to reduce these programs by the amounts I have suggested would restore the outlay numbers to the level of the 1978 budget resolution. That amendment would ignore the impact of inflation on old people. It would ignore the impact of inflation on national defense. It would ignore the impact of inflation on interest as well as the contractual obligation that is involved. It would ignore the importance we have all attached to expanding and increasing energy programs.

But apparently all those reasons which to me are very obvious were not obvious to the Senator from Utah and he finds no justification for the fact that in the 1979 fiscal year budget outlays are $41.5 million more than they were in 1978. The table I put in the RECORD explains it. I suggest that if the Senator from Utah is truly concerned about it he might propose an amendment offering to strike $8.5 billion from national defense, $11.2 billion from retirement and disability insurance, and down through the list, and that would get outlays down to what they were in fiscal year 1978.

As a matter of fact, two-thirds of the increase is due to inflation and if we can find a way to eliminate inflation by simply passing a law, adopting an amendment, maybe we will have found a magic answer to the inflation that is plaguing all Americans. We simply eliminate it by an act of Congress which says inflation shall no longer exist subsequent to the passage of this legislation.

In light of the fact we have not been able to find an answer to inflation, we cannot help but reflect its impact on the Federal budget and on the programs to which I have referred, and the Budget Committee has recognized that fact. But if the rest of the Senate feels the Budget Committee has been unrealistic, unwise, or imprudent, in recognizing on a selective basis, and it has been a selective basis, the impact of inflation, why of course, that is the prerogative of the Senate.

But that is the explanation of the difference between outlays between the 2 fiscal years. It is also an explanation for the bulk of the difference in the budget authority figures for the 2 fiscal years. It is a difference that the Budget Committee was unable to ignore and did its best to minimize, but nevertheless, as is the case with every household budget in the country, inflation has had its impact and we see it in this budget resolution.

We express regret about that, but we just accepted the fact that to not recognize the impact of inflation on these programs would impose hardships that Congress would not wish to impose on senior citizens, on the Defense Department, on veterans programs, energy programs, health care programs, transportation programs, education programs, natural resources and environment programs, and so on.

If the Senator thinks we were wrong, then an appropriate amendment could very easily be drafted to strike those differences and to restore the outlay figure to what it was in fiscal year 1978. I could draft such an amendment myself if I believed in it, but I do not. But I am happy to pass that advice along to those who think that budget making is a simple proposition.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER (Mr. MELCHER). The Senator has 3 minutes remaining.

Mr. MUSKIE. I reserve the remainder of my time, or I am ready to yield back my time.

● Mr. DECONCINI. Mr. President, I wish to associate myself with the remarks of my able and distinguished colleague from Wisconsin. His analysis of the issues posed by this budget resolution is dead on the mark. What we are deciding today as we vote on this resolution is the framework of national macroeconomic policy. The outcome will set the parameters within which the details of the Government's economic policy will be implemented. It, therefore, behooves us to take a very close look at what we are being asked to approve in the light of both the current state and major tendencies of our economic system.

The committee is to be commended for its obviously conscientious effort to find responsible ways to hold down increase in Federal spending. Yet, the aggregates recommended, while below both the first concurrent resolution and below those proposed by the President, nevertheless envision additional budget authority over current levels of almost $20 billion. Let us be clear on this point. The second concurrent budget would add almost $20 billion in new spending initiatives to existing policy. To be sure, proposed outlays would be $489.5 billion, almost $3 billion less than current services. However, outlay aggregates are to a large extent a function of spendout estimates. This apparent reduction is thus somewhat deceptive because it means that the additional budget authority included in this resolution will not be manifested until later fiscal years.

I do not believe, Mr. President, that the reductions suggested by my friends on the Budget Committee are sufficiently responsive to emerging economic realities. It is becoming more and more obvious with every passing week that the inflationary forces at work in our economic order, are much more serious and deeply embedded than many, including professional prognosticators, had supposed. Earlier this year, we were hearing reports of a real or underlying rate of around 6 percent. This was certainly no cause for complacency. But just this last week, the Federal Reserve announced the results of a new study which put the underlying rate at over 8 percent. Moreover, the so-called "necessities index"—food, medical care, et cetera—is already well into double digits. The destabilizing effects of inflationary pressures of this magnitude are too well known to bear repetition here. Suffice it to say that the decline of the dollar in world markets. The disappointingly sluggish performance of the capital sector in the current recovery, the relatively modest and declining rate of real economic growth, and the persistence of unacceptably high levels of unemployment can, I believe, all be traced to this perplexing and, apparently, intractable disequilibrium in the price system.

In short, Mr. President, objective economic conditions argue for tougher fiscal restraint than the resolution before us demands. The realities are, unpleasant as it may be to acknowledge them, that we simply cannot afford to sustain new programatic initiatives, unless we are willing to trim back existing programs to make room for them. This is the course I intend to pursue and I want to compliment my distinguished friend for proposing this amendment.●

Mr. PROXMIRE. Mr. President, I am ready to yield back my time.

I understand I have only 2 minutes remaining.

The PRESIDING OFFICER. The Senator is correct.

Mr. PROXMIRE. Let me simply say I do think this is a modest amendment. It does not go back to last year's authorization level. It goes $39 billion above last year. It is 7 percent above last year. It provides for the full amount of inflation on the assumption that inflation is about 7 percent. That is just about what it is.

So, as I say, this is an amendment which I think is modest and reasonable. It is not extreme, and it is an amendment which in view of the overwhelming importance of inflation and the fact that reducing Federal spending is the clearest kind of practical signal we could send the American people, I do hope that the Senate will approve the amendment.

Mr. President, I am ready to yield back the remainder of my time.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is not a sufficient second.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MUSKIE. Mr. President, I yield back the remainder of my time.

Mr. PROXMIRE. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Delaware (Mr. BIDEN), the Senator from North Dakota (Mr. BURDICK), the Senator from Idaho (Mr. CHURCH), the Senator from Mississippi (Mr. EASTLAND), the Senator from Alaska (Mr. GRAVEL), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from North Carolina (Mr. MORGAN), the Senator from New York (Mr. MOYNIHAN), the Senator from Maryland (Mr. SARBANES), the Senator from Tennessee (Mr. SASSER), and the Senator from Illinois (Mr. STEVENSON) are necessarily absent.

I also announce that the Senator from Massachusetts (Mr. KENNEDY) is absent on official business.

I further announce that the Senator from Rhode Island (Mr. PELL) is absent because of illness.

I further announce that, if present and voting, the Senator from North Carolina (Mr. MORGAN), the Senator from Colorado (Mr. HASKELL), and the Senator from Rhode Island (Mr. PELL) would each vote "yea."

Mr. HANSEN. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Massachusetts (Mr. BROOKE), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Nebraska (Mr. CURTIS), the Senator from Oregon (Mr. HATFIELD), the Senator from North Carolina (Mr. HELMS), the Senator from Nevada (Mr. LAXALT), the Senator from Idaho (Mr. MCCLURE), the Senator from Vermont (Mr. STAFFORD), the Senator from Alaska (Mr. STEVENS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The result was announced—yeas 25, nays 44, as follows:

[Rollcall Vote No. 369 Leg.]

So the amendment (UP No. 1813) was rejected.

Mr. ROTH. Mr. President, I would like to engage in a colloquy with the distinguished Senator from Oklahoma, who is the ranking member of the Budget Committee, if he would be willing to yield me time.

Mr. BELLMON. Mr. President, I am happy to yield to the distinguished Senator from Delaware. I yield 10 minutes.

Mr. CRANSTON. Will the Senator yield for a unanimous-consent request?

Mr. ROTH. I am happy to yield.

Mr. CRANSTON. I thank my friend for yielding.

I ask unanimous consent that Karen Mandan and Harold Gross may have privileges of the floor throughout all stages of consideration of the pending measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Will the Senator yield for a unanimous-consent request?

Mr. ROTH. I yield.

Mr. MELCHER. I ask unanimous consent that Wayne Mehl, of my staff, be granted the privileges of the floor during the debate and votes on the pending matter.

The PRESIDING OFFICER (Mr. RIEGLE). Without objection, it is so ordered.

Mr. BELLMON. I ask unanimous consent that Lewis Shuster, of the Senate Budget Committee staff, be granted the same privileges.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. If the Senator will yield, I ask unanimous consent that John Brooks, of my staff, be granted the privileges of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES. I ask unanimous consent that Rick Brandon of my staff, be granted the privileges of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Delaware has the floor.

Mr. MUSKIE. Will the Senator yield for a unanimous-consent request?

Mr. ROTH. I yield.

Mr. MUSKIE. I ask unanimous consent that Tom Dougherty of Senator GLENN's staff be granted the privileges of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROTH. Mr. President, the second budget resolution reported by the Senate Budget Committee provides for a revenue reduction in fiscal 1979 of $23.4 billion. This figure assumes an $8.2 billion reduction to accommodate an extension of existing tax cuts, $14 billion in additional tax cuts and $1.2 billion in miscellaneous tax cuts.

I think it is important to emphasize that the revenue levels envisioned in the second budget resolution will not provide a tax cut for the American people. The $8.2 billion extension of the temporary tax cuts merely avoids an $8.2 billion tax increase. And the $15.2 billion in additional tax cuts will not offset the pending social security and inflation-induced tax increases.

I believe we need a tax cut which provides real tax relief to the American people and I intend to push for the adoption of the Roth-Kemp tax cut in the Finance Committee markup this week.

It is important for the Senate to realize that the Budget Committee revenue recommendation for fiscal 1979 does not preclude the consideration of Roth-Kemp. The $15.2 billion revenue recommendation is slightly smaller than the $17.4 billion first-year cost of Roth-Kemp, as estimated by the Congressional Budget Office. However, there is a wide difference of opinion among economists as to the amount of revenue reflows there will be as a result of across-the-board tax rate cuts. CBO predicts a relatively small reflow of approximately 20 percent in the first year of Roth-Kemp. Other economists such as Chase Econometrics, predict reflows of at least 40 percent in the first year. I believe the reflow from Roth-Kemp would be greater than estimated by CBO, so I do not believe the revenue figures in this second budget resolution preclude enactment of Roth-Kemp.

However, even if we are forced to rely on the CBO figures, the Senate can enact Roth-Kemp by phasing it in more slowly in fiscal 1979 and then more rapidly in fiscal year 1980 and 1981.

Substantial tax cuts are needed now to offset the massive new tax increases the American people are facing over the next 5 years.

According to the Joint Committee on Taxation, the social security and inflation-induced tax increases will amount to at least $283 billion over the next 5 years. Chase Econometrics has estimated these tax increases will total $346 billion over the same 5 years.

According to the Congressional Budget Office, the net revenue impact of Roth-Kemp would be $286 billion over the next 5 years. This is hardly a radical amount when compared to the massive new tax increases we face.

In fact, the 5-year revenue projections in the Budget Committee report provide conclusive proof that the tax reductions of the magnitude I am proposing are needed.

According to the Budget Committee report, significant fiscal policy changes—tax reductions or expenditure increases beyond those reflected in the committee's fiscal year 1979 decisions—will almost surely be required to maintain economic growth through fiscal year 1983.

The committee report also states that "a significant portion of the fiscal policy changes required in later years for continued growth should take the form of tax reductions," not Federal spending increases.

Under this budget resolution, the committee is recommending tax cuts of $14 billion in fiscal 1979, $22 billion in fiscal 1980, $25 billion in fiscal 1981, $29 billion in fiscal 1982, and $33 billion in fiscal 1983.

However, the committee report states that, in order to maintain moderate economic growth, additional tax cuts will be required. These new tax cuts projected by the Budget Committee are $8 billion in fiscal year 1980, $27 billion in fiscal 1981, $39 billion in fiscal 1982, and $54 billion in fiscal 1983.

These tax reductions which the Budget Committee report states are necessary to maintain moderate economic growth are of a comparable magnitude of the Roth-Kemp tax cuts. And according to the Budget Committee's projections, these tax cuts can be enacted and the Federal budget can be balanced by fiscal 1983.

Mr. President, I think that is sufficiently important to repeat: And according to the Budget Committee's projections, these tax cuts can be enacted and the Federal budget can be balanced by fiscal 1983.

Mr. President, I ask unanimous consent that a table comparing the Budget Committee's 5-year revenue projections with Roth-Kemp be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

5-YEAR REVENUE PROJECTIONS

[In billions of dollars]

| | Fiscal year— | | | | | |
|---|---|---|---|---|---|---|
| | 1979 | 1980 | 1981 | 1982 | 1983 | Total |
| Tax cuts in 2d budget resolution | 14.0 | 22 | 25 | 29 | 33 | 123 |
| Additional tax cuts required to maintain economic growth | | 8 | 27 | 39 | 54 | 128 |
| Total tax cuts | 14.0 | 30 | 52 | 68 | 87 | 151 |
| Roth-Kemp | 17.4 | 41 | 67 | 77 | 84 | 286 |

Mr. ROTH. Mr. President, Treasury Secretary Blumenthal has testified before the Finance Committee that additional tax cuts will be necessary in future years. I believe that we must program these tax cuts in advance so that spending programs can be tailored to the available revenues. This process would add the discipline needed to hold down Federal spending and at the same time provide needed tax relief to the American people.

Mr. President, at this time, I would like to ask my distinguished colleague from Oklahoma to clarify the revenue numbers contained in the budget resolution and whether or not these numbers preclude the Finance Committee from considering a multiyear tax cut such as the one embodied in Roth-Kemp?

Mr. BELLMON. Mr. President, I yield myself 10 minutes on the bill to respond to Senator ROTH.

The PRESIDING OFFICER. The Senator is recognized.

Mr. BELLMON. Let me begin by

thanking the Senator from Delaware for his question and congratulating him for having sponsored a tax bill which I consider to be very timely and meritorious.

The committee report on the second budget resolution contemplates a total of $15.2 billion in new revenue reductions below the current law of which approximately $14 billion is foreseen as a general tax cut. This reduction is in addition to the $8.2 billion extension of the temporary tax provisions, as the Senator from Delaware has pointed out. The total revenue reduction below current law is thus $23.4 billion before reflows. Reflows from this reduction are estimated to be about $2.7 billion so the net tax reduction is $20.7 billion and the final revenue floor is $447.2 billion.

The Roth-Kemp Tax Reduction Act of 1978 as presently contemplated is a 10 percent rate reduction for the next 3 years. The gross revenue loss from that reduction for fiscal year 1979 is estimated by the Joint Tax Committee to be $21.1 billion with reflows of $3.7 billion. This is a net tax reduction of $17.4 billion. With provisions for extending the temporary provisions and with other miscellaneous tax provisions, the budget floor in the second budget resolution is thus about $6 billion too tight to permit the fiscal year 1979 first year of the Roth-Kemp proposal.

As I discussed in my additional views in the report and as I talked about this morning in my opening remarks, I feel that a multiyear tax reduction is the appropriate economic policy and that fiscal year 1979 is the appropriate time for its implementation.

I can list many reasons as to why I favor a multiyear approach to a tax cut, somewhat like the Roth-Kemp approach:

First, the economic recovery may be slowing. Recent economic data such as leading economic indicators, manufacturing orders, and balance of trade deficit support this prospect. While the Budget Committee projects a growth rate of real GNP of 4 percent in 1979 the consensus forecast is for a growth rate around $3.1 percent—not fast enough to reduce the unemployment rate below its present level.

In the absence of a multiyear tax cut, like Roth-Kemp, there are likely to be increasing pressures on the financial side of our economy which make the chances of significant economic weakness and rising unemployment much greater. If that economic weakness and rising unemployment occur next year, then the recent fiscal restraint which we have seen will likely dissolve and some form of new short-term spending stimulus will be adopted by Congress. If that occurs, we will reduce the probability of achieving a balanced budget in the immediate future.

Second, real after-tax income will fall due to inflation and other actions. Inflation rates of 6.7 percent for the next 3 years will cause real tax increases of $13 to $14 billion per year because of the progressivity of the individual income tax. Charles Schultze has indicated that the administration now believes the rate of inflation may be closer to 8 percent in 1979, in which case, the drain on incomes would be even greater.

Increases in social security contributions due to increases in the benefit base will amount to $9.8 billion in 1979 and increased payments due to tax rate increases will amount to $3 billion in 1979. The increased burden of corporate taxes due to the overstatement of corporate profits under historic cost depreciation methods will amount to about $4 billion. Economic growth and capital formation are further encumbered by new environmental and safety restrictions, minimum wage laws and other forms of regulation. Large tax cuts will be required to get the taxpayer back toward the average tax burden of the last two decades. The average personal income tax rate in 1964, for example, was 10.5 percent. That burden has risen to an estimated 11 percent in 1978, and will grow to about 15 percent by 1983 unless continuing tax relief is granted.

Third, a multiyear tax cut like Roth-Kemp would help capital formation and thus reduce future inflationary pressure. One of the major problems facing the economy is the lack of a level of capital formation which will provide for future capacity and expand job opportunities. A 3-year tax reduction would stimulate capital formation in the United States. Over the last 10 years, new capital formation in the United States has averaged 2.7 percent annually—the lowest of all industrialized countries. Even Great Britain added new capital at an average annual rate of 3.6 percent over the same period. It is obvious that a large and predictable tax reduction would increase the rate of return on capital.

Fourth, a 3-year tax cut announced now is more effective than three 1-year cuts announced a year at a time. Given the sluggish economy predicted for the next 2 or 3 years by most forecasters, greater economic benefits are derived by enacting a 3-year predictable tax reduction now rather than embarking on an uncertain policy of piecemeal year-by-year tax cutting. In fact, to enact a single-year tax cut in each of the next several years would require a larger overall tax cut than a one-time 3-year cut. Three-year tax cuts, as envisioned by Roth-Kemp, are predictable and consistent with the multiyear budgeting approach introduced by the Senate Budget Committee in its first budget resolution this spring.

Fifth, Roth-Kemp coupled with spending restraint does not have to be inflationary. If one maintains that the current policy level of expenditures shown in the 5-year projections during the budget markup will or should occur, that is, allowing a $200 billion growth in spending over the next 5 years, then and only then, is Roth-Kemp, in combination with that level of spending, inflationary. However, some econometric simulations which couple Roth-Kemp with spending cuts below current policy show that the inflationary effect would be minimal; that is, three-tenths of 1 percent by 1983 in a Chase Econometrics study.

Last, increased savings will help offset any increased deficit occasioned by Roth-Kemp. Because reduced tax rates increase the after tax reward to savings, some additional savings will be generated even in the short run. This will help finance the deficit and, depending upon the amount of induced savings—Chase estimates $69 billion by 1981—will reduce pressures on the monetary authorities to buy Federal debt and subsequently increase the money stock in an inflationary manner. Several studies have shown that an increased rate of return on capital will enlarge the pool of savings available for investment in productive, long-lived assets, and thus increase potential GNP.

A multiyear tax cut like the Roth-Kemp proposal would have us approach fiscal policy decisions in a different way. At present, there is a tendency to set expeditures levels first, and then to look at the possibility of reducing taxes only after those spending decisions have been made. A multiyear tax cut would reverse that procedure. We would start by deciding how much of our national income should be allocated to the government sector and then expenditure levels would be adjusted to conform to that revenue.

By establishing a program of substantial across-the-board tax rate reductions, phased in over several years, some have said that we would be establishing the prior claim of tax cuts over spending increases as a use of future revenues.

Mr. President, I understand that, tomorrow, the Finance Committee will begin markup of the 1978 tax bill. I would hope that they consider a multiyear approach such as that embodied in the Roth-Kemp proposal, for all the reasons I have mentioned. There are a variety of ways in which a multiyear tax bill could fit within the budget resolution floor and I would like to submit the following table as examples of methods by which the multiyear approach could be accommodated.

So, to answer the question that Senator ROTH has raised directly, there are ways in which a multiyear tax cut could fit within the budget resolution, probably not precisely the way Roth-Kemp is presently drawn. But I thank the Senator from Delaware for allowing me to clarify the revenue number contained in the second budget resolution and to express my support for the type of tax cut he and many others have supported for quite some time.

Mr. President, I ask unanimous consent that a table showing the way a phased in Roth-Kemp alternative could be fitted in the budget resolution be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

PHASED-IN ROTH-KEMP ALTERNATIVE I (7%, 7%, 7%, 7%)

| | 1979 | 1980 | 1981 | 1982 | 1983 | 5-yr total |

UP AMENDMENT NO. 1814

(Purpose: To reduce the total new budget authority provided in the resolution by $16.4 billion, the total budget outlays provided in the resolution by $10.1 billion, the amount of the deficit in the budget provided in the resolution by $10.1 billion, and the level of the public debt and the amount by which the temporary statutory limit on such debt should be increased provided in the resolution by $10.1 billion)

Mr. ROTH. Mr. President, I send an unprinted amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Delaware (Mr. ROTH), for himself, Mr. HAYAKAWA, Mr. PROXMIRE, and Mr. THURMOND proposes an unprinted amendment No. 1814.

Mr. ROTH. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 1, line 4, strike all after the words "Budget Act of 1974," and insert in lieu thereof the following: "that for the fiscal year beginning on October 1, 1978—

(1) the recommended level of Federal revenues is $447,200,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is $23,400,000,000;

(2) the appropriate level of total new budget authority is $541,300,000,000;

(3) the appropriate level of total budget outlays is $479,400,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $32,200,000,000; and

(5) the appropriate level of the public debt is $829,400,000,000, and the amount by which the temporary statutory limit on such debt should accordingly be increased is $31,400,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares, pursuant to section 310(a) of the Congressional Budget act of 1974 that, for the fiscal year beginning on October 1, 1978, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050): (A) New budget authority, $127,000,000,000; (B) Outlays, $112,500,000,000.

(2) International Affairs (150): (A) New budget authority, $10,300,000,000; (B) Outlays, $6,300,000,000.

(3) General Science, Space, and Technology (250): (A) New budget authority, $5,100,000,000; (B) Outlays, $5,000,000,000.

(4) Energy (27): (A) New budget authority, $8,900,000,000; (B) Outlays, $8,900,000,000.

(5) Natural Resources and Environment (300): (A) New budget authority, $13,600,000,000; (B) Outlays, $11,600,000,000.

(6) Agriculture (350): (A) New budget authority, $12,200,000,000; (B) Outlays, $7,200,000,000.

(7) Commerce and Housing Credit (370): (A) New budget authority, $5,500,000,000; (B) Outlays, $2,800,000,000.

(8) Transportation (400): (A) New budget authority, $16,200,000,000; (B) Outlays, $16,500,000,000.

(9) Community and Regional Development (450): (A) New Budget authority, $8,900,000,000; (B) Outlays, $9,600,000,000.

(10) Education, Training, Employment, and Social Services (500): (A) New budget authority, $23,800,000,000; (B) Outlays, $28,500,000,000.

(11) Health (550): (A) New budget authority, $49,600,000,000; (B) Outlays, $46,700,000,000.

(12) Income Security (600): (A) New budget authority, $191,500,000,000; (B) Outlays, $156,000,000,000.

(13) Veterans Benefits and Services (700): (A) New budget authority, $20,900,000,000; (B) Outlays, $20,400,000,000.

(14) Administration of Justice (750): (A) New budget authority, $4,100,000,000; (B) Outlays, $4,100,000,000.

(15) General Government (800): (A) New budget authority, $3,900,000,000; (B) Outlays, $3,500,000,000.

(16) General Purpose Fiscal Assistance (850): (A) New budegt authority, $8,800,000,000; (B) Outlays, $8,800,000,000.

(17) Interest (900): (A) New budget authority, $47,800,000,000; (B) Outlays, $47,800,000,000.

(18) Allowances (920): (A) New budget authority, $500,000,000; (B) Outlays, $500,000,000.

(19) Undistributed Offsetting Receipts (950): (A) New budget authority, $17,300,000,000; (B) Outlays, $17,300,000,000.

Mr. ROTH. Mr. President, I have carefully observed the congressional budget process since the enactment of the Congressional Budget and Impoundment Control Act of 1974. My analysis of the process has led me to the conclusion that we need to set limits not only on present spending levels but also on those expenditures which will occur in future years. I had originally decided to offer an amendment to this concurrent resolution which would have effectively set limits on Federal expenditures as a percent of GNP over the next 5 years. Due to questions regarding the germaneness of such an amendment however, I have decided against its introduction. I fully intend to offer, in the near future, an amendment to the Budget Act which will set limits on future spending with appropriate and carefully constructed safety valves which would allow emergency expenditures exceeding congressionally set limits.

In the absence of set budget limits for future expenditures, I am offering an amendment which will reduce fiscal year 1979 budget authority by a total of 3.2 percent and outlays by a total of 2.3 percent.

The amendment I offer today is not, from my prospective, a budget cut. It does, however, slow down the rate of growth in Government spending and it is a real reduction in the growth rate of the budget authority. There are no cuts in the current operating levels of any program. The budget authority provided by my amendment would be sufficient to continue existing programs adjusted for inflation. In contrast, the budget authority recommended in the concurrent resolution is $16.4 billion more than the

amount provided by my amendment, and is 11.3 percent greater than the spending authority granted in fiscal year 1978. Similarly, the committee recommendations contain $10.1 billion more in projected outlays than are contained in my proposal.

Rather than a budget cut, I look upon my amendment as a deficit cut. I believe the lowering of the Federal deficit is a necessity if we are to effectively deal with one of our greatest economic problem today—inflation. My amendment will mean the Federal Government can avoid borrowing an additional $10.1 billion which would be a clear signal to the American people of our commitment to squarely confront the problem of inflation. We simply cannot afford to continue to add deficit on top of deficit and expect our economic problems to be solved. Deficit spending over the last 5 fiscal years will amount to nearly $180 billion and our national debt has nearly doubled since 1970 to an astounding $798 billion. Interest payments on this debt alone are projected to amount to $54.5 billion in fiscal year 1979. And these are costs, I might add, that will be borne by future generations and by all of us in the years ahead.

Mr. President, the American people have made it clear that the burden of paying for the expenses of the Federal Government has become too great. Over 60 percent of them now identify inflation as our Nation's most serious economic problem and they overwhelmingly identify the Federal income tax as being the most burdensome of all the taxes levied in America, even more burdensome than local property taxes. Our Nation's Governors have called on the Federal Government to cut the rate of inflation and reduce the deficit and the leaders of many of our cities have joined them. In short, the American people have demanded that government spending and growth be substantially reduced and they have made it clear that inflation has become a serious problem in their lives.

I believe my amendment will help reduce the rate of inflation by curbing the growth rate of Federal spending and by reducing the size of the deficit. Further reductions in Government spending will occur in programs tied to the Consumer Price Index as the rate of inflation begins to moderate. Programs such as social security, Government retirement and pensions, and numerous Federal contracts and procurement projects will be less costly as inflationary pressures decelerate. The reduced deficit my amendment allows would not only help ease inflationary pressures, it would also lower the amount of credit the Federal Government seeks from private credit markets helping to ease the high interest rates hindering business expansion. Overall, my proposal would stimulate added beneficial side effects in addition to curbing the growth rate of Federal expenditures. And though it may be argued that there has already been a 17-percent cut in the deficit contained in the legislation, and I congratulate the members of the committee for that, I do not believe a deficit of over $42 billion is acceptable when we are in the fourth year of economic recovery, especially considering the fact that the deficit for 1980 is proposed to be even larger than this year's.

Mr. President, I realize the budget committee has reduced the total budget authority by $11 billion compared to the budget authority allowed in the first concurrent resolution. Yet, the total still represents an increase of over 11 percent from the 1978 budget authority granted by Congress. While this increase itself is startling, it pales in comparsion to the tremendous amounts of unused budget authority already existing in the various agencies and departments. According to a recent GAO study, approximately $235 billion of unobligated budget authority is scattered throughout the Federal Government, waiting to be spent at some future date. It is incredible to me that a $57 billion increase in budget authority is necessary in fiscal year 1979 when billions upon billions of dollars of unobligated authority is still available for expenditure from past years. If we are ever going to get a handle on Federal expenditures, over so-called uncontrollable items and over future inflationary spending, we must begin now by reducing budget authority significantly.

My amendment seeks to make such a reduction by cutting total budget authority by 2 percent from the bill's recommended level. Even with the reduction I am proposing, there is still an increase in total budget authority of over 8 percent, an amount which allows for the effects of inflation on Government programs and then some.

The proposal I am offering deals with the deficit problem by cutting outlays for fiscal year 1979 by 2.3 percent from the committee's recommendations. Even with this reduction, outlays will increase by 7 percent over the 1978 figure, an amount greater than the projected rate of inflation. Federal officials themselves say they cannot spend in 1 year the appropriated dollars we give away. Undoubtedly, there will be a shortfall this year as there has been in every year since 1969. According to a recent CBO report, shortfalls recently have averaged nearly $15 billion or 4 percent of projected outlays. It is clear that shortfalls such as these result not from more efficient Government spending practices, but rather from overoptimistic estimates and the upward bias in many agency estimates of requirements and outlays. It is evident to me that with consistently high estimations of outlays and the fraud and inefficiency occurring in many Federal programs, my amendment is appropriate and necessary.

Mr. President, my amendment does not merely cut the total levels of budget authority and outlays contained in the legislation. I have thoroughly analyzed the specific budget levels recommended in each of the functions. Reduced levels of budget authority and outlays are only proposed for those functions in which the committee's recommendations exceed the projected rate of inflation. I have exempted two functions from reductions because of their critical importance to our national security or economic stability.

In the case of agriculture, my amendment exempts that function from any reductions primarily because the outlays provided in the bill are a significant decrease from the fiscal year 1978 figures. I am also aware of the strong Senate support for the price support programs funded under this function and accept the Senate's will in this area.

Mr. President, we must deal with the problem of inflation by cutting back on Government spending. We must begin to gain control of future expenditures and start to deal with inflation on a long-term basis. The American people have shown that they are worried by the twin problems of inflation and Government growth and we must make strong efforts to control both. I believe my amendment is a solid beginning in the difficult struggle we face in both areas.

Mr. President, I will yield.

Mr. BELLMON. Mr. President, I yield myself 5 minutes on the amendment.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for 5 minutes.

Mr. BELLMON. Mr. President, to begin with, let me congratulate the Senator from Delaware for his diligence in attempting to bring Federal fiscal policy under control. It is an effort that needs to be made and I certainly commend him for the diligent way he has pursued this objection, even back to helping develop the resolution which set up the budget process.

Mr. President, while it probably will not give the Senate or the country much comfort, I would like to point out that back in 1970, the year the Senator from Delaware cited, the Federal revenues were $192.1 billion, and at that time our Federal debt was $369 billion. Our revenues, thus, were 52 percent of the debt. The revenues were $192 billion; the debt, $309 billion. I think the revenues were about 52 percent of the debt. In 1979, the year we have under consideration at the moment, our revenues are anticipated to be $447.2 billion and the debt is anticipated to go to $839.5 billion. The revenues then will be 53 percent of the debt. So we are just about in the same ratio of revenues to debt in this new budget as we were back in 1970.

Also, the Senator has called attention to the shortfall problem, and this is one which the members of the Budget Committee are greatly concerned about and which we have tried very hard to deal with, with some small degree of success.

I think it is important to know that until we can find the shortfalls and identify them, it is impossible to remove them. As the budget process has gone on, we have been more successful in finding where these spending shortfalls occur. This new budget resolution makes a greater effort than ever before to eliminate the excess funding, so that shortfalls should be reduced in fiscal year 1979. The budget process has made it possible to identify these shortfalls, and I think this is one of the major attributes of the process that Congress established.

Mr. President, I ask unanimous consent to have printed in the RECORD a table showing where the Roth cuts would be made and the size of those cuts.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

CUTS PROPOSED IN ROTH AMEDMENT

[In billions of dollars]

| | Budget resolution level | Roth level | Cut |
|---|---|---|---|
| I. Total cuts: | | | |
| Budget authority | 557.7 | 541.3 | −16.4 |
| Outlays | 489.5 | 479.4 | −10.1 |
| II. Cuts in specific functions: | | | |
| A. Large cuts: | | | |
| Function 150—International affairs: | | | |
| Budget authority | 12.6 | 10.3 | −2.3 |
| Outlays | 7.2 | 6.3 | −.9 |
| Function 400—Transportation: | | | |
| Budget authority | 19.5 | 16.2 | −3.3 |
| Outlays | 17.5 | 16.5 | −1.0 |
| Function 500—Education and jobs: | | | |
| Budget authority | 31.5 | 23.8 | −7.7 |
| Outlays | 30.2 | 28.5 | −1.7 |
| Function 550—Health: | | | |
| Budget authority | 51.9 | 49.6 | −2.3 |
| Outlays | 48.6 | 46.7 | −1.9 |
| Function 600—Income security: | | | |
| Budget authority | 191.5 | 191.5 | ---------- |
| Outlays | 159.6 | 156.0 | −3.6 |
| B. Small cuts: | | | |
| Function 250—General science: | | | |
| Budget authority | 5.2 | 5.1 | −.1 |
| Outlays | (1) | (1) | ---------- |
| Function 300—Natural resources and Environment: | | | |
| Budget authority | (1) | (1) | ---------- |
| Outlays | 11.7 | 11.6 | −.1 |
| Function 750—Justice: | | | |
| Budget authority | 4.3 | 4.1 | −.2 |
| Outlays | 4.2 | 4.1 | −.1 |
| Function 800—General government: | | | |
| Budget authority | 4.1 | 3.9 | −.2 |
| Outlays | 4.0 | 3.5 | −.5 |
| Function 900—Interest: | | | |
| Budget authority | 48.1 | 47.8 | −.3 |
| Outlays | 48.1 | 47.8 | −.3 |
| C. Functions with no cuts: | | | |
| 1. Function 050—National defense. | | | |
| 2. Function 270—Energy. | | | |
| 3. Function 350—Agriculture. | | | |
| 4. Function 370—Commerce and housing credit. | | | |
| 5. Function 450—Community and regional development. | | | |
| 6. Function 700—Veterans. | | | |
| 7. Function 850—Revenue sharing. | | | |
| 8. Function 920—Allowances. | | | |
| 9. Function 950—Undistributed offsetting receipts. | | | |

[1] No change.

Mr. BELLMON. Mr. President, the table shows that these cuts come primarily in function 500, which is education, in health, and in similar areas where the Budget Committee, in some cases, has attempted to do the thing the Senator from Delaware wants to do. But we have been forestalled, partially by the entitlement program and partially by the fact that, up to now, we simply have not had support for these kinds of cuts when you get down to specifics.

The Senator should know that both Senator MUSKIE and I have worked for similar cuts. But until there is more widespread support for these cuts, we have difficulty getting them put into place.

So, despite the fact that I agree with the objective of the Senator from Delaware, I feel that the Budget Committee already has done a thorough job of examining these programs and has made the cuts as deep as possible at this time. Therefore, I shall reluctantly vote against the Roth amendment.

The PRESIDING OFFICER. Who yields time?

Mr. ROTH. Mr. President, I do not intend to extend the debate indefinitely. However, I wish to make a few observations.

First of all, I congratulate the Budget Committee and the distinguished Senator from Oklahoma and the chairman for what I consider some very real progress being made in our budgetary processes.

I was particularly pleased to see on page 136 of the concurrent resolution on the budget the fact that by 1983 it is the goal of the Budget Committee to have spending or outlays reach 19.9 percent of the GNP. I hope we can stay on that schedule. That was the reason I made some reference earlier to the fact that I intended at one time to offer an amendment, if it had been germane, to help move us along in this direction.

Mr. President, no cut is easy, and we recognize that. What I am trying to say on the Senate floor, and what I hope the Senate will do, is to recognize the extraordinarily difficult situation this country is in.

I know it is difficult to ask the various agencies to hold down the rate of growth sometimes, in view of the actions taken by Congress, but I point out that the same difficulty is faced by the average American farmer. With inflation moving in the direction of double digit—at least, according to some economists—American workers, families, and housewives are finding it extraordinarily difficult to make ends meet. They find no growth whatsoever in their income, as we find here in the Federal budget. Instead, they find that they are, in fact, faced with much less purchasing power, and in many cases they have to lead a reduced standard of living because of what we have done in Washington.

It is my point of view that we should take stringent steps and use restraint in holding down the spending, and I believe that my proposal is responsible. It would hold down, basically, the rate of growth of inflation. We have made no cuts where the departments already have realized that goal. We have made certain exceptions in those areas where there seems to be a critical need, including national defense and energy.

In the case of agriculture, even though I did not support some of these programs, we recognize that Congress has spoken in that area.

So I hope that the Senate will give the signal to the people back home that a very tough effort is being made to hold down the rate of growth in Federal spending.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE. I yield myself 2 minutes.

Mr. President, I think my good friend, Senator BELLMON, has covered adequately the issues raised by Senator ROTH.

I simply make the point that the functions chosen by Senator ROTH, in large part, were very tough battlegrounds within the Budget Committee for getting outlays and budget authority down.

There are four major items on Senator ROTH's list, One is function 400, transportation, where he proposes cuts of $3.3 billion in budget authority and $1 billion in outlays, as I understand it.

I would like to point out that the House Public Works Committee has much higher figures than the Senate Committee on Environment and Public Works. We undertook to protect the Senate Committee on Environment and Public Works in its determination to conform to the budget, but we anticipate a very difficult and prolonged conference between the two committees before the issue is finally resolved, because the difference between the House and Senate figures is very great.

So, I think the numbers we included in the budget resolution, in terms of that conference and the problems it will face, are conservative and supportive of the Senate Committee on Environment and Public Works. We doubt that we could cut another $3.3 billion in budget authority from that function.

Mr. BELLMON. Mr. President, will the Senator yield?

Mr. MUSKIE. I yield.

Mr. BELLMON. Mr. President, the function 400 total BA is $44.7 billion and the highway trust fund is $8.4 billion, which leaves $11.1 billion in that function. So if we undertook to cut by $3.3 billion, this would be a 33-percent cut in that one function, which I think the Senator would agree is unrealistically drastic.

Mr. MUSKIE. The Senator is correct.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MUSKIE. I yield myself 5 minutes, to relieve the time pressure a little.

With respect to function 500—the education, training, employment, and social services function—the Budget Committee had a long, drawn-out discussion and several votes on this function, centering largely around CETA, but also including education, the administration's program of tuition assistance, the refundable tax credits related to the tuition tax credit proposal, and so forth.

The numbers we finally agreed to again, were pretty rockbottom figures, in an attempt to accommodate the diver-

gent views within the Budget Committee on what the total numbers for the function should be.

In my view, a further reduction of $7.7 billion in budget authority in that function would be very difficult to do, depending upon whose order of priorities has to be implemented. It is difficult to accommodate those differences.

Function 550, the health function, is also cut significantly in the Roth proposal: $2.3 billion in budget authority and $1.9 billion in outlays; and we have problems there.

I will say this about the Roth amendment. He has undertaken to be specific with respect to the functions in which he would seek to reduce spending. But these are not going to be easy to reconcile, and I suspect that if we were to try to enforce the numbers reflected in the Roth amendment when the appropriations bills hit the floor we would probably lose some, if not all, of those battles.

I simply make those points of observation to the Senate and to my good friend, Senator ROTH, who is one of the authors of the Budget Act.

I think the Budget Committee, which is always faced with the problem of trying to reconcile divergent and even conflicting views on priorities, did a reasonably balanced job, even though we might individually quarrel with some of the priorities reflected in the final numbers. I simply make those observations.

I think it would be very difficult to get those numbers down much further, and I would not find myself unsympathetic to some of the proposals of Senator ROTH.

I make this final observation. We have undertaken constantly since we discovered the shortfall phenomena in budget work to get the budget resolutions to anticipate more carefully and more precisely possible shortfalls. We are beginning to get some handle on it and, of course, the second resolution reflects the identification of shortfalls in spending. For instance, I think the savings in the second resolution over the first resolution represented by shortfalls is about $5.1 billion.

I emphasize to Senator ROTH that the second resolutions set binding ceilings on spending. They are not a mandate to spend up to those ceilings. I think we are fortunate that Senator MAGNUSON has taken a hard line on appropriations bills and has taken pride in bills which fall below the targets established in the first resolution.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. MUSKIE. I yield myself 2 additional minutes.

The PRESIDING OFFICER. The Senator is recognized for 2 additional minutes.

Mr. MUSKIE. I think we should be careful not to try to anticipate shortfalls to the point where we get our priorities distorted. In other words, we might well be able to save a major portion of the dollars the Senator's amendment addresses itself to but not necessarily in the places and in the priorities that he suggests.

We must keep in mind the fact that we are setting ceilings; we are not mandating spending up to those ceilings. The whole thrust, I think, of the budget appropriations process now is to spend below ceilings and targets, and I think that these amendments on the floor exert very useful pressure. But I think, given the different views about priorities within the committee and given the differences on priorities within the Senate as a whole, the resolution brought to the floor is pretty realistic. It represents a clear signal that we intend to exert budgetary restraints. I think that when the year is over, if the present mood in the country, the Senate, and Congress prevails we will find actual spending in 1979 will prove to be below the ceilings that are stated in the pending budget resolution.

I say that honoring Senator ROTH for his sense of budgetary restraint, but with the feeling that we should not cut any closer to the line at this point, given the fact that we are dealing with ceilings and not mandated spending.

Mr. ROTH. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Chair advises that the Senator from Delaware has 15 minutes remaining.

Mr. ROTH. Mr. President, I yield 2 minutes to myself.

The PRESIDING OFFICER. The Senator is recognized.

Mr. ROTH. Mr. President, one observation I wish to make to the distinguished chairman that has concerned me has not so much to do really with the budgetary process as with the fact that many people back home are confused about the difference between authorizations and appropriations or, in the case of a budget authority and budget outlays.

It seems to mislead many of our people back home, whether they are in education or other fields, that Congress is duplicatious or at least not consistent in what it is doing. It is hard for them in the case of education, for example, to understand why authorizations are much higher than what we appropriate.

One thing that I do think that in the future would be very helpful is if the Senate began to become more realistic in some of these areas so that we do not mislead our people back home into expecting more than they actually secure.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. ROTH. I am happy to yield.

Mr. MUSKIE. What the Senator says is valid comment. Outlays, of course, are not controllable except as we control budget authority. It is budget authority that is actual appropriations. But since budget authority does not all spend out at the same rate—it can vary from spend out in 1 year or spend out in 10 years or spend out in even more years than that, 40 years in the case of housing, for example—it is not possible to equate budget authority and outlays.

I think another factor or another difference between Federal budgets and other budgets that people do not focus on is that the Federal budget excludes capital expenditures. By definition capital expenditures spend out over time. If you had a straight operating budget at the Federal level as we do in our personal lives or in our private businesses, then I think the difference between budget authority and outlays would not be as great and people might have an easier time understanding them.

But the Senator's point is very valid. Earlier I put in the RECORD a table explaining the increase in outlays between fiscal 1978 and fiscal 1979. I now wish to put in a composite table which shows the difference in outlays between fiscal 1978 and fiscal 1979 and budget authority in 1978 and 1979, so that people can get an explanation of where the increases took place.

The increases, of course, are about two-thirds attributable to inflation and in some cases—the national defense, for example—there were real increases dictated by our current view of our national security needs. In other cases, as in social security, demographics produced increases, and I think that a breakdown as between programs may help people to understand why both budget authority and outlays for 1979 are larger than 1978.

Mr. President, I ask unanimous consent that the table be printed in the RECORD. I think it tends to be responsive to the observations that the Senator from Delaware has been making.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

EXPLANATION OF BUDGET INCREASE BETWEEN FISCAL YEAR 1978 AND FISCAL YEAR 1979

[In billions of dollars]

| | Budget authority | Outlays |
|---|---|---|
| Estimated fiscal year 1978 spending levels | 500.0 | 448.0 |
| National defense | +8.9 | +8.5 |
| Retirement and disability insurance (primarily social security) | +13.1 | +11.2 |
| Health care services (primarily medicare and medicaid) | +5.4 | +4.5 |
| Interest | +4.7 | +4.7 |
| Energy programs | +.8 | +3.4 |
| Veterans programs | +2.1 | +1.5 |
| Public service jobs, youth employment, and other employment and training programs | +6.6 | +1.0 |
| Transportation programs | +4.4 | +2.1 |
| Education programs | +1.7 | +1.6 |
| Natural resources and environment programs | +.5 | +.9 |
| Farm income stabilization | +11.0 | −1.0 |
| All other programs, net | −1.5 | +3.1 |
| Recommended fiscal year 1979 spending levels | 557.7 | 489.5 |

The PRESIDING OFFICER. The Senator's time has expired.

Mr. ROTH. Mr. President, I yield myself 1 additional minute.

The PRESIDING OFFICER. The Senator is recognized.

Mr. ROTH. Mr. President, I express my appreciation for the comments of the chairman of the Budget Committee. I also say that I recognize the difficulties that that committee has in making accommodations between the priorities that different Members of this Senate feel very

strongly about. It is just my feeling that these are extraordinarily difficult times. They call for great restraint, and I hope that Congress will show that kind of restraint in an effort to once again get our economy moving upward.

I am ready to yield back the remainder of my time.

Mr. BELLMON. Mr. President, before the Senator yields back his time, will the Senator yield me 2 minutes?

Mr. MUSKIE. Yes.

The PRESIDING OFFICER. The Senator is recognized for 2 minutes.

Mr. BELLMON. Mr. President, I join in complimenting the distinguished Senator from Delaware for having the courage and also for having the insight to be specific in this amendment.

It certainly improves the quality of the debate and makes it possible for the Members to cast their votes on specifics rather than on the general principle of having an across-the-board cut in outlays and in budget authority.

Certainly this is the way we should approach the budget process, and I commend the Senator from Delaware for having taken this approach.

Mr. President, to go a little further in discussing some of the specifics in function 600, CBO's outlays estimates which the Budget Committee uses are consistently below those of the executive branch, which means we are using a more conservative approach than the executive branch uses on these programs.

The proposed $3.6 billion cut in outlays which Senator ROTH suggests would override the judgment of the technical experts at CBO in what these programs will actually cost.

Also, Mr. President, in the health function, function 550, a $2.3 billion cut in budget authority would provide for a 7 percent increase over fiscal year 1978; however, this is less than the health inflation costs, which have averaged about 12 percent over the 4 years. So this means that unless some action is taken to put on a cap or some other similar approach by the authorizing committees we would simply wind up underfunding this program and have to increase the budget later in the year through a possible third budget resolution. I have long been opposed to reopening the budget after Congress completes action each fall on the binding totals in the second budget resolution.

Also the $1.9 billion cut in outlays would provide for an increase of only about 6.8 percent over fiscal year 1978 in the same function. This is also less than the health inflation rate we have experienced in past years which, apparently, we are going to experience in fiscal year 1979.

These cuts recommended in Senator ROTH'S amendment would not allow for the necessary inflationary adjustments in these programs.

The PRESIDING OFFICER. Who yields time?

Mr. ROTH. Mr. President, I would just point out that I recognize, No. 1, the effort to slow down the rate of growth is difficult in many cases. I would, however, point out that there have been a number of these areas, such as HEW, where there has been admitted fraud and waste.

One of my concerns in Government in contrast to the private sector is that there is never any real pressure to improve efficiency. In the case of the private sector when times are difficult, money is not coming in, they are forced to sometimes take very stiff corrective action. We here in Congress, sometimes for good reasons, increase Federal spending when there is a recession, so that we never really do ask the agencies to try to provide services for less. That, in a sense, is what I am trying to propose here.

I am ready to yield back the remainder of my time if the managers of the resolution are willing to yield back their time.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? The Chair is advised that there is not a sufficient second.

Mr. MUSKIE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROTH. Mr. President, I would propose two perfecting changes. In function 500 the budget authority should be $29.5 billion, and we should change the total budget authority figure to $547 billion.

The PRESIDING OFFICER. Since the Senate has not yet acted on the Senator's amendment, the request for those changes is in order. Is there objection? The Chair hears none, and the modifications are made.

The amendment, as modified, is as follows:

Beginning on page 7, line 4, strike all after the words "Budget Act of 1974," and insert in lieu thereof the following: "that for the fiscal year beginning on October 1, 1978—

(1) the recommended level of Federal revenues is $447,200,000,000, and the amount by which the aggregate level of Federal revenues should be decreased is 23,400,000,000;

(2) the appropriate level of total new budget authority is 547,000,000,000.

(3) the appropriate level of total budget outlays is $479,400,000,000;

(4) the amount of the deficit in the budget which is appropriate in the light of economic conditions and all other relevant factors is $32,200,000,000; and

(5) the appropriate level of the public debt is $829,400,000,000, and the amount by which the temporary statutory limit on such debt should accordingly be increased is $31,400,000,000.

SEC. 2. Based on allocations of the appropriate level of total new budget authority and of total budget outlays as set forth in paragraphs (2) and (3) of the first section of this resolution, the Congress hereby determines and declares, pursuant to section 310(a) of the Congressional Budget Act of 1974 that, for the fiscal year beginning on October 1, 1978, the appropriate level of new budget authority and the estimated budget outlays for each major functional category are as follows:

(1) National Defense (050): (A) New budget authority, $127,000,000,000; (B) Outlays, $112,500,000,000.

(2) International Affairs (150): (A) New budget authority, $10,300,000,000; (B) Outlays, $6,300,000,000.

(3) General Science, Space, and Technology (250): (A) New budget authority, $5,100,000,000; (B) Outlays, $5,000,000,000.

(4) Energy (270): (A) New budget authority, $8,900,000,000; (B) Outlays, $8,900,000,000.

(5) Natural Resources and Environment (300): (A) New budget authority, $13,600,000,000; (B) Outlays, $11,600,000,000.

(6) Agriculture (350): (A) New budget authority, $12,200,000,000; (B) Outlays, $7,200,000,000.

(7) Commerce and Housing Credit (370): (A) New budget authority, $5,500,000,000; (B) Outlays, $2,800,000,000.

(8) Transportation (400): (A) New budget authority, $16,200,000,000; (B) Outlays, $16,500,000,000.

(9) Community and Regional Development (450); (A) New Budget authority, $8,900,000,000; (B) Outlays, $9,600,000,000.

(10) Education, Training, Employment, and Social Services (500): (A) New budget authority, $29,500,000,000; (B) Outlays; $28,500,000,000.

(11) Health (550): (A) New budget authority, $49,600,000,000; (B) Outlays, $46,700,000,000.

(12) Income Security (600): (A) New budget authority, $191,500,000,000; (B) Outlays, $156,000,000,000.

(13) Veterans Benefits and Services (700): (A) New budget authority, $20,900,000,000; (B) Outlays, $20,400,000,000.

(14) Administration of Justice (750): (A) New budget authority, $4,100,000,000; (B) Outlays, $4,100,000,000.

(15) General Government (800): (A) New budget authority, $3,900,000,000; (B) Outlays, $3,500,000,000.

(16) General Purpose Fiscal Assistance (850): (A) New budget authority, $8,800,000,000; (B) Outlays, $8,800,000,000.

(17) Interest (900): (A) New budget authority, $47,800,000,000; (B) Outlays, $47,800,000,000.

(18) Allowances (920): (A) New budget authority, $500,000,000; (B) Outlays, $500,000,000.

(19) Undistributed Offsetting Receipts (950): (A) New budget authority, $17,300,000,000; (B) Outlays, $17,300,000,000.

Mr. ROTH. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BELLMON. Mr. President, if the Senator will yield, I ask unanimous consent that Mr. Ed Twilley of Senator THURMOND'S staff, and Mr. Mark Edelman of Senator DANFORTH'S staff have the privileges of the floor during the debate and votes on the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROTH. I yield back the remainder of my time.

Mr. MUSKIE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the yeas and nays having been ordered, the question is on agreeing to the amendment, as

modified, of the Senator from Delaware. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from North Dakota (Mr. BURDICK), the Senator from Idaho (Mr. CHURCH), the Senator from Mississippi (Mr. EASTLAND), the Senator from Alaska (Mr. GRAVEL), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from South Dakota (Mr. MCGOVERN), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from New York (Mr. MOYNIHAN), the Senator from Tennessee (Mr. SASSER), and the Senator from Illinois (Mr. STEVENSON) are necessarily absent.

I further announce that the Senator from Massachusetts (Mr. KENNEDY) is absent on official business.

I also announce that the Senator from Rhode Island (Mr. PELL) is absent because of illness.

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PELL) would vote "nay."

Mr. CURTIS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Massachusetts (Mr. BROOKE), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Oregon (Mr. HATFIELD), the Senator from North Carolina (Mr. HELMS), the Senator from Nevada (Mr. LAXALT), the Senator from Idaho (Mr. MCCLURE), the Senator from Vermont (Mr. STAFFORD), the Senator from Alaska (Mr. STEVENS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

(Mr. SARBANES assumed the chair.)

The result was announced—yeas 35, nays 38, as follows:

[Rollcall Vote No. 370 Leg.]

YEAS—35

| | | |
|---|---|---|
| Allen | Garn | Packwood |
| Bartlett | Goldwater | Proxmire |
| Bentsen | Griffin | Roth |
| Biden | Hansen | Schmitt |

| Johnston | McIntyre | Stafford |
| Kennedy | Moynihan | Stevens |
| Laxalt | Stevenson | Tower |
| McClure | Pell | |

So the amendment (UP No. 1814, as modified) was rejected.

Mr. HARRY F. BYRD, JR., obtained the floor.

Mr. JAVITS. Will the Senator yield to me for 3 minutes for a colloquy without losing his right to the floor?

Mr. HARRY F. BYRD, JR. I yield.

Mr. JAVITS. I thank my colleague very much.

Mr. President, I want to address three questions to the managers of the bill. One relates to the CETA program and the other relates to the elementary and secondary education. The CETA issue involves the following: There is a certain amount of reduction—I believe $1.1 billion in budget authority and $1 billion in outlays—in the amount of the CETA program, as compared with the first budget resolution. I understand that some $500 million of this amount relates to a reduction in the countercyclical public service employment program. All that I want to nail down is whether or not the reduction is attributable to dissatisfaction with the way the program is operating, or is it attributable to the Budget Committee's appraisal as to the prospects for unemployment?

Mr. MUSKIE. May I say to the Senator it is the latter. What the suggested ceiling assumes is a $500 million reduction in funding for countercyclical public service jobs for an average reduction of 60,000 jobs in fiscal 1979, and an actual reduction in countercyclical jobs from 375,000 in the first quarter of fiscal 1979 to 255,000 jobs in the last quarter of that same year. This reduction was assumed in light of improved economic conditions, as we have experienced them. But may I say that while all CETA reauthorization proposals presume a phasedown in light of economic conditions, the Senate bill provides no specific phasedown mechanism, leaving appropriate reductions to the budget and appropriations process. So it is the second answer suggested by the Senator from New York.

Mr. JAVITS. I thank my colleague very much.

The other question related to education where there is in function 500 a very large global figure of over $30 billion. The question is whether or not the reduction in that figure had anything to do with the action which we are taking in the pending education legislation in respect of concentration grants. That is a new approach in the ESEAI program for disadvantaged children. It relates to the high concentration of poor children within a given area. My question is whether or not the calculations for function 500 include the full funding for concentration grants as requested by the President at the $400 million level for fiscal year 1979?

Mr. MUSKIE. We provide for full funding for the President's title I concentration grants.

Mr. JAVITS. I greatly appreciate that response.

Mr. President, in the last week before the Labor Day recess, the Senate passed H.R. 15, the Education Amendments of 1978. Both the House and Senate passed versions containing new provisions to focus ESEA I funds on high concentrations of disadvantaged children. It is very important that the pending budget resolution consider this new aspect of title I. The Human Resources Committee was unanimous in adopting this proposal, which was authored by the administration. During the Senate deliberation of the Education Amendments, Senator MAGNUSON requested the deletion of a trigger which would give a priority to concentration grants. Senator MUSKIE and Senator BELLMON, along with many other Budget Committee members, supported this amendment. The managers of the bill accepted the Magnuson amendment based on his statement at the time that he supports these programs, and that his objection was only to so-called mandatory funding requirements. I ask unanimous consent that this portion of the debate from August 23 be reprinted as it appeared in the CONGRESSIONAL RECORD.

There being no objection, the debate was ordered to be printed in the RECORD, as follows:

UP AMENDMENT NO. 1741

(Purpose: To strike out provisions relating to reservation of funds for section 116 relating to special incentive grants in States having compensatory education programs and section 117 relating to grants for local educational agencies in counties with especially high concentrations of children from low-income families)

The PRESIDING OFFICER (Mr. MOYNIHAN). The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Washington (Mr. MAGNUSON) proposes an unprinted amendment numbered 1741, for himself and Mr. MUSKIE, Mr. PROXMIRE, Mr. HOLLINGS, Mr. CHILES, Mr. BURDICK, Mr. BELLMON, Mr. DOMENICI, Mr. YOUNG, Mr. STEVENS, Mr. SASSER, Mr. ABOUREZK, Mr. SCHMITT, Mr. JACKSON, Mr. MORGAN, Mr. DECONCINI, Mr. HANSEN, Mr. BARTLETT, Mr. HUDDLESTON, Mr. ZORINSKY, Mr. STENNIS, Mr. PAUL G. HATFIELD, Mr. MELCHER, Mr. BUMPERS, Mr. HODGES, Mr. BAYH, and Mrs. ALLEN.

Mr. MAGNUSON. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 107, strike out lines 5 through 13.

On page 15, in the Table of Contents, strike out item "Sec. 194.".

Mr. MAGNUSON. Mr. President, I have a series of amendments I would like to call up at this time.

The first amendment would delete section 194 of the bill. Section 194 reserves the first $400 million appropriated for title I, education of the disadvantaged, for concentration grants, and requires that State compensatory education programs, once funded, must continue to be funded at least at the preceding year's level. It makes it mandatory, regardless of whether these programs are good or bad. I have no objection to these new program components. In fact, I support them. I have supported them in the Appropriations Committee over the past few years.

I do believe that the mandatory funding

requirements would create problems for the Appropriations Committee. If this section stays in the bill, it would mandate an additional appropriation of at least $400 million for title I in fiscal 1979.

I hope the amendment will be accepted by the managers of the bill.

Mr. JAVITS. Mr. President, I am going to accept the amendment offered by the Senator from Washington (Mr. MAGNUSON), but I do wish to make one thing clear.

First, Senator MAGNUSON has stated that he approves of the concept which went into the committee's amendment, and his action represents the desire of the Appropriations Committee's freedom of action, with which we cannot disagree.

I believe it is important that the Senate be fully apprised of the committee's thinking when inserting section 194. The new concentration grants were designed to repair a very difficult problem in the title I program. Oversight and testimony in the Human Resources Committee demonstrated that the greatest single difficulty with title I was the fact that high concentrations of children in rural areas and children in urban areas were not receiving sufficient funds to make the title I program work effectively. The concentration factor is an attempt to compensate for the severe difficulties of title I children in areas where they are literally "concentrated" in large number. It is a proposal of relatively modest cost to compensate for the fact that title I remains several billion dollars below its full authorization.

The Human Resources Committee has experienced a mixture of success and disappointment in the results of spending decisions by the Congress. Some programs have done quite well while other meritorious programs are significantly underfunded. We recognize the difficulties facing any committee in dealing with spending decisions, and I appreciate greatly the tremendous workload and difficulties which the Appropriations Committee faces each year. They do a remarkable job.

I point out that the administration has requested the concentration grants and the State incentive program and has requested in fiscal 1979 the very $400 million appropriation to fully fund the concentration grants which the bill contains. So we endeavored to insure that these moneys would be given high priority.

I understand that Senator MAGNUSON, the chairman of the Appropriations Committee, as well as several senior members of the Budget Committee, are strongly inclined to favor the full $400 million spending in fiscal year 1979, and make appropriate allowances in the next supplemental appropriation and in the second concurrent budget resolution. This achieves the desire of the Human Resources Committee expressed in section 194 of S. 1753, that the new concentration grants would receive favorable treatment. We believe that section 194 does not force any appropriations. Rather, it simply puts a priority on the concentration grants. This is not an appropriation forcing device, rather it is simply a statement of Human Resources Committee views as to the principal importance of beginning the concentration grants program in 1979.

Based on the assurances of support from Senator MAGNUSON and others, I am comfortable in accepting his amendment to strike 194 from this bill.

Mr. MAGNUSON. I appreciate that. They do have high priority in the Appropriations Committee.

Mr. JAVITS. A third matter I wish to raise concerns the adequacy of new budget authority to fund the employment and training programs enacted under the Youth Employment and Demonstration Projects Act (P.L. 95–93) last year. We in the Human Resources Committee contemplated an annual program level of $1.5 billion per year for these programs.

I have become deeply concerned by recent indications that YEDPA programs may be restrained from reaching and maintaining the $1.5 billion level. I refer particularly to the recent Labor Department field memorandum, No. 327–78, which directed prime sponsors to adjust program operations so as to expand only 73 percent of fiscal year 1978 dollar levels provided.

I wish to know from the distinguished managers of the bill whether the function 500 ceiling for budget authority contained in the resolution before us today is sufficient to permit outlays of $1.5 billion in fiscal year 1979 for the YEDPA programs? And, further, is $1.5 billion per year the program level the Budget Committee assumes for YEDPA?

Mr. BELLMON. We have maintained the policy of $1.5 billion per year available for youth programs.

The reduction of $100 million in BA and outlays is just an adjustment, because we had more carryover than had been projected at the time of the first resolution.

If the $1.5 billion is spent, prime sponsors will have to double activity levels over this year.

Mr. JAVITS I thank my colleague very much. I thank the Senator from Virginia very much for his courtesy.

UP AMENDMENT NO. 1815

(Purpose: To reduce budget authority by $2.4 billion)

Mr. HARRY F. BYRD, JR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Virginia (Mr. HARRY F. BYRD, JR.) proposes an unprinted amendment numbered 1815:

On page 1, line 11, strike "$557,700,000,000" and insert in lieu thereof "$555,300,000,000".

On page 2, line 23, strike "$12,600,000,000" and insert in lieu thereof $10,200,000,000".

Mr. HARRY F. BYRD, JR. Mr. President, I yield myself 10 minutes.

The PRESIDING OFFICER. The Senator is recognized for 10 minutes.

Mr. HARRY F. BYRD, JR. Mr. President, I cosponsored with Senator PROXMIRE an amendment to Senate Concurrent Resolution 104 which would have reduced aggregate budget authority by $17.5 billion. I also supported the amendment offered by the Senator from Delaware (Mr. ROTH), which would have reduced aggregate budget authority by approximately $16 billion.

I had another amendment somewhat similar to that of the Senator from Wisconsin, although it was more specific, and somewhat similar to the amendment offered by the Senator from Delaware, although it was not as broad. Both of those amendments, one by Senator ROTH and one by Senator PROXMIRE, were voted down by the Senate.

This amendment deals with a single budget function; namely, function 150, international affairs.

First, let me say this: I realize, of course, it is the aggregate budget authority in the budget resolution that is the key figure, because it is binding, unlike the totals for the individual functions, and because it affects spending not only in the current year, but in years to come.

The proposed amendment, the one before the Senate now, would reduce the total budget authority by $2.4 billion in the current resolution and would, simultaneously, reduce function 150 by $2.4 billion.

I focused upon the international affairs function, because I think it is singularly inappropriate to approve the large increase in foreign assistance embodied in the Budget Committee's recommendation.

The committee proposes an increase of $3 billion in international affairs, from $9.6 billion in the current fiscal year to $12.6 billion for fiscal 1979.

Mr. President, this represents an increase of 31.2 percent.

This rate of increase is almost triple the rate of increase for the budget as a whole. It is more than five times the rate of increase in pay for Federal workers which President Carter is recommending; namely, 5.5 percent—and which he calls an example to the Nation. I submit that such an increase as 31.2 percent in spending for international affairs—foreign aid, if you will—cannot be justified.

My amendment now before the Senate would reduce budget authority for international affairs by $3.2 billion. There would still be an increase in that function, however, an increase of 6.2 percent over 1978. I feel it is way out of line to vote an almost one-third increase in the international affairs function at a time of huge deficits and high inflation. I hope that the Senate will adopt the proposed amendment.

Mr. HANSEN. Mr. President, will the Senator from Virginia yield?

Mr. HARRY F. BYRD, JR. I yield to the able Senator from Wyoming.

Mr. HANSEN. Mr. President, it seems to me that the Senator from Virginia has made a very responsible and reasonable proposal to the Senate. I think his comparisons that illustrate the percentage of budget increase in this year's budget in this specific area as compared with the overall budget, certainly call attention to the reasons for and the good sense in the proposal that the Senator from Virginia has offered. I hope very much that it might be adopted. I intend to support it.

Mr. HARRY F. BYRD, JR. I am very grateful to my friend from Wyoming for his comments.

I think another important aspect of this is that the unobligated economic aid, namely, funds appropriated to the President and unobligated at the end of this fiscal year, will equal $11.3 billion. That is, funds already appropriated. They are in the pipeline, unobligated funds. They

will equal $11.3 billion and the proposal before the Senate today is to add another $12.6 billion.

I reserve the remainder of my time.

Mr. MUSKIE. Mr. President, the Senator from Maine thinks this exercise is becoming a semiannual one between the distinguished Senator from Virginia and myself. First of all, let me address the percentage figures that the Senator has yielded. The increase in budget authority from 1978 to 1979 was $9.6 to $12.6 billion, which is $3 billion. Percentagewise, that is a large increase. Curiously, the bulk of that increase is related to a mandate of the Budget Act: To put proposed spending on budget where it can be controlled by the appropriations process.

The major part of that $3 billion increase is $1.8 billion for the Witteveen Facility to support countries having balance-of-payments problems related to costs of energy and energy imports. It is a facility which we agreed to create with other industrialized countries and with the OPEC countries. At the time, it was pretty widely hailed as a reasonable and wise reaction to the balance-of-payments problems generated for relatively small countries, particularly, who are in no position to fund the increases in energy costs. The struggle all year long has been between those in the administration who would prefer to have this facility off budget and thus outside the control of the appropriations process, rather than on budget and subject to the appropriations process; and those of us who are responsible for administering the budget process in Congress. We were determined that this Witteveen Facility would go on budget and, being on budget, it adds to the total by the amount that the Senator from Virginia finds unacceptable.

We cannot have it both ways: Enforce the budget process in accordance with its explicit terms and thus reveal the amount of money that is involved in the budget; or ignore the budget process and let the administration have its way by going off budget and creating another one of those problems that we have all come to find distasteful. If you take the $1.8 billion out of the three, that leaves $1.2 billion, which is roughly a 12-percent increase.

Mr. President, may I suggest the absence of a quorum?

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, I am happy to yield to my good friend from Oklahoma.

Mr. BARTLETT. I thank my distinguished friend from Maine.

Mr. President, I ask unanimous consent that Mike Roush of my staff be granted privilege of the floor during voting and the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Will the Senator yield?

I hate to break the continuity of this, but I need to go to another place and I have three questions to ask, if I may.

Mr. MUSKIE. I am happy to yield. I am awaiting some further information. In any case, it will be a respite and I yield to the Senator.

Mr. BUMPERS. Fine.

In looking over the information, the summary of the second budget resolution I find on my desk, I see that the Budget Committee has in the second concurrent budget resolution projected now a deficit of $42.3 billion, or 30 percent less than the President's original estimate, which I believe was $60 billion.

Is that correct?

Mr. MUSKIE. That is correct.

Mr. BUMPERS. The committee has also taken into consideration, in arriving at the $42 billion deficit, a $23.4 billion tax cut?

Mr. MUSKIE. The Senator is correct. That includes continuation of the temporary tax cut, to continue each year now for 3 or 4 years, $8.2 billion.

Mr. BUMPERS. In addition, this is a $23-some billion cut in addition to the temporary tax cut?

Mr. MUSKIE. No. It includes the $8.2 billion.

Mr. BUMPERS. Very well. My question is, if we left the present temporary tax cut in effect and did nothing toward enacting the House bill, for example, that figure would be roughly $15 billion in savings.

Is that correct?

Mr. MUSKIE. Fourteen billion dollars plus $1.2 billion in structural tax changes that we anticipate.

Mr. BUMPERS. Right.

Mr. MUSKIE. For a total of $15.2 billion.

Mr. BUMPERS. So if we left everything status quo, and I realize there is some variation, because economic activity might be reduced or stimulated, one way or the other, but, just on the face of it, if we did not pass the tax proposal the House already passed and we did nothing except leave the present temporary tax cut in effect, we could trim another, roughly, $15 billion off the $42.3 billion.

Is that correct?

Mr. MUSKIE. It would be something below that. I will try to get the figure.

The net gain, may I say to the Senator, would be on the order of $11 to $12 billion.

Mr. BUMPERS. Is that because of the reduction in economic activity as a result of not enacting the tax cut?

Mr. MUSKIE. The Senator is correct.

Mr. BUMPERS. That is very good, because that answers the question.

Finally, I take it that the present resolution has not taken into consideration the possible sustaining of the President's cut of $1.9 billion for the aircrcaft carrier?

Mr. MUSKIE. The President vetoed the authorization bill. The aircraft carrier, as I understand it, is included in the Defense Subcommittee's markup of the defense appropriation bill, which has not yet been reported in the Senate. The subcommittee's recommendation does not violate either the targets set in the first budget resolution or the ceilings established in the second budget resolution. That, of course, raises some of the issues the President used as reasons for vetoing the authorization bill. In other words, the carrier was funded, or is proposed to be funded, by the Appropriations Committee.

Mr. BUMPERS. In the authorization?

Mr. MUSKIE. As a substitute for other defense expenditures in the appropriation request that the President thinks are more clearly related to our present defense requirements than the carrier.

The defense appropriations bill that the Appropriations Committee is considering will implement many of the items in the authorization bill. It will be within the budget, even though it includes funding for the nuclear carrier.

I want the Senator to understand that the full amount of budget authority for the carrier would be in this year's budget, but that first year outlays associated with the budget authority would be minimal.

Mr. BUMPERS. The budget authority was $1.9 billion. I suppose the appropriation will probably be $300 million to $400 million, I am not sure, in fiscal year 1979.

In any event, the Budget Committee has taken into consideration the authorization which, as the Senator says, did not violate the first concurrent resolution.

Mr. MUSKIE. The Senator is correct.

Mr. BUMPERS. I thank the Senator very much.

Mr. MUSKIE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, let me make these further observations with respect to the Byrd amendment.

In the first place, the second budget resolution as reported by the Budget Committee already has cut $200 million from the level of the first budget resolution.

The second point I would make is that the second budget resolution actually cuts $1 billion from the President's request for foreign economic assistance and financial programs.

Third, the amount in the resolution is, roughly, the amount already appropriated by the House of Representatives. It represents only a slight increase.

Further reductions in these programs would threaten to end effective U.S. participation in multilateral development banks which we have come to encourage

in recent years as a wise substitute for unilateral aid, whenever possible. These banks generate $3 from other donor countries for every $1 provided by the United States.

Now, with respect to the $3 billion increase to which the Byrd amendment addresses itself, let me give the Senate the details of that $3 billion.

One billion eight hundred million dollars is for the Witteveen Facility, which I have already explained, and the Senate has spoken on that explicitly with respect to approving on-budget rather than off-budget treatment of that facility.

Six hundred million dollars is for the foreign military sales trust fund, reflecting increased sales to Saudi Arabia, Iran, and other countries.

Four hundred million is both for partial funding of our arrearages in multilateral banks out of a total of $800 million in arrearages which we now owe, and for real growth in our bilateral aid programs. Two hundred million dollars is for inflation and pay raises.

Those are the details, Mr. President, of the amounts that the Byrd amendment would strike from this function. I think it would represent a serious blow to the Witteveen Facility and the concept of on-budget treatment.

The foreign military sales program has been of great importance to us in maintaining our presence and influence in the Middle East with countries such as Iran and Saudi Arabia.

The arrearages which we owe the multilateral banks have been the subject of extensive discussion in the past on this floor between the distinguished Senator from Virginia and myself, and I do not think that subject needs further amplification at this point.

The other two items are not as large, but they are equally important.

That is the sum and substance of it, Mr. President. There has been an effort, as I emphasized to the committee, to cut this function below the President's request, below the first concurrent resolution, and I think the Budget Committee was satisfied with the figures finally approved.

So I urge the rejection of the Byrd amendment.

Mr. HARRY F. BYRD, JR. I yield myself 5 minutes.

First, Mr. President, the Senator from West Virginia (Mr. RANDOLPH) has requested that his name be added as a cosponsor of the pending amendment, and I ask unanimous consent that that be done.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Mr. President, I think what the Senate needs to decide is whether it is wise to increase foreign aid spending by $3 billion. There are many Senators, of course, who think it is wise. The Senator from Virginia happens to disagree. I do not believe that it is reasonable at this time, when our Nation as a whole is being asked to respond affirmatively to measures designed to hold down inflation, that Congress should increase foreign aid spending by $3 billion. I point out that the total foreign aid spending under the concurrent resolution will be $12.6 billion.

In regard to the Witteveen Facility, that is a new program. It is not now in effect. It is an entirely new program. It has been neither off budget or on budget. It is an additional, new program costing $1.8 billion, and that is piled on top of all the other foreign aid programs.

Another point needs to be emphasized, Mr. President: There is in the pipeline now, available to the President, an unobligated balance of $11.3 billion for foreign economic aid. This concurrent resolution would provide for an additional $12.6 billion. The amendment now before the Senate would seek to reduce this substantial increase by $2.4 billion. I think it is reasonable and is something that the American people would feel is reasonable.

How are we ever going to get Government spending under control if in this year of 1978, this year of high inflation, we adopt a budget resolution in the Senate providing for a 31-percent increase in foreign aid?

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. HARRY F. BYRD, JR. I am delighted to yield to my colleague from Virginia.

Mr. SCOTT. Mr. President, I appreciate the Senator yielding, and I associate myself with the remarks my distinguished colleague from Virginia has made.

It is often said with respect to foreign aid that the recipients of Federal funds have no constituency. Oftentimes, we vote on matters in which the people we represent have a direct interest, but that is not true of foreign aid.

I have taken polls during the 12 years I have been in Congress to see how the people of Virginia felt with regard to foreign aid. I posed the question whether they felt that foreign economic aid should be eliminated or reduced. In each instance, 90 percent or more have indicated that they felt that the foreign aid either should be eliminated or reduced.

So I think the distinguished Senator is representing the will of the people of Virginia and, in my judgment, the will of the people of the entire Nation, with the amendment he has offered.

We know about proposition 13. People want to pay less taxes. How do you pay less taxes unless you reduce spending? If you are going to increase spending and not increase taxes, you are going to have a larger deficit, and you are going to have more inflation, and the money that the people have will be worth less.

So I commend the distinguished Senator, and I associate myself with his remarks. I mentioned to him a few minutes ago, privately, that it is only $2.4 billion and that perhaps it should be $4.8 billion. I do not know what the amount should be. But I feel that the people of the country want less foreign economic aid, and I believe that the distinguished Senator is on very solid ground in the amendment he offers. I hope it will be approved. Certainly, I will vote to support it.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HARRY F. BYRD, JR. I yield myself 5 additional minutes.

Mr. President, I thank my friend from Virginia.

I invite the attention of the Senate to page 75, "Special Analysis C," of the 1979 budget. It shows that as of September 30 of this year, the President will have available to him, for economic aid, funds appropriated but not obligated in the amount of $11.3 billion. Yet, this proposal is to add another $12.6 billion.

Mr. MUSKIE. Mr. President, first of all, let me make clear to my good friends from Virginia that they are no more aware than I am that there is no constituency, not any votes, in this country in the foreign aid function. That is largely because most people—I will speak of my State, and the Senators can speak of theirs—have no exposure to the human conditions or to the national security problems which influence our responsibilities as a world leader. Most people have no exposure to the circumstances of those foreign problems that we have or that the President has or that our representatives overseas have.

To most citizens, foreign aid means that we are just handing out to individuals in other countries, who do not appreciate it, gifts of dollars. That is a very common impression. Of course, there are no votes in it.

I recall that when I first campaigned for the Senate, campaigning extensively on the importance of the United States using its role as leader in the world to try to influence the affairs of mankind for the better, by using the resources available to us, I won a rather overwhelming victory. That is not to say that I sold foreign aid as such.

It is an easy whipping boy, an easy scapegoat, and I am fully aware that I do not gain a vote by standing here and opposing the amendment of the distinguished Senator from Virginia.

But since Senators keep making the point, I thought they should understand that I am in full agreement with them on the lack of popular support for foreign aid.

Second, the $11 billion to which Senator BYRD refers is mostly callable capital, in the form of guarantees, and the multilateral banks involved have never called for a single dollar of that money. It has never been expended. It is on the Treasury books, and it is not available to the President, by and large, for the purposes to which I have referred in my response to the amendment of Senator HARRY BYRD. It is not available for the Witteveen facility, not available for the foreign military sales trust fund, not available for the bilateral program, and not available for salary increases to meet the cost of inflation. The $11 billion is simply not available for those purposes.

It is mostly callable capital. It will remain as callable capital which has never been called by the banks.

We should at least understand the distinction between callable capital and the unobligated amounts Senator HARRY F. BYRD, Jr., is talking about.

To imply that the unobligated money could be used for these purposes is not an accurate statement of the facts.

Senators may be opposed to both the callable capital and these purposes. That is understandable. But to suggest that you can finance this $2.4 billion that the Harry F. Byrd, Jr., amendment would strike from the close to $11 billion in callable capital that now exists is simply not an accurate statement of the facts.

Another point about this budget function is that this is the first year that foreign military sales have been included in this function. Previously, they have been included in the defense function, and I never heard any amendments offered then to strike military sales, especially by those who have a special interest in the defense of our country, our national security interests, and our allies and partners overseas. Now that it is in the international affairs function, it becomes fair game as foreign aid.

They are sales. They are by and large cash sales, and they are included as budget authority, because the United States becomes obligated to the transfer of funds out of the Treasury.

Senator BYRD's amendment would, in effect, strike $600 million of foreign military sales included in the $3 billion.

(Mr. CHILES assumed the Chair.)

Mr. HARRY F. BYRD, JR. Mr. President, if the Senator will yield, the amendment does not strike $600 million. It would reduce the total of $12.6 billion by $2.4 billion.

Mr. MUSKIE. That is correct, but the Senator justifies his amendment removing most of a $3 billion increase over 1978 and that $3 billion increase includes $600 million in foreign military sales.

If the Senator proposed to cut something out of the $9.6 billion, it seems to me the Senator owes it to the Senate to tell us what he is going to cut in place of the $600 million in foreign military sales. I can only address myelf to the premise upon which his amendment is based.

I agree that there are no votes in foreign aid. I make two final points:

First, the Witteveen facility is not foreign aid. It is a new facility created by the industrialized countries and the OPEC countries to help the world adjust—the poor nations, the industrial nations, the intermediate nations—to the enormous balance-of-payments problems that were created by the quadrupling of energy prices and the flow of capital from the industrialized countries to the OPEC oil producing countries. That is a world problem. That is not an American problem. It is a world problem. And this country has similar problems. We are in a better position to deal with our domestic problems, but we find ourselves overwhelmed by them.

How about these poor countries that have no way of supporting their balance-of-payments deficits attributable to the higher cost of energy except with the help of the industrialized world and the countries whose increase in prices made the problem come into existence? The United States, as part of an enlightened program by the industrialized countries, was able to persuade the OPEC countries to come into the plan to create the Witteveen facility.

The facility simply helps these countries through their adjustment period. I do not call that a foreign aid program. I call that an international program designed to help the world international economic structure which, includes poor as well as rich nations, respond to the quadrupling of energy prices.

It seems to me that, as the world's most powerful Nation, we have some responsibility. Or are we to take the position: "Let every other country participate in this, but let us stand on the sidelines. Let us sit on the sidelines. We cannot afford it."?

I tell Senators that if this international energy problem, and the balance-of-payments deficits which it has created, is not part of our world responsibilities, then by what right do we take our balance-of-payments problems to the rest of the world? We go to the OPEC countries and we ask them to restrain their price increases, because if they do not, they will destabilize our country, destabilize the international economic situation, and create economic chaos. So we, the world's most powerful Nation, are dependent on the OPEC countries to help contain this balance-of-payments problem that has been created by the quadrupling of energy prices. But when we are asked to participate modestly in a facility designed to help poorer countries get the same kind of relief that we are asking for ourselves, do we say we cannot afford it?

The Senator from Virginia praised me this spring for putting the Witteveen Facility on budget. Now he criticizes the committee, because of its cost.

How many ways can you ask to have a proposition?

I yield to my good friend from Maryland.

Mr. SARBANES. Mr. President, I wish to underscore the limited nature of the American contribution to the Witteveen Facility in comparison with that to be made by other countries. The American contribution will account for approximately 17 percent of the facility. Saudi Arabia, for one, will exceed our contribution significantly and OPEC countries, taken together, are contributing about one-half of the resources for the Witteveen Facility. It is the first time that they have been drawn into the international balance-of-payments system to provide resources to help to meet the problem created by developments in the energy field, in this instance with request to the lesser developed countries.

This is an American investment that is a wise one especially when one compares the terms of the American role here with most other things we go into.

I am very frank to say to the Senator from Virginia I would expect to find him praising the Witteveen Facility in terms of marking a new departure in the limited American contribution and in the assumption of responsibility by the OPEC countries and by the other advanced industrialized nations in percentages that far exceed what has heretofore been the case.

In other words, we ought not lose the opportunitly of placing the Witteveen Facility on line, because it establishes a very important precedent in terms of the contribution which other countries, either the other advanced industrial countries or the OPEC countries, are expected to make to this problem in comparison with the U.S. contribution. It shifts us away from the heretofore prevailing assumption that the United States alone is going to carry these international burdens—burdens which more appropriately should be shared by other countries and will be in this instance by their underwriting the Witteveen Facility.

Mr. MUSKIE. I thank my friend from Maryland for putting that point in perspective.

I will close with a second and final point: Function 150, the total amount provided is 2.3 percent of the budget. It is six-tenths of 1 percent of gross national product. What does this very minor percentage of our resources represent? It represents this Witteveen Facility which has just been described by the distinguished Senator from Maryland as a sharing of responsibility, with other industrial countries and the oil-producing countries, for the balance-of-payments problem that has been created by the quadrupling of energy prices; second, it represents the sale of arms under the foreign military sales trust fund to countries like Iran, Saudi Arabia, Israel, and other countries with which we have entered into agreements for that purpose to help meet their defense needs.

We have concluded that such sales help these countries meet their defense needs and also meet our national security needs.

This small percentage represents our sharing responsibility in these development banks for providing economic assistance to countries which seek to achieve economic viability. If they succeed, of course, they serve our economic interests overseas as they become trading partners and consumers of American goods.

This 2.3 percent of the budget, six-tenths of 1 percent of GNP, represent our contribution to world leadership through our economic resources. Now, is that excessive? Is that beyond the call and the responsibility of our role in the world? Is that more than we can afford to try to influence events around the world in directions we think beneficent and consistent with our own national interest, or is it too much?

Well, because there is no constituency for it, because there are no votes for it, it is easy to say we cannot afford it and that in this one function alone we are going to balance the budget.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. HARRY F. BYRD, JR. I yield.

Mr. SCOTT. I appreciate the Senator's yielding to me.

You know when an amendment like this is offered, I believe we have to reflect back after World War II when we had the Marshall plan submitted, and we had to think about the happenings since that time in the field of foreign aid.

I remember H. R. Gross on the House side used to refer to this as the foreign giveaway program. Perhaps this was a misnomer to call it that, but the people of the country do not favor the way in which Congress has been providing assistance, broad-brush assistance, throughout the world.

When we talk about no constituency, I believe that we, as representatives of the people of the country, do need to reflect upon the desire of the people for less Government spending. There is no doubt in my mind at all that the people of the country want our budget reduced. They want less taxes. Every time they have an opportunity to express themselves directly on this, they indicate that they want less taxes. Whether it is at the local level, the State level, or the Federal level, the only way we can cut is to cut and to vote "no" on some of these giveaway programs.

Again I commend my colleague from Virginia in what he is attempting to do. He is attempting to do what the people of Virginia and the people of the country want done. To me we are here to carry out the will of the people of the country, and voting in favor of this amendment is what the people would have us do, in my own personal judgment.

I appreciate the Senator's yielding.

Mr. HARRY F. BYRD, JR. Mr. President, I thank the Senator from Virginia. I shall take only a minute or two and then I will be glad to yield back the remainder of my time.

I think the basic question to decide is whether the Senate feels it is justified in increasing foreign aid by $3 billion in the upcoming budget.

I frankly do not think so. If we need to go into a new program like the Witteveen Facility, and it has, as the Senator from Maryland pointed out, some advantages over some of the current programs, it is, however, a new program; but if we are going into that, then I say let us reduce some of the existing programs, and let the funds come from that source.

The facts are that this concurrent resolution provides for a $3 billion increase, or a 31 percent increase, in foreign aid spending. I contend that is too much of an increase. I feel that increase ought to be reduced, and this proposal would do that.

I realize there is a difference of viewpoints. The able Senator from Maine has made a strong statement in behalf of his way of thinking just as the able Senator from Maryland has, but in my judgment the Congress is not justified in adding $3 billion to the foreign aid program, which represents an increase of 31 percent.

Mr. MUSKIE. Mr. President, I thought as a little personal footnote I should indicate that when passage of the Witteveen Facility bill was before the Senate the Senator from Virginia is recorded as voting "Yea" and the Senator from Maine is recorded as not voting. [Laughter]

Mr. HARRY F. BYRD, JR. That was a part, the Witteveen Facility was a part, of another larger bill, if the Senator will recall, it was not voted in alone.

Mr. MUSKIE. I also think the Senator was voting to put the Witteveen Facility on budget where it would become a more tempting target.

Mr. HARRY F. BYRD, JR. I think it is very desirable, and I have in the past, and do now, commend the Senator from Maine and the Budget Committee for putting this new foreign aid spending program in the budget process rather than having it as an off-budget item. If we are going to have this new program, most certainly it should be incorporated in the budget, as the Senator from Maine has advocated and as the Budget Committee has proposed to the Senate. That is the way to handle it.

My contention is if we are going to go into this new program, then we should reduce the other programs accordingly, because I just think it is too large an increase for the American taxpayer to increase foreign aid spending by $3 billion, or 31 percent.

Mr. MUSKIE. At least we have found some area of agreement.

Mr. HARRY F. BYRD, JR. We have many areas of agreement.

Mr. CHILES. Mr. President. will the Senator from Maine yield just temporarily?

Mr. MUSKIE. I yield.

Mr. CHILES. How much money is in the bill for the Witteveen Facility?

Mr. MUSKIE. $1.8 billion.

Mr. CHILES. $1.8 billion. If we had not put the facility on record, the authority was there, was it not, to spend that $1.8 billion off record?

Mr. MUSKIE. Yes, the Senator is correct.

Mr. CHILES. So of the $3 billion increase we are talking about in this number, $1.8 billion of that could have been spent off budget, still would have been a spending, and it would just have been off record?

Mr. MUSKIE. That is correct.

Mr. CHILES. So we are really then talking about an increase of $1.2 billion?

Mr. MUSKIE. The Senator is correct. That was the point I was trying to make earlier.

Mr. CHILES. The other could have been done through the back door.

Mr. MUSKIE. The Senator is absolutely correct.

Mr. CHILES. I thank the Senator.

Mr. MUSKIE. I am ready to yield back my time.

Mr. HARRY F. BYRD, JR. I yield back my time.

Mr. MUSKIE. I yield back the time and I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. HUDDLESTON). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is all time yielded back? Does the Senator from Virginia yield back his time?

Mr. MUSKIE. I think he has used his time. I yield back my time.

The PRESIDING OFFICER. All time being yielded back, the question is on agreeing to the amendment of the Senator from Virginia. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from North Dakota (Mr. BURDICK), the Senator from Idaho (Mr. CHURCH), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from Tennessee (Mr. SASSER), and the Senator from Illinois (Mr. STEVENSON), are necessarily absent.

I further announce that the Senator from Massachusetts (Mr. KENNEDY) is absent on official business.

I also announce that the Senator from Rhode Island (Mr. PELL) is absent because of illness.

I further announce that, if present and voting, the Senator from Rhode Island (Mr. PELL), would vote "nay."

Mr. CURTIS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Massachusetts (Mr. BROOKE), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Oregon (Mr. HATFIELD), the Senator from North Carolina (Mr. HELMS), the Senator from Nevada (Mr. LAXALT), the Senator from Idaho (Mr. MCCLURE), the Senator from Vermont (Mr. STAFFORD), the Senator from Alaska (Mr. STEVENS), and the Senator from Texas (Mr. TOWER), are necessarily absent.

The result was announced—yeas 32, nays 44, as follows:

[Rollcall Vote No. 371 Leg.]

YEAS—32

| Haskell | | |

So the amendment (UP No. 1815) was rejected.

The PRESIDING OFFICER. The resolution is open to further amendment.

UP AMENDMENT NO. 1816

Mr. CHILES. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida (Mr. CHILES) proposes an unprinted amendment numbered 1816.

Mr. CHILES. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER (Mr. HARRY F. BYRD, JR.).

Without objection, it is so ordered.

The amendment is as follows:

Page 4, after line 26, add:

(A) In order to achieve a balanced budget at the soonest possible date, total budget outlays shall not exceed $531 billion for fiscal year 1980, $570 billion for fiscal year 1981 or $615 billion for fiscal year 1982. Total Federal revenues for those years shal not be less than $500 billion in fiscal year 1980, $559 billion in fiscal year 1981, and $615 billion in fiscal year 1982.

(B) Total outlays shall only exceed these amounts to the extent that revenues are increased; Federal revenues shall only be reduced to the extent that outlays are reduced for the corresponding period.

(C) Federal deficits larger than those implied by the foregoing limitations shall only be permissible for a fiscal year in which the annual average unemployment rate is estimated to exceed 6.0 percent. The unemployment rate estimate applicable for this section shall be the most recent Congressional Budget Office forecast for the fiscal year for which a Concurrent Resolution on the Budget is being considered.

Mr. MAGNUSON. Mr. President, may we have order in the Chamber?

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Florida.

Mr. CHILES. Mr. President, I ask unanimous consent that Senator NUNN, of Georgia, be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES. Mr. President, I am offering this amendment to the concurrent budget resolution in order to produce a firm congressional commitment to balance the budget at the earliest possible date. The Budget Committee report sets out a path of spending and revenue projections based on the 1979 policies in this resolution, which would not produce a balanced budget until 1985.

My amendment would restrain spending and tax cuts in order to balance the budget by not later than 1982.

I would like to see us even move faster to a balanced budget, but the best economic advice that we can get seems to show that perhaps that may not be possible.

If we drastically cut spending or raise tax rates, the effect would be to increase unemployment, and that could drive up the cost of unemployment compensation and, therefore, reduce the number of taxpayers. The result would be a bigger deficit.

Mr. President, this is basically the line of economic reasoning that we have been following in incurring big deficits to bring the country out of a recession. However, that reasoning cannot be applied forever. We have recovered from the recession; unemployment has come down from over 9 percent to less than 6 percent. We should now be significantly reducing the size of the Federal deficit. That is what my amendment would do.

The Budget Committee report projects that the deficit of $42.3 billion that we reported for 1979 would increase to $44 billion in 1980 before declining to $30 billion in 1981 and $13 billion in 1982. It then projects that we would have a balance by 1983. I find these deficits unacceptable and I think they are unacceptable to the American people.

Mr. President, I ask unanimous consent that a table comparing my recommendations to the committee projections be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

CHILES PROPOSAL TO BALANCE THE BUDGET BY 1982 THROUGH RESTRAINING FEDERAL SPENDING AND TAX CUTS

[Dollars in billions]

| | Fiscal year— | | | | |
|---|---|---|---|---|---|
| | 1979 | 1980 | 1981 | 1982 | 1983 |
| Federal outlays: | | | | | |
| Current policy (1978 laws) | 494 | 542 | 584 | 633 | 679 |
| Committee recommendation | 490 | 536 | 575 | 623 | 669 |
| | (−4) | (−6) | (−9) | (−10) | (−10) |
| Chiles proposal | 488 | 531 | 570 | 615 | 659 |
| | (−6) | (−11) | (−14) | (−18) | (−20) |
| Federal deficit: | | | | | |
| Committee recommendation | −42 | −44 | −30 | −13 | +3 |
| Chiles proposal | −40 | −31 | −11 | 0 | 0 |
| Federal tax reduction (cumulative after 1979): | | | | | |
| Committee recommendation | (23) | 8 | 27 | 39 | 54 |
| Chiles proposal | (23) | ------- | 19 | 34 | 67 |
| Federal outlays as a percent of GNP: | | | | | |
| Committee recommendation | 21.7 | 21.5 | 20.9 | 20.5 | 19.9 |
| Chiles proposa | 21.5 | 21.4 | 20.7 | 20.2 | 19.5 |

Mr. CHILES. Mr. President, I have therefore proposed levels of spending and revenues that would bring the deficit down to $31 billion in 1980, which is $13 billion less than the committee report; to $11 billion in 1981, which is $19 billion less than the committee report; and then achieve a zero deficit in 1982, which would be $13 billion less than the committee figure. To achieve these lower deficits will require a responsible level of restraint by the Congress. It would not require a wholesale cutting of existing programs; rather, real growth over inflation would have to be held below 2 percent a year. Spending would have to be cut from current policy levels by $6 billion in 1979 and $18 billion in 1982.

In addition, we would have to defer some of the tax cuts projected by the committee. I happen to believe that the American people want tax relief, but I do not think they want it at the expense of deficit spending. I think they want tax relief by reducing spending rather than having the same high level of spending and running a deficit.

The plan that I am offering does not prevent tax relief. In fact, by 1983, I believe that the plan I offer would allow a $67 billion tax cut compared to $54 billion projected by the committee. The main reason that my plan would allow that bigger tax cut, is that it is based on a firm commitment to reduce spending and to start that reduction right away. That is the only way that we can responsibly cut taxes. I think we would also be cutting inflation right away because we were reducing spending.

Mr. President, the committee report projects an $8 billion tax cut in 1980, with a deficit that increases by $2 million over the deficit in 1979. That just does not make sense to me, that we are going to have an additional $8 billion tax cut, at the same time increasing the deficit $2 billion.

I can understand why we lack the confidence of the people in economic policy if they see us taking action like that.

My proposal would also produce a steady drop in Federal outlays from 21.5 percent of the gross national product in 1979 to 19.5 percent in 1983. That would take us well below the 20 percent of GNP that we reached just before the recession.

I think that would go a long way toward satisfying the popular demand for a smaller Federal Government. I think that is a real figure that the public can look at, not something that is done by mirrors. Some proposals would balance the budget by allowing inflation to make people's taxes go up, but not cut spending. Another kind of proposal that seems to be very popular, like the Roth-Kemp proposal, says that we are going to reduce taxes $30 billion a year over a period of time, but doing nothing about that deficit. If we can show people that the actual percentage of the GNP of this country that we are spending for the Federal sector is going down, then they are going to know that we are reducing the incursion of the Federal Government.

Mr. President, I am pleased that in reporting the second budget resolution that sets binding ceilings for fiscal year 1979, the Budget Committee has been able to reduce the ceiling for next year's level of Federal outlays by $9.3 billion; $4.2 billion of this represents real program reductions. The remainder of the reduction is due to lower estimates of spendout for current programs. But, more importantly, we have reduced the budget authority by $10.4 billion, which shows some real impact that our cuts will have over 3 or 4 years from now.

In committee, I proposed an additional reduction of $5 billion, to be followed by further reductions in future years, in order to bring us more rapidly to a balanced budget. Many of the recommendations accepted by the committee were items which I had suggested deleting in the first budget resolution. I am gratified to see that the committee is exercising greater restraint at this time.

As I was dissatisfied with the high level of spending after the committee's initial deliberations, I proposed a second round of additional cuts. The package I offered would have trimmed back 13 different functions of the budget to achieve sav-

ings of $3.6 billion in budget authority and cut $1.85 billion in 1979 outlays. We had a spirited discussion on each of these items. The committee accepted reductions of $900 million in budget authority and $500 million in outlays. These cuts required painful choices among competing demands for expenditures, but I think it is just this kind of painful choice that we have to make over the next 2 or 3 years if we are really going to keep spending within our means.

While the committee's reductions represent an important change from recent trends, and I am delighted to see that change, I believe that the committee could have done better and that we should have done better. Even the reduced outlay ceiling is a 9.2-percent growth over the 1978 level. That is 2.2-percent real growth after taking inflation into account. Since some of our current spending represents temporary costs due to the recession, the real growth is more like 3 percent.

The American people have made it clear that they want to see a reduction in Government spending, not growth. While not all of the reductions that I proposed were accepted, those that were will give us a good start. If we can make a further $5 million reduction next year, we could be on the path to a balanced budget by 1982.

The American people want tax relief, but not at the price of higher deficits. It would certainly be necessary to reduce taxes to offset the built-in increases due to inflation driving people into higher tax brackets. Tax reductions beyond such offsets should be only achieved, I think, by reducing spending. Once we have balanced people up to where inflation is not making them pay a higher tax, then I think we should not give a tax cut unless we can show we have reduced spending by that amount. There is no reason why we have to give all programs a full compensation for inflation every year.

I think that we could eliminate some unproductive or low-priority programs to pay for those new needs that are bound to come along and that we see coming along.

Mr. President, I have seen a new mood in Congress over last year. The public has shifted its primary concern from short-term stimulation of employment to the longer term economic stability and, mainly, to combating inflation. Congress is getting that message and cutting back on spending.

We have recovered from the recession down to 6-percent unemployment. That means we have just 1 percent to go before reaching the theoretical full-employment level. That 5 percent that would remain is so-called "frictional unemployment." It measures the fact that we have considerable turnover and attrition in the labor force. It takes people time to find jobs and they voluntarily quit jobs to move and look for better opportunities.

I do not believe we can close that final 1-percent gap by fine tuning with small across-the-board tax cuts.

To come that last step of the way, I think we need to do two things. First, we need to improve the confidence of businessmen and consumers that we really are doing something about inflation. The weakest point of our economic recovery has been business investment and the biggest obstacle to that investment is uncertainty. If businessmen are afraid we are going back to double-digit inflation, they will hold back on expanding production capacity and that is going to mean fewer jobs.

Businessmen simply do not believe we can control inflation while running larger and larger Federal deficits. That is why I am asking the Senate to commit itself to a 5-year schedule of restraint.

If we do this, I think we can show the business community and consumers what to expect, and then I think their confidence would cause additional economic growth.

The second thing we need to close that last 1 percent in unemployment is to target our effort to those persons who need help most. For that reason, I supported renewal of the Comprehensive Employment and Training Act with a major redirection toward the hardcore unemployed. Continued massive spending or general tax cuts is not going to produce jobs for this last 1 percent. It will only produce inflation.

Mr. President, Congress has been presented with several well-intentioned proposals to mandate a balanced budget under a constitutional amendment or tax surcharge. I have not supported those proposals because I do not believe there is any magic mechanical formula that can replace those hard choices necessary to reduce Federal spending.

Economic conditions vary from year to year and Congress should have the flexibility to examine the exact composition of proposals for spending and tax increases or decreases to determine their impact on the economy.

If a balanced budget is constitutionally required, many Members of Congress would find it easier to let inflation drive taxes up to meet spending levels than to cut spending.

During a recession, a Federal deficit, I think we all know, is unavoidable. When we are at high unemployment, a balanced budget is certainly obtainable, and it should be achieved. It is a matter of congressional will and public pressure. It cannot occur automatically. I think the amendment I am proposing today would commit us to a program of reducing growth of the Federal sector and achieving both a balanced budget and a lower rate of taxation.

Mr. President, therefore, I urge support of this amendment.

Mr. MAGNUSON. Will the Senator from Florida yield?

Mr. CHILES. I yield.

Mr. MAGNUSON. I think the Senator from Florida has made an excellent statement on long-term policies. I want to add that he is one of the distinguished members of the Appropriations Committee.

Even though this budget resolution passes, I think the Appropriations Committee will cut it even more. He has been a party with me to do that.

I think one of our problems is that we give everything to expenditures and we do not do too much about bringing more money into the Treasury. Receipts are what count. We could balance all the budgets if we had enough receipts.

So what we are trying to do is stimulate the economy to the point where the receipts become better, and they are becoming better. They are better this year than last year.

I do not know if the Senator will agree with me, that maybe, if we want to balance the budget, we just put in a simple resolution that we cannot spend any money that is not in the till.

Mr. CHILES. I would agree with the distinguished chairman of the Appropriations Committee——

Mr. MAGNUSON. And that is very simple. It is probably too simple to work. This is the problem.

But I think we are coming to that point. I hope the Finance Committee will heed this advice. Instead of talking so much about where the burden is going to be, I think we ought to spend a little more time getting more money into the till. When we do, then we will have a balanced budget. That is what causes the difference.

We keep books like nobody else. We would drive a CPA up the wall.

We will go down there now at midnight on September 30 and open the till. If there are some IOU's in there, that is the deficit. If there is some money in there, that is the surplus. Then we close the till and go back about our business. We do not consider loans, we do not consider anything else.

I suppose the SEC would put us in jail if we were a corporation, if we kept applying the rules of corporate financing.

What the Senator is saying is that if we cannot bring these things closer together, and that is, I know, not too long a range, a couple or 3 years, we can help the Appropriations Committee by voting for this amendment.

Mr. CHILES. I thank the distinguished chairman of the Appropriations Committee who is exerting his leadership in trying to bring a restraint into the appropriations process. I see him day after day in many areas trying to see that the Appropriations Committee does come in lower than the figures of the budget resolution. I think that is certainly commendable.

I think there was a time when we were in the recession where we knew we had unused plant capacity, where we knew we had high unemployment, and that we, therefore, could stimulate without adding to demand inflation at that time, because of that unused capacity. But now the economy has geared itself up, we realize how difficult it is to stop some programs we started then. Accelerated public works, soft public works, any of the programs we were trying to stimulate.

Mr. MAGNUSON. And CETA.

Mr. CHILES. And CETA.

Mr. MAGNUSON. And our job, I think, is to work CETA out of business, and that is what we will try to do.

Mr. CHILES. In the new bill we passed, while the authorization levels

are very high, as I know the chairman of the Appropriations Committee commented at the time it was passed, it does change the structure to allow now to try to go and help the structurally unemployed. I think it will be up to the Appropriations Committee in how it funds that new CETA authorization to see that we try to put the money, with restraint, where it will do some good, into the structurally unemployed, and not look on it as a broad revenue-sharing program of just giving some money back to counties and local government so they can take people off their payrolls and transfer them onto the Federal payroll, as we found was happening much of the time during CETA.

Mr. NUNN. Will the Senator yield for a brief comment?

Mr. CHILES. I yield.

Mr. NUNN. I commend the Senator from Florida for this very fine amendment which will move us in the right direction. I also commend the chairman of the Appropriations Committee for his excellent remarks. I certainly concur in those comments. I am proud to support this amendment and to be a cosponsor of it.

Mr. CHILES. I thank the distinguished Senator from Georgia, who was a member of the Budget Committee in its initial stages, and during that time was always trying to hold down spending in the Budget Committee. He has continued to do that on the floor of the Senate. He does great work in that regard in trying to see we get the most money in needed programs, especially in the armed services program where he works so diligently on those budgets, but he also works to see us avoid excess spending in programs where the need is not so great.

Mr. MOYNIHAN. Mr. President, will the Senator from Florida yield for a comment?

Mr. CHILES. I am glad to yield to the distinguished Senator from New York.

Mr. MOYNIHAN. Mr. President, I commend the Senator from Florida for what he has said. I look to the chairman of the committee and the ranking minority member for advice on how to vote, but I do appreciate the Senator's emphasis on considering the proportion of gross national product which the budget should comprise.

I suggest that perhaps what is most relevant is the fraction of GNP which is spent on the whole public sector, not just on the Federal Government. I think the Senator will find that it is hovering currently around 35 percent—a much higher proportion than we have heretofore supposed.

A great deal of the increase in State and local shares has been the result of the Federal mandate in sharing programs.

Back in 1946, an economist named Colin Clark wrote a book in which he put forth the proposition that any economy in which the public sector GNP went beyond 25 percent would have to live with uncontrollable inflation. This seemed such a remote possibility at the time that no one paid attention to Clark. I am not saying that he has proven or disproved his case, but we have gone well beyond 25 percent, and we are now in a condition of seemingly permanent inflation.

It seems to me that the expansive fiscal policies of the Federal Government are very usefully conceived in terms of what proportion of our total gross national product we are putting in the public sector. The idea of a limitation, or, if you will, a general average limit, is a practical idea, and I thank the Senator for bringing it to the floor, even though I would be for flexibility from one fiscal year to the next. In any event, I will be guided by our appointed watchdogs, the Senator from Maine and the Senator from Oklahoma.

Mr. CHILES. I thank the distinguished Senator from New York—I think. [Laughter.]

I do thank the Senator for his kind remarks. I think the point he raises, of the total spending, is very relevant and important; because that is really what affects the taxpayer ultimately, and that is what becomes the drag on the economy ultimately.

It happens that we can only influence a portion of that, and that is what my amendment is doing.

Many times we like to sit here and say that the growth over the last few years has been at the State and local level. What we have failed to say is that we stimulated that growth, because we set up those programs for the State, saying we will share the cost with them if the States match. Because we have failed to say that, right now about 25 percent of that State and local spending is directly coming from the Federal budget and I am sure we are influencing a great deal more of that because of the way we set up matching grant programs.

Mr. MAGNUSON. It is 26 percent.

Mr. CHILES. Those items add to it, too.

Because we cannot affect all those does not mean we should not try to do something in the area we can affect. That is why I think we need to take some kind of step.

Mr. STONE. Mr. President, will the Senator yield?

Mr. CHILES. I yield.

Mr. STONE. Mr. President, I commend my senior colleague from Florida on the careful work that has gone into this spending path and ceiling amendment.

Most people—certainly, most of our colleagues—repeatedly have felt and expressed the desire to get to a balanced budget. All of us are willing, I think, to vote for resolutions or constitutional amendments or statements or even bills that say that.

What the Senator is doing for us is mapping a practical way, in line with the Budget Committee's approach anyway, of a multiyear plan, but fine tuning that with some decisionmaking along the way as to how we get there.

I think that if the Senator's amendment is adopted—and I intend to vote for it—it will assist the overall, full Budget Committee in their necessary efforts to get the Senate and the entire Congress and the entire Federal Government to the point of a balanced budget in a reasonable period of time. I do not think there is a domestic issue of priority as high as that. I commend the Senator for his efforts in putting together such a practical and sound proposal.

Mr. CHILES. I thank my distinguished colleague from Florida. I have found at all times that he has tried to support and work toward those measures that would allow us to balance the budget and to reduce Federal spending.

Mr. BELLMON. Mr. President, will the Senator yield?

Mr. CHILES. I yield.

Mr. BELLMON. Mr. President, I compliment the distinguished Senator from Florida for the work he has done in this proposal.

I agree with the goal of balancing the budget as soon as possible. I believe, as does the distinguished Senator from Florida, that we can achieve a balanced budget, perhaps at an earlier date than the report would indicate. To do this, we certainly will need to reduce Federal spending as a percentage of GNP and reduce the rate of growth in spending each year over the next several years. I think that, as members of the Senate Budget Committee, we can assure this body that we will be working to do that.

As I mentioned in my opening statement this morning, I believe the only way we can get to a balanced budget is to exercise disciplined spending restraint next year and in future years. We must carefully examine new spending proposals and determine how necessary they are likely to be, in light of the short and long-run costs and effects. Indeed, only by resisting the temptation to enact additional costly programs can we finally reestablish the historic norms for the size and scope of the Federal Government and bring the budget into conformity with the wishes of the American people.

Although this resolution does not go as far as we would like, it does point us in that direction. I believe we should accept it and continue to exercise prudent judgment in the next year, so that we can accomplish a balanced budget at the earliest possible date.

Mr. President, there is a question of germaneness in this matter, since the resolution relates to the out years. Perhaps the chairman will discuss that. That question exists, even though on its merits it is a very fine suggestion.

Mr. CHILES. I thank the distinguished ranking minority member of the committee.

Mr. MAGNUSON. Mr. President, I do not have the figure, but I think 23 States already have passed resolutions calling for a constitutional convention to propose a balanced budget amendment to the U.S. Constitution, and the movement is spreading. This is what we do not want to happen, because we think we have some responsibility.

I ask unanimous consent to put in the RECORD at this point the number of States that have now acted upon and passed laws about the balancing of the Federal budget.

The PRESIDING OFFICER. Without objection, it is so ordered.

The list follows:

Oregon, Wyoming, Colorado, New Mexico, Arizona, Texas, Oklahoma, Kansas, Nebraska, North Dakota, Louisiana, Mississippi, Alabama, Georgia, South Carolina, Florida, Tennessee, Illinois, Indiana, Virginia, Maryland, Delaware, and Pennsylvania.

The PRESIDING OFFICER. All the time of the Senator from Florida has expired.

Mr. MUSKIE. Mr. President, I hesitate to put myself in the position of being critical of any proposal offered by the distinguished Senator from Florida. Really, what I have to say is not criticism but will result in my raising a point of order, which I will try to explain before I raise the point of order.

First, let me emphasize that I count the distinguished Senator from Florida (Mr. CHILES) as one of the most valuable members of the Budget Committee and have so valued him from the beginning of the budget process. He is one of the original members of the Budget Committee, along with the distinguished Senator from Georgia (Mr. NUNN). He is always constructive. He is ingenious; he is innovative; and, perhaps the most important quality of all, he is persistent in pursuing his ideas and the goal of a balanced budget.

So, I repeat, I am always hesitant to find myself in disagreement with him on a particular course of action.

Before I discuss the point of order, I would like to refer to the 5-year projections contained in the Senate Budget Committee report. It is upon those projections that Senator CHILES draws for analogies to support his proposal.

Let me make it clear that the 5-year projections in the Senate Budget Committee report are not forecasts at all, nor are they mandated spending totals.

They are simply an attempt to put in a 5-year context the consequences of the spending decisions we make with respect to fiscal year 1979. In making those projections, the Budget Committee does not say we should not have a balanced budget before 1983 at all. Every member of the committee would like to see a balanced budget in 1982, or 1981, or 1980, or even 1979.

But what we are able to achieve in that respect depends upon assumptions as to what the private sector of our economy will achieve and how it will perform over that 5-year period.

The assumption made in the 5-year projections contained in the Budget Committee report are moderate in their assumptions about the performance of the private sector over the next 5 years. They are moderate and yet, at the same time, if those moderate assumptions are realized, that realization would represent an unprecedented economic recovery.

We are now in the fourth year of economic recovery. If the recovery were to continue through 1983, it would represent a period of sustained economic recovery without precedent, and it is on that unprecedented assumption that we projected a balanced budget by 1983.

So, we think that that was a moderate kind of a projection, and we made it not to encourage deficits or to encourage spending, but to impose restraint upon spending.

It was our feeling that, if Members of Congress could see the consequences of today's spending decisions in a 5-year context and at the same time understand the prospect of new spending initiatives coming down the road, the effect may be restraint upon the inclination of Congresses and legislatures to spend.

So that is the reason we went into the 5-year projections.

What in effect Senator CHILES proposed is that we aim for a balanced budget 1 year earlier than 1983 by mandating now the ceilings on outlays and budget authority—I think it covered both outlays and budget authority—for each of the years covered by his amendment.

Mr. CHILES. Just the outlays.

Mr. MUSKIE. Just outlays.

Now, there are a couple of problems with that. As Senator CHILES knows as well, if not better than any of the rest of us, outlays are driven by budget authority. You cannot control deficits or spending by controlling outlays. Outlays are simply the result of appropriations in the form of budget authority. So if you mandate a certain level of outlays, that may or may not be a realistic reflection of the spending momentum that is underway to build weapons systems or to fund social security benefits, or whatever, across the whole range of the budget process.

(Mr. GLENN assumed the chair.)

Mr. MUSKIE. Second, if the underlying economic assumptions prove wrong, the mandated ceilings on outlays may prove to be very inflexible and unrealistic measures of the Federal Government's responsibilities or priorities in the economic circumstances in which we find ourselves.

I cannot help but remember that the Budget Committee was created in the fall of 1974 and within 6 months of that time we found ourselves plunged into a recession, the magnitude of which no one had anticipated or predicted at the time the budget committees were created. We were talking at the time we were created of a balanced budget in the fiscal year following. Instead we found ourselves with a deficit of $50 billion in less than 6 months.

In December 1974 the bottom fell out of the economy. So we found it impossible to predict the performance of the private sector for a 6-month period from the time that we were created.

Now it is proposed that we set mandatory ceilings for a period of years. I simply do not think that is a realistic thing for us to do, and if it were workable and achievable, there would be no need for the budget process. You simply write your ceilings into law 5 years in advance, 3 years in advance, and then live with them.

If the budget process does not exist to adjust Federal fiscal policy to the economic circumstances in which we find ourselves or which we try to predict with the best advice available to us, then it serves no purpose. We do not exist simply to set arbitrary ceilings or targets. We exist to adjust fiscal policy to the best of our ability to the economic circumstances and needs of the country, and these mandatory ceilings would simply deprive us of that flexibility because it would tell us in advance the maximum that we could spend.

It might have one other unfortunate consequence. It might actually encourage spending which would be excessive to our needs. Ceilings tend to be floors to a lot of people who vote on appropriations bills.

And if we have these and they are all going to be higher spending ceilings than in the current resolution, there is a temptation to spend up to those ceilings whether or not they are needed.

I raise these questions and suggest these problems not to denigrate Senator CHILES' objectives at all because in reality the objectives of the projections contained in the Budget Committee report and of Senator CHILES' amendment are the same.

We are both trying to find a more effective way to move the Federal budget toward balance, and we are seeking to do it by suggesting what the performance in the future should be.

So I do not criticize him at all. I simply have doubts as to the viability of mandated ceilings years in advance.

I will raise the point of order.

Mr. CHILES. Mr. President, will the Senator yield before he raises that point?

Mr. MUSKIE. I would be happy to yield to my good friend, if he will first let me describe the point of order. I will not raise it until the Senator is satisfied that there has been a sufficient dialog.

Mr. CHILES. All right.

Mr. MUSKIE. I would like to describe the point of order so that Senators will understand what it is. I have no desire to push aside the debate, and Senator CHILES should have a chance to respond or raise questions.

Section 305 of the Budget Act prohibits nongermane amendments to budget resolutions in order to prevent the resolutions from becoming vehicles for legislation within the jurisdiction of other committees and for matters not contained in the resolution.

The Chiles amendment provides spending ceilings and revenue floors for fiscal years 1980 to 1982, inclusive, fiscal years not addressed in Senate Concurrent Resolution 104, the second budget resolution to fiscal year 1979.

The amendment thus introduces new matter to the budget resolution as reported from the Budget Committee and is not germane within the meaning of section 305.

In addition, under section 306 of the Budget Act, this amendment would also be out of order, as it provides aggregate spending ceilings and revenue levels for fiscal years 1980 to 1982, matters within the jurisdiction of the Budget Committee.

Section 306 provides:

That no bill, resolution, or amendment thereto which deals with legislative matters within the jurisdiction of the Budget Committee should be considered by the Senate unless the bill or resolution has been reported from the Budget Committee with such subject matter.

Since the Chiles amendment introduces new matter which is within the jurisdiction of the Budget Committee, which was not reported from the Budget

Committee, it is out of order under section 306.

The proviso of section 301(6) that additional matters may be included does not apply here for two reasons: First. This proviso applies to the jurisdiction of the committee alone. Once reported, the resolution is limited to its contents. Second. Section 301(a) applies to the first resolution.

That is the basis of the point of order which I will raise when Senator CHILES is satisfied that there has been sufficient discussion.

I am willing to yield at this time or yield time to the Senator from Florida to further discuss the matter or to address myself to any questions he may wish to put.

Mr. CHILES. I thank the distinguished chairman. If he would yield to me——

Mr. MUSKIE. I yield such time to the Senator as he may need.

Mr. CHILES. I just wanted to make a couple of brief points and then make a comment on the point of order the Senator has indicated he intends to raise.

First, I will say that I think the distinguished chairman of the Budget Committee—and I compliment him for the long and arduous task that he works on in regard to the committee, and I know how dedicated he is to trying to get us on a path of fiscal restraint and toward a balanced budget—but I would like to comment on the point that he makes which, I think, is a valid point on binding the Congress, binding the Budget Committee, in future years and, perhaps, taking away the flexibility that we need.

I worried about this myself in thinking about an amendment like this. I tried to build some flexibility into my amendment which, I think, I have been able to do. Section (b) of that amendment states that "Total outlays shall only exceed those amounts to the extent that revenues are increased." So that allows the flexibility, if you can get some increased revenues, and we in the Budget Committee have often talked about this, and often to not much avail—that would be an opportunity. Second, in section (c), that Federal deficits larger than those allowed by the foregoing limitations should only be permissible for a fiscal year in which the annual average unemployment is estimated to exceed 6 percent.

So if you had a change in economic conditions, if the path of recovery turns around, that would be reflected in an unemployment rate above 6 percent, and we get those reliable estimates. So I am again trying to build flexibility in that way. In addition, we can point out that any Congress can, upon a drastic change of conditions, change this schedule of fiscal policy.

But it seems to the Senator from Florida that we need more than pass the simple resolutions. I am delighted to see those passed, but we had a heavy vote in this Chamber for a balanced budget by 1981.

But really that resolution is worth just about the paper it is written on, because it is only a sense of the Senate resolution. But if it is worth that much it would seem to me that we need to bind ourselves a little firmer than that, and to commit ourselves to a path of restraint.

I do not think what we have now in the committee report does that at all, that is, a provision that says this is what we think will happen if you go along with the 1979 budget. It is our best guess, it is our best estimate, of a projection going into play if you went along with this budget and if you went along with this course of action we lay out. So it lays out a path, but no one commits to that path. No one, by voting for this resolution, says "I commit myself to restraint."

The other thing that I see happening in the Budget Committee itself is we go in and because we are a committee pretty evenly balanced, representing the constituencies that come into this Chamber, I am willing to cut into one area but I want to make sure there is enough money for defense, for example. That happens to be something that I worry about. I do not worry as much about some of the other areas.

There are other people who worry more in the health field than they worry about defense. So what happens is before we get through, in order to make sure that we get my adequate figure on defense, we have to take my friend's adequate figure on health, and we come out with a figure that is more than either one of us went in there wanting to spend. But that is the process, and that is the process that really worked in here without the Budget Committee restraint to the extent that we found ourselves overspending every year, good times or bad.

So the purpose of the Budget Committee was to try to bring a restraint by coming in with a spending resolution and saying, "We are only going to spend so much, we are going to set a ceiling." But now we in the Budget Committee tried to come out with that resolution, which is debated on this floor, and every Senator has a chance to amend or agree, and we set that spending ceiling. But I find we need some kind of restraint on ourselves going into that Budget Committee because then if we had a restraint and saying that this year we have got $x$ number of dollars, how are we going to divide that within the priorities, I think we would match those priorities up to those dollars.

I think the level I am talking about as to spending is responsible as far as the total figure and that we can match the priorities within that. If we put enough restraint on ourselves to know that when we go in the room we have got to come out with a total resolution that stays within that figure, then I might not get exactly what I wanted for defense and he might not get exactly what he wanted for health. But I think the people would be better served because they would get something within the means of what we have, the dollars that are in the store, and that we would cut the cloth to fit the pattern.

That is the reason why I feel that a restraint like this is going to be necessary if we are ever going to balance the budget. We have to lay out some plan to the American people that shows our coming to a balance, even over a period of years, so that they might have some confidence in our processes.

Now if I might just discuss briefly the point of order. Section 301(a)(6) provides that the first concurrent budget resolution shall set forth, and I quote, "such other matters related to the budget as may be appropriate to carry out the purposes of the act."

It seems that a 5-year economic policy is certainly a purpose of the act. Section 301(a) states that the second budget resolution shall reaffirm or revise the first budget resolution.

So, therefore, the point I would make is if the 5-year totals are germane to the first resolution then they should be germane to the second resolution. I feel that they certainly would be germane to the first resolution and, therefore, should be in order to the second concurrent resolution.

Mr. MUSKIE. Mr. President, I do not think there is anything I can add to the point I have already tried to make with respect to the Chiles amendment. So if there is no further discussion I would raise the point of order as I have described it.

The PRESIDING OFFICER. Under the Budget Act, amendments to concurrent resolutions on the budget must be germane. Senate Concurrent Resolution 104 contains no matter dealing with a 5-year projection, or with other fiscal years. By attempting to deal with fiscal years not covered by this resolution, this amendment introduces new subject matter and, therefore, under the precedents the amendment is not germane. The point of order is well taken.

Mr. MUSKIE. May I make a few suggestions to my good friend from Florida? I will not take more than 1 or 2 minutes. I know the Senator from New York has a suggestion he wanted to discuss.

No. 1, I think the Senator from Florida has given the kind of thought and consideration to his proposal that deserves further consideration. The Senator knows how we struggled with and the doubts we had about our own projections as contained in the committee report. When we adopted those, we all felt, I think, that we were just beginning an evolutionary process that hopefully would produce something more specific, more disciplinary in its impact, and more influential in bringing Federal spending under control.

So I would urge the Senator to consider preparing legislation, maybe even an amendment to the Budget Act, and I would be happy to cooperate with the committee staff or in any other way that I can to try to develop his idea further, to the point where it might well serve as a useful instrument for budget policy.

Second, the Senator from New York, in his comments on the Senator's proposal, had some suggestions that I think are worth further study in connection with the proposal of the Senator from Florida. But I hope the Senator will not interpret my action today as throwing cold water on his idea. In fact, I would like to see him persist in trying to develop it and bring it to fuller fruition, and I will use the word maturity.

Mr. CHILES. I thank the distinguished chairman, and I will honor the kind compliment he gave me by saying that I will persist in it.

UP AMENDMENT NO 1817

(Purpose: To continue in the second congressional budget resolution for 1979 the allowance for fiscal relief for State and local welfare costs which was assumed in the first budget resolution)

Mr. MOYNIHAN. Mr. President, I send to the desk an unprinted amendment.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New York (Mr. MOYNIHAN) proposes an unprinted amendment numbered 1817:

On page 1, line 11, strike out—

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 11, strike out "$557,700,000,000" and insert in lieu thereof "$558,100,000,000";

On page 2, line 2, strike out "$489,500,000,000" and insert in lieu thereof "$489,900,000,000";

On page 2, line 5, strike out "$42,300,000,000" and insert in lieu thereof "$42,700,000,000";

On page 2, line 7, strike out "$839,500,000,000" and insert in lieu therof "$839,900,000,000';

On page 2, line 9, strike out "$41,500,000,000" and insert in lieu thereof "$41,900,000,000";

On page 4, line 4, strike out "$191,500,000,000" and insert in lieu thereof "$191,900,000,000"; and

On page 4, line 5, strike out "$159,600,000,000" and insert in lieu thereof "$160,000,000,000".

Mr. MOYNIHAN. Mr. President, I rise today to offer an amendment to the second concurrent resolution on the budget to allow for the expenditure of $400 million for fiscal relief to assist States and localities with the cost of the Aid to Families with Dependent Children program. I seek to restore the funds which clearly were set aside for fiscal relief in the first concurrent budget resolution, and which the Finance Committee specifically endorsed in its recommendations to the Budget Committee on the second concurrent resolution.

The Senate Budget Committee chose to remove those funds, with the explicit instruction in its committee report that:

The Committee recommendation does not assume funding in FY 1979 for fiscal relief to States to offset public assistance costs.

This amendment, I hope, will correct what I regard as a serious omission.

I would make, at the outset, simply two points. The first is that the Senate has overwhelmingly indicated its basic support for interim fiscal relief. When we adopted the social security amendments last summer, we provided $384 million. This was agreed to in part by the House conferees; the other half was to be included in the legislation now before us. There was no dissenting vote on the floor of the Senate. The understanding was that we would have a series of annually increasing direct fiscal relief measures, leading up to that time when the President's welfare reform legislation would take effect—fiscal year 1981. The understanding was that we would pass a fiscal relief measure for fiscal years 1978, 1979, and 1980.

The second point I would like to make is that this does not represent an increasing expenditure in terms of the public sector of the GNP; this is the matter I touched upon in my colloquy with the distinguished Senator from Florida. These measures aim to provide tax relief, and, in many States, property tax relief of the kind which has been much in the news in recent months. The Senate Finance Committee first agreed to such a measure in November 1977, when it was understood that the situation with respect to the cost of welfare made it necessary. We have done so over and over again, and I will not burden the chairman and his colleague on the minority side with the details; they know the details.

What I would trouble them to hear, though, is my concern—and it is a concern that I know is theirs also, otherwise I would hesitate to raise it—that we should never have the impression that the Budget Committee, much less the staff of the Budget Committe, is imposing its own political choices and priorities upon the substantive committees of the Senate. This was a natural apprehension when the committee was established, and no one took greater pains to dispel any such concern than the distinguished chairman of the committee, the man who created it. Yet it is difficult for us not to sense in the persistence with which our concern here is singled out for rejection more than a penumbra of disapproval of a programmatical kind, rather than the macrobudgetary concerns of the committee itself.

So I would like to ask some questions of the chairman and his distinguished colleague, the Senator from Oklahoma.

It appears that the second budget resolution as it comes back from conference will provide some significant allowance for new legislation in the income security category, inasmuch as both the House resolution and the resolution recommended by the Senate Budget Committee included such an allowance.

Obviously, in recommending such an allowance, the Senate and House Committees have in mind certain program changes that it would accommodate. Nonetheless, I believe it is correct—and I would ask the chairman of the Budget Committee to confirm this—that the Budget process does not specify which programs should be accepted. That is a decision to be made in the course of subsequent action or subsequent legislation.

In other words, if the second budget resolution leaves room for a certain amount of additional spending in the income security category, the Finance Committee can, in full compliance with the letter and spirit of the budget process, recommend the use of that allowance for any income security program or programs over which it has jurisdiction. I would ask the chairman if that is not correct.

Mr. MUSKIE. The Senator's first question requires a somewhat lengthy reply, in order to have a complete record.

Mr. MOYNIHAN. It was a rather lengthy question. I am sorry for that.

Mr. MUSKIE. In order to put a complete record before the Senate, first let me read from the committee report. I am reading from page 99:

The Committee recommendation assumes savings from increased targeting of public service jobs on low-income people, from the standardization of the allowance provided to AFDC recipients for work-related expenses in determining their benefit levels, and from the liberalization of veterans pension benefits recently passed by the Senate. Additional funding is assumed for an expanded earned income tax credit, the refundable portion of which is included as spending in this function. The Committee recommendation does not assume funding in FY 1979 for fiscal relief to States to offset public assistance costs. The 5-year recommendations assume the costs of additional welfare reform initiatives in future years.

The exclusion of funds for fiscal relief was a rather specific decision. The reasons for the committee's decision to exclude funds for welfare fiscal relief were as follows:

One, the fiscal relief should be provided only in the context of overall welfare reform. The provision of additional funding to States should "buy" much needed reform of the welfare system.

Two, this type of block grant should be addressed during consideration of general revenue sharing legislation.

Three, the immediacy of States' need for fiscal, relief is open to question: a. States and localities already received a block grant to offset welfare costs of $187 million in fiscal year 1978; b. States are showing budget surpluses; c. the AFDC program has experienced a reduction in participation in recent years and benefit costs have risen by less than the rate of inflation; d. the second budget resolution provides considerable additional funding for welfare related programs: title XX, social services, $200 million; expansion of the earned income tax credit, $500 million.

Those are the reasons for the decision taken.

Let me add this comment: Funds for fiscal relief could be taken from the above two program increases as both these programs are in the jurisdiction of the Finance Committee. Otherwise, they could be provided only by achieving cost reductions in existing programs.

It should be stressed that under no condition can fiscal relief be provided in addition to the increases shown above unless substantial savings are made in existing programs within the Finance Committee's jurisdiction.

I think that answer covers it.

Mr. MOYNIHAN. I think that answers my question almost entirely. In the spirit of that, in a moment I will move to withdraw my amendment. But I would like to make a point because it is in the interest of the chairman that when this committee acts, the people watch it, because the tendency will be to insert value judgments about program priorities. That is inevitable. One has to pick and choose before things are added up, and there are myriad choices implicit in that process.

The notion that the committee said fiscal relief should be offered only in the context of overall welfare reform constitutes a statement of what overall welfare reform represents.

I could make a perfectly good argument that fiscal relief is the welfare reform we need. I would not do that, but I could make that argument.

Secondly, as a point of fact, it was precisely in the context of overall welfare reform that we sought and succeeded in persuading the President that there ought to be a series of gradually increasing increments of fiscal relief to get the State and local governments interested in a bill which otherwise would not have any effect until fiscal year 1981.

Our persuasions, our blandishments, were perhaps not altogether disingenuous because we did not succeed—the bill did not pass the House. Still, fiscal relief is an integral aspect of welfare reform and it may be the only one we will get in the immediate future.

Of course, we are always interested in views. We must look upon them as obiter dicta.

Mr. MUSKIE. Let me add two observations. One is I simply gave the Budget Committee's rationale and conclusion, realizing that the Budget Committee's rationale is not binding.

Mr. MOYNIHAN. Yes, I understand that.

To sum up, I will ask for the chairman's judgment. It is my understanding from the chairman's very generous response that the Finance Committee would be free within the letter and the spirit of the budget process to recommend that any allowance for new legislation in the income security area be used for one or the other, or some combination of earned income tax credits and fiscal relief, as long as we remain within the budgetary limits assigned us by the Budget Committee.

Mr. MUSKIE. That is correct.

The Senator, of course, understands how difficult it would be to fit all the pieces of that puzzle together, because I understand he himself is a cosponsor of a plan to expand the earned income credit effective in 1979 at a cost of $700 million, which would use up all of the additional cost items which are provided in function 600. But the Senator has demonstrated in his career in the Senate an ingenuity that should stand him in good stead as he contemplates this puzzle. I certainly would not want to chill his right to pursue his objective.

Mr. MOYNIHAN. I take that to be a form in which the chairman wishes me good luck. I accept that observation. The Senator, as time passes, understands less and less, but he does understand that welfare reform is a complicated matter.

Mr. MUSKIE. And the Senator from New York has demonstrated an expertise and an understanding in this field which I do not believe is surpassed by any other Member of this body. I respect his wisdom and insight which he provides us in this field. I certainly do not challenge the validity of his observations. Welfare reform generally, as I am sure he understands it, involves popular as well as unpopular revisions of the system. States like the aspects of welfare reform which provide fiscal relief. Some may not like other aspects of welfare reform.

Fiscal relief alone, without other changes, would give the States the sweet without the sour. That is really what the Budget Committee is concerned about.

Mr. MOYNIHAN. The chairman is exactly correct in that respect, and I think the Senator from Oklahoma probably shares that view with an even greater degree of concern.

Mr. BELLMON. If the Senator will yield, I would like to join my chairman in agreeing that the adoption of this resolution will not preclude the Senate from voting later to grant fiscal relief to State and local governments for part of their welfare costs. The Finance Committee could choose different priorities than those recommended by the Budget Committee. But I would like to make clear that I personally feel very strongly that, if a choice has to be made between fiscal relief and improvement of the earned income tax credit, I would prefer to see us do the latter. Expansion of the earned income tax credit has been proposed in a number of welfare reform bills introduced this year, including the one that I introduced along with several of my colleagues, S. 2777. I believe Senator MOYNIHAN has also endorsed expansion of the earned income tax credit.

In presenting its recommendations on the second budget resolution, the Budget Committee provided room for expansion of the earned income tax credit but did not make specific room for fiscal relief, and I hope that this choice of priorities will ultimately be upheld by the full Senate—in other words, I hope the Senate will agree with the position we took.

The Budget Committee did not endorse fiscal relief for these reasons: There is no real urgent need for fiscal relief since States and local governments are generally in better financial shape than the Federal Government; welfare rolls have been dropping as the economy has improved over recent months; costs are growing more slowly than in past years, and this reduces the pressures on State and local government budgets. But the main reason, I feel, is that while there are valid reasons for the Federal Government to fund a larger share of welfare costs, this should be resolved as part of constructive changes in welfare programs. Providing fiscal relief as a first step undermines the drive for real welfare reform. This is the point that Senator MUSKIE was just making.

I am in favor of fiscal relief, but I think, as has been said, that States ought to take a little bitter with the sweet. I am afraid if we give them the sweet first, that is all we shall get.

Mr. MOYNIHAN. I thank the Senator from Oklahoma. I assume he is speaking in his own right as a distinguished Member of this body and a former Governor of his great State, and not as a member of the Committee on the Budget per se.

Mr. BELLMON. If the Senator will allow me, I am not sure you can separate the two, but I was speaking in my own right as a Member of this body.

Mr. MOYNIHAN. I am new to this Chamber, but I am already jealous of the prerogatives of my committee and alarmed at the imperial ambitions of all other committees.

I thank the distinguished chairman and his distinguished colleague for this opportunity. I thank the Chair.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. Do Senators yield back the time on the amendment?

Mr. MOYNIHAN. Mr. President, in the circumstances, I withdraw my amendment.

The PRESIDING OFFICER. The Senator has the right to withdraw his amendment.

The amendment was withdrawn.

Mr. DOMENICI. Mr. President, I wonder if the Senator from Maine might yield 10 minutes on the bill to the Senator from New Mexico.

Mr. MUSKIE. Of course.

Mr. DOMENICI. I thank the distinguished chairman.

I want to acknowledge that there are several improvements in the second concurrent budget resolution when compared to the President's original budget request and the first concurrent budget resolution. I also want to commend our distinguished chairman, Senator MUSKIE, and our distinguished ranking minority member, Senator BELLMON, for their diligence and dedication to constant improvements in the budget process and its products.

Specifically, it is worthy of note, as several of our colleagues have done earlier today, that the second concurrent resolution reduces new budget authority by $11.4 billion below the President's budget request and $11.15 below the first concurrent resolution. Similarly, outlays are reduced in the resolution by $11.5 billion when compared to the budget request and $9.3 billion compared to the first resolution. As a result of these outlay reductions and the committee's recommendations on revenues, the deficit projected by this resolution is $18.2 billion less than contained in the President's budget request and $8.6 billion less than projected by the first concurrent budget resolution.

Regarding revenues, it is worthy of note that this resolution makes room for an additional tax cut of $15.2 billion, $1.2 billion of which is intended for a variety of smaller items, and $14 billion of which has been designated for a general tax cut, with an effective date of January 1, 1979. While I would have preferred an even larger reduction in the revenue floor to accommodate greater tax cuts, I am pleased that tax reductions of the kind and amount contemplated by the Roth-Kemp proposal can be accommodated, with slight modification, so that a permanent reduction of individual tax rates can be put in place. This is something the economy of the country so badly needs and I particularly commend my distinguished colleague, the ranking minority member of the Budget Committee, Senator HENRY BELLMON, for his excellent presentation of this issue in his "additional views" printed in the report accompanying this budget resolution.

This resolution is a significant improvement over the first resolution and

it does indicate that the congressional budget process can be effectively utilized to better control and limit Government spending and more effectively utilize the fiscal policy tools available to the Government. In addition it demonstrates that responsible, sensible action can be taken to reduce the tax burden on individuals and businesses while maintaining due regard for the annual deficit and the public debt.

Still, I feel that further improvements in the budget process are possible and should be pursued. Acting on that conviction, I introduced S. 3200 on June 13 of this year. That bill would have amended the Budget Act to limit total outlays provided in any budget resolution to 20 percent of the estimated GNP. To date, there has been no action on that bill.

Mr. President, I should like to have printed in the RECORD a letter of July 24, 1978, which I received from the Board of Governors of the Federal Reserve System, from William Miller, chairman.

This letter, I say to my friends from the Budget Committee and to the Senators on the floor, basically was addressing the question of whether or not, since he had been talking about inflation very, very strongly, in the last 8 or 10 weeks, he thought it might be a prudent approach to set a percent of GNP as a procedural and substantive part of the budget process in the U.S. Congress. Without going into too much detail, let me say that, generally, the letter concurs with that and suggests that it might be a very good mechanism. I ask unanimous consent, for further details as to his views, that the letter itself be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

FEDERAL RESERVE SYSTEM,
*Washington, D.C., July 24, 1978.*

Hon. PETE V. DOMENICI,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR DOMENICI: Thank you for your recent letter concerning the reduction of Federal spending as a share of GNP.

Many observers agree that a decline in the share of Federal spending over the next few years can assist in bringing about a much needed expansion of business capital accumulation. I am not aware, however, of an economic analysis that tries to specify precisely the level of Federal spending, relative to GNP, that would be optimal. Economists appear to have contributed only general ideas on this subject, by discussing why and how the share of the public sector has tended to change over time.

My own recommendation to reduce the percentage of GNP accounted for by Federal expenditures to 20 percent by 1982, represents a pragmatic, interim target. The proposed moderation of the Federal spending share is achievable, for example, if existing Federal spending programs were continued at current levels. This implies that new initiatives should be added only to the extent that savings can be made in other programs. Thus the President's FY 1979 budget projects a 20 percent Federal spending share in FY 1982, on the assumption of no additional spending initiatives beyond those listed in the 1979 budget.

Between the mid-50's and the mid-60's, when inflation rates were moderate, the Federal spending share ranged from 17 to 19½ percent. Since mid-1965 much higher levels have been reached, and lately the Federal share of total GNP has been over 22 percent. A return toward a more moderate Federal spending share would help to reduce the Federal deficit, thus relieving inflationary pressures. At the same time, the reduced budget demands on resources and credit would free resources and funds for capital investment and export development. This shift is needed to restore healthy productivity growth and to reduce the large deficits in our balance of trade.

I hope that these remarks are helpful. It was a pleasure to hear from you.

Sincerely,

BILL.

Mr. DOMENICI. Mr. President, let me say that there is a great deal of talk these days about inflation, about the excessive tax burdens that the American people are bearing, and about deficit spending. Those are all culminating, these days, in the very, very widespread and, I believe, appropriate discussions that the most significant problem in America today is inflation. I do commend our chairman (Mr. MUSKIE) and our ranking member (Mr. BELLMON) for their continuing concern throughout this process about the issue of inflation and what it does to the American people, whether they are on fixed income or producing men and women, or whether they are small businessmen. I commend them for their concern.

It appears to me that one thing is missing today when we speak about whether or not the House tax cut of $16 billion is correct, whether or not the Roth-Kemp approach is correct, or whether or not we need a capital gains change in our country. The thing that is missing is that we are not telling the American people how we intend to control the outlays, the annual expenditures of the Federal Government.

The budget process has obviously, for its short term of existence, been doing a rather good job of analyzing that and analyzing the economics of our country and trying desperately to bring that ever-expanding budget within control. I had intended today to offer an amendment that basically would—I intended to offer two. I shall discuss the first one quickly.

The first one would have asked the President of the United States to submit, next year and for the following 3 years, budgets to us as optional budgets that, in each year, would reduce the percentage of GNP that that budget represented until we got to 1982, when that budget would be no more than 20 percent of the GNP.

My second amendment, that I had intended to offer, was actually an amendment to the Budget Act which would set, as a part of our process, that next year and for the following 3 years, we would bring in an outlay budget annually that was, in each year, a diminishing percentage of the GNP from where it is now so that we got to 20 percent in 1982. That would have been part of the substantive law of our land. At that point, if we ever wanted to exceed that, it would require a two-third vote of each body to spend more annually than 20 percent of the gross national product.

We all know that if we do not do something like that, there is a move afoot in the country, coming right up from the grassroots, to impose these kinds of restrictions, by constitutional amendment or otherwise. I personally believe that 20 percent of GNP or thereabouts is an appropriate annual expenditure by the Federal Government, and that anything that exceeds that for any substantial period of time has such a debilitating effect on the basic economic growth and the basic system that produces growth that, sooner or later, we are going to arrive at this kind of conclusion. I thought that it would be best to do it now rather than to wait until later.

I clearly understand that both of these amendments, if offered to the second concurrent budget resolution, would have been subject to a point of order under the Budget Act itself, because, as a matter of fact, they are not contemplated as being part of the second concurrent resolution as the Budget Act is drawn.

I am correct, am I not, I ask the chairman and the ranking minority member, that had I submitted them, a point of order would have been raised against them?

Mr. MUSKIE. I believe so, Mr. President. I have not discussed it with the Parliamentarian, but I understand it has been discussed at the staff level and the same problem that arose with respect to the Chiles amendment would have plagued the Senator's amendment at this time.

Mr. DOMENICI. Mr. President, without offering these amendments as amendments, but merely as part of this discussion, I ask unanimous consent that the two amendments be printed in the RECORD as part of this dialog, without ever calling them up or submitting them as amendments.

There being no objection, the amendments were ordered to be printed in the RECORD, as follows:

On page 4, after line 26, add the following:

"SEC. 3. Notwithstanding any other provision of this Resolution, unless waived by a two-thirds vote in each House of Congress, the President is required to submit to Congress a budget for fiscal year 1980 in which outlays shall not exceed 21.5 percent of the gross national product of the United States as estimated for that fiscal year by the Office of Management and Budget; to submit to Congress a budget for fiscal year 1981 in which outlays shall not exceed 21 percent of the gross national product of the United States as estimated for that fiscal year by the Office of Management and Budget; to submit to Congress a budget for fiscal year 1982 and in every fiscal year thereafter a budget in which outlays shall not exceed 20 percent of the gross national product of the United States as estimated for that fiscal year by the Office of Management and Budget."

On page 4, after line 26, add the following:

"SEC. 3. Notwithstanding any other provision of this Resolution, unless waived by a two-thirds vote in each House of Congress, the level of total budget outlays in any Concurrent Resolution passed in accordance with this Act shall not in fiscal year 1979 exceed 22 percent of the gross national product of the United States as estimated for that fiscal year by the Congressional Budget Office; shall not in fiscal year 1980 exceed 21.5 percent of the gross national product of the United

States as estimated for that fiscal year by the Congressional Budget Office; shall not in fiscal year 1981 exceed 21 percent of the gross national product of the United States as estimated for that fiscal year by the Congressional Budget Office; and shall not in fiscal year 1982 or in any fiscal year thereafter exceed 20 percent of the gross national product of the United States as estimated for the fiscal year by the Congressional Budget Office."

Mr. DOMENICI. I ask our distinguished chairman of the committee (Mr. MUSKIE) and ranking representative (Mr. BELLMON) if, early next year, as part of hearings on the Budget Act itself—we are in a position, as I understand it, where the Budget Committee has jurisdiction to recommend changes to the Budget Act, and in this case, with this kind of amendment, we would have concurrent jurisdiction with the Committee on Governmental Affairs. Might I ask my two good friends from the Budget Committee whether they believe this approach deserves some hearing next year to see whether or not the Budget Committee would be amenable to recommending changes of this type to the Senate of the United States?

Mr. MUSKIE. I would, of course. The Senator may remember the hearings this winter on the first budget resolution. We were taking testimony from some of the distinguished economists of the country and I asked them whether or not there was a limit to which the government share—by that I meant all three levels of government—some limit above which the government's share of GNP ought not to rise if we were to maintain a viable private sector. At that time, I think the figure they used was 34 percent as a measure of the share of all levels of government in GNP. The Federal Government's share was about 22 percent at that time.

Mr. DOMENICI. Correct.

Mr. MUSKIE. They really had not—at least the witnesses we had that morning had not addressed themselves to that question. I think we ought to.

I think we ought to form some judgments about that.

With respect to the Federal Government's share, our present objective in our 5-year projections, as the Senator knows, is to get the Federal Government share of GNP below 20 percent. I think that is a valid projection and that we ought to seek to pursue it.

That will pose for this Congress and for future Congresses even more serious hard choices as to the role of the Federal Government with respect to some problems we can see lying ahead that we will be asked to do something about. The national health insurance is one of them, and there are others covered in that report.

So the Senator's amendments address themseves to some very valid questions, I am delighted that he has expressed his interest in those questions in this way on the floor of the Senate.

I assure him, if we can get enough members of the Budget Committee to share his concern and mine as to these questions, we will surely have hearings so that we may explore them.

What we will do with the results of those hearings or with the conclusions we may draw from those hearings is something we will have to consider later.

The PRESIDING OFFICER. The Senator's 10 minutes have expired.

Mr. MUSKIE. I yield the Senator another 5 minutes.

Mr. DOMENICI. I thank the Senator.

Mr. MUSKIE. But I would agree with him that we would need to think in terms of the role the people of this country would like the Federal Government to play in providing services, in influencing the state of the economy, in impacting upon their lives.

These are fundamental questions that are visible all across the political landscape from coast to coast and from border to border in this country.

We ought to address those questions in very specific terms: What would a limit to the Federal Government's role be, what an expansion of that role would mean, what the drain of the resources from the economy would mean in terms of the private sector.

These are all relevant questions that I do not think have been addressed adequately or comprehensively enough and, certainly, not sufficiently so that the average citizen in this country can focus on it and make a contribution to our thinking.

I think they are fundamental questions. I congratulate the Senator.

Mr. DOMENICI. I want to say to my good friend from Maine, as to the discussion we are having and the amendments that I was going to introduce and that I have instead made a part of the RECORD, I consider this to be a part of the maturing process of the Budget Act and budgeting.

As we well know, this, in and of itself, to come up with a first and second concurrent resolution, and the functions, and look at every one of them to see how much they are growing and going through all the torture we have been going through, and matching that up with macroeconomic policies has, indeed, been arduous.

I think after the few years we have been at it, for us to now be looking at this very fundamental issue, that is, can we have an enterprise system with private initiative, private investment, and its productivity which puts most of our people to work and does most of that which we want done in terms of growth and energizing in the country, have we arrived at a point in history when we must say that the Federal Government's share of it can be only a certain percent? I personally believe we have.

I am delighted the Senator has commented as he has and that that point is one we will consider very seriously next year and, specifically, in terms of whether or not we ought to make it part of the substantive budgetary process of this land.

I thank the Senator for his kind words.

Mr. MUSKIE. I thank my good friend from New Mexico.

Mr. BELLMON. Will the Senator yield 3 minutes?

Mr. MUSKIE. Yes, I yield.

Mr. BELLMON. Mr. President, I would like to respond briefly to the comments made by the distinguished Senator from New Mexico, who is one of the most valuable members of the Budget Committee and who probably works as hard at the budget process as any other Member.

In 1978, the budget sets out 22.2 percent of GNP as the spending goal. In 1979, we are down to 21.7 percent of the GNP, which is a slight move in the right direction.

When we look at the report of the Budget Committee, we project GNP at $3.444 billion by 1983 and outlays of $669 billion, which is 19.9 percent of GNP.

So we are moving, if we can follow our plan, in the right direction.

I note that about $54 billion of tax reduction or spending increase is required to meet the economic projections on which these out-year numbers were based. If all of that $54 billion margin went to spending, outlays would amount to 21.2 percent of GNP by 1983.

So we have to make a choice between tax cuts or more spending.

I am certainly in favor of holding down on the spending. We will have to hold the line on new spending programs to meet the 2-percent goal, as the out-year budget shows. But this challenge can be met.

Rather than to mandate the change, however, I fear that such a rule might actually encourage spending under certain circumstances. I am not certain that 20 percent, 19 percent, or even 15 percent is the appropriate percentage of GNP to pursue. I also fear that such a rule will unduly encourage off-budget financing and other ingenious budgetary schemes.

I think we have to build safeguards against this.

I have great sympathy for the intent of the Senator from New Mexico. I feel that, clearly, when we undertake to look at the Budget Act as it has been working, this is one matter that deserves top consideration.

I join our chairman in agreeing it should be examined in appropriate hearings. I would certainly like to work with the Senator from New Mexico to see that this idea gets full consideration.

Mr. DOMENICI. I thank my good friend from Oklahoma.

Mr. President, I ask for an additional moment. I just want to say to my good friend from Oklahoma, I wholeheartedly agree with the remarks he has made and with the projections and predictions he has discussed. I hope they become a reality without a limitation.

On the other hand, I think he would agree with me, there are many "ifs" in getting to the 19.5 percent of GNP that is hoped for as found on page 27 of our concurrent resolution and the report today.

I think we have a choice to make as to whether or not mandating it will make it easier for us to discipline ourselves and whether it is realistic in terms of economics in our country, or whether we are apt to get there by just having it as a goal. I hope it becomes a full debate.

I do not know whether 20 percent is right, or 19 percent is right. But I do

know it must continue to come down from where it is if we do want a vibrant private sector that can permit our country to grow enough to do all the things requested of the Budget Committee and the authorizing committees every year.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE. Mr. President, I know of only two requests to address the budget, one from the distinguished Senator from Maryland (Mr. MATHIAS), and I know Senator BYRD would like some time just before the vote.

I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MUSKIE. Mr. President, I yield such time as he desires to the distinguished Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, the committee report on the second concurrent resolution on the budget for fiscal year 1979 is a comprehensive report, and I think it is a very good report. Many facts and figures and much information have been made available to the Senate through this report, and I believe that is very important.

On page 29 of the report is a very significant table. I will read one sentence from the committee report on page 29:

The table below presents the recommendations of the committee by mission and function for fiscal year 1979 and illustrates the impact of these decisions through fiscal year 1983.

I think it is very important that the Senate have that information, and I commend the committee for developing the facts which are being presented by this report.

This table on page 29 shows that the cost of Government will increase 50 percent during the next 5 years. For the current year, fiscal 1978, the budget authority is $500 billion. By fiscal year 1983, according to the report, budget authority will have increased to $767 billion.

Outlays for the current fiscal year—namely, fiscal year 1978—are $448 billion. By 1983, the outlays are projected to go to $669 billion.

So it is readily seen that the cost of Government during the 5-year period ending in 1983 will increase by 50 percent, according to the committee projections.

Mr. President, I ask unanimous consent to have this table on page 29 printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

*5-year spending totals*

[In billions of dollars]

| | Fiscal year | | | | | |
|---|---|---|---|---|---|---|
| | 1979 | 1980 | 1981 | 1982 | 1983 | Total 1979–83 |
| Budget authority | 557.7 | 607.0 | 660.4 | 715.1 | 767.9 | 3,308.3 |
| Outlays | 489.5 | 536.4 | 575.4 | 622.7 | 669.2 | 2,893.2 |

Mr. MUSKIE. Mr. President, I ask unanimous consent that it be in order to ask for the yeas and nays at this time on the House concurrent resolution.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MUSKIE. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PERCY. Mr. President, I am pleased to support the fiscal 1979 budget resolution, and I commend the Budget Committee for tapering the Federal budget to fit the changed economic circumstances we now find ourselves in.

At the time we passed the first budget resolution on April 26, the economy was in a far different position. Unemployment was dropping and fell to 6 percent that month, the lowest in 3½ years. Inflation, on the other hand, began to worsen after passage of the budget resolution and it is now possible we will finish out the year with double digit levels of inflation. George Meany, the president of the AFL-CIO, acknowledged in mid-May that inflation had replaced unemployment as the country's chief economic concern. Subsequent polls indicated that the majority of the American people share this concern.

The second resolution on the budget which we vote on today takes account of these changes. Federal spending has been reduced by $9.3 billion and the deficit by $8.6 billion, or 17 percent. What is more, the resolution cuts future Federal growth by $11.1 billion by triming budget authority—the real measure of Federal spending. This will certainly serve as a signal to Wall Street and our trading partners that we are sincere about reducing inflation and that the U.S. Senate is prepared to restrain the Federal budget to do so.

On the other side of the coin—revenues—the budget resolution permits the same size tax cut as the April resolution did. This is important because the economy is in great need of the invigorating tax cuts that will spur investment and give our middle income taxpayers a break. We all know that the tax code penalizes Americans whose wages keep up with inflation for it bucks them into higher tax brackets, thereby reducing their actual buying power. The Finance Committee is just now beginning its discussions of the 1978 tax bill and I will be working for investment incentives and individual tax cuts when that bill comes to the floor for consideration. Our budget resolution should leave room for these essential tax reductions.

Mr. President, I noted that several of my colleagues who serve on the Budget Committee have expressed concern that we could actually make the hard spending cuts that need to be made in the next several years. I agree with this sentiment and feel that there is no easy mechanism for our reconsideration of Federal programs and regulations. We need to pass a sunset law this year before we adjourn because it will give us the mechanism that will permit the timely consideration of Federal programs and the modification or elimination of those that are not functioning well.

I would also like to take this opportunity to urge my colleagues to support the legislation I have introduced to make our evaluation of Federal programs more frequent. Together with Representative WILLIAM STEIGER, who is the House sponsor, I have introduced the Government Accountability Act. Our bill requires the President to submit a biannual report to Congress on the management of all the programs administered by the executive branch. The President would rank Federal programs as to their effectiveness within each department, in effect issuing a "report card." This ranking would be based on the clarity of the program's statutory objectives, its design, and the quality of its management.

Our bill will also require the Director of the Office of Management and Budget—OMB—to identify programs that have seemingly contradictory aims or inconsistencies. Those programs that cannot measure up will bear the full weight of congressional scrutiny and may be modified or scrapped.

Mr. President, the Government Accountability Act would not directly affect the budget process, but, like the Budget Act, it would move the Federal Government toward a more manageable and responsive role. It is the type of Government the American people want and deserve. Just as the budget resolution we vote on today shows that Congress and the Federal Government can modify spending in light of new economic conditions, the biannual management report of the President will give us the tools to affect long-range changes in Federal spending.

Both Representative STEIGER and I are indebted to former Ambassador Laurence H. Silberman who first suggested this good idea.

Mr. President, I ask unanimous consent to have printed in the RECORD an article published in the Washington Star on August 30, explaining more fully the concept behind our bill.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LET'S RANK GOVERNMENT EFFECTIVENESS

(By Michael Novak)

I wish Democrats had thought of this idea first: a shrewd technique to make big government accountable. "Rank the bastards!" might be its battle cry.

My colleague at the American Enterprise Institute, former Ambassador Laurence H. Silberman, spelled out the idea in the new Republican intellectual journal Commonsense (310 First St. N.E., Washington, D.C. 20003). Each year the president of the United States would be required to report to Congress on the rank of every program in each department of the executive branch according to its effectiveness. Then the Congress—and the people—would get an idea of the least effective programs in each department.

Every single program would be ranked. Each would be rated in comparison to other programs within its own department. Good programs would get due notice. So would poor ones. Silberman proposes three mandatory criteria for distinguishing them: (a) coherence of statutory objectives; (b) design of the program; (c) quality of management. The ranking system would give government programs something like the major-league baseball standing: a mandatory finish line with clear winners and losers each year.

The director of the Office of Management and Budget would be required to identify programs within the government that have contradictory aims (i.e., encouraging tobacco growers but discouraging smokers). The OMB director would be entitled to propose to Congress the elimination of ineffective programs. Good managers might welcome that opportunity.

Would this particular presidential report be buried from sight? Both journalists and the public would love it. Would budget-wise administrators place the most popular programs at the lowest ranking, to protect them? Lobbies for popular programs would almost certainly begin fighting for a high ranking months before the report was due.

Some ineffective but popular programs would always be at the bottom and some of the worst would be sure to be among them. Besides, the president would have to supply a rationale for each ranking. He would not want to appear to be naive.

Some administrators might try to hide poor programs within larger categories. But astute administrators would have an incentive to break programs down into smaller measurable units. In order to keep their empires as large as possible, some would sacrifice only smaller units at the bottom. Year by year, the worst of these could be pruned away.

Actually, Silberman notes, good managers of federal departments have been doing something like this for years. Faced with tighter budgets, they informally rank their programs when they allocate scarce resources. A new law would force them to make these rankings formal, analytically precise and public.

How can one compare apples and oranges? When you have a limited amount of money for fruit, you have to. A Government Accountability Act would force managers to compare real programs with real programs, on the basis of clear technical analysis. Over the years, evaluative techniques will become sharper. For the only way to diminish controversy will be to develop clear, objective, communicable criteria.

Recall that when students in college used to be ranked, each single one received a relative position. Nowadays, when students are not ranked, "grade inflation" occurs; the bottom half moves upward in an anonymous mass. In the old days, even if all passed, each knew where he stood. Ranking improves techniques of evaluation.

Most subcabinet officers today stay in one position less than two years. To make a name for themselves, some find an incentive to launch a "new" program. No one notices or rewards tough managerial skills (which usually provoke internal dissension).

Under a ranking system, new appointees would face the threat of seeing their program slip lower, compared to previous years, and some would hit bottom. Standards of excellence would change, as incentives changed.

In the private sector, competition helps. A ranking system will make the public sector competitive.

Leaders in the House and Senate have recently proposed a Government Accountability Act based on Ambassador Silberman's shrewd techniques. Democrats, who favor good government as well as big government, should favor this act for the best of populist reasons.

It restores a piece of invisible government to visibility. It will help presidents to get a handle on the monster they manage.

Mr. LONG. Mr. President, a little over a month ago, the chairman of the Senate Budget Committee wrote me a letter asking for the advice of the Finance Committee on those aspects of the second budget resolution which affect Finance Committee jurisdiction. After discussing this request with the committee, I appeared before the Budget Committee and also wrote a letter to Chairman MUSKIE. I am pleased to see that, in setting its recommended revenue levels in the second budget resolution, the Budget Committee has come quite close to meeting the recommendations of the Finance Committee. We had recommended maintaining the allowance in the first resolution for tax cuts totaling $24.7 billion in the upcoming fiscal year. The Budget Committee has recommended an allowance for tax cuts totaling $23.4 billion.

I am, however, concerned over the fact that a much smaller total has been allowed for in the House-passed version of the second budget resolution. The House resolution would permit total tax cuts of only $19.9 billion—nearly $5 billion less than was allowed for in the first budget resolution adopted less than 4 months ago. I believe that first resolution represents a commitment on the part of Congress to provide taxpayers a degree of relief which compensates at least for this year's inflation plus the increases which are necessary in social security taxes. That commitment can be accomplished within the revenue totals recommended by the Senate Budget Committee. I am concerned whether that commitment can be met if the conference on the second budget resolution provides for a smaller tax cut than the Senate Budget Committee has recommended.

The judgment of Congress as expressed in the first resolution was that revenues should be reduced $24.7 billion in legislation this year. The Senate Budget Committee now recommends a tax reduction of $23.4 billion. The much lower total included in the House version of the second budget resolution is based on the tax cuts provided in the House-passed tax bill. I am certain that the Senate will suggest ways of improving on the House bill. That bill is inadequate. For many taxpayers at virtually all income levels, it does not even offset the impact of 1 year's inflation and the increases which are taking place in social security taxes.

For these reasons, I believe the revenue loss recommended by the Senate Budget Committee's proposed second resolution is a minimal one. I strongly urge that the Senate conferees resist any further reduction in the recommended tax cuts.

● Mr. MAGNUSON. Mr. President, I submit for the RECORD an editorial entitled "Budget Balancing Made Easy," which was published in the Wall Street Journal of Friday, September 1, 1978.

The editorial follows:

BUDGET BALANCING MADE EASY

When you ask around Washington why Congress doesn't stop inflation by cutting federal spending, you are apt to hear a lot of defeatist talk abount "uncontrollable" items and the like.

This, of course, is utter nonsense. Every dollar of the $500 billion the federal govenment spends is controllable. Indeed, Congress is charged explicitly by the Constitution with controlling the budget. What people really mean when they say "uncontrollable" is what Congress has made promises to a lot of people and finds it politically inconvenient to withdraw them.

Hence, we have chronic high inflation, public confidence in Congress is at a dangerously low ebb, and there is a strong grassroots movement to take matters out of the hands of Congressmen. In 22 states, the legislatures have passed resolutions calling for a constitutional convention for the purpose of making a balanced federal budget a constitutional requirement. If 34 states so vote, the Constitution requires Congress to call such a convention.

We're not saying that such a historic event will happen, but if it should it would be a colossal vote of no confidence in the United States Congress. The people would be saying that they have finally decided that Congress can't be trusted with money.

To avoid such disgrace, we would urge Congress to adopt its own version of zero-based budgeting. Instead of asking where to cut spending, it should start asking what federal spending is of any value to the nation. It's surprising how simple the problem then becomes.

Of major federal activities, national defense and foreign policy seem to us to be the only truly essential ones. The private sector or state and local government could do others, in many cases far more economically. Indeed, before Washington became the great expansionary colossus it is today, most such activities—welfare, education, transportation, etc.—were so conducted, with generally favorable results.

For the sake of argument, however, we will add several other things the federal government can perhaps justify, even if it doesn't always do them well. Social Security in its simplest form, as an income transfer to the aged and before it became an uncontrollable grab bag, had merit. The federal government also has had good success in supporting broad research—in agriculture, medicine, nuclear development, space exploration and the like. It probably would be imprudent to tinker with that.

We would also not deny Washington the task of gathering national statistics. And a case can be made for a Federal Reserve System, although England fared quite nicely for centuries with a private central bank.

Beyond that, the marginal utility of Washington drops sharply. With a few exceptions,

such as food inspection and the air safety operations of the Federal Aviation Administration, we doubt that the public would notice the demise of most federal regulatory agencies, except through price declines and an abundance of lawyers looking for jobs. There would be a sharp and sudden tax saving from shutting down the Department of Agriculture and transferring any useful research they do to some department for general research that would also take in NASA, etc.

At the Department of Transportation, Amtrak and Conrail should be auctioned to the highest bidders, who would then retain only those parts that have genuine usefulness. There would be huge tax savings. Urban transit should be left up to the cities, where it belongs, forcing them to find efficient means of moving commuters. Similarly, public housing can be safely left to the cities and states, which are in a better position than Washington to measure true needs.

With the cuts we have in mind, we could imagine a federal budget somewhere close to half the size of the present budget. That would leave room for a sharp cut in taxes, some of which would make room for states to finance a loss of grants from Washington. There would also be room in that budget cut to reduce the federal debt, all of which would lower inflation and interest rates generally and certainly reverse the alarming rise in interest costs the federal government pays.

What we've sketched here will be regarded in Washington as an end-of-summer's dream ignorant of the political realities of the Potomac, where the combined lobbies of special interests protect all the domains we have so casually demolished. We would not deny it. Similarly, the possibility of that constitutional convention looks pretty remote too, at the moment. But strange things are happening. A few years ago, who would have dreamed that a curmudgeon named Howard Jarvis would turn the whole state of California on its ear? We're simply offering our advice early, in case it's needed in a hurry.●

● Mr. JAVITS. Mr. President, although the conferees have not yet convened on the education amendments, H.R. 15, both the House- and Senate-passed versions include concentration grants beginning in fiscal year 1979. The anticipated enactment of H.R. 15 within the next 2 months would mean that the first fiscal year 1979 supplemental appropriation could include the $400 million for concentration grants, as requested by the President. For this reason, it is important that this authority be included in the budget resolution.

I am grateful that the Budget Committee has decided to support this program.

Mr. President, in the same mission, No. 501, I am concerned that the amounts available for the regular ESEA I and impact aid programs are insufficient. I have examined the actions of the House and the Senate Appropriations Committee on H.R. 12929, the HEW—Labor Appropriations bill for fiscal year 1979. This bill deals with title I and impact aid in their present form, because it covers present law only and not the new provisions like concentration grants.

Let us look first at the title I regular program. The President requested $2,978.8 million; and the House passed level increases this amount by $100 million to $3,078.8 million. The Senate Appropriations Committee recommends only $2,889.8 million, a reduction of $189 million from the House level and $89 million from the President's request.

In impact aid, the President requested $811.4 million for the Public Law 874 program. This represents full funding for tier two. This request was to maintain the present program for fiscal year 1979, and was made in the hope that authorizing bill changes would be made effective in 1980 to reduce these levels. The House level is the same amount as the President's request. However, the Senate Appropriations Committee has recommended a reduction of $54.3 million from the impact aid program. After staff consultation with the Budget Committee, I am informed that function 500 includes a $100 million cut for impact aid, and allows only $711.4 million.

In summary, the elementary and secondary education mission includes a reduction of $189 million from the President's budget request; which is $289 million below the House passed appropriations bill and $54.3 million below the Senate Appropriations Committee recommendation.

Mr. President, I do not know what the action the Senate will take when it considers H.R. 12929. But I would be opposed to a budget resolution which reduces the President's request for education by almost $200 million without adequate discussion and justification. If previous experience is a guide, the final version of H.R. 12929 will be approximately midway between the House and Senate levels. In this case, mission 501 may be understated by over $100 million. As the budget resolution is stated in billions, even this huge amount is only calculated by a 0.1 difference. Therefore, I do not intend to offer an amendment to the budget resolution, because I believe that the overall size of function 500 and its many programs will allow flexibility to take care of this situation. The proposed function 500 ceiling of $31.5 billion budget authority and $30.2 billion outlays for fiscal year 1979 should provide room for the needs of elementary and secondary education.

Mr. President, my purpose in rising is to point out that these assumptions used by the Budget Committee may prove incorrect. The Budget Committee has chosen to base its calculations on the levels in the Senate Appropriations Committee recommended version of H.R. 12929. I have no quarrel with this procedure because some such assumption must be made in order to construct a budget resolution. And if these assumptions are not correct, we should not attribute any "budget busting" to elementary and secondary education. It is certain that the Senate strongly supports these programs. On August 24, the Senate voted 85 to 7 on final passage of the Education Amendments of 1978 which reauthorize them. I want my colleagues to be aware of the spending implications of the second budget resolution for these vital programs in support of elementary and secondary education.●

Mr. MUSKIE. Mr. President, so far as I know, there are no other amendments or requests for time.

I yield back the remainder of my time.

Mr. BELLMON. I yield back the remainder of my time.

Mr. MUSKIE. Mr. President, I ask that the Committee on the Budget be discharged from further consideration of House Concurrent Resolution 683 and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution will be stated by title.

The second assistant legislative clerk read as follows:

A concurrent resolution (House Concurrent Resolution 683) revising the congressional budget for the U.S. Government for the fiscal year 1979.

Mr. MUSKIE. Mr. President, I ask unanimous consent to strike all after the resolving clause and insert in lieu thereof the language of Senate Concurrent Resolution 104, as reported.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is all time yielded back on House Concurrent Resolution 683?

Mr. MUSKIE. I yield back my time.

Mr. BELLMON. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota Mr. ANDERSON), the Senator from North Dakota (Mr. BURDICK), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from Tennessee (Mr. SASSER), the Senator from Illinois (Mr. STEVENSON) and the Senator from Alabama (Mrs. ALLEN) are necessarily absent.

I further announce that the Senator from Massachusetts (Mr. KENNEDY) is absent on official business.

I also announce that the Senator from Rhode Island (Mr. PELL) is absent because of illness.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) and the Senator from Rhode Island (Mr. PELL) would each vote "yea."

Mr. CURTIS. I announce that the Senator from Tennessee (Mr BAKER), the Senator from Massachusetts (Mr. BROOKE), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Wyoming (Mr. HANSEN), the Senator from Oregon (Mr. HATFIELD), the Senator from North Carolina (Mr. HELMS), the Senator from Nevada (Mr. LAXALT), the Senator from Idaho (Mr. MCCLURE), the Senator from Kansas (Mr. PEARSON), the Senator from Vermont (Mr. STAFFORD),

the Senator from Alaska (Mr. STEVENS) and the Senator from Texas (Mr. TOWER) are necessarily absent.

The result was announced—yeas 56, nays 18, as follows:

[Rollcall Vote No. 372 Leg.]

YEAS—56

| | | |
|---|---|---|
| Bayh | Gravel | Morgan |
| Bellmon | Hart | Moynihan |
| Bentsen | Hathaway | Muskie |
| Biden | Heinz | Nelson |
| Bumpers | Hodges | Packwood |
| Byrd, Robert C. | Hollings | Percy |
| Cannon | Huddleston | Randolph |
| Case | Inouye | Ribicoff |
| Chiles | Jackson | Riegle |
| Church | Javits | Sarbanes |
| Clark | Leahy | Schmitt |
| Cranston | Long | Schweiker |
| Culver | Lugar | Sparkman |
| Dole | Magnuson | Stennis |
| Durkin | Mathias | Stone |
| Eagleton | Matsunaga | Weicker |
| Ford | McGovern | Williams |
| Glenn | Melcher | Young |
| Goldwater | Metzenbaum | |

NAYS—18

| | | |
|---|---|---|
| Bartlett | Garn | Scott |
| Byrd, Harry F., Jr. | Griffin | Talmadge |
| | Hatch | Thurmond |
| Curtis | Hayakawa | Wallop |
| Danforth | Nunn | Zorinsky |
| DeConcini | Proxmire | |
| Domenici | Roth | |

NOT VOTING—26

| | | |
|---|---|---|
| Abourezk | Hatfield, Mark O. | McIntyre |
| Allen | | Pearson |
| Anderson | Hatfield, Paul G. | Pell |
| Baker | | Sasser |
| Brooke | Helms | Stafford |
| Burdick | Humphrey | Stevens |
| Chafee | Johnston | Stevenson |
| Eastland | Kennedy | Tower |
| Hansen | Laxalt | |
| Haskell | McClure | |

So the concurrent resolution (H. Con. Res. 683), as amended, was agreed to.

Mr. MUSKIE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BELLMON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MUSKIE. Mr. President, I ask unanimous consent that Senate Concurrent Resolution 104 be indefinitely postponed.

The PRESIDING OFFICER (Mr. WILLIAMS). Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, there will be no more rollcall votes today.

## ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

## EXPULSION OF AMERICAN NEWSMAN DANIEL DROOZ FROM SOUTH AFRICA

Mr. ROTH. Mr. President, on August 31, the Government of South Africa ordered an American newsman, Daniel Drooz, out of South Africa. Mr. Drooz, a constituent of mine from Wilmington, had been reprinting as a special correspondent for the Chicago Sun-Times from Johannesburg for the past 2 years.

The South African action came despite appeals from the Delaware delegation, Department of State, and the Chicago Sun-Times for reconsideration. During the past several weeks, I have spoken and corresponded with the South African Ambassador and responsible State Department officials in an effort to allow Mr. Drooz to be permitted to remain in South Africa. The State Department interceded in Pretoria and with the South African Embassy here in Washington on Mr. Drooz' behalf.

I am deeply disappointed that the South African Government chose to ignore our warnings about the very harmful effects the expulsion order would have on United States-South African relations. The South African Government clearly does not understand the great importance the American people attach to the free flow of information.

Unlike the United States, South Africa does not have a strong tradition of freedom of the press. It was only very recently, I understand, that foreign newspaper correspondents were permitted to reside in South Africa, but the South African Government has attempted to maintain a tight leash on our correspondents by requiring very frequent renewal of work and residency permits, with the clear implication that renewal would not be forthcoming for those whose articles were disliked by the Government.

While a similar threat was made earlier this year against another American correspondent and Mr. Drooz was threatened with expulsion last year, Mr. Drooz' expulsion last week marks the first time in this decade that this sanction has actually been used against an American correspondent. As such, it represents a very important and dangerous precedent and should be vigorously protested.

I personally have little doubt that American correspondents in South Africa will continue to write the news as they see it, regardless of Government threats or harassment. Nevertheless, I believe we should make our displeasure abundantly clear to South Africa. Certainly, the expulsion of Mr. Drooz does nothing to enhance South Africa's image in the United States.

Mr. President, I ask unanimous consent that articles from the Wilmington Morning News and Chicago Sun-Times regarding Mr. Drooz be printed at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Wilmington Morning News, Aug. 31, 1978]

REPORTER, EX-DELAWAREAN, IS EXPELLED FROM S. AFRICA

The first American newsman to be expelled from South Africa since the early 1960s was expected to arrive today at his parents' home in Greenville.

Daniel B. Drooz, 33, son of Rabbi and Mrs. Herbert E. Drooz of Greenville, had been working as a special correspondent for the Chicago Sun-Times in Johannesburg until his expulsion this week.

The South African government told Sen. William V. Roth Jr., R-Del., that Drooz was being kicked out because the Argus Africa News Service had offered him a job and "this would deprive a South African of employment," Drooz wrote in his last dispatch.

Drooz, who charged the South African government with harassing him for more than a year, called the government's reasoning "semantic gibberish."

He said the job offer would not have deprived a South African of work because "their passports are not valid in most of black Africa."

Drooz's father, who is rabbi of Temple Beth Emeth, said yesterday, "I'm very proud of our son because he has been reporting the news as he saw it.

"He's coming home . . . with his wife, our stepgrandson and four dogs," he added.

He said that when his son was getting ready to be married in South Africa last summer, he had already received notice to leave the country. The expulsion order was delayed, however.

The elder Drooz also said Roth and Sen. Joseph R. Biden Jr., D-Del., had tried in vain to dissuade the South African government. "They were wonderful, Mr. Roth and Mr. Biden, but they could not do anything," he said.

The Sun-Times protested to South African officials that the expulsion "will be widely viewed as repressive action to reduce access to information about South Africa."

Daniel Drooz began his South African assignment in September 1976, first with the Chicago Daily News and then, after that paper folded, with the Sun-Times.

He is a graduate of P. S. du Pont High School, where he was one of the state's top orators in 1962. He went on to Antioch College and the University of Michigan, where he received a master's degree in journalism.

In 1977, as a correspondent for the Toronto Star, he won the National Newspaper Award of Canada for his coverage of the Israeli raid on Entebee, Uganda.

Drooz has reported extensively from Israel and covered wars in Israel and Cyprus. He was wounded by shell fragments in 1974 while covering the Turkish-Greek war in Cyprus for the London Daily Times.

[From the Chicago Sun-Times, Aug. 30, 1978]

S. AFRICA EXPELS REPORTER FOR SUN-TIMES

Daniel B. Drooz, special correspondent for The Sun-Times in South Africa, has been expelled from that country despite repeated protests by Sun-Times editors. Drooz left South Africa Wednesday.

The protests and requests for reconsideration of the expulsion order were made in recent weeks by Editor in Chief James Hoge and Editor Ralph Otwell.

But South African authorities have remained unyielding.

Otwell, in an Aug. 16 cable to South African Foreign Minister Roelof F. Botha in Pretoria, said:

"The Chicago Sun-Times urges prompt reconsideration of the nonrenewal of the work permit for its correspondent, Daniel Drooz. As we have conveyed earlier in messages to Ambassador (Donald B.) Sole and Minister of Information (Connie) Mulder, the notice to Mr. Drooz to leave South Africa by Sept. 1 will be widely viewed as repressive action to reduce access to information about South Africa. Further, we believe expulsion of Mr. Drooz is inimical to interests of your country and to relations with the U.S.A. Prompt action to reverse the ouster decision is essential to all."

Sun-Times editors also alerted the U.S.

State Department to the implications of the expulsion order.

In his last dispatch from Johannesburg, Drooz wrote that the reason given by the South African government for his expulsion—the first of an American correspondent since the early 1960s—was "a distortion of reality."

The writer said U.S. Sen. William V. Roth Jr. (R-Del.) was officially notified by the South African government that Drooz was being kicked out because the Argus Africa News Service of South Africa had offered him a job as a reporter traveling in black Africa and "that this would deprive a South African of employment."

As a result, the government said through Ambassador Sole, Drooz' work permit for The Sun-Times was not being renewed.

Drooz wrote that, in fact, no South African would have been deprived of a job if he had taken the position with Argus because no South African could have held the post. "Their passports are not valid in most of black Africa," the correspondent noted. Drooz quoted a South African attorney as calling the government's reasoning in the matter "semantic gibberish."

The newsman said further that his problems with official South Africa dated to a year ago, when he received an expulsion order from former Information Sec. Eschel Rhoodie, who had accused him of being a spy.

"He wouldn't say for whom," Drooz wrote. "But he said it, and one of his aides said it in front of several witnesses, including reporters for the Christian Science Monitor, the New York Times and the British Broadcasting Corp.

"When confronted with his remarks," the newsman continued, "Rhoodie, who subsequently was 'retired' for maladministration, wrote that it was all malicious lies."

That original expulsion order was withdrawn, but his problems with the South African government continued. Along with correspondents for Newsweek magazine and the West German news magazine Der Spiegel, Drooz was denied accreditation as a correspondent, "kept on three-month extensions of work permits for the next year and harassed every time they came up for renewal."

Drooz said he had reason to believe his mail and telephone were under official surveillance before the decision was made to throw him out of the country.

Drooz, 33, has reported from South Africa for The Sun-Times as a special correspondent since March and earlier served in the same capacity for The Chicago Daily News since September, 1976.

A seasoned foreign correspondent, he has reported extensively from Israel and has covered wars in both Israel and Cyprus. He was wounded by shell fragments in 1974 while covering the Cyprus action for the London Daily Times.

Drooz is a native of Wilmington, Del., the son of Reform Rabbi Herbert Drooz.

Reporter Drooz is a graduate of Antioch College, Yellow Springs, Ohio, and holds a master's degree in communications from the University of Michigan. His earlier journalistic background includes assignments with the Associated Press in New York and the Voice of America in Washington.

## NATIONAL HISPANIC HERITAGE WEEK

Mr. PERCY. Mr. President, President Carter has declared the week of September 10–16 as National Hispanic Heritage Week. Hearings will be conducted across the Nation by executive branch officials to hear the views of Hispanic people on problems faced within their communities.

I am very pleased that one of these hearings is scheduled to be held in Chicago on September 12 at the Latino Institute. I intend to review the testimony presented at this hearing and also to cooperate with the administration in every way possible to alleviate the serious problems of unemployment, housing, health, and discrimination, which currently confront the Hispanic community.

National Hispanic Heritage Week is an important step in beginning to understand and help the Hispanic community. I commend President Carter in this effort. However, as of today, he has yet to appoint a Hispanic Commissioner to the Equal Employment Opportunity Commission. I urge the President, as I have in the past, to fill this important position promptly. What better way to honor National Hispanic Heritage Week than to appoint a Hispanic Commissioner to the EEOC.

## MESSAGES FROM THE PRESIDENT RECEIVED DURING THE RECESS

Under authority of the order of the Senate of August 25, 1978, the Secretary of the Senate, on August 28 and September 1, 1978, received messages from the President of the United States.

## EXECUTIVE MESSAGES REFERRED

Under authority of the order of the Senate of August 25, 1978, messages from the President of the United States submitting sundry nominations, received on August 28 and September 1, 1978, were referred to the appropriate committees.

(For nominations received on August 28 and September 1, 1978, see the end of Senate proceedings for today.)

## FEDERAL PAY COMPARABILITY ALTERNATIVE PLAN—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE RECESS—PM 213

Under authority of the order of the Senate of August 25, 1978, the Secretary of the Senate on August 31, 1978, received the following message from the President of the United States, which was referred to the Committee on Governmental Affairs:

*To the Congress of the United States:*

Under the Pay Comparability Act of 1970, an adjustment in Federal white collar pay will be required on October 1.

I have reviewed the report of my Pay Agent and the recommendations of the Advisory Committee on Federal Pay relative to a pay adjustment. Their findings indicate that an average 8.4 percent increase, at a cost of $4.5 billion, will be required to achieve comparability with the private sector.

I support comparability in pay between the Federal Government and the private sector. It is essential to ensure that the Federal Government continues to attract and retain qualified and dedicated employees. The Federal Government's civilian and military personnel have given the country loyal and competent service, and I would normally have no hesitancy in ordering a pay raise achieving comparability. However, pay comparability must be viewed in the light of the overall economic situation now facing our country. For that reason, my decision about pay comparability this year is especially difficult.

Today the greatest single threat to our national economic growth and the jobs and prosperity of our people is inflation. It persists because all of us—business and labor, farmers and consumers—are caught on a treadmill that none of us can stop alone. Each group desires to raise its income to meet rising costs; eventually we all lose the inflation battle together.

To curb the wage and price spiral, I proposed last spring that in each industry and sector of the economy, wage increases this year be held significantly below the average increases for the two preceding years. The Federal Government should set an example in this effort. A Federal white collar civilian and military increase of 5.5 percent would be consistent with this guideline.

The pay act gives me the authority to propose an alternate pay adjustment which I consider appropriate in the light of, "economic conditions affecting the general welfare." Therefore I am submitting to the Congress an alternative plan for a 5.5 percent pay increase. This will allow the Federal Government to set an example for labor and industry and lead the fight against inflation by example, and not just words alone.

Accordingly, I strongly urge the Congress to support the alternative recommendation which is attached.

JIMMY CARTER.

THE WHITE HOUSE, *August 31, 1978.*

## REPORT ON PROGRESS MADE TOWARD A NEGOTIATED SETTLEMENT ON CYPRUS—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE RECESS—PM 214

Under authority of the order of the Senate of August 25, 1978, the Secretary of the Senate on September 1, 1978, received the following message from the President of the United States, which was referred to the Committee on Foreign Relations:

*To the Congress of the United States:*

As required by Public Law 94–104, this report describes the progress that has been made towards a negotiated settlement on Cyprus in the past sixty days.

The last report described proposals submitted by the Turkish Cypriots on April 13, and noted several expressions of flexibility subsequently made by the Turkish side. In July there were further encouraging signs. Both the Government of Cyprus and the Turkish Cypriot leadership put forward fresh and promising proposals for the resettlement of the important commercial and resort city of Varosha (New Famagusta). Varosha has

been deserted and under Turkish control since the 1974 fighting. Significantly, both sides foresee that progress on this issue will lead to a resumption of the intercommunal negotiations.

We have urged the two Cypriot parties to give these proposals careful consideration, and plan to continue to encourage a satisfactory compromise on Varosha, one we hope will lead them to reconvene the intercommunal negotiations under the aegis of the Secretary General of the United Nations.

Both the Congress and the Administration feel that the United States 1) should continue to play an active role in seeking a just and lasting Cyprus settlement, and 2) should continue to support the efforts of Secretary General Waldheim. On August 14, the conference committee on the Security Assistance Bill approved the language to end the Turkish Arms Embargo. I consider this action appropriate and necessary to our continuing impartial and constructive role.

JIMMY CARTER.

THE WHITE HOUSE, *September 1, 1978.*

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

## PRESIDENTIAL APPROVALS

A message from the President of the United States reported that on August 28, 1978, he had approved and signed the following acts:

S. 405. An act for the relief of Chong Cha Williams; and

S. 1335. An act for the relief of Shin Myong Yo Furdom, also known as Myong Yo Sin.

## MESSAGES FROM THE HOUSE

### ENROLLED BILLS SIGNED

At 1:01 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled bills and joint resolutions:

S. 9. An act to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes;

S. 1633. An act to provide for the extension of certain Federal benefits, services, and assistance to the Pascua Yaqui Indians of Arizona, and for other purposes;

S. 2543. An act to amend title 39 of the United States Code to provide better enforcement procedures for preventing fraudulent solicitations through the mails;

H.R. 185. An act to amend section 2632 of title 10, United States Code, to provide the Secretary of the department in which the Coast Guard is operating with the authority to transport Coast Guard employees to and from certain places of employment;

H.R. 2931. An act to amend chapter 89 of title 5, United States Code, to establish uniformity in Federal employee health benefits and coverage by preempting certain State and local laws which are inconsistent with such contracts, and for other purposes;

H.R. 2952. An act for the relief of M/S. William E. Boone, U.S. Army, retired;

H.R. 3532. An act to amend chapter 639 of title 10, United States Code, to enable the Secretary of the Navy to change the name of a publication of the Naval Observatory providing data for navigators and astronomers;

H.R. 7161. An act to amend title 10, United States Code, to allow nationals, as well as citizens, of the United States to participate in the Junior Reserve Officers' Training Corps program;

H.R. 7162. An act for the relief of Stephanie Johnson;

H.R. 8342. An act to amend title 5, United States Code, to provide for the application of local withholding taxes to Federal employees who are residents of such locality;

H.R. 8397. An act to provide that a certain tract of land in Pinal County, Ariz., held in trust by the United States for the Papago Indian Tribe, be declared a part of the Papago Indian Reservation;

H.R. 8471. An act to authorize the Governor of the State of Wyoming to exhibit the nameplate, ship's bell, and silver service of the U.S. Ship *Wyoming* without restriction as to the place of such exhibition;

H.R. 10878. An act to extend until October 1, 1981, the voluntary insurance program provided by section 7 of the Fishermen's Protective Act of 1967, and for other purposes;

H.R. 10899. An act to provide for Federal regulation of participation by foreign banks in domestic financial markets;

H.R. 12106. An act to amend the Independent Safety Board Act of 1974 to authorize additional appropriations;

H.R. 12240. An act to authorize appropriations for fiscal year 1979 for intelligence and intelligence-related activities of the U.S. Government, the intelligence community staff, the Central Intelligence Agency retirement and disability system, and for other purposes;

H.R. 12602. An act to authorize certain construction at military installations for fiscal year 1979, and for other purposes;

H.R. 12927. An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes;

H.R. 13235. An act for the relief of James Thomas Lantz, Jr., David D. Bulkley, and Arthur J. Abshire;

H.R. 13467. An act making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes;

H.R. 13468. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1979, and for other purposes;

H.J. Res. 773. A joint resolution authorizing and requesting the President of the United States to issue a proclamation designating the 7 calendar days beginning September 17, 1978, as "National Port Week"; and

H.J. Res. 1014. A joint resolution designating April 28 and 29 of 1979 as "Days of Remembrance of Victims of the Holocaust."

The enrolled bills and joint resolutions were subsequently signed by the Acting President pro tempore (Mr. HODGES).

At 5:28 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House disagrees to the amendment of the Senate to H.R. 15, an act to extend and amend expiring elementary and secondary education programs, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. PERKINS, Mr. FORD of Michigan, Mr. ANDREWS of North Carolina, Mr. BLOUIN, Mr. SIMON, Mr. ZEFERETTI, Mr. MOTTL, Mr. MURPHY of PENNSYLVANIA, Mr. LE FANTE, Mr. WEISS, Mr. HEFTEL, Mr. CORRADA, Mr. KILDEE, Mr. MILLER of California, Mr. QUIE, Mr. BUCHANAN, Mr. GOODLING, Mr. PURSELL, Mr. ERLENBORN, and Mr. JEFFORDS were appointed managers of the conference on the part of the House.

The message also announced that the House has agreed to the following concurrent resolution, without amendment:

S. Con. Res. 103. A concurrent resolution to correct the enrollment of H.R. 6669.

## ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, September 6, 1978, he presented to the President of the United States the following enrolled bills:

S. 9. An act to establish a policy for the management of oil and natural gas in the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes;

S. 1633. An act to provide for the extension of certain Federal benefits, services, and assistance to the Pascua Yaqui Indians of Arizona, and for other purposes; and

S. 2543. An act to amend title 39 of the United States Code to provide better enforcement procedures for preventing fraudulent solicitations through the mails.

## REPORTS OF COMMITTEES SUBMITTED DURING RECESS

Under the authority of the order of Friday, August 25, 1978, the following reports of committees were submitted on August 31, 1978, during the recess of the Senate:

By Mr. LONG, from the Committee on Commerce, Science, and Transportation and the Committee on Environment and Public Works, jointly, with amendments:

S. 2995. A bill to facilitate the implementation of section 703 of the Railroad Revitalization and Regulatory Reform Act of 1976, to provide for the conversion of a part of the National Visitor Center to railroad passenger service, and for other purposes (Rept. No. 95–1172).

By Mr. CULVER, from the Committee on Environment and Public Works, with amendments:

S. 691. A bill to provide for the preservation and enhancement of critical habitat for migratory waterfowl and other wetlands-dependent migratory birds of the Pacific flyway in the grasslands area of the San Jo-

aquin Valley, California (Rept. No. 95–1173); and

H.R. 8394. An act to provide for payments to local governments based upon the acreage of the National Wildlife Refuge System which is within their boundaries (together with additional views) (Rept. No. 95–1174).

By Mr. CULVER, from the Committee on Environment and Public Works, without amendment:

H.R. 2329. An act to improve the administration of fish and wildlife programs, and for other purposes (Rept. No. 95–1175).

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. RIBICOFF, from the Committee on Governmental Affairs, without amendment:

H.R. 13087. An act to authorize the issuance of substitute Treasury checks without undertakings of indemnity, except as the Secretary of the Treasury may require (Rept. No. 95–1176).

By Mr. CANNON, from the Committee on Commerce, Science, and Transportation, without amendment:

S. Res. 551. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2995. Referred to the Committee on the Budget.

By Mr. NELSON, from the Committee on Human Resources and (for Mr. PROXMIRE) from the Committee on Banking, Housing, and Urban Affairs, each with an amendment:

S. 50. A bill to establish and translate into practical reality the right of all adult Americans able, willing, and seeking to work to full opportunity for useful paid employment at fair rates of compensation; to combine full employment, production, and purchasing power goals with proper attention to balanced growth and national priorities; to mandate such national economic policies and programs as are necessary to achieve full employment, production, and purchasing power; to restrain inflation; and to provide explicit machinery for the development and implementation of such economic policies and programs, and for other purposes (together with additional views) (Rept. No. 95–1177).

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. HUDDLESTON:

S. 3482. A bill to assure fair practices in agricultural bargaining; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HATHAWAY:

S. 3483. A bill to amend the Fishery Conservation and Management Act of 1976 in order to assist and protect the domestic fishing industry; to the Committee on Commerce, Science, and Transportation.

By Mr. CRANSTON (for himself and Mr. HAYAKAWA):

S. 3484. A bill to provide for the conveyance of certain public lands in San Bernardino County, Calif., to the town of Red Mountain, and for other purposes; to the Committee on Energy and Natural Resources.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HUDDLESTON:

S. 3482. A bill to assure fair practices in agricultural bargaining; to the Committee on Agriculture, Nutrition, and Forestry.

### NATIONAL AGRICULTURAL BARGAINING ACT OF 1978

● Mr. HUDDLESTON. Mr. President, important changes have taken place in the food and fiber production, processing, and distribution industries in recent years There is little question that traditional methods are rapidly giving way to new technology.

Changes in market structure have accompanied changes in technology. Firms throughout the food and fiber industries are becoming fewer, larger, and more specialized and are requiring larger amounts of capital. The traditional terminal and auction markets are giving way to direct buying, vertical integration, forward contracts, and other coordinating arrangements.

Processors and retailers are more specific in their requirements for products regarding quantity, quality, and delivery terms, thus setting a trend toward tighter coordination of production and marketing activities similar to that of the more complex industrial operation.

Integration of production-market functions by processors has had a great impact on market structure. Individual farmers are at a competitive disadvantage in such an economic climate. Their position is continuing to weaken, as fewer and larger buyers negotiate for the farmers' products. Present trends indicate that large-scale marketing agencies will push integration further to even greater control over product supply, time and condition of delivery, and product quality and appearance.

To help cope with these changes, growers in various commodity areas have formed bargaining associations as one way of securing what is commonly referred to as bargaining power, muscle in the marketplace, or countervailing power. Many new bargaining groups have been formed, including groups which bargain for milk, fruits, vegetables, and other specialized commodities.

The ultimate success of these associations may depend on legislative clarification and sanction for their bargaining activities.

Mr. President, the National Agricultural Bargaining Act of 1978, which I am introducing today, establishes standards of fair practices that shall be observed by handlers and associations of producers in their dealings in agricultural products, provide standards for accreditation of coperative associations of producers of agricultural products for the purpose of bargaining, defines the mutual obligations of handlers and associations of producers to bargain with respect to the production, sale and marketing of agricultural products and provides for the enforcement of such obligations. Under this act, associations of farmers can petition the Secretary of Agriculture, who will be the program administrator, stipulating the conditions of the proposed bargaining unit. These items will include such things as the commodity and handlers involved in such other information that the Secretary may request.

This measure stipulates that the association requesting accreditation, first, must be owned and controlled by producers; second, must have contracts, which are binding under State laws, with its members empowering the association to sell or negotiate terms of sale for the products of its members; third, must represent a sufficient number of producers for a product to enable it to function as an effective agent for producers in bargaining with the designated handler; and fourth, must have negotiations with handlers as one of its principal functions.

Mr. President, this act does not require that either party must come to an agreement. It does prescribe the mutual obligation of a handler and an accredited association to meet at reasonable times and for reasonable periods of time for the purpose of negotiating in good faith with respect to the price, terms of sale, compensation for products produced under contract, or other provisions relating to the products that are marketed within the bargaining unit. This bill provides guidelines for mediation and arbitration services if requested by the accredited association or handler or if, in the Secretary's judgment, an impasse in bargaining has occurred. The measure repeals the Agriculture Fair Practices Act of 1967 and replaces the unfair practices described in the 1967 act with an expanded list of unfair practices for not only handlers, but also for the first time for accredited associations.

Many feel the need for this new authority is becoming more acute due to the continuing decline in the number of auction and central markets which have provided the source of price information and an alternative market outlet for many producers. More and more production is being sold directly to handlers under forward contracts. Organized marketing and bargaining provides an alternative to increased reliance on the Federal Treasury for farm income subsidy payments with minimal Government intervention.

It has been suggested that producers of all farm commodities would be more apt to invest capital and commit farm produce to existing or newly created bargaining associations if they had assurance that handlers would not be able to circumvent or sabotage the bargaining process. Passage and implementation of marketing and bargaining procedures will improve the capability of farmers to enhance their net farm income and standard of living.

Numerous associations already exist for specialty crops, and new ones would likely be formed by producers of other commodities sold under forward contracts, such as cattle and hogs. These associations will be able to improve farm prices and the conditions and terms of sale, which are now prescribed by handlers with individual producers or associations having little clout to counter or

reject the contract offered by the handler or processor.

Mr. President, the Nation's general farm organizations, in a statement issued April 14, 1978, announced they have united in support of the National Agricultural Bargaining Act of 1978. The list of organizations supporting this measure is impressive and includes the American Farm Bureau Federation, the National Council of Farmer Cooperatives, the National Farmers Union, and the National Grange. I urge my colleagues to join me in support of this measure.

Mr. President, I ask unanimous consent that S. 3482 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3482

*Be it enacted by the Senate and House of the United States of America in Congress assembled,* That this act may be cited as the "National Agricultural Bargaining Act of 1978".

CONGRESSIONAL FINDINGS AND DECLARATION OF POLICY

SEC. 2. Agricultural products are produced in the United States by many individual farmers and ranchers throughout the Nation. Such products in fresh or processed form move in the channels of interstate and foreign commerce, or directly burden or affect interstate commerce. The efficient production and marketing of agricultural products by farmers and ranchers is of vital importance to their welfare, and to the general welfare. Because agricultural products are produced by numerous individual farmers, their ability to market and to bargain effectively for fair prices and terms of sale for their products is adversely affected unless they are free to join together in cooperative associations of producers as authorized by law. Interference with this right, or the failure of any handler of agricultural products to bargain in good faith with a cooperative association of producers as the representative and agent of such producers is contrary to the public interest and adversely affects the free and orderly flow of goods in interstate and foreign commerce.

Therefore, it is declared to be the policy of Congress and the purpose of this Act to establish standards of fair practices that shall be observed by handlers and associations of producers in their dealings in agricultural products, to provide standards for the accreditation of cooperative associations of producers of agricultural products for the purpose of bargaining, to define the mutual obligations of handlers and associations of producers to bargain with respect to the production, sale, and marketing of agricultural products, and to provide for the enforcement of such obligations.

DEFINITIONS

SEC. 3. When used in this act—

(a) "Associated association" means an association of producers accredited in accordance with section 6 of this Act.

(b) "Association" means any association of producers of agricultural products engaged in the marketing of such products, including marketing, selling, bargaining, shipping, or processing as defined in section 15(a) of the Agricultural Marketing Act of 1929, as amended (49 Stat. 317; 12 U.S.C. 1141(a)), or in section 1 of the Act entitled "An Act to authorize association of agricultural producers" approved February 18, 1922 (42 Stat. 388, 7 U.S.C. 291).

(c) "Handler" means any person, other than an association, engaged in the business or practice of (1) acquiring agricultural products from producers or associations for processing or sale; (2) grading, packaging, handling, storing, or processing agricultural products received from producers or associations; (3) contracting or negotiating contracts or other arrangements, written or oral, with producers or associations with respect to the production or marketing of any agricultural product; or (4) acting as an agent or broker for a handler in the performance of any function or act specified in clauses (1), (2), or (3) of this subsection.

(d) "Person" means one or more individuals, partnerships, corporations and associations.

(e) "Producer" means a person engaged in the production of agricultural products as a farmer, planter, rancher, poultryman, dairyman, fruit, vegetable, or nut grower, including a grower or farmer furnishing labor, production management, or facilities for the growing or raising of agricultural products.

(f) "Secretary" means the Secretary of Agriculture.

UNFAIR PRACTICES

SEC. 4. (a) It shall be unlawul for any handler to engage, or to permit an employee or agent to engage, in any of the following practices:

(1) To coerce a producer in the exercise of the producer's right to contract with, join, or maintain membership in, or to refrain from contracting with, joining, or maintaining membership in an association or to refuse to deal with a producer because of the exercise of the producer's right to contract with, join, or maintain membership in an association.

(2) To discriminate against a producer with respect to price, quantity, quality or other terms of purchase, acquisition, or other handling of agricultural products because of the producer's membership in contract with an association.

(3) To coerce or intimidate a producer to breach, cancel, or terminate a membership agreement or marketing contract with an association or a contract with a handler.

(4) To offer to pay or loan money or anything of value, or to offer or give any other inducement or reward to a producer for refusing to join or to cease to maintain membership in an association.

(5) To make or circulate false reports about the finances, management, or activities of an association or a handler.

(6) To refuse to bargain in good faith with an association accredited to represent producers, if the handler is designated pursuant to section 6 of this Act.

(7) To conspire, combine, agree, or arrange with any other person to do or aid or abet the doing of any practice that is in violation of this Act.

(b) It shall be unlawful for any association to engage or to permit an employee or agent to engage in any of the following practices:

(1) To refuse to bargain in good faith with a handler designated pursuant to section 6 of this Act.

(2) To coerce or intimidate a handler to breach, cancel, or terminate a marketing contract with an association or a contract with a member of an association.

(3) To make or circulate false reports about the finances, management, or activities of an association or a handler.

(4) To coerce or intimidate a producer to breach, cancel, or terminate a membership agreement or marketing contract with an association.

(5) To conspire, combine, agree, or arrange with any other person to do or aid or abet the doing of any practice that is in violation of this Act.

BARGAINING IN GOOD FAITH

SEC. 5. (a) "Bargaining" is the performance of the mutual obligation of a handler and an accredited association to meet at reasonable times and for reasonable periods of time for the purpose of negotiating in good faith with respect to the price, terms of sale, compensation for products produced under contract, or other provisions relating to the products that are marketed by the members of such accredited association or by the association as their agent. Such obligation on the part of any handler shall extend only to accredited associations and the products with respect to which such associations are accredited to bargain. Such obligation does not require either party to agree to a proposal or to make a concession.

(b) If a handler purchases a product from producers under terms more favorable to such producers than the terms negotiated with an accredited association for such product, the handler shall offer the same terms to the accredited association. In comparing such terms, there shall be taken into consideration, in addition to the stipulated purchase price, any bonuses, premiums, transportation or loading allowances, reimbursement of expenses, or payment for special services of any character that may be paid by the handler, and any sums paid or agreed to be paid by the handler for any purpose other than payment of the purchase price.

ACCREDITATION OF ASSOCIATIONS OF PRODUCERS

SEC. 6. (a) An association seeking accreditation to bargain for producers of agricultural products shall submit to the Secretary a petition for accreditation. The petition shall (1) specify the agricultural product or products for the producers of which the association seeks accreditation to bargain; (2) designate the handlers, individually, by production or marketing area, or by some other appropriate classification, with whom the association shall be accredited to bargain; and (3) contain such other information and documentation as tae Secretary may require.

(b) The Secretary shall accredit such association if, based upon the evidence submitted by the association and obtained by the Secretary's own investigations, the Secretary finds:

(1) that under the charter documents or bylaws of the association, it is owned and controlled by producers;

(2) that the association has contracts with its members empowering the association to sell or to negotiate terms of sale of the products of its members that are binding under State law;

(3) that the association represents a sufficient number of producers or that its members produce a sufficient quantity of agricultural products to enable it to function as an effective agent for producers in bargaining with the designated handlers. In making this finding, the Secretary shall exclude any quantity of the agricultural products contracted by producers with producer owned and controlled processing cooperatives and any quantity of such products produced by handlers; and

(4) that the association has as one of its functions acting as principal or agent for its members in negotiations with handlers for prices and other terms of trade with respect to the production, sale, and marketing of their products.

(c) The Secretary shall give notice of such accreditation to all handlers so designated and to all other associations that have been accredited to bargain with respect to the product or products with any of the designated handlers.

(d) Each accredited association shall submit an annual report to the Secretary in such form and including such information as the Secretary may by regulation require

to enable him to determine whether the association continues to meet the standards for accreditation.

(e) If the Secretary believes that an accredited association has ceased to meet the standards for accreditation set forth in subsection (b) of this section, the Secretary shall notify the association of the basis for that belief and allow the association a reasonable period of time to respond to the allegations or to correct the deficiencies cited in the allegations. Thereafter, if the Secretary is not satisfied with the association's response to the allegations of if the agency fails to correct the deficiencies cited in the allegations, the Secretary shall notify the association and hold a hearing to consider the revocation of the association's accreditation. If, based upon the evidence submitted at the hearing, the Secretary finds that the association has ceased to maintain the standards for accreditation, he shall revoke the accreditation of such association.

(f) The Secretary may, upon his own motion or the petition of an accredited association or a designated handler, amend his order of accreditation with respect to the product or products specified therein. The Secretary shall give notice of any proposed amendment and the reasons therefor to all accredited associations and handlers that would be directly affected thereby and shall provide an opportunity for a public hearing. Thereafter, the Secretary may amend the order if he finds such amendment will be conducive to more effective bargaining and orderly marketing by the accredited association of the product or products of its members.

ASSIGNMENT OF ASSOCIATION DUES, FEES OR RETAINS

SEC. 7. If a producer of a farm product voluntarily executes, either as a clause in a sales contract or other instrument in writing, an assignment of dues or fees to, or the deduction of a sum to be retained by, an association authorized by contract to represent such producer, by which the handler is directed to deduct a sum from the amount to be paid for such product, or for the services of such producer under a growing contract, and on behalf of the producer to pay the same to such association as dues or fees or funds to be retained by the association, and causes notice of such assignment to be delivered to a handler, such handler shall deduct the amount authorized from the amount paid for any farm product being sold by any such producer or for any services under any growing contract. Upon payment to producers for such farm product or services, the handler shall pay said amount over to the association or its assignee.

MEDIATION AND ARBITRATION

SEC. 8. (a) The Secretary may provide mediation services if (1) requested either by an accredited association or by a designated handler engaged in bargaining with an accredited association and (2) in the Secretary's judgment an impasse in bargaining has occurred.

(b) The Secretary shall provide assistance in proposing and implementing arbitration agreements between accredited associations and designated handlers.

(c) The Secretary may establish a procedure for compulsory and binding arbitration if he finds that an impasse in bargaining exists and such impasse will result in a serious interruption in the flow of products to consumers or will cause substantial economic hardship to producers or handlers involved in the bargaining.

ADMINISTRATION

SEC. 9. (a)(1) Whenever it is charged that an accredited association or handler has violated or is violating section 4(a)(6) or 4(b)(1) of this Act, the Secretary shall issue and cause to be served upon the person charged a complaint stating the charges. The complaint shall summon the named person to a hearing before the Secretary at the time and place therein fixed.

(2) Whenever it is charged that an association or handler has violated or is violating any provision of this Act, other than section 4(a)(6) or 4(b)(1), the Secretary shall investigate such charges. If, upon such investigation, the Secretary has reasonable cause to believe that the person charged has violated such provision, he shall issue and cause to be served upon the person so charged a complaint stating the charges. The complaint shall summon the named person to a hearing before the Secretary at the time and place therein fixed.

(b) A person served a complaint under subsection (a) of this section shall have the right to file an answer to the original complaint and any amended complaint and to appear in person or otherwise and give testimony. The person who filed the charge that is the basis for a complaint issued under subsection (a) of this section shall also have the right to appear in person or otherwise and give testimony.

(c) If, upon preponderance of the evidence, the Secretary is of the opinion that the person complained of has violated any provision of this Act, the Secretary shall state the findings of fact in the case and shall issue and cause to be served on such person an order requiring such person to cease and desist from such violation, and shall order such further affirmative action, including an award of damages to the person filing the charge, as the Secretary determines will effectuate the policies of this titie.

(d) The Secretary (1) may issue such rules, regulations, and orders as may be necessary to implement the provisions of this Act, and may cooperate with any department or agency of the Federal Government, any State, Territory, District, or possession, or department, agency, or political subdivision thereof, or any person; and (2) shall have the power to appoint, remove, and fix the compensation of such officers and employees not in conflict with existing law, and make such expenditures for rent outside the District of Columbia, printing, binding, telegrams, telephones, law books, books of reference, publications, furniture, stationery, office equipment, travel, and other supplies and expenses, including reporting services, as shall be necessary to the administration of this Act in the District of Columbia and elsewhere, and as may be appropriated for by Congress. There is hereby authorized to be appropriated such sums as may be necessary to implement the provisions of this subsection.

INDEPENDENT ENFORCEMENT AUTHORITY

SEC. 10. The Secretary may at any time institute an inquiry on the Secretary's own motion, in any case and as to any matter for which a charge is authorized to be made to or before the Secretary under section 9 of this Act. The Secretary shall have the same power and authority to proceed with any inquiry instituted under this section as the Secretary has for complaints filed under section 9 of this Act, including the power to make and enforce any order.

JUDICIAL REVIEW

SEC. 11. (a) Any person aggrieved by a final order of the Secretary issued under section 9 of this Act may obtain review of such order in the United States Court of Appeals for the District of Columbia Circuit by submitting to such court, within 30 days from the date of such order, a written petition praying that such order be modified or set aside.

(b) The findings of the Secretary with respect to questions of fact, if supported by substantial evidence on the record, shall be conclusive.

(c) Orders of the Secretary with respect to which review could have been obtained under subsection (a) of this section shall not be subject to judicial review in any civil or criminal proceeding for enforcement.

(d) If no petition for review, as provided in paragraph (a) of this section, is filed within thirty days after service of the Secretary's order, the Secretary's findings of fact and order shall be conclusive in connection with any petition for enforcement that is filed by the Secretary after the expiration of such thirty-day period. In any such case, the clerk of the court, unless otherwise ordered by the court, shall forthwith enter a decree enforcing the order and shall transmit a copy of such decree to the Secretary and the person named in the complaint.

(e) The commencement of proceedings under this section shall not, unless specifically ordered by the court, operate as a stay of the Secretary's order.

FEDERAL ENFORCEMENT

SEC. 12. (a) Whenever on the basis of any available information the Secretary finds that any person is in violation of section 4 of this Act or in violation of any order of the Secretary issued under this Act, the Secretary shall bring a civil action in accordance with subsection (b) of this section.

(b) The Secretary is authorized to commence a civil action for appropriate relief, including a permanent or temporary injunction. Any action under this subsection may be brought in the district court of the United States for the district in which the defendant is located or resides or transacts business, and such court shall have jurisdiction to restrain such violation and to require compliance.

(c) Any person who violates section 4 of this Act or any order of the Secretary issued under sections 9 or 10 of this Act shall be subject to a civil penalty not to exceed $500 per day of each such violation.

(d) Any person who willfully violates section 4 of this Act, or any order of the Secretary under sections 9 or 10 of this title, shall be punished by a fine of not less than $500 nor more than $1,000 per day of each such violation or by imprisonment for not more than one year, or both.

CIVIL REMEDIES

SEC. 13. (a) Except as provided in subsection (b) of this section, any person may commence a civil action on his own behalf:

(1) against any person who is alleged to be in violation of section 4 of this Act or of any order issued by the Secretary under sections 9 or 10 of this Act; or

(2) against the Secretary when there is alleged a failure of the Secretary to perform any act or duty under this Act that is not discretionary with the Secretary.

The district courts of the United States shall have the jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce such section or order (including the issuance of a permanent or temporary injunction or restraining order), or to order the Secretary to perform such act or duty as the case may be, and to assess any appropriate civil penalties under section 12 of this Act.

(b) No action may be commenced:

(1) Under paragraph (a)(1) of this section

(A) prior to 60 days after the plaintiff has given notice of the alleged violation to the Secretary and to the alleged violator, or

(B) if the Secretary has commenced and is diligently prosecuting a civil or criminal action in a court of the United States to require compliance with such section or order, but in any such action any person may intervene as a matter of right.

(2) Under paragraph (a) (2) of this section prior to 60 days after the plaintiff has given notice of such action to the Secretary.

(c) Any person injured in his business or property by reason of any violation of, or combination or conspiracy to violate any provision of section 4 of this Act may bring an action in the appropriate district court of the United States without respect to the amount of the controversy, and shall recover damages therefor. Any action to enforce any cause of action under this subsection shall be forever barred unless commenced within two years after the cause of action arose.

(d) The district courts of the United States, in issuing any final order in any action brought under subsections (a) or (c) of this section, may award costs of litigation (including reasonable attorney fees) to any party, whenever the court determines such award is appropriate.

(e) The district courts of the United States shall have jurisdiction of proceedings instituted under this section and shall exercise the same without regard to whether the aggrieved party shall have exhausted any administrative or other remedies that may be provided by law, except as provided in subsection (b) of this section.

INVESTIGATIVE POWERS OF SECRETARY

SEC. 14. (a) Whenever required to carry out the objectives of this Act, including the conduct of any investigations or hearings,

(1) the Secretary shall require any person to (i) establish and maintain such records, (ii) make such reports, and (iii) provide such other information as the Secretary may reasonably require; and

(2) the Secretary or his authorized representative, upon presentation of his credentials—

(i) shall have a right of entry to, upon or through any premises in which any records required to be maintained under paragraph (a) (1) of this section are located, and

(ii) may at reasonable times have access to and copy any records that any person is required to maintain or that relate to any matter under investigation or in question.

(b) Any records, reports or information obtained under this section shall be available to the public, except that upon a showing satisfactory to the Secretary that such records, reports or information, if made public, would divulge confidential business information, the Secretary shall consider such record, report or information or particular portion thereof confidential in accordance with section 1905 of title 18, United States Code, except that such record, report or information may be disclosed to other officers, employees or authorized representatives of the United States concerned with carrying out this Act or when relevant in any proceeding under this Act.

(c) (1) In making inspections and investigations under this title, the Secretary may require the attendance and testimony of witnesses and the production of evidence under oath.

(2) The Secretary, upon application of any party to a hearing held under sections 9 or 10 of this Act, shall forthwith issue to such party subpoenas requiring the attendance and testimony of witnesses or the production of evidence requested in such application. Within five days after the service of a subpoena on any person requiring the production of any evidence in the possession or under the control of a person, such person may petition the Secretary to revoke such subpoena. The Secretary shall revoke such subpoena if in the Secretary's opinion the evidence whose production is required does not relate to any matter in question, or if such subpoena does not describe with sufficient particularity the evidence whose production is required.

(d) The Secretary, or any officer or employee designated by the Secretary for such purpose, shall be empowered to administer oaths, sign and issue subpoenas, examine witnesses, and receive evidence. Witnesses shall be paid the same fees and mileage allowance as are paid witnesses in the courts of the United States.

(e) In the case of any failure or refusal of any person to obey a subpoena or order of the Secretary under this section, any district court of the United States or the United States Courts of any territory or possession, within the jurisdiction of which such person is found or resides or transacts business, upon the application by the Secretary shall have jurisdiction to issue an order requiring such person to appear to produce evidence relating to the matter under investigation or in question. Any failure to obey such order of the Court may be punished by said court as a contempt thereof.

STATE AUTHORITY

SEC. 15. This Act shall not invalidate the provisions of any existing State legislation dealing with the same subjects of this Act, nor shall this Act prevent any State from enacting legislation similar to existing state legislation, except that such similar legislation may not permit any action that is prohibited under this Act.

REPEAL OF AGRICULTURAL FAIR PRACTICES ACT OF 1967

SEC. 16. The Agricultural Fair Practices Act of 1967 (P.L. 90–288, 7 U.S.C. 2301 *et seq.*) is hereby repealed on the effective Act of this Act; *Provided*, That such repeal shall not affect any act done or any right accruing or accrued, or any act or proceeding had or commenced in any civil cause, before such repeal.

EFFECTIVE DATE

SEC. 17. The provisions of this Act shall become effective October 1, 1978.●

---

By Mr. HATHAWAY:

S. 3483. A bill to amend the Fishery Conservation and Management Act of 1976 in order to assist and protect the domestic fishing industry; to the Committee on Commerce, Science, and Transportation.

FISHERY CONSERVATION AMENDMENTS OF 1978

● Mr. HATHAWAY. Mr. President, in 1976 the 200-mile fishing limit promised the dawn of a new day for our domestic fishermen, the end to the unfair competition waged against them by subsidized foreign fleets. Nowhere was the 200-mile limit needed more than in the waters off New England, where two decades of foreign fishing on Georges Bank had decimated the fishery resource and prevented the growth of the New England fishing industry.

The 200-mile limit had been supported and fought for through several years. In 1972, while a Member of the House, I cosponsored a bill to extend the fishing limits out to the Outer Continental Shelf. International considerations held sway for many years, however, and many looked to the Law of the Seas Conference to resolve this issue. Only when it became obvious that the fishermen could not wait another year for settlement of the international issues and after several other countries had extended their own boundaries, did the United States act in the interests of its own fishermen.

Fought for by the fishermen, the 200-mile limit has, however, brought new problems. For with the limit has come fishery management, and the first experiences with Federal, State and regional government. In New England the years of overfishing, the revival of interest in fishing and the complications of the Canadian competition have made the management problems of the law particularly acute.

The problems in the New England groundfishery—cod, haddock, and yellowtail flounder—have been so intense that some fishermen have said they would prefer to see the 200-mile limit repealed.

I do not believe that is the answer. Foreign fishing has been reduced considerably, even on Georges Bank. New England fishermen, and Maine fishermen, have benefited from the law, as is obvious from the growing interest in entering the fisheries. The law, and its implementation by the Commerce Department, has, however, proven too frequently to be inflexible, and to fail to take into account the very real problems which management regimes based only on fishery conservation can pose for the fishermen.

For that reason, I am introducing legislation today to increase the act's flexibility, to strictly limit the use of outright fishing bans as a management tool, and to increase the authority of the regional fishery management councils over the management plans. In addition, these amendments make explicit the purpose of the law to promote the domestic fishing industry, and the need to draw upon many varied sources of data, including the years of experience of the fishermen, to determine the appropriate level of fishing for stocks which have been overfished.

In regard to the council's management role, when the law was passed, it was assumed that the regional councils would serve as both an intergovernmental and industry body which could coordinate the often conflicting priorities of these groups. The Commerce Department was to play only an oversight role insuring that certain national standards were met by the council's plans.

As it has worked out, the Department's oversight role has too often stifled the function of the councils in implementing management plans efficiently and reasonably. A oversight role should work after the fact, to make sure plans concur with the broader standards. The presumption should be that they do, until the Commerce Department finds otherwise.

My amendments, then, would make that presumption for the council's plans, and their amendments to plans, and limit the role of the Commerce Department to that of oversight. This approach is in accord with what I feel was the original intention of the act, and ultimately works to the benefit of both the Commerce Department, the regional councils, and the fishing industry.

Second, the bill makes one of the specific purposes of the act the development of the fishing industry, and promotion of the conversion of the industry from overutilized species to underutilized stock.

Finally, and most importantly, the bill limits the use of a total ban on fishing as a tool of last resort only, so that such a ban could be implemented only upon a finding by both the regional council and the Commerce Department that there is an imminent threat to a fishery resource without such a ban. A fishing ban will be a management tool of last resort only.

There have been three fishing bans in the New England groundfishery since last December. These bans have affected fishermen in the various States differently, and in most instances have affected the Gulf of Maine fishermen most severely. Maine has the smaller fleet, and the fish arrive in Maine waters later, by which time the quotas may have been reached. The bans have been inflexible; they do not permit sufficient incidental catch and fishermen end up throwing dead fish overboard. They serve neither the fishing industry nor fishery conservation.

This first year and a half has been fraught with crises for New England fishermen. The 200-mile limit has brought fishermen less foreign competition but new and equally foreign government forms and regulations. The law is still in its infancy but it is not too young for modification. I hope that the amendments I am introducing today will encourage Commerce to speed up its own processes and to be more flexible in its management approach.

Mr. President, at this time I ask unanimous consent that a section-by-section analysis of the "Fishery Conservation Amendments of 1978," my recent correspondence with the Commerce Department, and the text of the bill be printed in the RECORD.

There being no objection, the material and bill were ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS

(A bill to amend the Fishery Conservation and Management Act of 1976 in order to assist and protect the domestic fishing industry)

Section 2. Amends the purposes and policy of the Act to ensure that the Act's implementation:

(1) Promotes the development of the domestic fishing industry.

(2) Takes into account the economic impact of management plans upon the fishing industry, and particularly upon fishermen.

(3) Uses scientific data from a variety of sources, including the fishermen, the industry, and state, local and academic sources.

(4) Considers the development of the domestic fishing industry in determining any permitted levels of foreign fishing.

Section 3. Amends the definition of "conservation and management" to ensure that the needs of commercial fishermen are taken into account and that adverse economic impacts are minimized to the extent possible.

Section 4. Amends the national standards to do the following:

(1) Include consideration of economic impact on the industry in management plans.

(2) Restrict the use of fishing bans as a management tool. A ban could be put into effect only if both the Regional council and the Commerce Department agreed that there was an imminent threat to a fishery resources without such a ban. It would be a "tool of last resort" only.

(3) Make the Regional council's management plans, and amendments to them, effective immediately upon adoption by the council. The Commerce Department's role would be limited to an after the fact oversight review of the plans for compliance with national standards.

(4) Require Commerce to coordinate its data gathering and fishery research with other state, local, academic or industry sponsored programs.

---

WASHINGTON, D.C.,
*August 7, 1978.*

Hon. JUANITA M. KREPS,
*Secretary, Department of Commerce, Washington, D.C.*

DEAR JUANITA: The Department of Commerce has announced today the closing of the cod fishery in the Gulf of Maine to all vessel classes, supplementing the closing which went into effect this past weekend. That closing is to take place midnight, August 15, and as the NOAA press release puts it, is "for the rest of 1978".

I understand that you have now received a Memorandum from the New England Regional Fisheries Council on the goals and principles of the New England groundfishery management plan. In addition, they earlier proposed amendments to the groundfish FMP, all of which appear to be certain of the Commerce Department's approval.

One remaining question is that of restarting the year for purposes of determining when the quotas would be effective. If the year is retroactively started other than in January, then fishing can be resumed for this calendar year. Approval both of a new starting date for the quota, and what that date should be are crucial to permitting some continued groundfishing in the Gulf of Maine this year.

You are, I think, well aware of the confusion and hostility which these continued closings of the fishery have caused for Maine and New England fishermen. I hope that the Department will make every effort to approve the Council's recommended changes to the FMP, including the change in the year's starting date. Further, please expedite that decision as rapidly as possible in order to avoid the economic disruption and widescale non-compliance which is the likely result of this total closing.

I am sure that you agree that this type of enforcement mechanism, i.e. closing of fisheries, is unsatisfactory both from the point of view of the interest in fishery conservation, and from the economic viewpoint of New England fishermen. The Council's proposals have emphasized greater flexibility and have reflected the realities of New England fishermen's needs. Both of these are essential elements of any successful fishery management plan.

Please make every effort to expedite and approve the Council's amendments to the management plan.

With best wishes.

Sincerely,

WILLIAM D. HATHAWAY,
*U.S. Senator.*

---

S. 3483

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Fishery Conservation Amendments of 1978".

SEC. 2. (a) Section 2(a)(6) of the Fishery Conservation and Management Act of 1976 is amended to read as follows:

"(6) A national program for the conservation and management of the fishery resources of the United States is necessary to prevent irreversible overfishing, to rebuild overfished stocks, to promote the development of the domestic fishing industry and to realize the full potential of the Nation's fishery resources.".

(b) Section 2(b)(5) of such Act is amended by striking out "and" before "(B)" and by inserting before the semicolon at the end thereof the following: "and (C) which take into account the impact of such plans on the economic needs of the fishermen in the region affected by the plans".

(c) Section 2(e) of such Act is amended by striking out clauses (3) and (4) and inserting in lieu thereof the following:

"(3) to assure that the national fishery conservation and management program utilizes the best scientific information available, including input from State and local agencies and academic facilities, and from the fishing industry itself; involves, and is responsive to the needs of, interested and affected States, the fishing industry, and citizens, promotes efficiency; draws upon Federal, State, industry, and academic capabilities in carrying out research, administration, management, and enforcement; and is workable and effective;

"(4) to permit foreign fishing consistent with the provisions of this Act, including the need to develop the domestic fishing industry and to encourage the domestic industry to utilize species now underutilized; and".

SEC. 3. (a) Section 3(2) of the Fishery Conservation and Management Act of 1976 is amended by redesignating clauses (ii) and (iii) as (iii) and (iv), respectively, and by inserting before such clauses the following:

"(ii) the needs of commercial fishermen are taken into account and any adverse impacts on commercial fishing are minimized to the extent possible by any needed conservation or management measures;".

(b) Secton 3(18) of such Act is amended by striking out clauses (A) and (B) and inserting in lieu thereof the following:

"(A) which will provide the greatest overall benefit to the Nation, with particular reference to food production, promotion of the domestic fishing industry, and recreational opportunities; and

"(B) which is prescribed as such on the basis of the maximum sustainable yield from such fishery, as modified by any relevant economic, social or ecological factor, including the impact of any catch limitations on the affected domestic fishing industry and the need to minimize any adverse economic impacts on both a regional and State level in order to further the promotion of the domestic fishing industry.".

SEC. 4. (a) Section 301(a) of the Fishery Management and Conservation Act of 1976 is amended by inserting at the end thereof the following:

"(8) Conservation and management measures shall take into account their economic impact on the fishing industry in the region where they apply, and to the extent practicable, shall be implemented in such a way as to minimize any such adverse economic impact.

"(9) Conservation and management measures shall be implemented in such a manner as to permit the continued fishing for a species within the confines of the optimum yield, and a total closing of a species to fishing shall be permitted as an enforcement measure only upon a finding by the Secretary, with the concurrence of the appropriate regional council, that there is an imminent threat to a fishery resource without such prohibition on all fishing for that species.".

(b) Section 303(b)(2) of such Act is amended by inserting after "shall not be permitted," the following: "subject to the limitation in section 301(a)(9),".

SEC. 5. (a) Section 304 of the Fishery Management and Conservation Act of 1976 is amended by redesignating subsections (c) through (f) as subsections (d) through (e), respectively, and by inserting before such subsections the following:

"(c) Such plan, or any amendment to any

such plan, shall become effective immediately upon approval by such Council pending the Secretary's review for compliance with the national standards. The Secretary shall disapprove such plan in whole or in part only upon a finding that it is not in compliance with the national standards, and such plan or amendment shall be in effect until such finding is made.".

(b) Section 304(e) of such Act is amended by inserting after the period at the end thereof the following: "Further, the Secretary shall coordinate such program of fishery research with an relevant State, local, academic, or industry sponsored program, and to the extent practicable, within existing authorizations, shall support such other efforts.".●

---

By Mr. CRANSTON (for himself and Mr. HAYAKAWA):

S. 3484. A bill to provide for the conveyance of certain public lands in San Bernardino County, Calif., to the town of Red Mountain, and for other purposes; to the Committee on Energy and Natural Resources.

SALE OF PUBLIC LANDS TO RED MOUNTAIN, CALIF.

● Mr. CRANSTON. Mr. President, today I introduce for appropriate referral a bill to provide for the conveyance of approximately 160 acres of public lands to the residents of the unincorporated town of Red Mountain in San Bernardino County, Calif. This measure is identical to H.R. 11168 as reported by the House Interior and Insular Affairs Committee on July 26.

The small community of Red Mountain was founded in the early 1900's as a mining camp. About 200 residents, many of whom are elderly and retired on fixed incomes, live in homes on Bureau of Land Management land. In the late 1960's, a Red Mountain townsite committee completed the necessary paperwork to apply for a townsite designation for this unincorporated entity under the Federal Trustee Townsite Act. The committee arranged for a local judge to act as a trustee and file a townsite application with the Bureau of Land Management. However, the California Highway Commission was surveying for a proposed freeway in the area and asked the BLM to delay processing the application. Unbeknownst to the committee, the judge agreed to the BLM's request not to file the application.

It was not until 1973 that the residents learned that their application had not been submitted to the BLM. New documentation was prepared and another judge agreed to act as trustee. But, on filing, they learned that the Townsite Act had been repealed by the Federal Land Policy and Management Act of 1976.

Under the newly enacted Federal Land Policy and Management Act, the BLM must require the residents to pay the fair market value for the land on which their homes are located. Estimates place the value of an average Red Mountain lot at roughly $1,000. For many of these homeowners living on social security or limited savings, producing this sum would be an overwhelming financial burden. Under the circumstances, I believe the Federal Government has an obligation to assist these homeowners to acquire this quarter section of desert land.

Mr. President, the House Interior and Insular Affairs Committee has produced a bill which permits the Federal Government to convey this property to the residents of Red Mountain without setting a precedent that would upset the land conveyance procedures established by the FLMPA. The legislation also provides a just solution to this problem for both the Red Mountain residents who tried vainly for years to acquire title under the Townsite Act, and for the Federal Government, which does not need this acreage for recreation, rights-of-way, or other public purposes.

The bill approved by the House committee, which I am introducing, directs the Secretary of Interior to establish specifications for an association to be set up by the residents of Red Mountain. The association would designate a trustee to submit an application to the Bureau requesting conveyance of the land. The application would include a land survey, an accounting of improvements to the property, a list of homeowners, an indication of all unoccupied lots, a general land use plan for the proposed townsite, and any other information the Secretary may require.

Upon application approval, the Secretary will convey any vacant land to the trustee. Any proceeds from the disposal of vacant lots are to be transferred to county or town officials for public purposes within Red Mountain. Improved lots will be conveyed to the homeowners directly or to the trustee for reconveyance without cost to the owner except that all surveying, administrative, and recording costs will be borne by the association or the homeowners as the case may be. Finally, the conveyance will be made subject to valid existing rights, with the United States reserving all mineral rights.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3484

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

(a) That notwithstanding the provisions of the Federal Land Policy and Management Act of 1976, the Secretary of the Interior (hereafter referred to as the "Secretary") within 90 days after the date of enactment of this Act, shall establish specifications for an association of the residents of Red Mountain, San Bernardino County, California hereafter referred to as the "association" which may through such trustee as they may designate, make application for the conveyance of such lands as are located within the area described in paragraph (b) of this section. Such application shall include, *inter alia*, a complete internal survey of the area; shall indicate the extent and character of any improvements on any lot and the name or names of the owners (hereinafter referred to as "owner") thereof; shall indicate all unoccupied lots and lands; and shall include a general land use plan for such area.

(b) The lands subject to conveyance pursuant to the provisions of this Act are described as follows:

T. 30 S., R. 41 E.,

SEC. 6; SW¼SE¼NE¼NE¼, SW¼NE¼NE¼, S½NW¼NE¼NE¼, SE¼NW¼NE¼, E½SW¼NE¼, W½SE¼NE¼, NW¼NE¼SE¼NE¼, NW¼NW¼NE¼SE¼, E½NW¼SE¼, E½SW¼NW¼SE¼, E½SW¼SE¼, E½NW¼SW¼SE¼, E½SW¼SW¼SE¼.

SEC. 7; N½NE¼NW¼NE¼, N½NW¼NW¼NE¼, Mount Diablo Meridian, California.

SEC. 2. Within 120 days after receipt of such application from the association, the Secretary shall determine if it complies with the specifications established pursuant to section 1 of this Act. If he determines that additional information is required, he shall so notify the association, through such trustee as it may designate, in order to allow it to supplement or correct such application. The Secretary shall require the association to verify, under oath or otherwise, that the owner is, at the time of the enactment of this Act and was, on or before February 27, 1978, in fact, the true owner of improvements located within the area and the association shall certify such verifications to the Secretary as a supplement to its application.

SEC. 3. As soon as reasonably practicable, but not later than two years after receipt of an application, or corrected application, complying with the specifications which he established, the Secretary shall convey to the association or its trustee, as he deems appropriate, all unoccupied lots or lands and all lands presently used for public purposes, and shall convey to the owner verified pursuant to section 2 of this Act title to the lot (which shall comply as nearly as possible with the established boundaries of the area now occupied but shall not exceed one-half of an acre) upon which the improvement of such owner is located. The Secretary may in his discretion, convey title to all improved lots to the trustee for reconveyance to the appropriate owners in order to minimize administrative costs. Each such deed of conveyance by the Secretary or reconveyance by the trustee (i) shall convey the land without cost to the owner, except for payment of the respective administrative and recording costs which shall be paid by said association or owner as the case may be; (ii) shall be subject to any valid existing rights arising under the laws of the United States unless relinquished by the holder thereof; (iii) shall reserve to the United States all minerals in the lands, together with the right to prospect for, mine and remove minerals under applicable laws and such regulations as the Secretary may prescribe; and (iv) shall contain such covenants, mutually enforceable between the landowners, as the Secretary has determined to be appropriate to assure compliance with the land use plan submitted pursuant to section 1 of this Act. In conveying title to any unoccupied lands to the association, or its trustee, the Secretary may impose such restrictions or reserve such interests as he deems reasonable and appropriate to assure compliance with the general land use plan and may permit the association or its trustee to reconvene any or all of such lands: *Provided*, That the proceeds derived from such conveyance shall be transferred to the appropriate county or town officials to be used for public purposes within the Town of Red Mountain.

SEC. 4. Unless an application for conveyance of the lands described in section 1 of this Act is received by the Secretary within 5 years after the date of enactment, the provisions of this Act shall expire and such application shall then be made only pursuant to the provisions of the Federal Land Policy and Management Act of 1976.●

---

## ADDITIONAL COSPONSORS

S. 2128

At the request of Mr. INOUYE, the Senator from Idaho (Mr. CHURCH) was removed as a cosponsor of S. 2128, a bill to provide increased tax credits for the elderly.

S. 3049

At the request of Mr. CULVER, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 3049, a bill to amend the Internal Revenue Code of 1954 to provide for a deduction for certain amounts paid to a reserve for product liability losses and expenses.

S. 3248

At the request of Mr. MORGAN, the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from Wyoming (Mr. WALLOP) were added as cosponsors of S. 3248, a bill to create a National Agricultural Cost of Production Board.

S. 3263

At the request of Mr. BENTSEN, the Senator from Louisiana (Mr. LONG), was added as a cosponsor of S. 3263, a bill to reduce duplicative and conflicting Federal, State, and local rules and regulations.

S. 3288

At the request of Mr. DOLE, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 3288, to amend the Internal Revenue Code to allow a retirement savings deduction for persons covered by certain pension plans.

S. 3404

At the request of Mr. BENTSEN, the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 3404, a bill to provide rapid depreciation for certain expenditures required by mandatory OSHA health and safety standards.

S. 3419

At the request of Mr. CULVER, the Senator from Texas (Mr. TOWER) was added as a cosponsor of S. 3419, a bill to amend the Internal Revenue Code of 1954 to exclude from gross income a portion of payments made under certain Federal and State cost-sharing programs the primary purpose of which is conservation of soil and water resources, environmental protection or restoration, forest enhancement, or the provision of wildlife habitat.

SENATE JOINT RESOLUTION 151

At the request of Mr. HEINZ, the Senator from Washington (Mr. JACKSON), the Senator from North Dakota (Mr. BURDICK), the Senator from Colorado (Mr. HART), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Connecticut (Mr. RIBICOFF), the Senator from New York (Mr. MOYNIHAN), the Senator from Maine (Mr. HATHAWAY), the Senator from Wisconsin (Mr. NELSON), and the Senator from Delaware (Mr. ROTH) were added as cosponsors of Senate Joint Resolution 151, authorizing and requesting the President to designate November 11 through 17, 1978, as "Vietnam Veterans Week."

SENATE JOINT RESOLUTION 153

At the request of Mr. DECONCINI, on behalf of Mr. ANDERSON, the Senator from Maine (Mr. HATHAWAY), the Senator from Rhode Island (Mr. PELL), the Senator from Nevada (Mr. LAXALT), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Kentucky (Mr. FORD), the Senator from South Dakota (Mr. MCGOVERN), and the Senator from Arizona (Mr. DECONCINI) were added as cosponsors of Senate Joint Resolution 153, to authorize the President to proclaim the third week in June, 1979, as "National Veterans' Hospital Week."

SENATE CONCURRENT RESOLUTION 68

At the request of Mr. CURTIS, the Senator from Illinois (Mr. PERCY) was added as a cosponsor of Senate Concurrent Resolution 68, expressing the sense of the Congress on the Baltic States question.

## SENATE RESOLUTION 551—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. CANNON, from the Committee on Commerce, Science, and Transportation, reported the following original resolution, which was referred to the Committee on the Budget:

S. RES. 551

*Resolved,* That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 2995. Such waiver is necessary because the bill authorizes $60,000,000 for fiscal year 1979 and was reported after May 15, 1978. In addition, construction funds for an intercity bus terminal at Union Station are not available from any other source, to coincide with construction schedules that begin on January 1, 1979 on the visitor center and rail facility. The amendment to S. 2995, which in turn amends the Amtrak Improvement Act of 1974, provides for a $30,000,000 authorization in fiscal year 1979 for a model, intermodal demonstration facility, first contemplated 4 years ago when the Congress authorized the Secretary of Transportation to design, plan, and coordinate the construction of a model, intermodal transportation facility at Union Station.

When construction begins next year on the renovation of the main building, the transfer of rail facilities into the concourse, where bus ticketing and baggage facilities are to be found, and on the ramp and parking garage to the north of the main building. It is essential that work proceed simultaneously on the bus terminal facilities.

## SENATE RESOLUTION 552—SUBMISSION OF A RESOLUTION RELATING TO REDUCING FEDERAL EXPENDITURES

Mr. STONE submitted the following resolution, which was referred to the Committee on the Budget and the Committee on Governmental Affairs, provided that either committee is discharged after 30 days of continuous session following the report of the first committee, pursuant to order of August 4, 1977:

S. RES. 552

*Resolved,* That (a) in reporting any concurrent resolution on the budget under title III of the Congressional Budget Act of 1974 for the fiscal years ending September 30, 1980, September 30, 1981, and September 30, 1982, the Committee on the Budget of the Senate shall not include an appropriate level of total budget outlays or of new budget authority which is greater than the following percentages of the adjusted amount of the appropriate level of total budget outlays or total new budget authority, respectively, set forth in the final concurrent resolution on the budget for the fiscal year ending September 30, 1979:

(1) 98 percent, in the case of the fiscal year ending September 30, 1980,

(2) 98 percent, in the case of the fiscal year ending September 30, 1981, and

(3) 98 percent, in the case of the fiscal year ending September 30, 1982.

(b) For purposes of Subsection (a), the adjusted amount of the appropriate level of total budget outlays or total new budget authority set forth in the final concurrent resolution on the budget for the fiscal year ending September 30, 1979, is the amount set forth increased or decreased, as of any date, by the same percentage by which the Consumer Price Index (published by the Bureau of Labor Statistics) on such date has increased or decreased over the Consumer Price Index on September 30, 1979.

Mr. STONE. Mr. President, I rise to submit a resolution calling for the Senate Budget Committee to lead the way in the difficult task of reducing Federal expenditures.

Before submitting this resolution I want to commend the Budget Committee for reducing the budget authority for fiscal year 1979 by more than $11 billion and thereby reducing the projected Federal deficit. I appreciate how difficult it is to reduce the budget and I want to extend my congratulations to the committee for its work this year and especially to its able chairman, Senator MUSKIE and the ranking minority member, Senator BELLMON.

The committee's recommendations show continued progress toward a balanced budget by fiscal year 1983. My proposal would contribute to that goal specifically by directing the Senate Budget Committee to report to the Senate a budget resolution incorporating at least a 2-percent reduction each year in Federal spending outlays and authorization for the next 3 fiscal years, beginning in fiscal year 1980.

The resolution allows for an inflation adjustment in computing the actual amount of the reduction from year to year in order to allow for increases in the cost of delivering the same Government services. However, I believe that overall this measure will help bring down the rate of inflation.

The proposal is not an abandonment of our commitment to necessary social programs. Rather, I believe that it will put authorizing committees and Federal agencies on notice of Congress determination to "trim the fat." It, thereby, provides lead time over 3 years to make the appropriate administrative and budgetary adjustments.

The measure would demonstrate our commitment to continue moderate reductions in Federal spending until annual outlays no longer exceed annual revenues. This gradual reduction in budget authority, combined with a thorough examination of all programs, will enable Congress to work more realistically toward the goal of a balanced budget.

If this resolution is enacted, the Senate serves notice to all Federal agencies that we are sincere in our commitment to balance the budget. This will help prod agencies into taking a closer look

at their own budgets with an eye toward cutting unnecessary expenditures. In my own State of Florida, the Fort Lauderdale News prints a daily column entitled "Your Tax Dollars in Action." Its author, Duncin Mackenzie, regularly chronicles unnecessary grants and contracts, and let me assure you, he does not suffer from a lack of material. We all agree that waste exists and that we must work harder to reduce it. That entails making tough budgetary decisions.

Several weeks ago, I joined with a number of my colleagues in an effort to cut each 1979 appropriations bill by 2 percent across-the-board. I was encouraged by our initiatives because they forced us to take a hard look at Federal spending programs and reexamine priorities. But I feel we can do better, and this resolution demonstrates that desire. It is time to plan ahead, and this resolution does just that. It sets moderate 3-year goals, moving us beyond the year-to-year system now employed.

In a few days, the Senate will be considering a proposal submitted by President Carter to reduce the taxes of our overburdened citizens. The object of the modest tax reduction is to put more money into the hands of working people. However, if we provide tax relief without an accompanying reduction in Federal spending, the budget deficit will increase and the additional money in the taxpayer's pocket will be spent trying to keep up with inflation.

Mr. President, if we are to enact responsive and responsible legislation for the American people, then we should begin looking ahead and setting moderate goals. If we continue to lower Federal spending gradually, we can look forward to the day when our economy is free from the enormous Federal debt and inflation is under better control.

## AMENDMENTS SUBMITTED FOR PRINTING

### UNIFORM BANKRUPTCY LAW—S. 2266

AMENDMENT NO 3578

(Ordered to be printed and to lie on the table.)

Mr. BARTLETT submitted an amendment intended to be proposed by him to S. 2266, a bill to establish a uniform law on the subject of bankruptcies.

### AGRICULTURAL EXPORT TRADE EXPANSION ACT OF 1978

AMENDMENTS NOS. 3579 AND 3580

(Ordered to be printed and to lie on the table.)

Mr. MORGAN submitted two amendments intended to be proposed by him to S. 3447, a bill to strengthen the economy of the United States through increased sales abroad of American agricultural products.

## NOTICES OF HEARINGS

COMMITTEE ON THE JUDICIARY

Mr. ROBERT C. BYRD. Mr. President, on behalf of the Senator from Mississippi (Mr. EASTLAND), and for the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Thursday, September 14, 1978, at 9:30 a.m., in room 2228, Dirksen Senate Office Building, on the following nomination:

Bruce S. Jenkins, of Utah, to be U.S. district judge for the district of Utah, vice Willis W. Ritter, deceased.

Any persons desiring to offer testimony in regard to this nomination shall, not later than 24 hours prior to such hearing, file in writing with the committee a request to be heard and a statement of their proposed testimony.

This hearing will be before the full Judiciary Committee.

SUBCOMMITTEE ON PUBLIC LANDS AND RESOURCES

● Mr. JACKSON. Mr. President, the Subcommittee on Public Lands and Resources will hold a hearing on Friday, September 8, 1978, at 10 a.m. in room 3110 Dirksen Building to hear testimony on the following bills: S. 2489, S. 2254, S. 1634, S. 3445, S. 3245, S. 3175, H.R. 11168, H.R. 11451, H.R. 10029, H.R. 7588, H.R. 4243, H.R. 7971, H.R. 6997, H.R. 12772, H.R. 10160, and H.R. 3121.

Testimony will be presented by the Department of the Interior and the Department of Agriculture. Anyone having questions concerning the hearing should contract R. D. Folsom of the subcommittee staff at 224–0611. Those wishing to testify or to submit a written statement for the hearing record should write to the Public Lands and Resources Subcommittee, room 3106 Dirksen Senate Office Building, Washington, D.C. 20510.●

SUBCOMMITTEE ON ADMINISTRATIVE PRACTICE AND PROCEDURE

● Mr. ABOUREZK. Mr. President, I wish to announce that the Subcommittee on Administrative Practice and Procedure of the Committee on the Judiciary, will hold hearings on September 12, 13, and 20, 1978, concerning the legislative veto and regulatory reform, S. 2011. The hearings will begin each day at 9 a.m., in the Dirksen Building, room 2228.●

PUBLIC LANDS AND RESOURCES SUBCOMMITTEE

● Mr. JACKSON. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Public Lands and Resources Subcommittee of the Energy and Natural Resources Committee.

The hearing is scheduled for September 8, 1978, beginning at 9 a.m., in room 3110 of the Dirksen Senate Office Building. Testimony is invited regarding S. 876, a bill to authorize the Secretary of the Interior to amend the contract for the construction, operation, and maintenance of the Vermejo reclamation project between the Vermejo Conservancy District, located in the State of New Mexico, and the United States.

For further information regarding the hearing, you may wish to contact Mr. Russell Brown of the subcommittee staff on extension 224–2366. Those wishing to testify or who wish to submit a written statement for the hearing record should write to the Public Lands and Resources Subcommittee, room 3106, Dirksen Senate Office Building, Washington, D.C. 20510.●

SELECT COMMITTEE ON SMALL BUSINESS

● Mr. NELSON. Mr. President, I wish to announce that the Select Committee on Small Business will continue its hearings on Capital Formation Problems of Small Business on September 21 and 28. The sessions will begin at 9:30 a.m., on each of these days in 424 Russell Senate Office Building.

At that time, we will address the effect of the securities regulations and laws on the ability of smaller and independent enterprises to raise capital. A witness list will be published as soon as it is completed.

The earlier hearings of February 8 and 10 in Washington, D.C., and May 15 at the American Stock Exchange in New York City, are now in print and may be obtained from the committee.

All those wishing to participate in the September hearings may contact the committee offices (202/224–5175).●

SUBCOMMITTEE ON ADMINISTRATIVE PRACTICE AND PROCEDURE

● Mr. CULVER. Mr. President, I wish to announce that the Subcommittee on Administrative Practice and Procedure of the Committee on the Judiciary will hold a markup session on S. 1974, the Regulatory Flexibility Act, at 9:45 a.m., tomorrow, September 7, 1978, in room S–146 in the Capitol.●

## ADDITIONAL STATEMENTS

### THE SIGNIFICANCE OF SALT—AN ARTICLE BY SENATOR FULBRIGHT

● Mr. SPARKMAN. Mr. President, our former colleague, Bill Fulbright, has written an excellent article on the SALT negotiations which I wish to bring to the attention of the Senate and all persons interested in United States-Soviet relations.

His article, which appears in the current issue of the American Enterprise Institute Defense Review, is a thoughtful survey of the significance of the current SALT negotiations. He puts the effort to reach an arms limitation agreement in a broad perspective and examines with fresh insight some of the current issues troubling United States-Soviet relations.

He concludes by citing his view of the obligations to the world of the two superpowers:

> Because of their power, and the responsibility it confers, the superpowers do not have the freedom to quarrel that smaller and less potentially dangerous nations have, or that great powers themselves may have had in an age when weapons were less destructive. The superpowers are therefore under an obligation—to themselves, to the rest of the world, and to posterity—to resolve their differences insofar as they can, and to set aside those which they cannot resolve. As the greater threats to world peace, the United States and the Soviet Union also have the greatest responsibility for protecting it. That is the real meaning of détente: it is not, fundamentally, an option but a compelling obligation.

I commend this excellent article to my colleagues and ask that it be printed in the RECORD.

The article follows:

THE SIGNIFICANCE OF SALT

(By J. William Fulbright)

With the United States and the Soviet Union reported to be within reach of a second Strategic Arms Limitation treaty, there is increasing concern in this country over prospects for Senate approval of the accord. Soviet and Cuban activity in Africa, together with the recent trials of Soviet dissidents, has served to focus attention on the fundamental issue that, more perhaps than the technicalities of weapons systems, will determine the success or failure of SALT. That issue, still unresolved for Americans after more than thirty years of constant interaction, is the nature of the Soviet system and what is to be expected of Soviet power. How Americans view the Soviet Union and the motivations of its political leaders will have much to do with determining the chances for accommodation on outstanding issues, and for the identification of shared interests between the two countries. The problem of perception is, of course, a mutual one: how each superpower perceives the intentions of the other will largely determine the future of détente and peace in the world.

While there is today little disagreement in the United States over the fact that Soviet military power is approximately equivalent to our own, there is no consensus on the uses to which Soviet power is likely to be applied. The proposed SALT II agreement, if approved, will reaffirm the principle that has guided American and Soviet leaders since the SALT talks first convened in November 1969: that, in a world in which the superpowers possess over 13,000 strategic nuclear warheads aimed at each other, neither country can accept the risks of thermonuclear war in pursuit of ideological or geopolitical objectives.

SALT will not eliminate the competitive aspects of U.S.-Soviet relations nor all the risks that competition entails. Given disparate historical experiences, cultures, and world views, and the enormous destructive power in the hands of each country's political leadership, the danger to mankind's continued existence inherent in nuclear weapons cannot be expected to disappear merely because of SALT. The best we can hope for is a lessening of that danger and a dampening of the competition that has dominated the history of this planet for the last thirty-three years.

In recent months it has become increasingly clear that the main battleground for SALT, and for the contending attitudes toward the Soviet Union that will fuel the debate over the treaty's ratification, will be the Senate of the United States. Among the questions that senators will have to answer are: (1) whether it is in the interests of the United States to begin reducing the total number of strategic nuclear delivery vehicles it and the Soviet Union can deploy; and (2) whether the two countries should try to limit the competition in the qualitative aspects of nuclear arms that has characterized the arms race for the past decade. In order to answer these questions, the Senate might also wish to consider the broader potential benefits of ratification, including the extension of détente into areas now beyond its scope, as well as the adverse consequences of defeating SALT—for instance, a new, more costly, and destabilizing round in the arms race, together with a break in the admittedly uneven pattern of cooperation that the two countries have developed in recent years.

No one in the Senate, to my knowledge, wishes to continue the arms race and increase the risk of war. Those who will oppose SALT will do so not because they wish to perpetuate a senseless expansion of nuclear arsenals, but because of a deep-seated fear that the Soviet Union cannot be trusted to act in its own true self-interest. The opponents of détente and SALT still adhere to beliefs and attitudes derived from events of the cold war period, events that led them to believe that Kremlin leaders would sacrifice the achievements of the Russian Revolution and subsequent struggles in order to perpetuate, at almost any cost or risk, the ideology to which they adhere. For reasons to be developed below, I believe this fear, though genuine, to be based in large part on misperceptions.

Much of the discussion in committee hearings and on the floor of the Senate will center on esoteric technical details of the SALT II treaty and protocol and the contending theologies of nuclear strategists. Pertinent though these may be, the more fundamental and decisive question is that of our attitudes toward the Soviet Union, and of our ability to distinguish between those which are solidly rooted in facts and experience and those which are the product of myth and unwarranted fear. It is important to discern the historical bases of deeply held convictions, critically and analytically, with open minds, respect for ascertainable evidence, and a solid commitment to the broader national interest.

ATTITUDES TO THE SOVIET UNION

In foreign as in personal relations our inferences are shaped as much by how we look at a person or situation as by what we actually see. There are few foreign countries about which we do not have certain preconceptions as to their good or ill intensions, and these exert a powerful influence on our evaluation of their specific acts or policies. "What struck me most in the United States," Alexis de Tocqueville wrote in the 1830s, "was the difficulty experienced in getting an idea, once conceived, out of the head of the majority. . . . Neither writings nor speeches can have much success in that; only experience can do it, and that too must sometimes be repeated."[1] I do not know whether the tendency to stereotype is a distinctly American trait; perhaps I am attracted to that idea as a ready excuse for my own limited success in swaying majorities, over the years, through writings and speeches.

Be that as it may, there seems little doubt that our attitude toward the other superpower has been importantly influenced by preconceptions, mostly unfavorable, about its motives and ambitions. For a brief period during World War II, we came to view the Russians not only as stalwart allies but also as fellow crusaders for a world regime of peace through law. That image gave way quickly after the war—and by no means entirely without reason—to the previously held and more predominant view of the Soviet Union as an aspirant world conqueror, the agent of world revolution Lenin had proclaimed it to be. Stalin, whom Roosevelt had supposed he could charm into responsible world citizenship and whom Truman once characterized as "good old Joe," was recognized instead—and more realistically—as the "crafty giant" of Churchill's description, a despot of extraordinary cruelty and ambition. With much encouragement from the American leaders of the early postwar era, this image of Stalin was implanted in American minds as the true picture of the Soviet Union itself, and was then transferred, only somewhat diluted, to Stalin's successors—to the earthy and supple Khrushchev, and then to the prudent and conservative Brezhnev. Because of the tenacity of our preconceptions, the great changes that have taken place in the Soviet Union since Stalin's time have been less than fully recognized, and even when we seek to cooperate with the Russians, as in the current Strategic Arms Limitation Talks, we retain some of our ironclad suppositions—that we are for stability and they for disruption, that we are peacemakers and they troublemakers, that we, in short, are good people and they bad people.

What, indeed, are the Russians really like? Can we conceive that they share with us a common human nature despite differences of culture and political tradition? Is it possible that their motives, like our own, are often ambiguous and obscure, to themselves as well as to others? Are they really still the world revolutionaries they professed to be in Lenin's time? Is it true—or still true—as Dean Acheson told the Senate Foreign Relations Committee in 1947, that "you cannot sit down with them," that indeed "it is a mistake to believe that you can, at any time, sit down with the Russians and solve questions"?[2] Or is it possible that their revolutionary zeal has abated, that power and experience have made them cautious and even responsible? A historian of revolutions has written that "there is no eternal fanaticism or, at any rate, there has not yet been an eternal fanaticism."[3] Is it conceivable then that Chairman Khrushchev meant it when he spoke of "goulash communism," to signify his commitment to a better life for his people? Or that Mr. Brezhnev was telling the truth when he told members of Congress, during his visit to this country in June 1973, that in seeking trade and investment he came here to consolidate good things, not to quarrel?

COLD WAR OR DÉTENTE

After thirty years of almost constant interaction we have still not made up our minds what the Russians are really like. During these decades two schools of thought have competed for the allegiance of public and congressional opinion. The more prevalent—at least in Congress—has been the cold war school, which remains wedded to the belief that the Soviet Union is driven by ideological zealotry, that its internal practices are incorrigibly repressive except when outside pressure is applied, and that, despite tactical concessions from time to time, the Soviet Union can never be anything but an inveterate antagonist to the United States in world affairs. The other school of thought—the détente school—basing its observations on Soviet *behavior* rather than doctrine, contends that, at least since Stalin's time, Soviet foreign policy has been pragmatic rather than messianic, opportunistic but not predatory, and that on the basis of its actual performance the Soviet Union has shown itself to be a reliable collaborator with the United States in honoring the terms of existing arms control agreements, keeping the lid on regional conflicts, and paying its commercial debts. As to the Soviet Union's internal practices, the détente school holds that these are for the most part beyond the reach of foreign influence, but in any case more amenable to influence through improved relations than by pressure.

THE COLD WARRIORS

The cold war school achieved the upper hand in this protracted national debate soon after World War II. At that time, when the Soviet Union was imposing subservient Communist regimes in Eastern Europe and encouraging subversion in the recently liberated, war-wracked nations of Western Europe, Soviet policy and Communist doctrine largely coincided. The mistake made by American policy makers was in assuming that because doctrine and practice coincided

---

Footnotes at end of article.

at a particular time in particular places, they must always coincide, which would mean that we would no longer need to examine Soviet actions in specific terms but could read them always as part of a grand design. Our policy makers' mistake after World War II was not in what they *did*—which was to respond strongly to Soviet provocations through aid to Greece and Turkey, the Marshall Plan, and the formation of the NATO alliance—but in their *interpretation* of these policies and the *explanations* of them given to the American people. Thus, instead of explaining our aid to Greece and Turkey in 1947 as a sound measure against a particular Soviet provocation, as Secretary of State Marshall proposed to do, President Truman encased it in the grandiose ideological terms of what came to be known as the Truman Doctrine. In his famous address on March 12, 1947, the President declared that at that moment in world history, "nearly every nation must choose between alternative ways of life," the one based on democratic institutions like our own, the other based on "terror and oppression." [4]

Couched in those terms, the choice would have seemed easy and obvious, but our postwar policy makers perceived the Soviet Union as possessing a diabolical magnetism for its prospective victims. During the heyday of McCarthyism in the late 1940s and early 1950s, the Russians were credited with an uncanny ability to subvert free societies, including our own, through the manipulation of gullible idealists. As the hysteria mounted, the category of gullible idealist was broadened to include—and besmirch—almost any public person who thought it possible, and worthwhile, to try to cooperate with the Soviet Union in specific areas of our relations. In 1950 State and Defense Department officials prepared a document, known as "NSC-68," which became a kind of full-fledged charter of American cold war policy. Fostered by Secretary of State Dean Acheson, the paper was prepared under the direction of the head of the State Department's Policy Planning Staff, Paul Nitze, who is now prominent in a group known as the "Committee on the Present Danger." "The Soviet Union," said NSC-68, "unlike previous aspirants to hegemony, is animated by a new fanatic faith, antithetical to our own, and seeks to impose its authority over the rest of the world." [5] Modified and altered in detail from time to time, this basic view of Soviet intentions dominated American foreign policy during the 1950s and had much to do with our subsequent involvement in the war in Vietnam, which was perceived not as a local civil war but as part of the Soviet, or Sino-Soviet, design for world domination.

DÉTENTE

The philosophy of the Truman Doctrine and NSC-68 exerts a profound influence over our policy to the present day, although it gave way to the détente school of thought at several crucial junctures over the years: under President Eisenhower, when hesitant efforts were made to reach an understanding with Chairman Khrushchev; under President Kennedy, when the nuclear test ban treaty was concluded; and, most significantly, under President Nixon and Secretary of State Kissinger. In 1972, which stands as the high point to date of Soviet-American détente, the ABM Treaty, restricting antiballistic missile sites, and the Interim Agreement, limiting strategic offensive arms, were concluded; a definitive agreement was reached on access to Berlin; and a seemingly propitious trade agreement was signed. In 1973 numerous other agreements were concluded, such as one on the prevention of nuclear war, and others for cooperation in oceanography, transportation, airline service between the two countries, expanded cultural exchange, and other areas. For three successive years President Nixon and General Secretary Brezhnev exchanged visits. On the eve of his last visit to Moscow, President Nixon, in a speech at Annapolis on June 5, 1974, recalled the agreements that had been reached and said that "upon these bridges we are erecting a series of tangible economic and cultural exchanges that will bind us more closely together." An enduring "structure of peace," said the President, "must be cemented by the shared goals of coexistence and the shared practice of accommodation." [6]

Mr. Nixon's vision, though promising, was premature. As on all previous occasions when the nation seemed to be on the track of steadily improving relations with the Soviet Union, the cold warriors rallied their considerable forces, and advocates of détente encountered once again the difficulty, noted by Tocqueville, of "getting an idea, once conceived, out of the head of the majority." Just as President Eisenhower's initiative was aborted by the U–2 affair in 1960 and President Kennedy's efforts were overwhelmed by the Vietnam War, the Nixon-Kissinger détente began to come unstuck when the administration's authority was undetermined and finally destroyed by Watergate. Under renewed cold war pressures since 1974, the two superpowers have failed to reach a new SALT agreement, while the strategic arms race proceeds unabated; the trade agreement has been denounced by the Soviet Union because of the Jackson amendment, connecting it with emigration; and the two countries find themselves at odds in Africa and the Middle East, and over human rights within the Soviet Union.

Overshadowed though it has been, and despite certain solid elements of accuracy in the cold war view of Soviet-American relations, the détente school of thought still provides a more accurate—and surely a more promising—perspective for the future development of Soviet-American relations. Evaluating Soviet intentions on the basis of performance rather than doctrine, and of realistic probability rather than the "worst-case" scenarios so beloved of our strategic planners, advocates of détente look to both the past and the future. In the past they see that, since the early postwar years when the Russians established their domination over Eastern Europe, the Soviet Union has not engaged directly in overt military aggression beyond the sphere of domination it had established, although it has competed with us—with more failure than success—in seeking to establish its influence with various client regimes in the Third World. All but the most unreconstructed cold warriors will recognize now that the Vietnam War was not part of a Soviet world design but was essentially a civil war in which the Soviet Union supported one faction while we, on an incomparably greater scale, supported the other. Still looking to the past, advocates of détente note that the Russians have shown a continuing interest in strategic arms limitations and in trade, and that when agreements have been reached they have honored them.

Looking to the future, advocates of détente do not foresee perfect harmony or an end to all competition between the superpowers. They see instead, as Daniel Yergin puts it in his fine book "Shattered Peace", a broad understanding encompassing "a somewhat more explicit agreement on the rules of competition; a certain number of cooperative projects, of which arms control, based on the purported acceptance of parity, is the most important; increasing communication and contacts on many levels; and a reduction in the state of permanent alarm on both sides." [7]

Whether such a broad understanding is feasible depends upon which school of thought—cold war or détente—is more accurate in its reading of the motives and aims of the Soviet leadership. I am, I believe, in authoritative company in my belief that the Soviet leaders, though far from idealistic and by no means willing to give up their competition with the United States in seeking influence throughout the world, are on the whole reliable partners in the most important single activity of world politics—the prevention of nuclear war. They are reliable for this purpose, as George Kennan has pointed out, because, far from being "monsters" who would run almost any risk and extract any sacrifice from their people to destroy us or gain world domination, they are in fact "quite ordinary men," shaped more by their experience and responsibility as leaders of a great country than by ideology. They are properly understood, Kennan suggests, as "highly conservative men, perhaps the most conservative ruling group to be found anywhere in the world, markedly advanced in age, approaching the end of their tenure, and given to everything else but rash adventure." Furthermore, Kennan suggests, the Soviet leaders "share the horror of major war that dominates most of the Soviet people," and "have no desire to experience another military conflagration and no intention to launch one." [8]

FUTURE DIRECTIVES

We stand at present, once again, at a crucial juncture in Soviet-American relations, and the auguries for the future are less than promising. The SALT talks have made progress, we are told, but there are still obstacles to be overcome, and domestic opposition to a new agreement is rising. We are at odds with the Russians over Africa, the Middle East, and human rights, and cold warriors at home are demanding that we punish the Russians for what they are doing in these areas by holding up a SALT agreement. The professionals call this approach "linkage"; an anonymous observer, noting our own vital interest in SALT, said it is more like shooting yourself in the foot.

President Carter himself has denied any intent to practice linkage. Indeed, when he inaugurated his human rights campaign in 1977 he expressed confidence that it would not interfere with an arms accord. Nonetheless, in a speech at Wake Forest University on March 17, 1978, the President warned—or threatened—the Russians with the erosion of popular support for cooperation "toward common social, scientific and economic goals" if they "fail to demonstrate restraint in missile programs and other force levels and in the projection of Soviet or proxy forces into other lands and continents." He also warned against the Soviet buildup of conventional arms and sea power and, in rather strident terms, declared that we must never allow the Soviet Union to be in a position to use its nuclear power to coerce or blackmail us or our friends. He warned, too, that a Soviet first strike, though a "remote" threat, would be "national suicide" for the Soviet Union. [9]

It seemed probable at the time that the President was directing his remarks less to the Russians than to our domestic cold warriors, especially the Senate "hawks" who might scuttle a SALT treaty. Unfortunately, there is no way of trying to appease Senator Jackson and his associates without antagonizing the Russians, and that is exactly what happened. The official Soviet press agency, Tass, responded immediately and sharply to

---

Footnotes at end of article.

the Wake Forest speech, accusing President Carter of abandoning détente and resorting "to a course of threats and a buildup of tension." [10] The Russians, it seems, were reacting to the *tone* and *attitude* of President Carter's remarks. His references to Soviet coercion and blackmail and to the threat of a first strike, even though hypothetical, must convey to the Russians that these are what we think they have in mind; these are the motives and intentions we attribute to them.

Just as we have never been quite able to make up our minds about the Russians, they show uncertainty about our intentions. In an authoritative article in *Pravda* on March 28, 1978, the Soviet leadership described the Carter administration as torn between two schools of thought within the United States, one for "building up tension," the other for détente. Emphasizing the delay in reaching a SALT agreement, the article, written by Georgi A. Arbatov, adviser to the Politburo on American affairs, said that a time of "truly crucial decisions" was at hand, and the issue was not only whether there was to be a SALT agreement. "The question is actually about selecting the road for years to come." [11]

With a view—so it was announced—to clarifying the confusion over American policy toward the Soviet Union, President Carter made another speech on the subject at the United States Naval Academy in Annapolis on June 7, 1978. He reiterated his belief in the fundamental importance of a SALT agreement; pledged his administration's continuing efforts to achieve an agreement, noting that "the risks of nuclear war alone propel us in this direction"; and assured his listeners that the prospects for a SALT II agreement were good. He went on, however, to castigate the Soviet Union for its actions in Africa, its military buildup, and its violations of human rights. Then—in somewhat patronizing terms—the President took note of the shortcomings of the Soviet economy and Soviet agriculture and reminded the Russians that their standard of living was lower than those of some other countries.[12] Since these failings are well known to the Russians, it is not clear what purpose is advanced by trumpeting them, other than to provoke or give offense, or—as seems likely—to try to appease anti-Soviet sentiment in the Congress, an unpromising undertaking as likely to encourage as to dampen cold war attitudes.

The President's speech at Annapolis apparently failed to clarify American policy to the Russians. The Soviet news agency Tass found the President's remarks "strange, to say the least," while earlier *Pravda* had accused the Carter administration of "constant zigzags and inconsistency" and said it was difficult to tell "who in Washington expresses the true policy of the Administration." [13] The Russians, it would seem, were not alone in their confusion. The *New York Times* in an editorial declared the President's Annapolis speech "essentially conciliatory," while its front page news article, on the same day, carried the subhead, "Toughest Stand Yet." [14]

As we examine the outstanding issues between the two superpowers and attempt to resolve the ambivalance and contradictions of our policy, our decisions, I have no doubt, will be based only in part on the facts and merits of special problems, such as SALT, Africa and the Middle East, and human rights. Our decisions will be shaped at least as much—and I suspect more—by the attitudes that we and the Russians bring to our continuing interaction. If each side remains basically convinced that the true objective of the other is to dominate or destroy, there will be no worthwhile SALT agreement, because almost any weapons system is potentially aggressive; there will be no cooperation for peace in the Middle East or Africa, because any bid for influence can be read as part of a global design; there will be no increase in trade, because almost any commodity, even food, can contribute to a nation's war making capacity; and there will surely be no improvement in human rights, because relaxing controls, from the Soviet standpoint, would open the gates to Western subversion.

If, on the other hand, we approach outstanding problems with attitudes of cautious trust, with the desire to cooperate, and with some appreciation of the other party's fears and anxieties—with a measure, that is, of empathy—we might well find ourselves able to develop a different, positive kind of "linkage" in our relations with the Soviet Union. As currently practiced, linkage involves retaliation, or the threat of it, in one area for the failure of agreement in another. Its effect is to exacerbate disagreement—threatening SALT, for example, because we do not like what the Russians are doing in Africa. Were we instead to pursue a SALT agreement independently of other issues, and without excruciating bargaining over every last technical detail, we might then find ourselves in an improved position—on a new psychological plateau, so to speak—for enlisting Soviet cooperation for a settlement in the Middle East. And were we to do that, instead of trying to exclude the Russians from the Middle East, we might, conceivably, find them easier to deal with in regard to Ethiopia or Rhodesia. Should all this come to pass, and if we were also willing (as we promised back in 1972) to trade with the Soviet Union on nondiscriminatory terms, I would venture a guess—maybe even a prediction—that there would be some easing of restrictions on human rights within the Soviet Union.

### LINKAGES, POSITIVE AND NEGATIVE

The centerpiece of détente—if there is to be détente—is strategic arms control. Its importance, though obvious to ordinary people, sometimes seems to escape the experts, and therefore bears repeating: arms control is important because the leaders of the Soviet Union and the United States have the means at their disposal at any time to destroy each other's cities and much or most of each other's populations. It is theoretically possible to prevent war by maintaining a strategic balance in an uncontrolled arms race, and it is even possible, theoretically, to limit the arms race by voluntary, unilateral restraints on the development of superfluous weapons systems. Recent experience suggests, however, that to the arms experts there is no such thing as a superfluous weapons system, and all history—from antiquity to the world wars of the twentieth century—shows that peace cannot survive indefinitely on the basis of fear alone. It is an accepted principle of psychology that fear shapes behavior; our prophecies tend to be self-fulfilling, so that if we live in the constant expectation of war, we will probably, in due course, get it.

### CARTER AND SALT

The Carter administration has been ambivalent in its approach to SALT, as it has in its entire approach to détente. At times the President has seemed to share the view held by advocates of détente that the Russians are probably no more enthusiastic about being incinerated in a nuclear war than we are. In his address to the 32nd United Nations General Assembly in the fall of 1977, President Carter pointed to the "awesome and special responsibility" of the superpowers in an age in which standards of "victory" and "defeat" have become archaic.[15] More recently, as in the President's speeches at Wake Forest and at Annapolis, the Carter administration has been reinforcing cold war attitudes of fear and mistrust of Soviet intentions. The intent may well be to try to appease cold war pressures at home; the probable effect is to reinforce these pressures while puzzling and angering the Russians.

The status of the SALT talks is by no means clear. On the one side we are told that significant progress has been made and that the agreement is about 95 percent complete. A compromise seems to have been reached on the long-stalemated issue of the American cruise missiles, limiting their deployment, and it is also reported that the United States will be prepared to accept Soviet assurances that the so-called Backfire bomber—another controversial issue—will not be deployed in a manner enabling it to fly strategic missions against the United States. To the layman much of the argument over restrictions on nuclear overkill seems stupefyingly technical and, overall, irrelevant, since there is virtually no possibility that either side can make itself immune to shattering attack by either first or second strike.

The rewards of a SALT agreement are not in the realm of physical security, since that has already been lost irretrievably in this age of nuclear weapons and ballistic missiles—to us, to the Russians, to all peoples. The real rewards of SALT are twofold. First, arms control can save a great deal of money: a Senate Budget Committee report in the spring of 1978 warned senators that if SALT failed, additional defense spending over the next fifteen years could increase up to $100 billion—for cruise missiles, Trident submarines, and the fantastically expensive projected M–X missile, which could be deployed in a mobile mode.[16] The second, and greater, reward of a SALT agreement will be in its psychological effects: in its encouragement of a measure of mutual trust between the superpowers, and, as a precedent for cooperation on other issues, as a step toward the development of a habit of cooperation. This approach, which might be called positive linkage, may well be dismissed by experts and professional Kremlinologists as naive. I put it forth nonetheless because the approach commended by the self-styled, hard-nosed "realists" has been tried and found wanting. It has brought us only recurrent crisis and the dangerous and costly arms race; there is no "realism" in an approach that does not work. It would seem timely to try something new.

### HUMAN RIGHTS AND TRADE

One area in which only the truest of true believers would contest the need of a new approach is that of human rights and the related problem of trade. Here there is the distinct risk of a conflict of American ideals, of the possibility, as sociologist David Riesman has put it, "that the proclaimed goal of human rights may inadvertently risk the human prospects of survival itself." [17] Americans naturally and properly deplore the mistreatment of individuals in totalitarian societies, and the inclination is strong to apply pressure or sanctions—that is, linkage—against states that deny basic human rights to their own citizens. The trouble with our human rights campaign against the Soviet Union is surely not in its motivations but in its effects: it simply does not work. Just as the arms race has failed to win security, the human rights campaign has failed to win freedom for its intended beneficiaries On the contrary, it has provoked a hardening of the Soviet position against dissidents and, although it has not yet done so, may goad the Soviet leaders into a tougher stand on SALT and other issues, through a linkage policy of their own.

---

Footnotes at end of article.

There is incontestable evidence of the futility and mischievousness of an aggressive human rights campaign in the fiasco of the Jackson-Vanik amendment. Jewish emigration from the Soviet Union was mounting steadily—from about 15,000 in 1971 to 30,000 in 1972 and a peak of 35,000 in 1973—until the debate on and adoption in 1974 of Senator Jackson's amendment making equal trade treatment contingent on the dropping of emigration controls. The Russians responded by dropping instead the Soviet-American trade agreement of 1972 and by sharply restricting Jewish emigration, which fell to 15,000 in 1975, the same in 1976, and then to its current rate of about 13,000 a year. By contrast, Chancellor Schmidt of West Germany, practicing a quiet, discreet diplomacy, obtained in 1976 the repatriation from the Soviet bloc of some 70,000 ethnic Germans.

Aside from its drastic effects upon Jewish emigration from the Soviet Union, the principal result of the Jackson-Vanik amendment, and the related Stevenson amendment that restricted Export-Import Bank credits to the Soviet Union, has been a boon to the trade of other countries. Except for some large agricultural shipments to the Soviet Union, Soviet-American trade has stagnated since 1974, while Soviet trade with Western Europe and Japan has expanded considerably. The potential market for American trade and investment in the Soviet Union remains very large. With their under-developed civilian economy, the Russians have need not only of agricultural commodities but also of high-technology products that the United States can provide, such as fertilizer plants, petroleum and natural gas facilities, power-generating plants, transport and distribution systems, and managerial know-how. To gain access to this potentially profitable market, which could provide jobs for American workers while reducing our huge foreign trade deficit, we would have to repeal the Jackson and Stevenson amendments, allowing the Russians equal trade status and access to Export-Import Bank credits on the same terms we grant to other trading partners. Whether we are willing to take these steps depends ultimately, as does our approach to SALT, on our basic attitude toward the other superpower: Is it to be regarded as a permanent antagonist resolved to do us in, or as another great power with which, through effort, we can hope to build reasonably normal relations?

One might have expected the fiasco of the Jackson amendment to have produced a measure of modesty, if not chagrin, among the Soviet-baiting cold warriors. Such, however, has not been the case. Although the President himself has backed away from the human rights sermons with which he infuriated the Russians during his first months in office, American representatives, led by Arthur Goldberg, wound up in March 1978 eight months of futile polemics and moralizing at the Belgrade conference on European security and cooperation, which was convened to review the Helsinki accords of 1975. Although our representatives lectured the Russians eloquently and at length on their transgressions in the field of human rights, not one of more than 100 proposals submitted to the conference was approved, and the final report made no reference to human rights because the Russians threatened to veto the report if human rights were mentioned. The only agreements reached at Belgrade were decisions to hold certain other meetings, including another review conference in 1980 in Madrid.

Following upon this triumph of human rights diplomacy, the administration and its congressional supporters seemed to shift their attention to the prospective Scharansky trial. Mr. Scharansky is a young Soviet dissident accused of working for the CIA, for whom President Carter, early in his term, spoke out publicly, denying any CIA connection. The result was to put the President's prestige on the line and to elevate an individual question of Soviet justice to the status of a cold war issue. In an interview broadcast over the Voice of America on April 3, 1978, the American ambassador to the Soviet Union, Malcolm Toon, bluntly invoked linkage, warning that the trial of Scharansky "will have a very negative effect on our relations and it will make it very difficult indeed for us to do the sorts of things which I think both of us feel are essential to peace and stability in the world." [18]

There is nothing to be said in defense or excuse for the sometimes brutal treatment of Soviet citizens by their leaders—including, for another example, the banishment in March 1978 of the distinguished musician Mstislav Rostropovich. Experience demonstrates, however, that it is usually futile and often destructive and dangerous to intervene in the internal affairs of other countries, especially a great power like the Soviet Union. As we discovered in Vietnam, outsiders are seldom wise enough, or powerful enough, to elevate the morality of a society not their own. The Russian people, moreover, have lived under dictatorship throughout their history, under the tsars and under the Communists, and it is not within the scope of our resources, moral or material, to lift that burden of oppression by external pressure.

The authors of the human rights campaign argue that there must be a "moral dimension" to our foreign policy, and in that they are absolutely correct. The question, however, is not whether or not there is to be morality in our policy but, as David Riesman observed, what choice we will make when ideals seem to conflict. My own strong conviction is that there is no more compelling moral purpose to be advanced through our foreign relations than the prevention of nuclear war, and this objective requires, above everything else, the development of a peaceful and reasonably cooperative relationship between the two nations that have it within their power virtually to shatter human life upon the earth. I also believe—and in this I am in the company of leading students of Soviet affairs, such as Secretary Vance's principal adviser on the Soviet Union, Marshall Shulman—that there is no ultimate conflict between the policy of détente and human rights. As Professor Shulman has noted, we cannot predict the evolution of the Soviet system, but "it seems reasonable to believe that easing of repression is more likely to result from evolutionary forces within the society under prolonged conditions of reduced international tension than from external demands for change and the siege mentality they would reinforce." [19]

The most promising route to greater freedom within the Soviet sphere, it would seem, is detente itself—the gradual lessening of tensions and pressures through the normalization of relations.

### THE THIRD WORLD

Looking further at the possibilities of positive linkage, it would seem worthwhile to examine the possibilities of Soviet-American cooperation in the Middle East and Africa, and to do so in such a way that progress in one region can be built upon for progress in the other. I am by no means certain that this can be done. The Russians may be unmovable in ideological commitment to the advancement of the "class struggle" in the Third World. In that event we are not without resources for resisting them if they threaten our interests or otherwise act in violation of the United Nations Charter, and we can do so without jeopardizing the strategic arms limitations that are of such great importance to both of us. There is also a possibility—an untested and, I rather suspect, a good one—that if we were to enlist, rather than resist, Soviet participation in the search for peace in the Middle East, we might find them in turn more amenable to our preferences with respect to Ethiopia, Rhodesia, or Angola.

Somewhat unexpectedly, in the fall of 1977, the Carter administration departed from the established American policy of excluding the Russians, so far as possible, from Middle East diplomacy. On October 1, 1977, the United States and the Soviet Union issued a joint statement in their capacity as cochairmen of the Geneva Peace Conference on the Middle East, in which they called for a comprehensive settlement based on Israeli withdrawal from occupied Arab territory, ensuring the "legitimate rights" of the Palestinian people, termination of the state of war and the establishment of normal relations between Israel and the Arabs, and international guarantees of the entire settlement in which the Soviet Union and the United States would participate.

One would have thought this declaration, in which the Soviet Union took a position consistent with that of the United States, would have been welcomed as promising both for peace in the Middle East and for superpower detente. Instead there arose a fearful hue and cry about "letting the Russians back into the Middle East." The *New York Times* proclaimed itself perplexed by this "tortured piece of prose." [20] The Jewish community was portrayed as "absolutely horrified," [21] and one overwrought columnist fulminated against the joint statement as an "infamous" design by President Carter for turning the West Bank into a "Soviet staging area" against Israel.[22]

Under this barrage of Zionist and anti-Soviet criticism, the administration beat a prudent but unfortunate retreat from the approach of the joint statement. Little if anything has been said since then about Soviet-American cooperation for peace in the Middle East, even though—and the point bears all possible emphasis—the Soviet position on an Arab-Israeli settlement is substantially similar to our own: they, like we, favor Israel withdrawal from most occupied territories; they, like we, support the survival and security of Israel—a position, indeed, held by the Soviet Union since the creation of Israel in 1948; and they, like we, now say that they are prepared to join in guaranteeing a settlement along these lines. Furthermore, the Russians exert an influence on Syria and on the Palestine Liberation Organization, an influence that could be used to advance the cause of an equitable overall settlement.

If the United States is reluctant to cooperate with the Soviet Union in the Middle East, where their basic position is compatible with our own, it would seem something less than astonishing that the Russians are not now hastening to do our bidding in Africa. In the wake of the successful Soviet-Cuban intervention in Ethiopia, which enabled that country to expel Somali invaders from its territory, and the alleged Cuban support of the Katangan exile raid into Zaire, the United States has important, legitimate concerns. Will the Russians now restrain their Cuban allies from further large-scale military involvement in Africa, or will they encourage them in "wars of national liberation"? Will the Russians now practice restraint in the difficult transition to majority rule in Southern Africa, or will they support and incite the militant Patriotic Front against a moderate settlement in Rhodesia? These are matters that might be brought to satisfactory, or at least tolerable, resolution in the context of a broader

Soviet-American détente—which is to say, we might be better able to influence the Russians on these issues if there were a habit of consultation between us, on all major issues and in other regions as well as Africa.

Of late we have been advising the Soviet Union that it cannot have a selective détente; it cannot intervene in Africa and still hope for a forthcoming American attitude on SALT. Some members of Congress have called for suspension of the SALT talks until the Russians terminate their "adventurism" in Africa, and Mr. Brzezinski, the President's national security adviser, is widely thought to be a proponent of one form or another of linkage of this kind. It is worth recalling in this respect that there never would have been a SALT I agreement if the Russians had insisted upon linkage; Mr. Brezhnev signed that agreement with President Nixon in Moscow in 1972 at a time when the United States was intensifying its bombing of North Vietnam and had just mined the North Vietnamese ports.

It is also worth noting that the Soviet role in Ethiopia thus far does not qualify as "aggression," in law or in fact. By contrast with Angola, where the Russians and Cubans intervened in a civil war in violation of the United Nations Charter, their intervention in Ethiopia, whatever its motivation was in support of an invaded nation, and was therefore consistent with the United Nations Charter. Were there a *habit* of détente between the superpowers—of cooperation, that is, on all major issues—it might have been possible for the United States, as a signatory to the United Nations Charter, to *endorse* the Soviet effort insofar as it consisted of support for a victim of aggression, and then to express our "confidence" that the Russians would not go beyond this commendable purpose.

CONCLUSIONS

Linkage, in short, is a two-way street, and is far more likely to work as a positive incentive than as a negative sanction. If the United States could send half a billion men to Vietnam, cut the Russians out of the Middle East, and subvert an elected Marxist government in Chile, while still expecting the Russians to cooperate on arms control, they may find it puzzling when we threaten to disrupt SALT because of their involvements in Africa. We would be on much stronger ground in calling on the Russians to practice general rather than selective détente if we would practice what we preach: by pursuing SALT on its own terms, by inviting rather than resisting Soviet cooperation in the Middle East, by permitting trade on nondiscriminatory terms, and by abstaining from futile meddling in the internal affairs of the Soviet Union.

Powerful though they are, the Soviet Union and the United States are under certain constraints that do not necessarily apply to other nations. They alone have the power—and with it the responsibility—to maintain a semblance of order in our turbulent world. Many other nations, large and small, have acquired the means to fight wars, trouble their neighbors, and disrupt their regions, if these are their inclinations. In this respect we live in an increasingly pluralistic world. But in another, perhaps more important, respect, the paramount role of the superpowers is increasing rather than decreasing. They alone have the power, through collaboration, to put limits on the world's turbulence, to prevent great conflicts and contain small ones, to curb the excesses of nationalism and ambition, including their own, and by so doing to make the world as safe as it can be made in the thermonuclear age. Because of their power, and the responsibility it confers, the superpowers do not have the freedom to quarrel that smaller and less potentially dangerous nations have, or that great powers themselves may have had in an age when weapons were less destructive. The superpowers are therefore under an obligation—to themselves, to the rest of the world, and to posterity—to resolve their differences insofar as they can, and to set aside those which they cannot resolve. As the greatest threats to world peace, the United States and the Soviet Union also have the greatest responsibility for protecting it. That is the real meaning of détente: it is not, fundamentally, an option but a compelling obligation.

Lasting peace must be built on two foundations, fear and affiliation. Modern weapons provide an adequate basis for fear, and that fear, which Churchill called the "balance of terror," is the principal basis of peace in the world today. By itself, however, it is insufficient, too slender a reed on which to base the future of the human race. We must try, therefore, by the means at our disposal—arms control and political cooperation, trade, and educational exchange—to build the second, often fragile, but ultimately more reliable, foundation of peace, which is the capacity of human beings for affiliation and cooperation. As Sigmund Freud wrote to Albert Einstein in 1932, "All that produces ties of sentiment between man and man must serve us as war's antidote." [23]

## ILLEGAL ASPECTS OF NORMALIZING RELATIONS WITH RED CHINA

● Mr. GOLDWATER. Mr. President, it is well-known that one of the essential conditions demanded by Communist China for the establishment of diplomatic relations with the United States is termination of the Mutual Defense Treaty of 1954 with the Republic of China. Some proponents of switching embassies from Taipei to Peking argue the novel concept that the President has power to unilaterally break the defense treaty or to determine that it has lapsed upon recognition of Red China.

The leading spokesman for this unique theory is Prof. Jerome Cohen of Harvard Law School, who published his opinion in the July issue of the American Bar Association Journal.

Mr. President, I believe the proposition argued by Professor Cohen is a dangerous innovation in American constitutional law and practice.

I believe Professor Cohen has failed to recognize that there is not a single precedent in American history for the abrogation of a defense treaty by the unilateral action of the President.

Nor is there any example of the President ever having decided that a defense treaty would lapse following a change in diplomatic relations between governments.

To the contrary, it has become increasingly clear in international law that nonrecognition of a state or government does not by itself impede the latter's capacity to carry out bilateral treaties. Existing treaties with the unrecognized state or government remain in force, subject to the principle of reciprocity.

As Prof. Victor Li, professor of international legal studies at Stanford University, testified at hearings before the House Subcommittee on Asian and Pacific Affairs on September 21, 1977:

> International law does not require that prior treaties entered into with a once-recognized government, the terms of which are limited to the territory actually controlled by that government, must automatically lapse after that government loses de jure recognition while still exerting de facto control . . . Hence, the choice of what to do with the defense treaty is a political, more than legal matter.

Mr. President, the real question is a political one, not a legal technicality as Professor Cohen would have it. The question that must be asked is whether the President can act alone under our political system.

According to James Madison and Thomas Jefferson, the answer is in the negative.

Madison wrote that he saw "the same authority, precisely, being exercised in annuling as in making a treaty." As we all know, the treatymaking authority is the President acting together with the advice and consent of two-thirds of the Senate.

Jefferson, in his Manual of Rules of the Senate, wrote:

> Treaties being declared, equally with the laws of the United States, to be the supreme law of the land, it is understood that an act of the legislature alone can declare them infringed and rescinded.

Madison and Jefferson are supported by the text of the Constitution, which specifies that a treaty is part of "the supreme Law of the Land." And, since the President is obligated by another provision of the Constitution to "take care that the laws be faithfully executed," it is clear the President is under a duty to carry out treaties, just the opposite of an authority to repeal them.

The history of the ratification of the Constitution contains persuasive evidence that the framers meant to make it difficult for the United States to terminate a treaty. Madison, Hamilton, and C. C. Pinckney, each of whom signed the Constitution, wrote that the unfaithful adherence to treaties by the new nation was one of the defects of the Articles of Confederation intended to be remedied by the Constitution. Similarly, James Wilson hoped that by remaining faithful to its treaties, the new government would gain the respect of other nations. These statements contradict Cohen's opinion that the framers meant for treaties to be easily broken by Presidential decision alone.

With all the emphasis the framers put on a balance of powers and accountability, it is difficult to conceive, as Cohen does, that the framers would have tossed these principles aside by vesting a totally unchecked power in the President to break the faith of the Nation as expressed in its treaty commitments.

Cohen's appeal to the President's removal power as a precedent for the termination of treaties is astounding. From the bare fact that high Government officers are appointed by the President with the advice and consent of the Senate, but can be removed by the President at his discretion, Cohen believes the President can terminate a treaty by his independent initiative.

In my opinion, the fact that advocates of extreme Presidential power must resort to such an absurd argument of this kind reveals the weakness of their concept. The status of the President vis-a-vis other sovereign nations cannot be equated to his relationship with subordinate officers of his own administration.

The power of removing officials who serve under his direction aids in the efficient exercise of the President's duty to execute the laws. But the treaty power is not, as Cohen implies, a tool for more effectively operating the mechanics of Government. A treaty pledges the solemn word of our people and is elevated to the same constitutional rank as a law. By breaking a formal compact with another nation, which he is bound to uphold as law, the President would not carry out the law, he would break it.

In his article, Professor Cohen also misconceives the significance of a provision in the defense treaty with Taiwan which allows withdrawal by either party following 1 year's notice. The term "party" does not mean "the President," but refers to the government of the state concerned. Thus, the provision requires a reference to the constitutional processes of the government ratifying the treaty to determine what authority in that government shall make the decision to give notice under the treaty. This brings us back to the fact that under the Constitution the decision to terminate a treaty is a joint one shared by the President and Senate or Congress.

Mr. President, it must be remembered that the defense treaty with Taiwan does not stand alone. Nearly every bilateral and multilateral treaty the United States has with other governments contains a provision similar to the duration article of the defense treaty. For example, NATO, the Test Ban Treaty, the Biological Weapons Convention, and the Outer Space Treaty, each contain provisions authorizing termination after 1 year's or less notice thereof.

If the language in the defense treaty with Taiwan were construed as allowing the President alone to provide notice of its termination, each of the above treaties would equally be hostage to his sole discretion. I am certain that this news would come as a great surprise to the Senate, which had advised and consented to those various international agreements without any such understanding or warning.

Mr. President, I conclude my remarks by issuing a word of caution to those persons who are advising the President to unilaterally concede to Red China's demand for the termination of our defense treaty with Taiwan. I would remind persons who are so advising the President that we in the Senate unanimously declared our sentiment that the Constitution requires "prior consultation between the Senate and the executive branch" on any proposed policy changes which may affect the continuation in force of the Mutual Defense Treaty of 1954. This statement by the Senate, which was contained in the Dole-Stone amendment to the International Security Assistance Act, was designed specifically to correct any misconception that the treaty would automatically lapse if the administration recognizes Peking. The vote on that amendment was 94 to 0.

If the President should, contrary to all precedent and in violation of the unanimous declaration by the Senate, attempt to terminate the defense treaty with Taiwan, it would subject the country to a severe constitutional crisis. Not only would the subject matter present a "case or controversy," to which the judicial power extends, but I am confident that Members of the Senate would have standing to come into the courts for a judicial determination of the constitutionality of the President's action.

Also, there are other remedies available to the Senate or Congress, including the possibility of impeachment proceedings. This is not a threat or prediction of what might happen, but it is something any President's adviser should be aware of before any action is taken which would put the President in a serious conflict with the legislative branch over an abuse of power issue.●

## PROPOSED ARMS SALES

● Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask to have printed in the RECORD the notifications I have just received.

The notifications follows:

WASHINGTON, D.C.,
*August 29, 1978.*

In reply refer to: I–7052/78ct.

Hon. JOHN J. SPARKMAN,
*Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith, Transmittal No. 78–96, concerning the Department of the Air Force's proposed Letter of Offer to Korea for other than major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost $60 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES,
*Lieutenant General, U.S.A., Defense Security Assistance Agency.*

[Transmittal No. 78–96]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Korea.
(ii) Total Estimated Value:
Major Defense Equipment,* $0.0 million.

Other, $60.0 million.
Total, $60.0 million.
(iii) Description of Articles or Services Offered:

Cooperative Logistics Supply Support Arrangement (CLSSA), requisition case (FMSO II) for follow-on spares and supplies for support of aircraft of U.S. origin (F–4, F–5, A–37, and C–123 aircraft).

(iv) Military Department: Air Force.
(v) Sales Commission, Fee, etc. Paid, Offered or Agreed to be Paid: None.

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

(vi) Date Report Delivered to Congress: August 30, 1978.●

## PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

● Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that such a notification was received on August 30, 1978.

Interested Senators may inquire as to the details of this preliminary notification at the offices of the Committee on Foreign Relations, room S–116 in the Capitol.

The notification follows:

WASHINGTON, D.C.,
*August 29, 1978.*

In reply refer to: I–8035/78.

Dr. HANS BINNENDIJK,
*Professional Staff Member, Subcommittee on Foreign Assistance, Committee on Foreign Relations, U.S. Senate, Washington, D.C.*

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Southeast Asian country for major defense equipment tentatively estimated to cost in excess of $7 million.

Sincerely,

ERNEST GRAVES,
*Lieutenant General, USA, Director, Defense Security Assistance Agency.*●

(By request of Mr. PEARSON for Mr. HELMS the following statement is printed in today's RECORD:)

### NATIONAL HOSIERY WEEK

● Mr. HELMS. Mr. President, small business is the backbone of America's economy and our free enterprise system. I can think of few industries in which small, family-owned businesses make up the greater part than the hosiery industry. I am proud of the thousands of dedicated people who have made this vital and growing industry, and I salute the hosiery industry during National Hosiery Week.

Mr. President, the eighth annual National Hosiery Week will be held September 10–16 of this year and I am delighted to have the opportunity to recognize and congratulate the National Association of Hosiery Manufacturers and its member companies for their outstanding contributions to American industry and the economy.

The hosiery industry of America produces $3.4 billion in retail sales, and as such is a vital part of our total economy.

The hosiery industry provides employment for nearly 75,000 people in 444 plants scattered all across the country. The average number of employees per plant is about 170. The hosiery industry provides jobs for many other individuals supplying raw materials, as well as for those who distribute and retail the many and varied hosiery products. In North Carolina alone, some 35,000 people are employed by the hosiery industry.

The majority of the hosiery industry is comprised of small, family-owned, independent companies, working hard to earn a profit while providing needed jobs and boosting the economies of a number of small towns and cities. There are 330 companies manufacturing hosiery. There are very few large corporations involved in its production.

Mr. President, I am proud to state that over 90 percent of the total hosiery production is concentrated in the South, with my own state of North Carolina accounting for over 55 percent of the total production in the United States.

National Hosiery Week has been designated as a week to educate the consumer about hosiery and hosiery production and to acquaint the public with the wide variety of hosiery products available to meet his or her needs.

Companies involved in the production of hosiery face the same challenges as do most other American industries—they need an adequate supply of energy, they need to be able to compete internationally, and they must be able to depend on a sound economy for their security.

Mr. President, I applaud the National Association of Hosiery Manufacturers, which sponsors National Hosiery Week. The hosiery industry is an important and viable industry which serves as an integral part of our economy. The week of September 10 through 16 should help remind us of the opportunities and contributions American enterprises provide and we should all join in the celebration of National Hosiery Week.●

## THE CLOSE UP PROGRAM

● Mr. BENTSEN. Mr. President, I rise today to bring your attention to the fine work that several extraordinary educators in my State are doing to encourage students to take a greater interest in their community and their local government.

These nine teachers and administrators have been participants in the national close up program. Through that program, which I have supported, they were able to see their students take a more active interest in government—an interest they wanted to see preserved upon their return to Texas.

In order to encourage continued interest in government at all levels, they formed a steering committee, planned and conducted a mammoth program which involved over 1,000 students and teachers from the Houston area in a close up look at local government and some of the key issues facing us in Texas.

In a day when studies show a declining interest in politics at all levels, I think these dedicated Texans deserve special recognition for the work they have done to stimulate our young people to "get involved."

I know, Mr. President, that you and my colleagues in the Senate will join me in paying a special tribute to cochairpersons Dr. Judy Morris and Mr. David Adams of the Greater Houston Close Up Steering Committee and their committee:

Mr. Jim Lyons, Mr. Bob Wells, Ms. Gayle Fallon, Mr. Erskine Morehead, Ms. Carolyn Jones, Ms. Linda Wise, and Mr. Dale Glover.●

## NATIONAL HEALTH INSURANCE

● Mr. CURTIS. Mr. President, I should like to call to the attention of the Members an excellent column appearing recently in the Omaha World-Herald which underscores, in clear and unequivocal terms, why national health insurance is neither desirable nor necessary in this country. The columnist in this instance, a resident of Bellevue, Nebr., points out that "apathy toward national health care insurance legislation will lead us into the most devastating financial fiasco in our Nation's history," and she proceeds to refute, point by point, the premises behind the President's 10 "principles" released in July. Mrs. Ruse's analysis of each is excellent, and I commend her column to the entire membership as to why national health insurance is not needed and is an idea whose time is past.

I request that the column be printed in its entirety in the RECORD.

The column follows:

[From the Omaha World-Herald, Aug. 16, 1978]

### NATIONAL INSURANCE FOR HEALTH NOT NEEDED

(By Margie L. Ruse)

(NOTE.—The author, who lives in Bellevue, Neb., writes: "My husband and I fall into the much-abused middle-income bracket. We have raised and helped to educate three boys. Secretarial positions in both the insurance field and the medical field have given me some insight into this issue, but primarily, I feel that 35 years of tax burden to support an unrealistic structure have made me acutely aware of the urgent need to halt its continuance.")

Apathy toward national health care insurance legislation will lead us into the most devastating financial fiasco in our nation's history. Proponents of this legislation are promising services already available through private enterprise and tax supported welfare programs. Under the guise of better health care at less cost, they are trying to buy votes and gain control of additional tax dollars. The advantages lie totally on the side of the politicians and the insurance companies and the proposals must not be allowed to prosper and come into being.

Let's examine President Carter's proposals, as outlined in the July 30 World-Herald:

1. The plan wishes to insure all Americans comprehensive health care coverage. We have that now! Most Americans have coverage through employee benefit plans or private

policies. The underprivileged are covered under various federally funded programs. The argument that these programs are inadequate simply is not true. Existing programs, prudently administered, would be more than adequate. It is unthinkable that we should be asked to subsidize another give-away program. Politicians have demonstrated time after time that they are totally incapable of successful administration of tax supported programs, and unable to avoid corruption in the welfare system. Remember the term "federally funded" means tax supported and that means you and I are already providing care for the underprivileged as well as for ourselves.

2. Quality health care should be given to all. We have that now! Government intervention will absolutely not improve the quality of care; quite the contrary. Physician's offices and medical facilities will be so overcrowded with free-loaders seeking unneeded attention that the medics will be forced to reduce patient care to a bare minimum. Some years ago a prominent Kansas City physician told me that if he was ever forced to start treating diseases instead of people he would stop practicing. I wonder if other qualified physicians might feel the same way.

3. Freedom to choose our health care services. We have that now! Medicare, Medicaid and Social Security disability claimants are choosing their doctors and medical facilities just the same as people insured through private enterprise. If inefficiency in the government agencies prohibits the use of preferred medical services, remove the abuse and waste and grant assistance only to those in need. There will, then, be enough care for everyone.

4. Eliminate unnecessary health care spending. That one is a laugh! The administration admits to gross waste and abuse in existing tax supported programs, and exhibits total inability to rectify this situation. We must demand responsible use of our tax dollars before we subsidize another proposal designed to gain control of a greater percentage of our income.

5. Additional private and public expenditures can be offset by greater efficiency. Another laugh! When did any government program operate with greater efficiency than private enterprise? It just doesn't happen. Private enterprise must provide the greatest service at the least cost, show a profit and meet competition in order to stay in business. Tax supported programs do not have to show a profit or meet competition.When misuse of government funds causes a program to falter, a tax increase puts it back in business. We, the taxpayers suffer the consequences and we are responsible if we continue to elect irresponsible officials. Politicians instituting tax supported give-aways have brought our country to a state of economic chaos and we have allowed it. If the United States is to return to economic stability, we must deny support to every politician whose philosophies advocate such give-aways. My friends, we are the majority and we have the vote.

6. The plan will be gradually phased in with no additional government expenditures until 1983. Then what? If the politicians can't fulfill their obligations, as historically has been the case, you and I will be stuck without recourse, with the dictates and costs of an insurance program over which we have no control. A very dangerous position.

7. The plan will be financed through government funding and contributions from both employers and employees. Remember, the "government" is you and I. That means we will pay two ways—through our tax dollars and through private contributions. We do that now! However now, at least, we have the prerogative of selecting our own insurance carrier, or changing to another if we choose. A government controlled program would rob us of that choice, but we would still have to pay.

8. Private insurance companies would play a significant role. Precisely. This is probably the most dangerous by-product of the whole proposal. The coverage would be "farmed out" proportionately to various insurance companies. This would provide an already too-powerful industry carte blanche to write into their declarations any provisions that would best serve them. True, the administration will feign a system of regulations under which they should operate, but the insurance industry is already too large and powerful to be effectively regulated or controlled. Again, we would be saddled with a program over which we had no control, either from the standpoint of cost or coverage. If the plan were devised solely for the purpose of providing better care at reduced costs, it would be a threat to the insurance industry and they'd be screaming bloody murder. Do you notice how strangely silent they are?

To a great extent, insurance rates are determined by the percentage of revenue that is paid out in claims. Can you envision what the rates will do when free-loaders and graft paralyze the government controlled insurance program?

9. Attract personnel to underserved areas. We have that now! Federally subsidized programs already exist to build, equip and staff medical facilities in underserved areas. If those areas are not now adequately served, one can only assume such programs are unsuccessful and should be discontinued, certainly not escalated. "Ambulatory and preventive" services would be a bonanza for the unscrupulous who need only one "iffy" category under which to operate.

10. Assure consumer representation. We have that now! Most assuredly it will be sacrificed under a national health care insurance program. What voice do we now have in the Social Security program? None. We are compelled to support it and compelled to participate, but we absolutely have no voice in its administration. Do we want the same kind of insurance program?

We do have another form of representation and that is our right to vote. Consider what irresponsible use of your tax dollars has already done to the economy and weigh very carefully the consequences of further political control.

Insurance is a consumer product just as much as the groceries. You would not want the politicians choosing your groceries. Surely a product as important to your well-being as health care insurance should not be entrusted to the free spending, vote-buying politicians. The more control we relinquish to any administration, the less control we retain for ourselves. Vote out any politician who backs this legislation.

Compare the cost of expressing your views to the increased tax burden you will sustain as the result of a national health care insurance program, then write immediately to your elected representatives. Your local library can provide any addresses you may need. We literally cannot afford to sit idly by and allow this program to become a reality. The time to stop it is now.●

## ERA EXTENSION

● Mr. GARN. Mr. President, House Joint Resolution 638, extending the time for the ratification of the equal rights amendment, may soon be before us. I think it is fair to say that rarely, if ever, has this body been faced with a single piece of paper that poses so many obvious and potential constitutional problems.

I say "piece of paper" advisedly, Mr. President, because that is what we will have before us. It is not a bill, for we will not send it to the President when we are through with it. It is not a treaty. It is not a part of the Constitution, and will never become a part of the Constitution, for we will not send it to the States for ratification. It purports to be an amendment to House Joint Resolution 208, but it cannot be that, because House Joint Resolution 208 is no longer before us.

In short, Mr. President, what we are being asked to pass is not anything at all.

This point has been made in some detail in the minority views of Congressman CHARLES WIGGINS, published in the House committee report. To quote him directly, what we are trying to do "cannot be done. If it could be done, it would not be wise to do it. If it were wise to do it, House Joint Resolution 638 is not the proper way to do it."

Mr. President, this is wisdom. I beg my colleagues to consider the constitutional chaos we will be inviting if we pass this resolution, and urge them to forgo the exercise. Irrespective of the merits of the ERA, we should proceed with restraint and fairness. While I oppose the ERA, I would make precisely the same arguments if the amendment under consideration were one of my own.

In the next week or two, I will be pointing out to my colleagues some of the legal and constitutional risks we will be running by pushing this extension resolution through the Congress. I sincerely hope that Senators will listen to these points, and join me in an effort to proceed fairly to all parties concerned.

To begin with, Mr. President, I ask that Congressman WIGGINS' minority views be printed in the RECORD.

The material follows:

MINORITY VIEWS OF MR. WIGGINS

It cannot be done. If it could be done, it would not be wise to do it. If it were wise to do it, House Joint Resolution 638 is not the proper way to do it. If House Joint Resolution 638 were the proper way to do it, it is nevertheless patently and intentionally discriminatory.

The Committee agonized over House Joint Resolution 638 for 1 entire day. Many questions were raised. Few were answered. Although House Joint Resolution 638 is hereby reported to the House, the majority of 19 Members who voted for it cannot know what it is. Needless to say, neither can the 15 Members who voted against it know what it is. Most of the proponents appear to believe that they have concocted a new form of legislation unprecedented in the history of the Republic and this House—a joint resolution that neither proposes a constitutional amendment by a two-thirds vote of both Houses nor needs a Presidential signature to take binding effect. However, as the Committee debates makes clear, not all the proponents believe that such a joint resolution can be passed. I encourage my colleagues to read the appendix following these views recounting the committee's unsuccessful struggle to find out what it is doing.

We don't know what we did. We won't say what we did. Why? Because we cannot do what we did.

FIRST

Congress does not have the power to amend conditions previously imposed on a proposed constitutional amendment.

As our Government was conceived, Congress has only those powers conferred on it by the Constitution. Article VI of that Constitution makes clear that there are only three ways by which Congress can create a legal obligation—treaties, laws, and constitutional amendments. True to our system of checks and balances, in none of these ways may Congress act alone. In all three of these ways, Congress must receive the concurrence of another institution of government. In making treaties, the Senate serves as a check on executive authority. In making laws, the executive serves as a check on the Congress. And in proposing constitutional amendments, the States serve as the check.

Heretofore, that was our constitutional system. But now the political exigencies and emotions of the day urge rejection of these checks and balances. Proponents do not like the States as a check, for 14 States—one more than constitutionally necessary—have voted rejection of the pending constitutional amendment. Thus they suggest an unprecedented power to create legal obligation in a manner nowhere found in the Constitution. They suggest that Congress by majority vote and without executive approval can change the conditions on which a prior Congress submitted a proposed constitutional amendment to the States. What an anomalous result it would be that our system requires a "law" to appropriate a penny but allows Congress—unchecked—to alter the amendment process during the pendency of a proposed constitutional amendment.

In view of the fact that Congress does not have the power to create new methods of legal obligation and in view of the fact that House Joint Resolution 638 is not an exercise of any recognized method, some proponents tried in vain to convince the Chairman of the Subcommittee managing the bill to adopt a traditional legislative rationale for House Joint Resolution 638 (see appendix). However, the chairman knew full well that such a rationale was unavailable here. The framers never intended that the President play a role in the amendment process. And in *Hollingsworth* v. *Virginia* (3 Dall. 378 (1798)), the Supreme Court confirmed that fact. To adopt a legislative rationale would require submission to the President; the power to veto would involve the executive in a most fundamental way, with a process intended to operate completely apart from executive intervention.

The Constitution, of course, was proposed by the States assembled "in convention" and ratified by the States through separate State conventions. In drafting article V, the framers built upon the above article VII model. Originally, it was agreed that the States in convention would propose amendments to the Constitution and that the States would ratify them either through their legislatures or by convention. However, the accurate skeptical insights of the framers led them to believe that if the States alone could propose amendments there might never be proposals to strengthen the national government. Thus, *after* the legislative process had been written into the Constitution, it was thought that Congress should have an equal role in proposing amendments. The check on Congress was, of course, the ratification process and not the executive veto. That is the lesson of *Hollingsworth*.

It would have been unusual for the framers to have envisioned article V (adoption of amendments) and article VII (adoption of the Constitution) as anything but parallel provisions, each treating with the fundamental law of the land. If one accepts that, it should be clear that the legislative process is quite separate and unrelated. It would not have been possible for Congress to alter the ground rules for ratification of the Constitution inasmuch as it was not yet in existence.

Suppose that the framers had attached a 7-year limitation in proposing the Constitution. Would an alteration of that condition have required a majority or two-thirds vote of the Congress? Would such a change have required Presidential signature? The reason why those questions do not make sense is that Congress had no such power at all. The reason why our committee could not make sense out of similar questions raised by House Joint Resolution 638 is the very same: Congress has no such power to alter the conditions attached to the pending proposal.

Proponents suggest that the power to extend the time for ratification is found in two Supreme Court cases, *Dillon* v. *Gloss* (256 U.S. 368 (1921)), and *Coleman* v. *Miller* (307 U.S. 433 (1939)). In *Dillon*, the Court held that Congress could condition a proposed constitutional amendment by fixing a reasonable time for ratification. Proponents suggest that it logically follows from *Dillon* that Congress can change the condition. Not at all. For in the facts before the Court in *Dillon*, Congress had placed the 7-year condition in the text of the proposed amendment. It is agreed by all that Congress does not have the power to alter any part of the text. Thus *Dillon* hardly supports the proposition that Congress can amend a condition previously imposed.

In *Coleman*, the Court divided on a 4-to-3-to-2 basis. Consequently, Dean Griswold suggests that it is a "case" and not a "decision." Nonetheless, *Coleman* is cited by proponents for the proposition that where Congress fails to place any time condition on an amendment, Congress may, when the constitutional number of States have apparently ratified, take a vote on whether a reasonable time has elapsed. Of course, Congress could do that. We can do it now. We can express our opinion on anything. But the important point in *Coleman* is the suggestion that the Court would not review the validity of such a Congressional decision. That aspect of *Coleman* is today very much in doubt since *Coleman* appears to be a departure from previous decisions of the Court and has not been followed by the Court in recent decisions, notably, *Baker* v. *Carr* (369 U.S. 186 (1962)); *Powell* v. *McCormick* (395 U.S. 486 (1969)); and *United States* v. *Nixon* (418 U.S. 683 (1974)).

What the proponents are suggesting in relying on Coleman is that the absence of judicial review creates the power for Congress to change the time condition. But in a system of law, that cannot be. As one proponent said in committee debate on another issue, the lack of judicial review means that we must exercise "greater care not greater license." We must obey the Constitution whether or not our actions will later be judged in court.

Article VI governs our actions whether or not there will be judicial review. Read in the light of article VI, neither Dillon nor Coleman support House Joint Resolution 638. Neither suggest a fourth way to create legal obligation. Dillon holds that Congress may condition a proposed constitutional amendment, and article VI does not suggest otherwise. Coleman suggests that Congress may render its judgment that the time condition by Dillon in every proposed amendment has, or has not, been fulfilled. But that is a vastly different exercise from that suggested by House Joint Resolution 638. House Joint Resolution 638 attempts to state a law—a new law—governing decision. If we assume for the sake of argument that Coleman is good law, the Court has merely said that Congress can render its interpretation of the Constitution whether a proposed amendment has been ratified in compliance with article V. And nothing in article VI prohibits Congress from stating its view.

In sum, nothing in Dillon or Coleman gives to Congress a fourth way to create legal obligation. Nothing in Dillon or Coleman suggests that Congress can change the 7-year condition previously imposed.

In order to see this more clearly, suppose that Congress had passed a statute proposing equal rights regardless of sex but conditioned the effectiveness of the statute with a proviso that such statute shall not take effect unless, within 7 years, 38 States pass resolutions of concurrence. If in 6½ years, 35 States have concurred, Congress could adopt a concurrent resolution, like that suggested by Coleman, expressing its opinion whether the conditions of the proviso have been met. But whether or not there is judicial review, can Congress "interpret" the facts and declare in a concurrent resolution that 38 States have in fact concurred or that only 4 years have passed and that there still remains 3 years? If Congress wished to change the effective date, it would—in a system of law—have to do more than merely render a judgment by concurrent resolution. It would have to write a new statute. It would have to begin again.

That is likewise true here. Unless Congress wishes to act lawlessly in the hope that no court will review, its only course—the only way permitted by article VI—is to begin anew by resubmitting a new constitutional amendment on whatever favorable conditions it believes appropriate.

If Dillon is correct that Congress may fix a 7-year condition, then Coleman is no authority that Congress may ignore that specific condition and even less authority that Congress may change that specific condition. The fact that Dillon allows Congress to fix a time limitation on ratification in packaging a proposal for submission to the States does not suggest that Congress can alter the package once it is submitted. The asserted power to amend follows neither from Dillon, as noted before, nor from congressional practice and precedents. Congress can, in practice, only amend measures of which it has possession. Once those measures leave our halls, change can occur only through a newly processed measure of equal weight. In view of Hollingsworth the only path open under article VI is to resubmit the text to the States on more favorable terms.

SECOND

If Congress had the power to extend, it would not be wise to exercise it. I offer two arguments to support this proposition. First, it is agreed by all that when Congress changed its practice of placing time limitations in the text to one of placing them in the proposing clause, the sole purpose was to unclutter the Constitution and not to create the possibility of extending the time. Proponents hasten to point out innumerable instances where the intention of Congress was one thing and the legal effect another.

That is true. The intention of Congress is often thwarted by the courts, by Presidents, and by bureaucrats. We are always busy with new measures—from legislation to overturn court decisions that have clearly ignored congressional intent to legislation to impose the legislative veto on regulations of one agency after another.

But let's wait a minute, here. The fact that congressional intent is so often ignored is not a cause for rejoicing, inside or outside our halls. Indeed, our many legislative responses indicate that a large majority of Members frown when congressional intent is ignored. The fact that we are thwarted so often should hardly be offered to us as a reason why we should ignore our own intention in placing the time limitation in the proposing clause. And that intention we all

know. It was to bind on the same basis as a condition in the text itself but not to clutter up the Constitution.

If Congress will not defend the intent of Congress, who will?

The second argument pertains to the facts of this particular ratification process. If Congress had the power to extend the time, I would think that Congress would want to exercise its power in an evenhanded, neutral manner to further the ends of the ratification process and not merely grant or refuse extensions on the basis of current opinion of the merits of the pending amendment.

On that basis, there is no "article V" need to extend the time. In the first year or so after submission of the amendment, 30 States ratified. Since that time five States have ratified while four have rescinded. More important, of the 15 States that have not ratified, 14 States have voted no. Under article V, it takes only 13 no votes to defeat an amendment on a rollcall of the 50 States. In only one State has the amendment been "bottled up" in committee. That State is Mississippi.

Therefore, it seems clear to me that the pending amendment has lost momentum. It has not gained in ratifications in recent months. And, in fact, it has been rejected in the requisite States necessary to defeat the amendment.

Moreover, the last 6 years have been a time of rapid change in women's rights. New rights have been created by Federal and State laws and new rights have been declared by the courts. Although proponents believe there is still more progress to be made, that is the question for the States under the ratification process. In view of the advances made legislatively and judicially in the last 6 years, early-ratifying States may have come to regret their decision yet feel bound by law. They may have then thought they had to go all the way and ratify in order to achieve the recent advances. That may explain why States appear to be increasingly reluctant to ratify.

This rapid change leads me to believe that a ratification in 1972 means something a lot of different—something a lot less radical—than a ratification in 1979 or 1982. Thus it would appear unfair to hold the ratifying States to their decision for any extended time. In view of the many recent changes in the area of women's rights, a 7-year period has proved to be a relatively long period of time. The extension of such a period causes me to doubt that a possible ratification in 1982 could be "contemporaneous" with those in 1972.

Nor are we faced here with a situation where those who have to decide want more time to decide. In fact, some States have urged defeat of House Joint Resolution 638 because they do not want any more time.

The amendment has been debated. The votes are in. It has been defeated. Any State that wanted to reconsider had plenty of time and still has time. In view of the rapid changes of the past 6 years, it is highly inappropriate on any objective standard to extend the time for 3 additional years.

Every amendment to the Constitution has been ratified within 4 years. In these modern times, a 7-year period would seem more than sufficient.

Finally, the Members should well understand the political strategy behind the drive for extension. The purpose is to lock in the 35 States that have ratified (while conveniently ignoring the four rescissions) so that proponents may focus their attention (and economic boycott) on the 15 nonratifying States. The reason why this approach is attractive to proponents and worth the risk of this unsettled course is the whispered fear that the amendment, if reintroduced today, might not receive the two-thirds vote of both Houses or receive the 35 ratifications it now claims.

In other words, the purpose of the extension is to "fool" article V by creating the false impression that there is a unity of the required number of States in favor of the proposed amendment. Consequently, even if we had the power to extend the time, it would be most unwise to do so.

THIRD

If Congress had the power and if it were wise to exercise the power, House Joint Resolution 638 is an improper exercise of that power. On its face, House Joint Resolution 638 appears to require only a simple majority for passage. It should require two-thirds of each House.

A reading of House Joint Resolution 638 indicates that it purports to amend House Joint Resolution 208 of the 92nd Congress. House Joint Resolution 208 passed both Houses by the required two-thirds majority and was submitted to the States.

It is well-established that amendments to a resolution proposing a constitutional amendment, when offered in the regular course of affairs before the House votes on adoption, require only a majority vote. Thereafter, the House votes on the resolution as amended. At that time, a two-thirds vote is required for passage. Thus every amendment to such a resolution must pass two hurdles—a majority vote and then a two-thirds vote.

It would appear that "parliamentary regularity," as Professor Weschler testified before the Subcommittee, would require that any amendment to the resolution occurring after the two-thirds vote in the House must itself receive a two-thirds vote for adoption. The reason is that any amendments made "after the fact" might unravel the two-thirds coalition required for passage.

Thus if the House passes a resolution proposing a constitutional amendment with no time limitation and if the Senate passes the same resolution but with one amendment imposing a seven-year limitation, House concurrence in the amendment requires a two-thirds majority. That, too, is very well established precedent. House Rules Manual, Section 192.

Now, I doubt that the House can amend the resolution at all once it has left the halls of Congress. But if it has the power, the requirement for a two-thirds vote would not appear to be diminished simply by the passage of 6 years.

If House Joint Resolution 638 would have required a two-thirds vote in the 92nd Congress once the House had passed House Joint Resolution 208, it would appear that as a matter of law the same two-thirds vote is required in the 95th Congress. The policy behind the rule is that one cannot guess why Members voted as they did. The Supreme Court raised this policy to a rule of law in *Powell* v. *McCormick* (395 U.S. 486 (1969)), in holding that it was impermissible to speculate why Members voted for a proposition. That policy is particularly appropriate here. For in the 92nd Congress, the chief sponsor of the proposed constitutional amendment testified at page 41 of the hearings on House Joint Resolution 208:

In an effort to gain united support for the amendment, however, three minor technical changes have been incorporated into House Joint Resolution 208. The time allowed to the states to ratify the amendment has been limited to an ample 7 years * * *.

In view of that statement it seems procedurally improper to speculate that the constitutionally required two-thirds majority would have been achieved regardless of the time limtation. The 7-year limitation was part of the package all wrapped into one sentence and passed by a two-thirds majority. If the coalition is to be renegotiated, it requires the same two-thirds majority as a matter of law and as a matter of policy.

Nevertheless, proponents argue that a simple majority would suffice. They allude to all types of simple-majority situations and find them analogous. But they never refer to what they are, in fact, doing, namely, amending House Joint Resolution 208.

Proponents read Coleman to authorize Congress to declare by concurrent resolution, in cases where no time limitation has been set, whether so long a time has passed that a contemporaneous consensus no longer exists. If Congress can make that decision by majority vote, proponents reason that Congress can in this instance likewise decide what is a reasonable time by majority vote.

But whatever discretion Congress may have in such a situation to declare whether too long a time has elapsed is completely eliminated where Congress has fixed a specific time as a condition of its proposal. If it were otherwise, time limitations would be meaningless and, in fact, proponents would not be suggesting the need for passage of House Joint Resolution 638. The claimed discretion being eliminated by the time limitation, the question then becomes how may Congress legally change the limitation. And that takes us back to the very beginning of these views; it cannot be done. If we wish to assume it can be done, we are still faced with the fact that the limitation is placed in a joint resolution requiring two-thirds vote for passage, and any subsequent amendments must themselves receive a similar approval, as previously explained.

Proponents argue that Congress did not have to adopt the time limitation in a resolution requiring two-thirds vote. They suggest that Congress could have proposed the text in one resolution by a two-thirds vote and could have in another resolution chosen the mode of ratification and fixed a time limitation by majority vote. Thus, they say, any vote on these issues above a simple majority was superfluous, and Congress may presently extend a time by majority vote.

Again this somewhat remote procedure is not all the situation before us. Powell prevents us from mentally refashioning House Joint Resolution 208 as two resolutions and then speculating whether they would have passed by their required votes. Thus even if this two-resolution approach were originally available, it would now be necessary that both resolutions be resubmitted to the House. We cannot speculate that the resolution containing the text would have passed without any time condition, particularly when the two-thirds coalition necessary for passage was admittedly formulated by the inclusion of a specific 7-year condition.

Whatever this novel theory, in whose support there is neither law nor precedent, tells us about some alternate method whereby Congress could assertedly pass a separate resolution choosing the mode of ratification and conditioning the two-thirds resolution's efficacy by imposing a time limitation, the fact that cannot be overlooked is that no such resolution was passed. It does not exist. Hence, it cannot be amended.

The validity of the theory itself is doubtful. I note that the Justice Department, on whose opinion proponents rely, repeatedly states in its testimony that the power to impose conditions on a proposal is a function of proposing the text, as opposed to choosing the mode of ratification. The reason may be common sense or it may be strategy. Cer-

tainly, the Department is well aware that article V expressly limits Congress to but one exercise of its power to establish the mode of ratification. That power having already once been exercised, one can see why proponents might wish to find some other power to impose time conditions.

Taken to its ultimate logic, the theory runs into a dead end. If Congress has the power to fix time conditions in a separate mode of ratification resolution, what happens when a national convention called pursuant to direction from two-thirds of the States itself proposes a new constitutional amendment, the text of which includes a provision to limit the time for ratification? Since the asserted theory would appear to make article V unworkable, its validity must be doubted.

In sum, the argument is both doubtful and inapplicable. What Congress did was to pass House Joint Resolution 208. That limits the time for ratification. If House Joint Resolution 208 can now be amended, it must be by a two-thirds vote.

FOURTH

House Joint Resolution 638 is patently and intentionally unfair. We all know that it is. Its purpose is to hold 35 State ratifications frozen while heat is applied to the other 15 States.

House Joint Resolution 638 is, in effect, a motion to reconsider the vote rejecting the pending constitutional amendment. If agreed to, however, it is intended that the rollcall on reconsideration be selective. Only the States that have voted no will be allowed to change their votes. States that have voted aye will not be allowed to change their votes. And that is grossly unfair. Even worse, that is exactly the purpose that the majority has in mind.

In committee, Mr. Railsback offered an amendment to permit the names of all the States to be called on reconsideration. The committee rejected his proposal by a vote of 21 to 13. The majority simply would not tolerate equal treatment. You see, if States were free to ratify or reject during the extension, the "right side" might not win. And the object here is not to be procedurally fair but to use whatever means are necessary so that the "right" might triumph over the forces that proponents deem "unfair".

For months we have been hearing that the debate on the pending amendment is far from over and that it is unfair to cut it off at 7 years. But "debate," I suggest, means discussion by both sides. It is useful as an aid to voting for or against. But House Joint Resolution 638 is not intended to permit a free choice to be made in any of 35 States. If proponents believe what they say, they should permit true debate to continue in all 50 States.

I recognize that the ratification process is not a game. But neither is the legislative process. And when reconsideration is agreed to in the legislative process, the entire roll is called and not merely those who voted the "wrong" way.

For the reasons stated above, House Joint Resolution 638 should be rejected. It is unconstitutional, unwise, unparliamentary, and unfair.

CHARLES E. WIGGINS.●

## SAVING THE DUNES

● Mr. BAYH. Mr. President, earlier this year, my colleague from Indiana, Senator LUGAR, and I introduced S. 2560, a bill to expand the Indiana Dunes National Lakeshore. The legislation would add three additional parcels of land to the National Lakeshore and is the final phase of a battle which has been waged for decades to preserve the beautiful and unique dunes along the southern tip of Lake Michigan.

Recently, editorials regarding the Dunes appeared in the Detroit Free Press and the Wichita Eagle. I think these editorials demonstrate the importance of the Dunes, not only to Hoosiers, but also to people throughout the Midwest. They also underline the urgency of congressional action on the expansion bill which is now pending before the Committee on Energy and Natural Resources. I hope my colleagues will take note of these editorials and support our efforts to protect our State's valuable and fragile resources.

Mr. President, I ask that the articles be printed in the RECORD.

The articles follows:

[From the Detroit Free Press, Aug. 13, 1978]

DUNES: IN INDIANA, TWO SMALL LAND PARCELS THREATEN A NATIONAL LAKESHORE

The Indiana dunes, some 12,000 acres of forested bluffs and wind-scoured beaches at the southern end of Lake Michigan, are a source of pleasure and recreation for the entire Midwest. Their preservation is as important to Michigan as to Indiana, especially as the drive to save our own shifting dunes and white beaches picks up momentum.

Within the boundaries of the Indiana National Lakeshore there currently lie 800 unprotected acres, where undesirable uses threaten to affect lands well within the park. The largest parcels are a 1½-mile strip along U.S.-12 and 650 acres within the community of Beverly Shores, where current zoning permits multi-family, high-rise, commercial and industrial development that would destroy wooded ravines and wetlands and affect adjacent national lakeshore areas. Another 90-acre greenbelt separating the park from an Indiana utility company could, if unprotected, become a dumping ground for fly ash, affecting the quality of water and vegetation in the park.

A National Park Service study reports that uncontrolled private uses in the 800 acres could impair visitors' access to the dunes and their enjoyment of the lakeshore. Accordingly, a bill now in the U.S. House and Senate national park subcommittees would absorb those areas into the lakeshore.

The parcels involved are relatively small, but they are important to the integrity of the lakeshore; dunes that took 15,000 years to form could be seriously eroded or damaged in a few years by wrongful use. The Indiana dunes are a regional resource, all the more precious for lying in the middle of a highly urbanized, industrialized area; the fight to preserve them deserves the support of Michigan residents and representatives, too.

[From the Wichita Eagle, Aug. 27. 1978]

PROTECTING A MIDWESTERN GEM

"It wouldn't be spring in Washington without a hearing on an Indiana Dunes bill" is the way some Capitol observers have put the 12-year-long struggle to preserve the best of what's left of the storm-pounded beaches and forested sand hills that ring the southern toe of Lake Michigan.

Rep. Keith Sebelius, R-Kan., and other midwestern members of Congress who realize the value of the Indiana Dunes to the entire region have fought hard to complete the job of protecting the dunes that Congress started in 1966.

That was the year that the Indiana Dunes National Lakeshore was established—a 5,818-acre paradise existing cheek-by-jowl with some of the heaviest industrial development in the entire country.

But it soon became evident that there were problems in paradise. Encroaching slag heaps from the area's steel mills, the dumping of poisonous wastes by utilities, and the leveling of pristine dunes for homesites made it imperative that Congress add 3,662 acres in 1976.

It also designated three key tracts for National Park Service study. Constituting less than 800 acres all told, the areas long had been considered vital to the completion and adequate protection of the Indiana Dunes.

The Park Service essentially agreed, and Congressman Sebelius and other friends of the Dunes went to work to secure passage this year of H.R. 11110 in the House and S. 2560 in the Senate.

Mr. Sebelius is confident the House Interior Committee, on which he serves, could report the bill out this session. But there has been no similar movement on the Senate side, and time quickly is running out.

We hope Kansas Sens. James B. Pearson and Bob Dole will help convince their Senate colleagues on the Energy and Natural Resources Committee to take action on the legislation so a bill may be enacted by the full Congress before adjournment.

Otherwise, there really will be another spring in Washington with more hearings on the Indiana Dunes. People in the Midwest—10 million of whom live within easy driving distance of the national lakeshore—deserve to have this gem of the National Park System completed, and preserved for all time.

Further delay cheats us all of a natural heritage that has hung on, barely, all these years, and needs our help now to survive.●

## PRODUCT LIABILITY INSURANCE

● Mr. HEINZ. Mr. President, recently I had the pleasure of meeting with a group of Pennsylvania businessmen and women to discuss an urgent problem. Their problem concerns product liability insurance.

Over the past few years, premium costs for this insurance have been skyrocketing, increasing as much as 400 to 500 percent in 1 year alone. These costs have placed an especially harsh burden on our small businesses who can least afford it. The result is that many firms have decided to forego product liability insurance entirely. This situation is serious, for the health and viability of our innovative small businesses, and for consumers.

Under present law, a manufacturer is ultimately liable for damages caused by defects in the goods he produces. Therefore, there is a risk associated with each product he manufacturers: that it is defective, that it will injure a consumer, and that the injured consumer will claim an indemnity from the manufacturer. The cost of that risk must therefore be borne by someone—who is ultimately the consumer.

Some manufacturers purchase product liability insurance to pass the risk off to a third party. The cost of that insurance is necessarily passed in turn along to all the consumers of the company's products. As the cost of that insurance increases, the prices paid by consumers also increase.

Some manufacturers, unable to obtain or afford such insurance, insure themselves. But rarely do these self-insurers have sufficient resources, after taxes, to set up reserves to pay for product liability claims. The result is that one suit can bankrupt a firm and the consumer is again left holding the bag. The injured party does not receive appropriate compensation which may be justly due him.

This is not idle speculation, Mr. President. Cases of such situations are well documented. The critical problem of product liability insurance is well illustrated in the following cases:

Hankison Corp., Canonsburg, Pa., manufacturers of refrigerated air dryers for 30 years, has felt the crunch of soaring insurance premiums. From 1974 to 1978, their insurance rates have increased 670 percent. Hankinson's record of claims, is one, in 1963, and it was settled for $3,000.

James Austin Co., an old firm established in 1889, manufactures bleach products and stated that in 1975 the premium on $500,000 worth of product liability insurance was in the neighborhood of $15.000. This doubled to $30,000 in 1976 and this figure again doubled in 1977 to $60,000. During those years, they also had a million dollar umbrella policy to support the liability coverage and this cost approximately $2,400 per year. This, effective April 1, 1977, was increased to $19,000 so that they have seen liability costs increase from $32,400 to $79,000 in the past year, and over the past 2 years, $94,000. The most their carrier ever paid out in total payments was less than $8,000 in any given year.

CBM Industries & Laurel Stone, Inc., in Oakmont, Pa., report their product liability premium in 1976 was $33,400 and in 1977, $79,400, an increase of $46,000 in a 12-month period. Their maximum annual settlement over the last 20 years was $6,800.

Something has to be done to alleviate this problem; and it must be done now. I believe S. 3049, the Product Liability Self-insurance Act of 1978 is a step in the right direction. Today, I have joined with my colleagues the distinguished Senators from Iowa (Mr. CULVER) and Wisconsin (Mr. NELSON) in cosponsoring this bill.

Under the tax code, a company is allowed to deduct the cost of product liability insurance as a business expense. But if a small manufacturer desires to self-insure, he must do so with after-tax dollars. I do not believe that businessman should be penalized just because he cannot obtain or afford the cost of insurance.

This bill will provide a mechanism whereby the small manufacturer can insure himself against the risk of a product liability claim at reasonable rates. It also provides the small manufacturer some relief from exposure to unjustified huge price increases in insurance. If he cannot afford the premium cost, he will have the option, under this bill, of self-insuring at no economic loss which presently would be imposed by our tax code.

But this is only part of the answer, Mr. President. It is only a safety valve. It is not the comprehensive solution this problem requires. When one looks behind the problems of product liability insurance for the root cause, one has to see the tremendous uncertainty inherent in our tort laws.

An insurance company bases its premium rates on the amount of risk it is accepting, the probability of paying claims, and the expected dollar outlay for each claim paid. If these factors are known with reasonable certainty, the insurance company can set a premium which provides sufficient funds to pay all expected claims and insure the company a fair profit. As the uncertainty surrounding these factors increases, however, the natural tendency of an insurance company is to increase its premiums as a hedge against paying the highest claims that may be expected.

Since the early 1960's, the body of case law that constitutes our tort laws has been significantly liberalized. From a manufacturers product liability based upon its negligence to provide a safe product, the law has moved to strict liability. That latter concept implies that a manufacturer is liable for any damages caused by any defect in its products regardless of fault. Some companies are predicting, even, that liability will eventually become absolute—that is, a company is liable for any injury regardless of any defect.

Absolute liability has the effect of unlimited liability. In the face of potential limitless claims, then, insurance companies protect themselves through exhorbitant premiums.

It is clear that some reform of the tort laws is needed if we want to solve the product liability insurance crisis. Reasonable limits to a manufacturers liability must be established if we want to insure that insurance companies are able to set reasonable premiums and that consumers injured by unsafe products have a reasonable prospect of being compensated.

There are a number of proposals for reforming the tort laws. Some have been introduced here and in the House of Representatives. Nineteen State legislatures have also taken on the incredibly complex task of changing the tort laws and have succeeded. I do not plan at this time to debate the merits of any of these proposals, however.

Tort law is not one law but 50. Each State has evolved its own brand of rights and remedies based on its own unique circumstances. If tort reform is to be accomplished, it should be within each State's legal context.

Too often in the last 50 years the Federal Government has taken upon itself the responsibility of solving all problems. But today I think we are finding out just what the limits of the Federal Government are. It cannot be all things to all people. Tort law has always been the prerogative of the States. If there is a problem with tort law, we shall look to the States to solve it, not the Federal Government.

I am not unsympathetic to the problem of product liability insurance. I believe it is real and that it is becoming ever more critical. I believe there are solutions and they should be explored. But I look to the States to do the job and have faith that the remaining 31 States will follow the lead of the 19 that have already enacted tort reform.●

---

## THE NEW JERSEY PINE BARRENS

● Mr. WILLIAMS. Mr. President, a recent front-page article in the Wall Street Journal describes a vast area in New Jersey which is remarkable for its pristine quality and its proximity to the most urbanized corridor in the Nation. The New Jersey Pine Barrens contain thousands of acres of unbroken pine and oak forests, free-flowing streams, and rare wildlife and plant species. The unique ecology of the area is supported by an enoromus aquifer which lies just beneath the porous, sandy soil. Human activities, including cranberry and blueberry growing, forestry, and recreation, and a number of small communities, have not disturbed significantly the natural processes of life in the pines.

But this will not always be so. The sprawling residential and commercial development of the surrounding region has started to make inroads into the Pine Barrens. Unless steps are taken soon to plan and protect the area, its pure water, its thriving agriculture, its recreational value, and its serene way of life will be gone forever.

The State of New Jersey and some of the local governments are already involved in efforts to save the Pine Barrens. A year ago, the Governor appointed a Pinelands Review Committee to review State actions in the area and to recommend means of protecting it. The State Department of Environmental Protection has developed new water quality standards for the central Pine Barrens, which will help to control undesirable development there. At the local level, Burlington County has launched a program to buy conservation easements on farms and other open space lands.

Mr. President, these State and local actions reflect the deep interest which the people of New Jersey have in preserving the pinelands. The Federal Government should have a role in supporting and assisting these efforts. A number of Federal studies have recognized that the Pine Barrens are of national significance. In fact, the unique ecology of the area would qualify it for inclusion in the national park system. However, acquisition and management as a national park would be inappropriate for the pinelands. Not only would this be far too expensive, but it would also needlessly eliminate the towns, the farms, and the other diverse private activities that are an integral part of the life there.

We need to find a means for protecting this area which combines the resources and capabilities of the local,

State, and Federal governments and the private sector, and which utilizes the full range of land and water conservation techniques.

To this end, Senator CASE and I plan to propose a pinelands provision for inclusion in the Senate omnibus parks bill. Our proposal would designate approximately 1 million acres in New Jersey as the "Pinelands National Reserve." It would authorize up to $3 million for the Federal share of developing a plan for the pinelands, and $23 million for the acquisition of critical land that is threatened by adverse development. The Federal share of planning and acquisition would be 75 percent, with the State providing the other 25 percent.

The comprehensive plan for conserving the area would be drawn up by a joint Federal-State-local body, and would detail the application of various means of managing land and compensating landowners and local governments, such as fee acquisition, conservation easements, zoning, air and water quality standards, and payments in lieu of taxes. The plan would be submitted to the Secretary of Interior within 18 months, and after his approval, would be reviewed by Congress for a period of 90 days prior to implementation.

During the planning period, certain federally assisted new development in critical areas of the Pine Barrens would be subject to review by the Secretary and, once the plan was approved, all Federal actions would have to be consistent with it.

Mr. President, I am sure that many of my colleagues will be interested in this important but little-known national resource. I ask that the Wall Street Journal article, "Rustic Pine Barrens in Urban New Jersey Attracts Developers" be printed in the RECORD.

The article follows:

ENDANGERED EDEN—RUSTIC PINE BARRENS IN URBAN NEW JERSEY ATTRACTS DEVELOPERS

(By Daniel Machalaba)

WOODMANSIE, N.J.—William Wasowich doesn't like suburban living. He keeps his distance from it by living alone, the sole resident of this ghost town deep in a vast forest of pine trees. "When you're in the Pine Barrens, you could just as well be in the Amazon jungle," he says.

But the Pine Barrens happens to be in New Jersey, the nation's most urbanized and densely populated state. Besides being only 30 miles east of Philadelphia and 60 miles south of New York City, the area is directly in the path of future real estate development stemming from the oil exploration off the Jersey coast and the gambling craze in Atlantic City, less than an hour's drive away.

If developers have their way, large tracts of this nearly unbroken wilderness, about the size of Rhode Island, may be carved up for houses, retirement villages, trailer camps and gravel pits. "If someone doesn't stop them soon, the game will be up for these pines," Mr. Wasowich says.

CRANBERRIES AND BLUEBERRIES

Such a happening would be a disaster, environmentalists say. The sparsely settled forest extends for almost 1,500 square miles, with pine trees, cedar swamps, meandering streams, cranberry bogs, blueberry fields and a variety of rare plants and animals.

Underlying it all, beneath the sandy, acidic soil is a vast untapped reservoir of pure water, estimated to hold over 17 trillion gallons—an amount that would take New York City 34 years to consume. Yet the porous sands that make the Pine Barrens a water-holding area also make it highly vulnerable to pollution. "We're worried that a development, large or small, could screw things up for all time," says David Moore of the New Jersey Conservation Foundation, a private group.

Rescue efforts, currently afoot in Congress, the New Jersey legislature and the courts, are bringing into sharp focus the special problems of protecting endangered landscapes that, like the Pine Barrens, are too expensive and complex to be bought for a national park.

Several pending bills would provide federal funding for the purchase of Pine Barrens acreage. The wide-ranging omnibus parks bill, which has cleared the House and awaits action in the Senate, includes $25 million for Pine Barrens land purchases. But, says Margaret Maguire, a staff official of the Interior Department, "we can't afford to spend billions of dollars to buy all the Pine Barrens," which is classified by Interior as the "largest undeveloped stretch of land on the Eastern Seaboard."

Instead, the federal government is considering new land-preservation methods. The idea would be to use federal funds to buy only a small amount of an endangered landscape, while surrounding areas would remain privately owned though controlled by conservation easements, subsidies to Pine Barrens farmers and state-managed zoning laws. The Interior Department already has proposed a somewhat similar approach for the embattled Santa Monica Mountains near Los Angeles. If the plan takes hold, it someday may be applied to other endangered areas, including marshland near New Orleans and the Potomac River Valley near Washington, D.C.

Meanwhile, New Jersey is planning to spend $10 million to buy some Pine Barrens land and to set up a commission to manage the area's private land through tough zoning laws. Water-quality standards recently established by the state for the Pine Barrens have at least temporarily stopped some projects, including a 5,000-person retirement center proposed by Crestwood Village Inc.

MIXED RESPONSE

Conservationist efforts to seal off the Pine Barrens from development are meeting a mixed response from the inhabitants of the area—"pineys" they call themselves—many of whom earn their livelihoods largely by harvesting cranberries and blueberries or by picking pine cones and a highly absorbent moss that they sell to ornament makers and florists.

Not all of them are as resistant to new development as Mr. Wasowich in his remote one-man village. For instance, Albertus Pepper Jr., who owns 60 acres in Chatsworth, a hamlet of 300 persons that has sometimes been called the "capital of the pines," says, "I've babysat this place for 33 years, and if there's any money to be made, I'd like to have a share of it." To protect their rights, he says, the pineys are "going to lay some lawsuits on the state and the environmentalists."

Local political leaders also are concerned about the efforts to limit the area's development. "If the state gets its way, all we'll be able to do with our land is pay taxes on it," says Earle Hill, mayor of 107-square-mile Washington Township in the heart of the Pine Barrens. "What the state is doing is confiscating our land through regulation," he adds.

John Bowker, the mayor of Woodland Township, is bitterly resentful of environmentalists for opposing the Crestwood Village project, which he says would have cut local residents' property taxes in half.

Some locals regard the state schemes to control the Pine Barrens as a plot to seize the water for more populated sections of New Jersey, John Broomes, who owns the general store in Chatsworth, has sold dozens of lapel buttons with the words "No Piney Water for City Slickers."

Adding fuel to the fire is the sharp rise in local land prices. Floyd West, mayor of Bass River Township, figures that real estate values in even the most remote sections of the Pine Barrens have tripled in the last six years to around $750 an acre. Some more accessible land is selling as high as $4,000 and $5,000 an acre. This is still cheap, though, compared to the $20,000 to $30,000 an acre prices on land just west of the Pine Barrens, toward Philadelphia. An added attraction is the flatness of the Pine Barrens land, which makes it easy and cheap to build on. "We have big plans for the Pine Barrens," says Robert H. Williamson, executive vice president of the New Jersey Shore Builders Association.

Local realtor Herbert Lahn is buoyant over a projection he has heard that Atlantic City's casinos and offshore oil drilling will generate demand for 50,000 houses. There's also talk that oil pipelines will need to be built across the region to connect future offshore wells to refineries in Philadelphia.

What makes the Pine Barrens vulnerable to such pressure is that only one fifth of it lies in public hands. Most is owned by berry farmers or by big outside speculators, such as Canada's Olympia & York Developments Ltd. and New York-based Citibank, which holds 7,000 acres on behalf of 13 corporate pension funds.

A STATE OF CHAOS

The Pine Barrens wasn't always so highly regarded. During the Depression thousands of lots were given away as premiums for newspaper subscriptions or to purchasers of encyclopedias. Because of abandonment, fraud and sloppy record-keeping, land titles are in a state of chaos, and there are thousands of acres where "no one knows who owns anything," one local authority says.

Farmers dubbed the region the "Barrens" because its sandy, infertile soil was unfit for most crops. Others were repelled by its predominant foliage of pitch pines, which are scraggly and asymmetrical. Because the pine trees are highly flammable and the sands dry quickly, fire is a constant menace; some 250 forest fires occur every year. The fires may account for a 15,000-acre forest of full mature but shoulder-high dwarf trees in what is known as the Pine Barrens Plains. "We think fire has genetically altered these trees, but we still don't know for sure," says Jack McCormick, an environmental specialist.

The harsh conditions of fire, sandy soil and acidic water have blocked out many common plant species such as chestnuts, apple trees, sugar maples, sycamores, dogwood—and poison ivy. In fact, one botanist has estimated there are only 600 plant species here, barely a third the number to be found only a few miles farther inland.

What's left, though, is a great wealth of unusual plants—the rare curly grass fern, which scientists say is a remnant of primitive vegetation, sundews and pitcher plants, which trap and digest insects for nutrients

they can't get from the soil, to say nothing of more than two dozen varieties of orchids that grow wild.

HIKERS AND MOONSHINERS

From the top of the fire tower on Apple Pie Hill, pitch pine extends to the horizon in every direction, broken only by a distant cranberry bog and in one spot, dark green cedars whose steeple-like tops jut above the shorter pines. In parts of the area there are only a few roads and most of these are mere tracks in the sand; Floyd West, the Bass River mayor, keeps a shovel in his car to use when he gets stuck. Hikers have gotten lost for hours, and in the old days moonshiners used to set up stills here, says Alan Harris, a New Jersey forest ranger.

Over the years, ecologists have been able to fight off many threats to the central Pine Barrens. In the middle 1960s they helped shoot down a huge jetport proposed for the dwarf forest, and in the early 1970s they killed a developer's plans for a city of 80,000 people near the banks of the Wading River in Bass River Township. But they haven't been nearly as successful rallying public support against single-family-house building that is "nibbling away the Pine Barrens gradually," according to Annie Carter, naturalist at Batsto Village in Wharton State Forest.

Ecologists fear that the heavy doses of lime and fertilizer needed to grow grass for housing developments in the sandy soil could disturb the region's naturally acidic, sterile waters on which the present plant systems depend. However, J. Garfield DeMarco, a big berry farmer and chairman of the Burlington County Republican Party, points to the development that has already taken place on the fringes of the area and declares, "The argument that the Pine Barrens is so fragile doesn't hold water."

About 210,000 acres of the Pine Barrens already are in state forests and reservations, but conservationists, in challenging Mr. DeMarco's contention, make the point that most of the area's major streams—the Wading River, Bass River and Rancocas Creek—have their headwaters in threatened private land. For more complete ecological preservation, the state hopes to safeguard 130,000 acres of private land nearby through acquisitions or strict zoning laws.

Around this "wilderness zone" the state is proposing that another 400,000 acres of Pine Barrens land be placed in a "protection zone" that will be "much more sensitive to economic forces," according to Richard Biretsky, executive secretary of the New Jersey Pinelands Review Committee. Such a zone wouldn't allow helter-skelter development and would veto any project that failed to protect local ecology.

TROUBLE AT MEDFORD LAKES

The foes of development point to the experience of Medford Lakes, just west of the Pine Barrens as an example of what could happen. There, the pure water in a series of man-made lakes was transformed by slimy algae when sewage discharges changed the water quality.

As the controversy goes on, there have been changes in the day-to-day existence of the few thousand pineys who still inhabit the woods. (In the 500 square miles at the center of the Pine Barrens, population density is only 30 people per square mile, compared to New Jersey's statewide average of 1,000 per square mile.) "The pineys' days are numbered," says Allen Golin, president of Allyn Manufacturing Co., a Whiting, N.J., decorations maker that operates a gas kiln for heating open pine cones; the cones are then painted for Christmas wreaths.

"There are enough pine cones in the woods to keep us busy for a hundred years. But the pineys are trying to upgrade themselves" by seeking out less arduous, better paying jobs, Mr. Golin says. He has turned to importing pine cones because the number of local pickers has fallen to 40, compared to 150 a dozen years ago.

But if Mr. Golin's prediction comes true, Mr. Wasowich is likely to be one of the last holdouts. He is still perfectly content living by himself in the one-time sawmill town of Woodmansie and says the $4,000 a year he makes from picking cones and raking up moss is enough for his needs. He pays no rent to live in his abandoned six-room shack. And he doesn't mind the back-breaking labor of collecting the dripping wet sphagnum moss, which holds four times its weight in water and is thus in demand with florists who use it to keep plant roots moist.

Lately, however, 38-year-old Mr. Wasowich has started to notice unwelcome signs of change. Many of the sand roads he drives down to reach the swamps have been blocked off by developers. "If things keep going this way, the Pine Barrens is going to be a suburban place, and the people of the pines will be nothing," he says.●

## THE COMPASSION AND BRAVERY OF HOMER KEANU

● Mr. INOUYE. Mr. President, much has been said in this Chamber about the problem of crime in our communities. Statistics and charts are amassed to convey to us the urgency of this problem. But sometimes lost in these stark displays is the cost in emotional terms of crime to its victims and perpetrators, and the enormous risks we ask our officers of the law to take in their daily work.

I wish to bring to the attention of the Senate a recent article in the Honolulu Star-Bulletin which describes how, when police weaponry seemed helpless to avoid a tragic incident, a lone unarmed human being succeeded in bringing about a peaceful result to a tense and dangerous situation.

Not once, but twice, did a courageous Honolulu recreation worker named Homer Keanu succeed in disarming an emotionally distraught young man who seemed bent on harming himself and four relatives.

Mr. Keanu talked the young man into surrendering a knife, with which he threatened to slash himself. Several hours later, Mr. Keanu furnished bail money and took the man into his own home for food and shelter.

The next day, unfortunately, the young man took four of his relatives hostage and, armed with a rifle, threatened to shoot both them and surrounding police officers.

The police were helpless. Mr. Keanu was summoned by police and, ignoring rifle shots aimed above his head, walked unarmed into the house and talked to the gunman for 4 hours until he and Police Officer Bruce Ishimoto were able to take the rifle away.

These acts of outstanding compassion and bravery should be given proper recognition. I ask permission to have this article printed in the RECORD.

The article follows:

PREVENTING A BLOODBATH

(By Donald H. Moore)

(Moore is executive director of the Hawaii Council on Crime and Delinquency. On Aug. 17 the Council and the Dillingham Corp. presented a $500 check to Homer Keanu, the subject of this story:)

Almost weekly, somewhere in the United States an individual arms and barricades himself in a house, an office or a university tower and takes on a world which seems allied against him. Police arrive and frequently resolve the problem in the manner for which they alone are specially prepared—with firepower. Sometimes there seems to be no alternative.

Last year on Oahu's North Shore there was such an occurrence. But an alternative came from the community, and a bloodbath was averted. The community came, in this case, in the person of Homer L. Keanu.

Keanu, 32, is a resident of Hauula. For seven years he has worked with the youth of the area as an employee of the City Department of Parks and Recreation. Frequently he is to be found at the Waialua Recreation Center. At other times he is checking his kids' school attendance. Homer is quiet, but he is an imposing figure—a weightlifter whom tough youngsters can admire.

One day early last year, a young Haleiwa man, too burdened by finances and marriage, both beyond control, seized a knife with deadly intent. Powerful and the student of an arcane Filipino martial art specializing in knives, he held police at bay. An officer at the scene who knew that Keanu and the distraught man were acquainted asked Homer to come and help.

That he did. But, after helping police disarm the man, Homer asked officers not to handcuff him and offered instead to walk him to a police car himself. Homer figured the man was upset enough without that. Homer is a man from whom, once he has you, you do not escape. Police accepted this act of compassion.

That, however, was not all. Homer drove from Haleiwa to town and a few hours later laid down his own money to bail out the man, who, a short time earlier, would have cut him to ribbons. Returning to his own home, Homer offered him a meal and a shower before he had to go to work. As he left, he suggested that the man come by the recreation center for a talk.

The man did not. He got a rifle, went to the home of his in-laws and took four people hostage. His face was painted like that of a Cheyenne on the warpath. He would kill those inside. He would kill himself. He would charge the police and die in a hail of gunfire.

Mayhem was in the air, and the police who surrounded this sad place on the North Shore knew it. Recalling his effectiveness of the previous day, the police again summoned Homer Keanu.

When Homer arrived, the blue lights on the police cars were being used for target practice, and the policemen behind their cruisers were cursing the fortune which brought them duty on this shift. With faith in his God and the feeling that he could do no less, Homer Keanu walked past the police cars, up the path to an angry man and a fate that he could not control. Once, twice the gunman fired at him. Homer shuddered but walked on to where he stood.

There, with Honolulu Police Officer Bruce Ishimoto, Homer Keanu began to talk and, more importantly, to listen. The anguished man took the barrel of the rifle in his mouth and caressed the trigger. He threatened. And he poured out his pain for four tense hours. Then, as his guard dropped, Keanu and Ishimoto sprang and seized man and gun.

No one died in Haleiwa that day, although many might have. Charged with reckless endangering, the suspect was taken to the Halawa Correctional Facility and later the State Hospital, Kaneohe. He has been back in the community for some time now. They say

he has resolved the problems which overwhelmed him a year and a half ago or, at least, learned to accept them. Homer says he often sees the man playing tennis. They wave to each other.

Many things helped prevent that tragedy in Haleiwa. Police restraint was admirable.

Most remarkable, however, was the community's response to its own problems as embodied in Homer Keanu, who believes that he cannot leave the anger, frustration and failure of those around him to the impersonal ministrations of bureaucracy. For Homer, the power and responsibility of affiliation, of belonging, is as legitimate as the law.●

## PROPOSED ARMS SALE

Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulated that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is immediately available to the full Senate, I ask to have printed in the RECORD the notification I have just received. A portion of the notification, which is classified information, has been deleted for publication, but is available to Senators in the office of the Foreign Relations Committee, room S–116 in the Capitol.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
*Washington, D.C., September 5, 1978.*

Hon. JOHN J. SPARKMAN,
*Chairman, Commitee on Foreign Relations, U.S. Senate,*
*Washington, D.C.*

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding under separate cover, Transmittal No. 78–74, concerning the Department of the Navy's proposed Letter of Offer to Australia for major defense equipment, as defined in the International Traffic in Arms Regulations (ITAR), estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
*Lieutenant General, U.S.A.,*
*Director.*

---

TRANSMITTAL NO. 78–74: NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Australia.

(ii) Total Estimated Value: Major Defense Equipment* [deleted]. Other [deleted]. Total [deleted].

(iii) Description of Articles or Services Offered: [Deleted].

(iv) Military Department: Navy.

(v) Sales Commission, Fee, etc., Paid, Offered or Agreed to be Paid: None.

(vi) Date Report Delivered to Congress: September 5, 1978.

---

*As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

## S. 2128—TAX CREDITS FOR THE ELDERLY

● Mr. INOUYE. Mr. President, I ask that Senator CHURCH's name be removed as a cosponsor of S. 2128, the bill I introduced last year to provide increased tax credits for the elderly.

I understand that Senator CHURCH intended to cosponsor an amended version of the bill. Since the amendments were not incorporated in a separate bill but were added at my suggestion in the Senate Finance Committee, technical considerations make such cosponsorship impossible.

As chairman of the Senate Special Committee on Aging, Senator CHURCH has great familiarity with the problems my bill attempts to correct. While I regret we do not have the benefit of his formal cosponsorship, I am most pleased to know he does in fact support the bill as adopted in the Finance Committee. For more information about the bill and Senator CHURCH's position on it, I would refer my colleague's to his statement on page 26695 of the August 17, 1978, CONGRESSIONAL RECORD.●

## AUTHORIZATION TO FILE REPORT ON S. 50

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Human Resources may have until midnight tonight to file their report on S. 50.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs may have until midnight tonight to file a report on S. 50.

The PRESIDING OFFICER. Without objection, it is so ordered.

## TIME-LIMITATION AGREEMENT—S. 3447

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as Calendar Order No. 1061, S. 3447, the Foreign Export Agricultural Act, is called up and made the pending business, that there be a time agreement as follows: 1 hour to be equally divided between Mr. STONE and Mr. DOLE; 30 minutes on any amendment; 15 minutes on any debatable motion, appeal or point of order, if such is submitted to the Senate; and that the agreement be in the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the agreement follows:

*Ordered,* That when the Senate proceeds to the consideration of S. 3447 to increase sales of American agricultural products debate on any amendment shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill; and debate on any debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 15 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: *Provided,* That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee: *Provided further,* That no amendment that is not germane to the provisions of the said bill shall be received.

*Ordered further,* That on the question of final passage of the said bill, debate shall be limited to 1 hour to be divided equally between the Senators from Florida (Mr. Stone) and Kansas (Mr. Dole): *Provided,* That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

## TIME—LIMITATION AGREEMENT—S. 1423

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as calendar order No. 957, S. 1423, the judicial tenure bill is called up and made the pending business before the Senate, that there be a time agreement on it as follows: 6 hours on the bill to be equally divided between Mr. DECONCINI and Mr. THURMOND; 1 hour on any amendment in the first degree; and 30 minutes on any amendment in the second degree, with 20 minutes on any debatable motion, appeal, or point of order if such is submitted to the Senate; and that the agreement be in the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the agreement follows:

*Ordered,* That when the Senate proceeds to the consideration of S. 1423, to establish Council on Judicial Tenure, debate on any amendment in the first degree shall be limited to 1 hour, to be equally divided and controlled by the mover of such and the manager of the bill; debate on any amendment in the second degree shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill; and debate on any debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 20 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: Provided, That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee: Provided further, That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of final passage of the said bill, debate shall be limited to 6 hours equally divided between the Senators from Arizona (Mr. DECONCINI) and South Carolina (Mr. THURMOND) *Provided,* That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senators during the consideration of any amendment, debatable motion, appeal, or point of order.

## THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there are six measures on the Consent Calendar which have been cleared all around. I ask unanimous consent that the Senate now proceed to the consideration of the following Calendar Orders: Calendar Orders Nos. 1050, 1051, 1077, 1078, 1087, and 1088.

The PRESIDING OFFICER. Without objection, it is so ordered.

## PUEBLO OF ZIA LAND TRANSFER

The Senate proceeded to consider the bill (S. 2358) to declare that the United States holds in trust for the Pueblo of Zia certain public domain lands, which had been reported from the Select Committee on Indian Affairs with an amendment.

On page 7, beginning with line 5, insert the following:

SEC. 9. (a) Notwithstanding any other provision of this Act, during the three years following enactment of this Act, the Secretary may, after giving the tribe 30 days written notice and after consulting with the tribe, enter on the lands described in the first section of this Act to identify, investigate, examine, and remove any paleontological resources from such lands: *Provided*, That no explorations, surveys or excavations shall be authorized within a 200-yard radius of the following shrines or religious sites:

(1) Eagle Peak, Eagle Rock, or Eagle Point (Tiam);

(2) Cherry Spring (Hu-nah-kah-kah-Warish);

(3) Grandma (Pah-Pah);

(4) Mudhead (Ku-Mah-Yah-Wish);

(5) Punaya; and

(6) White Points (Grash-Yeh-Tey-Sham).

Such resources so removed are the property of the United States and shall be administered under laws applicable to federally owned resources. Paleontological resources on such lands that are not removed from the lands pursuant to this section shall be managed in a manner that will permit the greatest possible public benefit, use and study of the resources, consistent with tribal law and practices.

(b) Any lands excavated pursuant to this section shall be reclaimed and restored to their original condition by the Secretary, as nearly as he determines may be practicable.

So as to make the bill read:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That all right, title, and interest of the United States in the following lands situated within Sandoval County in the State of New Mexico are hereby declared to be held by the United States in trust for the benefit and use of the Pueblo of Zia:

NEW MEXICO PRINCIPAL MERIDIAN

Township 14 North, Range 1 East Section 3:
Lots 2, 3, 4,
Southwest quarter of northeast quarter,
West half of southeast quarter,
Southwest quarter,
Southeast quarter of southeast quarter,
South half of northwest quarter,
Township 15 North, Range 1 East.
Section 10: Lot 4,
Section 11: South half of south half,
Section 13:
Southeast quarter,
West half,
Section 14: All,
Section 15:
Lots, 1, 2, 3, 4,
Southwest quarter,
West half of southeast quarter,
Section 22: All,
Section 23:
West half of northeast quarter,
Northeast quarter of northeast quarter,
Southeast quarter,
West half.
Section 24: North half of north half,
Section 26: North half of northwest quarter,
Section 27: All,
Section 34:
Southwest quarter,
Northwest quarter,
Northeast quarter,

Containing 4,848.13 acres, more or less.

SEC. 2. The Secretary of the Interior shall publish in the Federal Register the boundaries and descriptions of the lands declared to be held in trust by this Act.

SEC. 3. All of the right, title, and interest of the United States in all minerals, including gas and oil, underlying the lands hereby declared to be held in trust for the Pueblo of Zia, are hereby declared to be held by the United States in trust for the benefit and use of the Pueblo of Zia.

SEC. 4. (a) Nothing in this Act shall deprive any person of any valid existing right of use, possession, contract right, interest, or title which that person may have in any of the trust lands within the purview of this Act, or of any existing right of access to public domain lands over and across such trust lands, as determined by the Secretary of the Interior. All existing mineral leases involved lands declared to be held in trust by this Act, including oil and gas leases, which may have been issued or approved pursuant to Federal law, prior to enactment of this Act, shall remain in force and effect in accordance with the provisions thereof. Notwithstanding any other provisions of law, all applications for mineral leases involving such lands, including oil and gas leases, pending on the date of enactment of this Act shall be rejected and the advance rental payments returned to the applicants.

(b) Subject to the provisions of subsection (a) of this section, the property declared to be held in trust by this Act for the benefit and use of the Pueblo of Zia shall hereafter be administered in accordance with the laws and regulations applicable to other property held in trust by the United States for the Indian tribe of such pueblo.

SEC. 5. All gross receipts (including, but not limited to, bonuses, rents, and royalties) hereafter derived by the United States from any contract, permit, or lease which relates to the property declared to be in trust by this Act received subsequent to the enactment of this Act shall be administered in accordance with the laws and regulations applicable to receipts from property held in trust by the United States for Indian tribes.

SEC. 6. All property declared to be held in trust for the benefit and use of the Pueblo of Zia pursuant to this Act, and all the receipts therefrom referred to in section 5 of this Act, shall be exempt from Federal, State, and local taxation so long as such property is held in trust by the United States. Any distribution of such receipts to tribal members shall neither be considered as income or resources of such members for purposes of any such taxation nor as income or resources or otherwise utilized as the basis for denying or reducing the financial assistance or other benefits to which such member or his household would otherwise be entitled to under the Social Security Act or any other Federal or federally assisted program.

SEC. 7. (a) The Secretary may execute any title documents necessary to effect conveyance authorized by this Act.

(b) Title to all lands acquired under the provisions of this Act shall be taken in the name of the United States in trust for the Pueblo of Zia.

SEC. 8. The transfer and conveyance of title shall be subject to the following roadway right-of-way to be for the use and benefit of adjacent private landowners, the Bureau of Land Management, its permittees, lessees, successors, and assigns:

(1) Access road through Zia Allotment: A road right-of-way 50 feet wide over that portion in southeast quarter section 13, north half section 24, southeast quarter section 23, north half section 26, and north half section 27, all in township 15 north, range 1 east, New Mexico principal meridian.

Beginning at intersection of State Road 44, thence southwesterly 1,600 feet to a point of curve, thence westerly 2,100 feet to a point of curve, thence southerly 1,100 to a point of curve, thence southwesterly 2,400 feet to a point of curve, thence southerly 2,640 feet to a point of curve, thence southerly 8,500 feet to a point of curve near the west section line of section 27, road being 3.5 miles long (approx.). Distances to a curve are scaled distances (approx.) from U.S.G.S. quadrangle sheet, Sky Village northeast quadrangle, and San Ysidro quadrangle.

The description was compiled from U.S.G.S. quadrangle maps dated November 1960, and this is only a paper survey.

(2) Gypsum Mine access road: A road right-of-way 50 feet wide, over that portion in southeast quadrant of section 13, northeast quadrant section 24, westerly quadrant section 13, and northeast quadrant section 14, all in township 15 north, range 1 east, New Mexico principal meridian.

Beginning at the intersection of Gypsum mine access road and access road through lands known as Zia Allotment being 500 feet southwesterly from State Road 44, thence northwesterly 6,500 feet near the east line of section 14. Distances to the termination of road are scaled distances (approx.) from U.S.G.S. quadrangle sheet, San Ysidro quadrangle.

This description was compiled from U.S.G.S. quadrangle map dated November 1960, and this is only a paper survey.

SEC. 9. (a) Notwithstanding any other provision of this Act, during the three years following enactment of this Act, the Secretary may, after giving the tribe 30 days written notice and after consulting with the tribe, enter on the lands described in the first section of this Act to identify, investigate, examine, and remove any paleontological resources from such lands: *Provided*, That no explorations, surveys or excavations shall be authorized within a 200-yard radius of the following shrines or religious sites:

(1) Eagle Peak, Eagle Rock, or Eagle Point (Tiam);

(2) Cherry Spring (Hu-nah-kah-kah-Warish);

(3) Grandma (Pah-Pah);

(4) Mudhead (Ku-Mah-Yah-Wish);

(5) Punaya; and

(6) White Points (Grash-Yeh-Tey-Sham).

Such resources so removed are the property of the United States and shall be administered under laws applicable to federally owned resources. Paleontological resources on such lands that are not removed from the lands pursuant to this section shall be managed in a manner that will permit the greatest possible public benefit, use and study of the resources, consistent with tribal law and practices.

(b) Any lands excavated pursuant to this section shall be reclaimed and restored to their original condition by the Secretary, as nearly as he determines may be practicable.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. WALLOP. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1131), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE MEASURE

The purpose of S. 2358 is to restore to the pueblo of Zia approximately 4,848 acres of land, situated in Sandoval County, in the

State of New Mexico. These lands, referred to as the Zia community allotment, have belonged to the tribe since time immemorial and have been permitted to the tribe for the past 40 years by grazing permits. Enactment of this legislation would simplify the administration of the land for both the Bureau of Land Management and the Bureau of Indian Affairs as well as provide protection to the Zia within the acreage transferred into trust by this bill.

BACKGROUND

All of the land transferred into trust by this legislation has been occupied and used by the pueblo of Zia since time immemorial. The land was used exclusively by the pueblo for grazing purposes until 1936 when the Bureau of Land Management took over the land and fenced it in.

The estimated surface value of the land is $38 per acre for a total value of $184,000. There are no known mineral leases in the area. The pueblo of Zia plans to continue using the land for grazing and religious purposes.

LEGISLATIVE HISTORY

S. 2358 was introduced by Senators Domenici and Schmitt on December 15, 1977. A hearing was held on the proposed measure before the Senate Select Committee on Indian Affairs on April 26, 1978. Testimony was received from the Department of the Interior and several tribal witnesses, all of whom supported enactment of S. 2358.

A similar measure, H.R. 10240, was introduced by Congressman Lujan on December 6, 1977. A hearing was held before the House Interior Subcommittee on Indian Affairs and Public Lands on April 27, 1978. At that hearing, representatives from the Department of the Interior testified in favor of the bill.

## PUEBLO OF SANTA ANA LAND TRANSFER

The Senate proceeded to consider the bill (S. 2588) to declare that the United States holds in trust for the Pueblo of Santa Ana certain public domain lands, which had been reported from the Select Committee on Indian Affairs with amendments as follows:

On page 1, beginning with line 8, strike through and including page 8, line 11, and insert in lieu thereof the following:

NEW MEXICO PRINCIPAL MERIDIAN

Township 13 Noth, Range 3 East
Section 1:
Lots 1, 8, 9, 10, South half north half, South half,
Section 3:
Lots 9, 10, 11, 12,
South half north half.

Lots 5, 6, 7, 8, and bed of Jemez River lying north of the
North boundary of the Angostura Grant,
Section 17:
Lots 10, 11, 12, 13,
Northwest quarter,
Section 18:
Lots 2, 3,
East half northwest quarter,
Northeast quarter,

Township 14 North, Range 3 East
Section 6: Bed of the Jemez River,

Township 14 North, Range 4 East
Section 17: All,
Section 18: East half east half,
Section 19: East half east half,
Section 20: All,
Section 21: West half,
Section 27: Southwest quarter southwest quarter,
Section 28:
Northwest quarter,
South half,
Section 29: All,
Section 30: East half east half,
Section 31:
East half northeast quarter,
Southwest quarter northeast quarter,
Northwest quarter northwest quarter,
South half northwest quarter,
South half,
and bed of Jemez River,
Section 33: All,
Section 34:
South half northeast quarter,
Northwest quarter,
South half,
Section 35:
Lot 9,
West half southwest quarter,
Containing 16,249.98 acres more or less.

(b)(1) The lands described in paragraph (2) of this subsection consisting of approximately 2,240.14 acres shall continue to be subject to Public Land Order 873, entitled "An Order Withdrawing Public Lands for Use of the Department of the Army in Con-

nection with the Jemez Canyon Dam and Reservoir Project", issued by the Secretary of the Interior on November 14, 1952, until such lands, or any portion thereof, are determined by the Secretary of the Army to be no longer needed for the purpose for which the lands were reserved under such order. The Secretary of the Army shall publish notice of any such determination in the Federal Register.

(2) The lands described in subsection (a) of this section which are subject to Public Land Order 873 are the following lands:

NEW MEXICO PRINCIPAL MERIDIAN

Township 13 North, Range 3 East

Section 1:
Lots 1, 8, 9, 10,
South half northeast quarter,
Southeast quarter northwest quarter,
Northeast quarter southwest quarter,
Section 5:
Lots 1, 2, 3, 4,
Northwest quarter northwest quarter,
Lots 1, 2, 3, Northeast quarter, East half northwest quarter, Northeast
South half northwest quarter,
Southwest quarter,
West half southeast quarter,
Lot 5, that part lying north of the east-west quarter section line,
Section 6:
Lots 1, 2, 3,
Northeast quarter,
East half northwest quarter,
Northeast quarter southwest quarter,
North half southeast quarter,
Southeast quarter southeast quarter,
Section 8:
Lots 3, 4, 5,
West half northeast quarter,
Northwest quarter,
North half southwest quarter,
Northwest quarter southeast quarter,
Section 17:
Lots 10 and 11,
Lot 12, that part lying east of the north-south quarter section line,

Township 14 North, Range 4 East

Section 31:
Southwest quarter northeast quarter,
Northwest quarter northwest quarter,
South half northwest quarter,
South half.

On page 18, beginning with line 9, strike through and including line 14, and insert in lieu thereof the following:

(b) Those persons holding grazing permits from the United States Bureau of Land Management in the grazing unit known as the Bernalillo Community Allotment (Number 551), Sandoval County, New Mexico as of the date of enactment of this Act are hereby granted the right to continue those grazing rights, subject to all otherwise applicable terms, conditions, rules and regulations of the Bureau of Land Management governing such grazing rights, for a period of not to exceed ten years. Such grazing rights shall be administered by the Bureau of Land Management in accordance with applicable rules and regulations governing such rights on the Federal public domain, and may be canceled by the Bureau of Land Management in accordance with its regulations for failure to meet the terms and conditions of the existing permits, or failure to abide by applicable rules and regulations. Grazing fees shall be payable by the permittees to the Bureau of Land Management at prevailing rates, which fees shall be remitted by said Bureau to the Pueblo of Santa Ana within 30 days of receipt. Such grazing rights shall be nontransferable, except that they may be relinquished at any time to the Pueblo of Santa Ana.

In the event of cancellation or relinquishment of said grazing rights as provided above, such rights shall not be renewed, nor shall any new permits be issued: *Provided, however,* That no grazing fees shall be payable by the said existing permittees for the first five years following enactment of this Act.

(c) Subject to subsections (a) and (b) of this section, any property held in trust under this Act for the Pueblo of Santa Ana shall be administered in accordance with the laws and regulations applicable to other property held in trust by the United States for the Indian tribe of such pueblo.

On page 21, line 6, strike "exchange, or condemnation," and insert "or exchange,";

On page 22, beginning with line 1, insert the following:

SEC. 8. (a) Notwithstanding any other provision of this Act, during the three years following enactment of this Act, the Secretary may, after giving the tribe 30 days written notice and after consulting with the tribe, enter on the lands described in the first section of this Act to identify, investigate, examine, and remove any paleontological resources from such lands: *Provided,* That no explorations, surveys or excavations shall be authorized within a 200-yard radius of the following shrines or religious sites:

(1) Santiyaku 'Ke Kura (Santiago's Corral);
(2) Santiyaku Ka'me (Santiago's Home);
(3) Santiyaki 'Kaisru (Santiago's Field);
(4) 'Tsitsi Sruwii (Water Snake Head);
(5) Tuyuuna (Snake Head Shrine—Canjilon Hill);
(6) Shayeka Kauwatsesruma (Hunter Shrine)
(7) 'Kuyau 'Kapesru (Old Lady Sits Shrine);
(8) Huchaniitse (White House Shrine);
(9) Dya'dyu Tsinautani (Bobcat Point);
(10) 'Kasreri 'Kumiyeisruma (Clown Point);
(11) Chapiyu 'Ka'kuyanisru (Chapiyu's Trail);
(12) Shawiti'tsuyu (Parrot Point);
(13) Hane 'Kai (Sacred Clown Society Shrine); and
(14) Yusrkuma (Corn Cob Shrine).

Such resources so removed as the property of the United States and shall be administered under laws applicable to federally owned resources. Paleontological resources on such lands that are not removed from the lands pursuant to this section shall be managed in a manner that will permit the greatest possible public benefit, use and study of the resources, consistent with tribal law and practices.

(b) Any lands excavated pursuant to this section shall be reclaimed and restored to its original condition by the Secretary, as near as he determines may be practicable.

So as to make the bill read:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That all right, title, and interest of the United States in the following lands situated within Sandoval County in the State of New Mexico are hereby declared to be held by the United States in trust for the benefit and use of the Pueblo of Santa Ana:

NEW MEXICO PRINCIPAL MERIDIAN

Township 13 North, Range 3 East

Containing 16,249.98 acres more or less.

(b)(1) The lands described in paragraph (2) of this subsection consisting of approximately 2,240.14 acres shall continue to be subject to Public Land Order 873, entitled "An Order Withdrawing Public Lands for Use of the Department of the Army in Connection with the Jemez Canyon Dam and Reservoir Project", issued by the Secretary of the Interior on November 14, 1952, until such lands, or any portion thereof, are determined by the Secretary of the Army to be no longer needed for the purpose for which the lands were reserved under such order. The Secretary of the Army shall publish notice of any such determination in the Federal Register.

(2) The lands described in subsection (a) of this section which are subject to Public Land Order 873 are the following lands:

NEW MEXICO PRINCIPAL MERIDIAN

Township 13 North, Range 3 East

Section 1:
Lots 1, 8, 9, 10,
South half northeast quarter,
Southeast quarter northwest quarter,
Northeast quarter southwest quarter,
Section 5:
Lots 1, 2, 3, 4,
Northwest quarter northwest quarter,
Lots 1, 2, 3, Northeast quarter East half northwest quarter, Northeast,
South half northwest quarter,
Southwest quarter,
West half southeast quarter,
Lot 5, that part lying north of the east-west quarter section line,
Section 6:
Lots 1, 2, 3,
Northeast quarter,
East half northwest quarter,
Northeast quarter southwest quarter,
North half southeast quarter,
Southeast quarter southeast quarter,
Section 8:
Lots 3, 4, 5,
West half northeast quarter,
Northwest quarter,
North half southwest quarter,
Northwest quarter southeast quarter,
Section 17:
Lots 10 and 11,
Lot 12, that part lying east of the north-south quarter section line,

Township 14 North, Range 4 East

Section 31:
Southwest quarter northeast quarter,
Northwest quarter northwest quarter,
South half northwest quarter,
South half.

SEC. 2. The Secretary of the Interior shall publish in the Federal Register the boundaries and descriptions of the lands declared to be held in trust by this Act.

SEC. 3. All of the right, title, and interest of the United States in all minerals, including gas and oil, underlying the lands hereby declared to be held in trust for the Pueblo of Santa Ana, are hereby declared to be held by the United States in trust for the benefit and use of the Pueblo of Santa Ana.

SEC. 4. (a) Nothing in this Act shall deprive any person of any valid existing right of use, possession, contract right, interest, or title which that person may have in any of the trust lands within the purview of this Act, or of any existing right of access to public domain lands over and across such trust lands, as determined by the Secretary of the Interior. All existing mineral leases involving lands declared to be held in trust by this Act, including oil and gas leases, which may have been issued or approved pursuant to Federal law, prior to enactment of this Act, shall remain in force and effect in accordance with the provisions thereof. Notwithstanding any other provisions of law, all applications for mineral leases involving such lands, including oil and gas leases, pending on the date of enactment of this Act shall be rejected and the advance rental payments returned to the applicants.

(b) Those persons holding grazing permits from the United States Bureau of Land Management in the grazing unit known as the Bernalillo Community Allotment (Number 551), Sandoval County, New Mexico as of the date of enactment of this Act are hereby granted the right to continue those grazing rights, subject to all otherwise applicable terms, conditions, rules and regulations of the Bureau of Land Management governing such grazing rights, for a period of not to exceed ten years. Such grazing rights shall be administered by the Bureau of Land Management in accordance with applicable rules and regulations governing such rights on the federal public domain, and may be canceled by the Bureau of Land Management in accordance with its regulations for failure to meet the terms and conditions of the existing permits, or failure to abide by applicable rules and regulations. Grazing fees shall be payable by the permittees to the Bureau of Land Management at prevailing rates, which fees shall be remitted by said Bureau to the Pueblo of Santa Ana within 30 days of receipt. Such grazing rights shall be nontransferable, except that they may be relinquished at any time to the Pueblo of Santa Ana.

In the event of cancellation or relinquishment of said grazing rights as provided above, such rights shall not be renewed, nor shall any new permits be issued: Provided, however, That no grazing fees shall be payable by the said existing permittees for the first five years following enactment of this Act.

(c) Subject to subsections (a) and (b) of this section, any property held in trust under this Act for the Pueblo of Santa Ana shall be administered in accordance with the laws and regulations applicable to other property held in trust by the United States for the Indian tribe of such pueblo.

SEC. 5. (a) Any and all gross receipts derived from, or which relate to, the property declared to be held in trust by this Act which were received by the United States subsequent to the acquisition by the United States of such property and prior to the date of the enactment of this Act (including State school lands referred to in section 7), from whatever source and for whatever purpose, shall, as of the date of enactment of this Act, be deposited to the credit of the Pueblo of Santa Ana and may be expended by such tribe for such beneficial programs as the tribal governing body may determine.

(b) All gross receipts (including, but not limited to, bonuses, rents, and royalties) hereafter derived by the United States from any contract, permit, or lease referred to in section 4(a) of this Act, shall be administered in accordance with the laws and regulations applicable to receipts from property held in trust by the United States for Indian tribes.

SEC. 6. All property declared to be held in trust for the benefit and use of the Pueblo of Santa Ana pursuant to this Act, and all the receipts therefrom referred to in section 5 of this Act, shall be exempt from Federal, State, and local taxation so long as such property is held in trust by the United States. Any distribution of such receipts to tribal members shall neither be considered as income or resources of such members for purposes of any such taxation nor as income or resources or otherwise utilized as the basis for denying or reducing the financial assistance or other benefits to which such member or his household would otherwise be entitled

to under the Social Security Act or any other Federal or federally assisted program.

SEC. 7. (a) For the purpose of improving the land tenure pattern and consolidating Santa Ana Pueblo lands, the Secretary of the Interior is authorized and directed to acquire, by purchase, or exchange, under such regulations as he may prescribe, all State school lands in township 13 north, range 3 east, sections 2 and 16; township 14 north, range 3 east, section 36; and township 14 north, range 4 east, section 32, State of New Mexico, containing 2004.05 acres, more or less; and interests therein, including improvements, mineral rights, and water rights. In exercising his authority to acquire such lands by exchange, the Secretary is authorized to utilize unappropriated public lands in the State of New Mexico. The properties so exchanged shall be of approximately equal value, and the Secretary may accept cash from or pay cash to the State of New Mexico in such an exchange in order to equalize the values of the properties exchanged.

(b) The Secretary may execute any title documents necessary to effect the exchanges authorized by this section.

(c) Title to all lands acquired under the provisions of this section shall be taken in the name of the United States in trust for Santa Ana Pueblo.

SEC. 8. (a) Notwithstanding any other provision of this Act, during the three years following enactment of this Act, the Secretary may, after giving the tribe 30 days written notice and after consulting with the tribe, enter on the lands described in the first section of this Act to identify, investigate, examine, and remove any paleontological resources from such lands: *Provided*, That no explorations, surveys or excavations shall be authorized within a 200-yard radius of the following shrines or religious sites:

(1) Santiyaku 'Ke Kura (Santiago's Corral);

(2) Santiyaku Ka'me (Santiago's Home);

(3) Santiyaki 'Kaisru (Santiago's Field);

(4) 'Tsitsi Sruwii (Water Snake Head);

(5) Tuyuuna (Snake Head Shrine—Canjilon Hill);

(6) Shayeka Kauwatsesruma (Hunter Shrine);

(7) 'Kuyau 'Kapesru (Old Lady Sits Shrine);

(8) Huchaniitse (White House Shrine);

(9) Dya'dyu Tsinautani (Bobcat Point);

(10) 'Kasreri 'Kumiyeisruma (Clown Point);

(11) Chapiyu 'Ka'kuyanisru (Chapiyu's Trail);

(12) Shawiti'tsuyu (Parrot Point);

(13) Hane 'Kai (Sacred Clown Society Shrine); and

(14) Yusrkuma (Corn Cob Shrine).

Such resources so removed are the property of the United States and shall be administered under laws applicable to federally owned resources. Paleontological resources on such lands that are not removed from the lands pursuant to this section shall be managed in a manner that will permit the greatest possible public benefit, use and study of the resources, consistent with tribal law and practices.

(b) Any lands excavated pursuant to this section shall be reclaimed and restored to its original condition by the Secretary, as near as he determines may be practicable.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. WALLOP. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1132), explaining the purpose of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE MEASURE

The purpose of S. 2588 is to restore to the pueblo of Santa Ana approximately 14,000 acres of public domain land; and also to authorize and direct the Secretary of the Interior to acquire through exchange or purchase an additional 2,000 acres of State-owned school lands for the tribe. These lands would be transferred into trust and held for the benefit of the pueblo.

The act would serve to connect and consolidate the two separated Santa Ana Reservations. It would also enhance the economic posture of the pueblo by providing additional grazing lands and allowing for development of the proposed Jemez Lake Park and Santa Ana recreation areas.

BACKGROUND AND NEED

The land affected by this legislation was occupied, controlled and used for subsistence, economic and religious purposes by the Pueblo of Santa Ana prior to the arrival of the Spanish in the 17th and 18th centuries. These aboriginal lands extended from the Rio Puerco River on the west, through the town of Bernalillo and across the Rio Grande River to the vicinity of Placitas, N. Mex.

This land was originally used for hunting and fishing and subsequently became grazing land for the tribe's livestock herds. The old Santa Ana Pueblo, Ta-Ma-Ya, is still maintained today as a small ceremonial village and used periodically for religious ceremonies.

The history of land control in the Santa Ana Pueblo area is checkered, with the tribe losing and regaining, claiming and reclaiming, selling and repurchasing portions of their aboriginal lands to the Spanish, Mexican, and American Governments, as well as local nonIndian residents.

In 1937, pursuant to the Taylor Grazing Act of 1934, a regional grazing committee asserted jurisdiction over the lands involved in this legislation under the assumption that they were public domain lands and subject to the act.

The Bureau of Indian Affairs chose to acquiesce in the designation of the lands as public domain, and, instead of asserting and defending the pueblo's aboriginal title, submitted an application to the committee on behalf of the tribe for a grazing permit. The application included all of the lands encompassed by this legislation, but was denied on the basis that "the land applied for is needed for qualified native applicants." These "qualified native applicants" were local non-Indian ranchers.

A subsequent application was accepted and granted the tribe permission to use approximately 6,500 acres for grazing, and this area became the Santa Ana grazing allotment. The balance of approximately 7,500 acres was permitted to local non-Indians and became the Bernalillo community allotment.

For approximately 25 years, an informal agreement between the pueblo and other permittees recognized the tribe's aboriginal grazing rights and the tribe used the lands jointly with other permittees.

In 1961, however, the Bureau of Land Management, citing an over-grazing problem, fenced in the Bernalillo community allotment and restricted its use to the local non-Indian permittees.

The current Santa Ana Pueblo consists of two physically separated reservations encompassing approximately 41,000 acres with a total population of approximately 625 people. Approximately one-half of this land (22,976 acres) was transferred to the pueblo in trust by the act of September 14, 1961, Public Law 87–231. This transfer was initiated by the Bureau of Land Management to reduce the burden of BLM administration in the complicated tribal land pattern that existed in the area after it had been determined that the area had been used exclusively by the pueblo for over 20 years. This legislation would close the existing physical gap between the reservations by transferring the area separating them into trust for the pueblo

The land to be transferred into trust by S. 2588 can be considered as three adjacent and related parcels; the Santa Ana grazing allotment area, the Jemez Lake Park Recreation Area, and the Bernalillo community allotment. A brief description of each parcel follows.

1. The Santa Ana grazing allotment area consists of 6,576.92 acres and has been exclusively and continuously used by the Santa Ana Pueblo for grazing purposes for at least 300 years. The area is an isolated, lava-capped plateau, accessible only from current pueblo land holdings. It will continue to be used primarily for grazing.

2. The Jemez Lake Park Recreation Area comprises 762.27 acres adjacent to the Jemez Canyon Dam. In 1931, the Army Corps of Engineers constructed the dam for flood control in the area. However, it has only been utilized twice in the past 25 years to contain Jemez River floodwaters.

The pueblo proposes to establish a permanent pool behind the dam, and develop the adjacent land into a major recreation area serving Metropolitan Albuquerque. The recreation area will include a visitor's center, marine, restaurant, plus picnicking and camping areas. The pueblo has also developed a plan to store water purchased by Albuquerque from the San Juan Chama diversion project which is now released into the Rio Grande River when not utilized. The city would obtain both water storage areas and recreational facilities

3. The Bernalillo community allotment, also designated as the Santa Ana recreation area, includes 6,729.93 acres in a rolling sandy area accessible by paved roads from the south and east. The land is presently used for grazing, but the tribe plans to develop the area by establishing cabin and lodge rental facilities, dude ranches and an all-terrain-vehicle use area. The pueblo will also be able to create a buffer zone between this recreation area and their ancient ceremonial village, Ta-Ma-Ya, which is currently being desecrated by dune-buggy enthusiasts and curious sightseers. Vehicle use will be limited to specific areas and access to Ta-Ma-Ya will also be easier to control and limit.

Contained within the parcels described above are some 2,000 acres of State school lands which are also to be acquired for the tribe through exchange or purchase from the State of New Mexico by the Secretary of the Interior. Also contained within the area described above is approximately 2,200 acres of land withdrawn subject to Public Land Order 873, entitled "An Order Withdrawing Public Lands for Use of the Department of the Army in connection with the Jemez Dam and Reservoir Project," issued by the Secretary of the Interior on November 14, 1952. The Secretary of the Interior is authorized by the legislation to revoke or terminate this withdrawal order after a determination by the Secretary of the Army that the lands are no longer needed for the purpose for which they were withdrawn.

Transfer of the lands described above into trust for the benefit of the Pueblo of Santa Ana will serve to bridge the gap between the physically separated reservations and also provide job opportunities and other economic advantages under proposed development plans.

LEGISLATIVE HISTORY

S. 2588 was introduced by Senators Domenici and Schmitt on February 24, 1978. A hearing was held on the proposed measure before the Senate Committee on Indian Affairs on April 26, 1978. Favorable testimony was received at that hearing from representatives of the Interior Department and the tribe.

A similar measure, H.R. 3924, was introduced by Congressman Lujan on February 23, 1977. A hearing was held before the House Interior Subcommittee on Indian Affairs and Public Lands on April 27, 1978. At that hearing, representatives from the Interior Department testified in favor of the bill.

On May 3, 1978, the House Interior Committee favorably reported H.R. 3924 out of committee in the form of a substitute bill.

## "COLONIZATION OF THE WEST BANK TERRITORIES BY ISRAEL"

The resolution (S. Res. 538) authorizing the reprinting of the committee print entitled "Colonization of the West Bank Territories by Israel," was considered and agreed to, as follows:

*Resolved,* That there be reprinted, with illustrations, for the use of the Committee on the Judiciary five hundred copies of its committee print of December 1977, entitled "Colonization of the West Bank Territories by Israel," a report to the committee by Senator James Abourezk.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. WALLOP. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1155), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Resolution 538 would authorize the reprinting, with illustrations, for the use of the Committee on the Judiciary, of 500 copies of its committee print of December 1977, entitled "Colonization of the West Bank Territories by Israel," a report to the committee by Senator James Abourezk.

The printing-cost estimate, supplied by the Public Printer, is as follows:

*Printing cost estimate*

Back to press, 500 copies ..... $395.92

## VALERIE E. KAIT, MARGUERITE E. GILL, AND GEORGE E. GILL

The resolution (S. Res. 548) to pay a gratuity to Valerie E. Kait, Marguerite E. Gill, and George E. Gill was considered and agreed to, as follows:

*Resolved,* That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Valerie E. Kait and Marguerite E. Gill, daughters, and George E. Gill, son, of Helen Gill, an employee of the Senate at the time of her death, a sum to each equal to one-third of seven months' compensation at the rate she was receiving by law at the time of her death, said sum to be considered inclusive of funeral expenses and all other allowances.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. WALLOP. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## COPAN DAM AND THE LAKE OF THE DELAWARES

The joint resolution (S.J. Res. 131) to change the name of Copan Dam and Lake in the States of Oklahoma and Kansas to Copan Dam and the Lake of the Delawares was considered, ordered to be engrossed for a third reading, read the third time, and passed as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Copan Dam and Lake on the Little Caney River in the States of Oklahoma and Kansas shall be known as the Copan Dam and the Lake of the Delawares in honor of the Delaware Indians. Any law, regulation, document, or record of the United States in which such project is referred to by any other name shall be held and considered to refer to such project by the name of Copan Dam and the Lake of the Delawares.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. WALLOP. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1164), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of Senate Joint Resolution 131, as reported, is to change the name of Copan Dam and Lake to Copan Dam and the Lake of the Delawares in honor of the Delaware Indians.

GENERAL STATEMENT

The Copan Lake project, under construction, is expected to be completed in 1980. The dam will be located on Little Caney River in Washington County, about 2 miles west of Copan and 9 miles north of Bartlesville, Okla. The lake will extend into Chautauqua County, Kans. The project will provide flood control, water supply, water quality control, recreation, and fish and wildlife enhancement.

For 103 years the main body of the Delaware Indian Tribe has resided in the geographic area in which the Copan project will be located. The Delaware Tribe came to Oklahoma under the 1866 treaty with the U.S. Government and 1867 treaty with the Cherokee Nation. Because of the many years the Delawares have resided upon the land surrounding the proposed Copan project, it is fitting and proper that the Copan Lake should bear their name.

## GATHRIGHT DAM AND LAKE MOOMAW

The Senate proceeded to consider the bill (H.R. 12112) designating Gathright Lake on the Jackson River, Va., as Lake Moomaw, which had been reported from the Committee on Environment and Public Works with amendment as follows:

On page 1, line 6, strike "Lake Moomaw" and insert "Gathright Dam and Lake Moomaw";

On page 2, line 2, strike "Lake Moomaw" and insert "Gathright Dam and Lake Moomaw".

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended so as to read:

An act designating Gathright Lake on the Jackson River, Virginia, as Gathright Dam and Lake Moomaw.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. WALLOP. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1165), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of H.R. 12112, as reported, is to name the Gathright Lake on the Jackson River, Va., Lake Moomaw for Mr. Benjamin C. Moomaw, Jr.

GENERAL STATEMENT

Gathright Lake project is presently being constructed. The dam will be located on the Jackson River, a tributary of the James River, about 19 miles upstream of the city of Covington, Va. The lake will be located in Allegheny and Bath Counties, Va. The project, when completed, will provide flood control, water quality control, and recreation.

Mr. Benjamin C. Moomaw, Jr., who died on March 12, 1978, at the age of 88, was instrumental in obtaining the construction of the Gathright Lake project. For some 30 years, he and other concerned citizens devoted time and effort to secure the authorization and construction of the project. Unfortunately "Mr. Ben," as he is known throughout the area, did not live to see the completion of the project. It is a fitting tribute that the lake created by the Gathright Dam be named for Ben Moomaw.

To also retain the original identification of the project, the committee believes that the project should now be known as the Gathright Dam and Lake Moomaw.

## THE UKRAINIAN GENOCIDE UNDERSCORES THE NEED FOR THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, between the years of 1931 and 1933, 5 million Ukrainian peasants perished, victims of the government of the U.S.S.R. under the leadership of Joseph Stalin. Five million people, annihilated by mass starvation, by deportation, and merciless political terror.

How could any government commit this grisly act? Why did the rest of the world sit by, turning their heads away from the slaughter? And why, Mr. President, why do we hear so little of this

atrocity, certainty one of the most horrendous in human history?

Mr. President, the Ukrainians are a courageous, freedom-loving people. When the Communist government sought to collectivize agriculture, stripping peasants of their land and livestock, their houses and tools, Ukrainians resisted. They sabotaged the collective farms, took back their possessions, and began to hold back grain from the government.

The response of the Communist party was swift and brutal. In his book, "Genocide of the Ukrainian People," Prof. Vasyl Plyushch wrote:

> The Central Committee of the Russian Communist Party ordered an acceleration of collectivization and its conclusion in one or two years' time. At the same time "the kulaks as a class" should be liquidated. Inasmuch as not only rich or well-to-do Ukrainian peasants were considered to be "kulaks," but all those who resisted collectivization, this was an order calling for the extermination of all Ukrainian peasants, that is, an order of conscious genocide.

The extermination of the Ukrainian peasantry was carried out with unrelenting savagery. The government confiscated all but a meager portion of the food produced by the Ukraine, and allocated most of the small quantity remaining to the cities. In this way, the Communist government created an artificial famine calculated to wipe out the rebellious peasants or starve them into submission. That policy succeeded, and with a vengence.

Millions died. Millions more were deported. And the Ukrainian resistance quickly collapsed.

And what was the response of the world to these actions?

Essentially, Mr. President, the nations of the world ignored the Ukrainian slaughter. To be fair. some charitable organizations did attempt to relieve the famine, but their efforts were rebuffed by the government. As Stalin later admitted to Winston Churchill, the "kulaks had to be dealt with."

Professor Plyushch puts the matter plainly:

> These were the years which covered with eternal shame not only those who arranged the famine and terror . . . but also the heads of governments of Western Europe, North America and the intellectual elite of the whole world, who viewed these horrors in silence.

While the Ukrainian people endured this agony, we remained silent. We must never, never remain silent again.

Mr. President, the United States has a chance to raise its voice, to join with a chorus of 83 nations that have declared genocide an international crime, one that must be punished. The Convention for the Prevention and Punishment of the Crime of Genocide is a noble document that deserves the ratification of the Senate. We cannot allow the events that occurred half a century ago in the Ukraine to repeat themselves. We cannot allow genocide.

## CETA AND FIGHTING THE WRONG FIGHT

Mr. PROXMIRE. Mr. President, on Friday, August 25 the Senate overwhelmingly passed the Comprehensive Employment and Training Act reauthorization bill. I was one of the few who voted against the final passage of this bill. Why did I vote as I did?

FINE ATTEMPT TO IMPROVE TROUBLED PROGRAMS

First of all, I would like to commend my colleague from Wisconsin, Senator NELSON, and the other members of the Human Resources Committee for their fine efforts to find remedies for the all too well-known problems of waste, abuse, and scandal within the numerous programs of CETA, particularly public service jobs.

Hopefully, the new provisions provided for in the Senate bill will result in a significant improvement in the operation of these troubled programs. However, it remains to be seen, if in fact, these legislative medicines will even make healthier, let alone cure the sick CETA patients.

ECONOMY STRONG AND EMPLOYMENT GROWING

Mr. President, it is clear to me that inflation and not unemployment is the number one economic problem facing our Nation. Unemployment has fallen sharply during the present strong economic recovery. Unemployment was running close to 9 percent during the second quarter of 1975. It is now less than 6 percent. Over the last year alone, total employment has grown by more than 3.5 million. The proportion of the population that is employed is close to an alltime high.

So, Mr. President, our economy is generating jobs at a prodigious rate and this has resulted in a brightening of the job picture for virtually every category of worker.

DOUBLE DIGIT INFLATION RETURNS

Now what of inflation? During the first half of this year, consumer prices were increasing at a double digit rate. And inflation is having a devastating effect on many of the economically weakest groups of Americans, the poor, the old, and the young. It is very clear to me that we will continue to lose the fight against inflation until the Congress moves quickly and decisively to hold down and even reduce Federal spending.

NEED TO PHASE DOWN COSTLY CETA PROGRAMS

Now the Congressional Budget Office says that the cost of this CETA bill could run as much as $46.3 billion over the life of the authorization. That is a rate of spending of over $11 billion per year. With unemployment dropping, we should be phasing down public service jobs and other CETA programs but there are no phase downs or job slot reductions in this bill. Rather than place a ceiling and a phase down mechanism in the bill, the committee continued to commit us to the sky is the limit approach to budgeting by authorizing "such sums as may be necessary". That phrase "such sums as may be necessary" is an open invitation for budget busting by the powerful lobbyists who favor these types of programs.

Mr. President, I believe our Nation must provide training and public service job opportunities to its citizens, but the Federal Government is spending six times more on CETA programs today than it was spending for them just 4 years ago. No wonder there are serious management problems with these programs. Clearly, we have moved too fast in this area.

With strong growth of the economy, the giant Federal deficit of almost $50 billion and double digit inflation back upon us, it is time to slow down and reverse the growth of CETA programs. Because the Comprehensive Employment and Training Act Amendments of 1978 did not do this, I felt compelled to vote against it.

## ORDER THAT HOUSE JOINT RESOLUTION 1088 BE HELD AT THE DESK

Mr. PROXMIRE. Mr. President, House Joint Resolution 1088, which is the New York City fiscal measure which we debated at some length, has passed the House of Representatives. It needs appropriation action, however, to make it effective. I have discussed this very briefly with Senator MAGNUSON, Senator MOYNIHAN, and other interested people, but unfortunately I have not had an opportunity to discuss it with the Senator from North Dakota (Mr. YOUNG), who is the ranking minority member of the Appropriations Committee.

I ask unanimous consent that when received that bill be held at the desk pending further disposition. If anyone objects to the request, it will go to the Appropriations Committee. It is, however, a matter that should be acted on promptly. It was debated at great length, as I say, in the authorization process. The authorization and appropriation measures are almost identical, and this request would simply permit us to determine whether or not any Senator would object to having it taken up directly. If so, as I say, it would go to the committee.

Mr. ROBERT C. BYRD. Will the Senator revise that request to provide that it be held at the desk for 24 hours pending further disposition?

Mr. PROXMIRE. Mr. President, I make that request; I ask unanimous consent that the bill be held at the desk for 24 hours pending other disposition in the meantime.

Mr. WALLOP. Mr. President, may I inquire, is it the Senator's intention, or should someone else notify Senator YOUNG?

Mr. PROXMIRE. Yes, it is my intention to notify Senator YOUNG and get his permission. In the event he objects, it would go to the Appropriations Committee. We will make sure that he has an opportunity to register an objection before we act on it.

Mr. WALLOP. Very well, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 10 a.m. tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR ROUTINE MORNING BUSINESS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on to-

morrow morning after the two leaders are recognized that there be a brief period for the transaction of routine morning business not to extend beyond 10 minutes, with statements limited therein to 2 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

## CONFERENCE REPORT ON NATURAL GAS BILL

Mr. ROBERT C. BYRD. Mr. President, it is anticipated that the conference report on natural gas may be called up tomorrow morning. It is hoped that an agreement can be entered into whereby a definite date and hour could be set for a vote on the motion to recommit the conference report.

It is also hoped that included in that agreement can be a provision that no tabling motion with respect to the conference report will be in order and that this will allow Senators then to debate the conference report beginning tomorrow and through such hour on next Wednesday as agreed upon for the vote on the motion to recommit.

It would also be hoped that it might be possible to operate on a double track at some point between now and next Wednesday if such an agreement is entered into, provided no Senator sought the floor to speak on the natural gas conference report.

So that is what is possibly in the offing tomorrow. It is not assured, but in talking with various principals on both sides of the aisle and on both sides of the issue there seems to be a willingness to enter into that kind of agreement. But the agreement will not be presented today. It will not be presented until in the morning at 10 o'clock.

## RECESS UNTIL 10 A.M. TOMORROW

Mr. PROXMIRE. Mr. President, I move, under the previous order, that the Senate stand in recess until 10 a.m. tomorrow.

The motion was agreed to; and 6:35 p.m. the Senate recessed until tomorrow, Thursday, September 7, 1978, at 10 a.m.

## NOMINATIONS

Executive nominations received by the Senate August 28, 1978, under authority of the order of the Senate of August 25, 1978:

### FEDERAL RESERVE SYSTEM

Nancy Hays Teeters, of Indiana, to be a member of the board of governors of the Federal Reserve System for the unexpired term of 14 years from February 1, 1970, vice Arthur F. Burns, resigned.

### THE JUDICIARY

Bruce S. Jenkins, of Utah, to be U.S. district judge for the district of Utah, vice Willis W. Ritter, deceased.

Executive nomination received by the Senate September 1, 1978, under authority of the order of the Senate of August 25, 1978.

### SECURITIES INVESTOR PROTECTION CORPORATION

Adolph Philip Schuman, of California, to be a director of the Securities Investor Protection Corporation for a term expiring December 31, 1978, vice Jerome W. Van Gorkom, term expired.

Adolph Philip Schuman, of California, to be a director of the Securities Investor Protection Corporation for a term expiring December 31, 1981 (reappointment).

Executive nominations received by the Senate September 6, 1978:

### NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Subject to qualifications provided by law, the following for permanent appointment to the grades indicated in the National Oceanic and Atmospheric Administration:

*To be lieutenant (junior grade)*

Joseph C. Talbott

*To be ensigns*

David S. Goldenberg
John W. Humphrey, Jr.
Fredric R. Plotkin
V. Dale Ross
Diane E. Strayer
William R. Bergmann
Michael Mallette
James M. Sherwood

### IN THE ARMY

The following Army National Guard of the United States officer for appointment in the Adjutant General's Corps, Reserve of the Army, under the provisions of title 10, United States Code, sections 593(a) and 3392:

*To be major general*

Brig. Gen. Edward Clarence Binder, [redacted]

The following-named Army Medical Department officer for temporary appointment in the Army of the United States, to the grade indicated, under the provisions of title 10, United States Code, sections 3442 and 3447.

*To be brigadier general, Medical Corps*

Col. Andre John Ognibene, [redacted], Medical Corps, U.S. Army.

The following-named Army National Guard of the United States officer for appointment to the grade of brigadier general as a reserve commissioned officer of the Army and to the grade of brigadier general, Army of the United States, under the provision of title 10, United States Code, sections 593a, 3385, 3442, and 3447:

*To be brigadier general*

Col. Herbert R. Temple, Jr., [redacted].

Col. Junior Henry Burkhead, [redacted], for appointment to the grade of brigadier general in the Adjutant General's Corps, Army National Guard of the United States, under the provisions of title 10, United States Code, sections 593(a) and 3392.

### IN THE AIR FORCE

The following-named officers for promotion as a Reserve of the Air Force, under the appropriate provisions of chapter 35 and 837, title 10, United States Code:

#### LINE OF THE AIR FORCE

*Major to lieutenant colonel*

Abizaid, John G., [redacted].
Albers, Everett H., [redacted].
Alexander, Robert H., [redacted].
Allen, Harlan G., Jr., [redacted].
Anderson, Gerald R., [redacted].
Arant, Carl P., Jr., [redacted].
Armstrong, James E., [redacted].
Arnold, Kathryn S., [redacted].
Arthur, Guy B., III, [redacted].
Artman, Thomas G., [redacted].
Asseoguerra, Casimiro, [redacted].
Astafan, Nora A., [redacted].
Auger, Robert C., [redacted].
Backes, Clarence M., [redacted].
Bacon, William R., [redacted].
Baczynski, John L., [redacted].
Baker, Gerald C., [redacted].
Barber, Howard C., [redacted].
Barber, Lawrence E., [redacted].
Barner, Robert M., [redacted].
Barnett, Bobby G., [redacted].
Barr, Sammie, [redacted].
Barry, Joseph G., [redacted].
Bates, Larrie C., [redacted].
Bauwens, Joseph E., [redacted].
Beall, Thomas W., [redacted].
Beason, John P., [redacted].
Beavers, Roy K., [redacted].
Belk, Marvin L., [redacted].
Bell, Elvin C., [redacted].
Bell, James H., [redacted].
Bensch, Harold P., [redacted].
Beshara, Thomas M., [redacted].
Beucher, Terence E., [redacted].
Bishop, Pledger M., Jr., [redacted].
Bitzow, Roy L., [redacted].
Blackmon, Zeb, Jr., [redacted].
Boab, Patrick S., [redacted].
Boone, Nicholas D., [redacted].
Bortness, Leroy M., [redacted].
Boston, Leo S., [redacted].
Bovingdon, George G., [redacted].
Bowman, Hal K., [redacted].
Brackett, William R., Jr., [redacted].
Brainerd, Peter T., [redacted].
Branch, Edward A., [redacted].
Brandenburg, Lowell E., [redacted].
Brothers, Willis E., [redacted].
Brown, Alan R., [redacted].
Brown, Charles V., [redacted].
Bruggeman, Norbert A., [redacted].
Bucholz, Theodore C., [redacted].
Buoni, William G., [redacted].
Burch, George A., [redacted].
Burch, Ronald K., [redacted].
Burk, Bill E., [redacted].
Calland, Richard A., [redacted].
Campbell, Joe L., [redacted].
Cantrell, George F., [redacted].
Carlson, Lyle R., [redacted].
Carter, Walter C., Jr., [redacted].
Cary, Bryan S., [redacted].
Cates, Robert E., [redacted].
Chancellor, Mason T., [redacted].
Chatham, Charles C., [redacted].
Chavez, Jose R., [redacted].
Chiacchieri, Peter P., [redacted].
Chrisman, Albert E., [redacted].
Cisar, Thomas E., [redacted].
Clark, Kenneth W., II, [redacted].
Clark, Robert M., [redacted].
Clayton, Robert F., [redacted].
Coban, Donald C., [redacted].
Cobb, James B., [redacted].
Colaw, Larry W., [redacted].
Colbert, Robert M., [redacted].
Collier, John W., [redacted].
Collins, Frank A., [redacted].
Conner, Timothy J., [redacted].
Cornelio, Emelio M., [redacted].
Courtright, Leroy E., [redacted].

MEDICAL CORPS

Almon C. Wilson
J. William Cox

SUPPLY CORPS

Shirley D. Frost
Gerald J. Thompson

CIVIL ENGINEER CORPS

William M. Zobel

DENTAL CORPS

John B. Holmes

# HOUSE OF REPRESENTATIVES—*Wednesday, September 6, 1978*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

*Thus saith the Lord God; in returning and rest shall you be saved; in quietness and in confidence shall be your strength.*—Isaiah 30: 15.

Almighty God, our Father, returning from a busy work period we turn to Thee praying that we may feel the touch of Thy spirit upon us as we begin the work of a busy month. As we labor day by day grant unto us wisdom for the decisions we have to make, courage to carry out our decisions for the benefit of our people, and good will to motivate us in our endeavors.

Guide our President and the leaders of Egypt and Israel as they seek to find a way to live together in peace, with justice and for good will. In so doing may they strengthen the causes of freedom and peace in our world.

We pray for Pope John Paul I. May he lead his followers and all people in the ways of truth and love. God bless him as he assumes his place of leadership in his church and in the hearts of all good people; for Thy glory and the benefit of the human race. Amen.

## CALL OF THE HOUSE

Mr. ASHBROOK. Mr. Speaker, under clause 1, rule I, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Without objection, a call of the House is ordered.

There was no objection.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 724]

| | | |
|---|---|---|
| Abdnor | Diggs | Harrington |
| Alexander | Dodd | Harsha |
| Ambro | Dornan | Hillis |
| Ammerman | Drinan | Hollenbeck |
| Armstrong | Duncan, Oreg. | Huckaby |
| Beard, R.I. | Edgar | Hyde |
| Bellenson | Edwards, Okla. | Johnson, Colo. |
| Bevill | English | Jones, Tenn. |
| Boggs | Erlenborn | Kasten |
| Bonker | Evans, Ind. | Krueger |
| Breckinridge | Fary | Lagomarsino |
| Buchanan | Fithian | Lehman |
| Burke, Calif. | Flippo | Lent |
| Burke, Fla. | Flood | Lloyd, Tenn. |
| Burleson, Tex. | Flowers | McCormack |
| Burton, Phillip | Ford, Mich. | McDonald |
| Byron | Ford, Tenn. | McEwen |
| Chappell | Forsythe | McKinney |
| Chisholm | Fraser | Mann |
| Clawson, Del | Frey | Mikva |
| Cochran | Fuqua | Milford |
| Conyers | Garcia | Miller, Calif. |
| Cornwell | Gibbons | Myers, Gary |
| Coughlin | Goldwater | Nichols |
| Dent | Hall | O'Brien |
| Devine | Hansen | Oakar |
| Dickinson | Harkin | Pattison |
| Pettis | Sawyer | Thone |
| Poage | Scheuer | Traxler |
| Pressler | Shipley | Tsongas |
| Preyer | Sisk | Tucker |
| Quie | Skubitz | Udall |
| Quillen | Spellman | Wiggins |
| Rahall | Steiger | Wilson, Tex. |
| Richmond | Stokes | Wirth |
| Roberts | Stump | Wright |
| Rodino | Symms | Wydler |
| Rostenkowski | Taylor | Young, Alaska |
| Sarasin | Teague | Young, Tex. |

The SPEAKER. On this rollcall 315 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

## THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

## MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 15. An act to extend and amend expiring elementary and secondary education programs, and for other purposes;

H.R. 112. An act to amend the Internal Revenue Code of 1954 to reduce the excise tax on the investment income of private foundations from 4 percent to 2 percent;

H.R. 1337. An act to amend the Internal Revenue Code of 1954 with respect to excise tax on certain trucks, buses, tractors et cetera;

H.R. 1920. An act to amend section 5064 of the Internal Revenue Code of 1954 to provide for refund of tax on distilled spirits, wines, rectified products, and beer lost or rendered unmarketable due to fire, flood, casualty, or other disaster, or to breakage, destruction, or other damage (excluding theft) resulting from vandalism or malicious mischief while held for sale;

H.R. 3702. An act to amend title 10, United States Code, to make certain changes in the Retired Serviceman's Family Protection Plan and the Survivor Benefit Plan as authorized by chapter 73 of that title, and for other purposes;

H.R. 4319. An act to amend subchapter III of chapter 83 of title 5, United States Code, to provide that employees who retire after 5 years of service, in certain instances, may be eligible to retain their life and health insurance benefits, and for other purposes;

H.R. 4320. An act to amend chapter 83 of title 5, United States Code, to discontinue civil service annuity payments for periods of employment as a justice or judge of the United States, and for other purposes;

H.R. 6536. An act to establish an actuarially sound basis for financing retirement benefits for policemen, firemen, teachers, and judges of the District of Columbia and to make certain changes in such benefits;

H.R. 7320. An act to revise miscellaneous timing requirements of the revenue laws, and for other purposes;

H.R. 7819. An act to complement the Vienna Convention on Diplomatic Relations;

H.R. 8811. An act to amend section 7447 of the Internal Revenue Code of 1954 with respect to the revocation of an election to receive retired pay as a judge of the Tax Court;

H.R. 9471. An act to amend title 5, United States Code, to provide that Japanese-Americans shall be allowed civil service retirement credit for time spent in World War II internment camps;

H.R. 10126. An act to amend title 5, United States Code, to establish a program to increase part-time career employment within the civil service;

H.R. 10161. An act for the relief of Eastern Telephone Supply & Manufacturing, Inc.;

H.R. 12232. An act to amend the Unemployment Compensation Amendments of 1976 with respect to the National Commission on Unemployment Compensation, and for other purposes; and

H.R. 12380. An act to amend the Federal-State Extended Unemployment Compensation Act of 1970 with respect to an individual's eligibility period for benefits under such Act.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 8149) entitled "An act to provide customs procedural reform, and for other purposes."

The message also announced that the Vice President, pursuant to Public Law 95–45, appointed Mr. STAFFORD (chairman), in lieu of Mr. SPARKMAN, resigned; and Mr. SCOTT to attend, on the part of the Senate, the 65th Interparliamentary Union Conference to be held in Bonn, Germany, September 2 to 14, 1978.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 15) entitled "An act to extend and amend expiring elementary and secondary education programs, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. PELL, Mr. RANDOLPH, Mr. KENNEDY, Mr. EAGLETON, Mr. WILLIAMS, Mr. STAFFORD, Mr. SCHWEIKER, Mr. HAYAKAWA, and Mr. JAVITS to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills and a concurrent resolution of the following titles, in

which the concurrence of the House is requested:

S. 408. An act to amend title 5, United States Code, to extend certain benefits to former employees of county committees established pursuant to section 8(b) of the Soil Conservation and Domestic Allotment Act, and for other purposes;

S. 1274. An act to provide the Attorney General of the United States with authority to contract with State and local authorities for the safekeeping, care, and subsistence of all Federal prisoners;

S. 2366. An act for the relief of Keum Sun Lee;

S. 2570. An act to amend the Comprehensive Employment and Training Act of 1973 to provide improved employment and training services, to extend the authorization, and for other purposes;

S. 2640. An act to reform the civil service laws;

S. 3036. An act to amend the Coinage Act of 1965 to change the size, weight, and design of the one-dollar coin, and for other purposes;

S. 3184. An act to designate the Indian Health Facility in Ada, Okla., the "Carl Albert Indian Health Facility";

S. 3274. An act to designate the United States Department of Agriculture's Bee Research Laboratory in Tucson, Arizona, as the "Carl Hayden Bee Research Center";

S. 3336. An act to enable the Department of Justice and the Administrative Office of the United States Courts to provide services and special supervision to drug dependent Federal offenders in an efficient and effective manner;

S. 3373. An act to amend title 10, United States Code, to authorize the Secretary of Defense to provide transportation to the Girl Scouts of the United States of America in connection with International World Friendship Events or Troops on Foreign Soil meetings, and for other purposes;

S. 3375. An act to amend title 28 of the United States Code to make certain changes in the places of holding Federal district courts, in the divisions within judicial districts, and in judicial district dividing lines;

S. 3446. An act to authorize the President of the United States to present on behalf of the Congress a specially struck gold medal to Ben Abruzzo, Maxie Anderson, and Larry Newman; and

S. Con. Res. 105. Concurrent resolution authorizing the printing of additional copies of the final report and of volume II of the executive session hearings on the Korean influence inquiry.

## COMMUNICATIONS FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communications from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
*August 18, 1978.*

Hon. THOMAS P. O'NEILL, Jr.,
*The Speaker, House of Representatives, Washington, D.C.*

DEAR MR. SPEAKER: Pursuant to the permission granted on August 17, 1978, the Clerk has received this date the following messages from the Secretary of the Senate:

That the Senate agree to the amendments of the House of Representatives to the amendments of the Senate numbered 1, 5, 19, 20, and 33 to H.R. 13468; and

That the Senate agree to the Report of the Committee of Conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill H.R. 12602.

With kind regards, I am,
Sincerely,
EDMUND L. HENSHAW, Jr.,
*Clerk, House of Representatives.*

WASHINGTON, D.C.
*August 21, 1978.*

Hon. THOMAS P. O'NEILL, Jr.,
*The Speaker, House of Representatives, Washington, D.C.*

DEAR MR. SPEAKER: Pursuant to the permission granted on August 17, 1978, the Clerk has received this date the following message from the Secretary of the Senate:

That the Senate passed without amendment H.R. 8342, An Act to amend title 5, United States Code, to provide for the application of local withholding taxes to Federal employees who are residents of such locality.

With kind regards, I am,
Sincerely,
EDMUND L. HENSHAW, Jr.,
*Clerk, House of Representatives.*
By W. RAYMOND COLLEY,
*Deputy Clerk.*

---

WASHINGTON, D.C.,
*August 23, 1978.*

Hon. THOMAS P. O'NEILL, Jr.,
*The Speaker, House of Representatives, Washington, D.C.*

DEAR MR. SPEAKER: Pursuant to the permission granted on August 17, 1978, the Clerk has received this date the following messages from the Secretary of the Senate:

That the Senate passed without amendment H.R. 185, Coast Guard employees and H.J. Res. 554, D.C. representation;

That the Senate agree to the Report of the Committee of Conference on the disagreeing votes of the two Houses on the amendment of the House of Representatives to the bill S. 9;

That the Senate agree to the Report of the Committee of Conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill H.R. 12240; and

That the Senate agree to the Report of the Committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H.R. 12927.

With kind regards, I am,
Sincerely,
EDMUND L. HENSHAW, Jr.,
*Clerk, House of Representatives.*

---

*Washington, D.C.,*
*August 28, 1978.*

Hon. THOMAS P. O'NEILL, Jr.,
*The Speaker, House of Representatives, Washington, D.C.*

DEAR MR. SPEAKER: Pursuant to the permission granted on August 17, 1978, the Clerk has received this date the following messages from the Secretary of the Senate:

That the Senate passed without amendment H.R. 2952, H.R. 3532, H.R. 7161. H.R. 7162, H.R. 8397, H.R. 8471, and H.R. 13235;

That the Senate passed without amendment H.J. Res. 773 and H.J. Res. 1014;

That the Senate agree to the amendments of the House of Representatives to the amendments of the Senate numbered 3 and 4, and that the Senate agree to the amendment of the House of Representatives to the amendment of the Senate to the title of the bill H.R. 2931;

That the Senate agree to the Report of the Committee of the Conference on the disagreeing votes of the two Houses on the amendment of the House of Representatives to the bill S. 1633; and

That the Senate agree to the Report of the Committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H.R. 13467.

With kind regards, I am,
Sincerely,
EDMUND L. HENSHAW, Jr.,
*Clerk, House of Representatives.*

## COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
*August 18, 1978.*

Hon. THOMAS P. O'NEILL, Jr.,
*The Speaker, House of Representatives, Washington, D.C.*

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 6:20 p.m. on Thursday, August 17, 1978, and said to contain "H.R. 10929, An Act to authorize appropriations for fiscal year 1979 for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons and for research, development, test and evaluation for the Armed Forces to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, to authorize appropriations for civil defense, and for other purposes," and a veto message thereon.

With kind regards, I am,
Sincerely,
EDMUND L. HENSHAW, Jr.,
*Clerk, House of Representatives.*

## DEPARTMENT OF DEFENSE APPROPRIATION AUTHORIZATION ACT, 1979—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95-377)

The SPEAKER laid before the House the following veto message from the President of the United States:

*To the House of Representatives:*

I am returning without my approval H.R. 10929, the "Department of Defense Appropriation Authorization Act, 1979." I am doing so because I cannot, consistently with my constitutional responsibilities, sign into law a bill that in my view would weaken our national security in certain critical areas and wastes scarce defense dollars. The Congress' inclusion in this bill of a number of lower priority programs would force out of our defense budget certain central elements of our program, items needed now to modernize and bolster our military forces.

I believe that the defense of the United States needs to be strengthened. An adequate defense is the single most important concern I have as President. Accordingly, I submitted to the Congress in January of this year a budget request for the Department of Defense which would if enacted provide the defense we need. It requested $126.0 billion for the Department of Defense for Fiscal Year 1979. That amount was judged by me and by the Secretary of Defense to be adequate to provide for the military security of this country in Fiscal Year 1979, provided it was wisely spent.

The bill I am returning does not spend wisely. Instead, it actually would lead to less defense capability than I have requested. It does this by eliminating funds for high priority defense requirements and adding funds for purposes which do not meet our defense needs. Most notably, it would take nearly $2 billion from the total and set it aside

for purchase of a nuclear-powered aircraft carrier—a ship which in the end would cost at least $2.4 billion, plus additional billions for its aircraft and the additional ships needed to defend and escort it.

We need more immediate improvements in our defense forces. A new nuclear-powered aircraft carrier would not be commissioned until 1987.

To spend $2 billion in defense dollars in that way would ignore much more serious and immediate defense needs. Other programs have been cut, during the appropriation process as well, to stay within Congressional budget limits. The effect would thus be to take away funds urgently needed by the Army, Navy, Air Force and Marine Corps for high priority programs—and to use those funds to build the most expensive ship in history. The result would be to weaken our military security in several critical areas, particularly during the next two years, at a time when we should be strengthening it. Within the $126.0 billion allocated for defense, we cannot have both an adequately balanced defense program and the luxury of an unneeded nuclear-powered aircraft carrier.

In pushing a nuclear-powered aircraft carrier into a $126.0 billion defense budget, H.R. 10929 would result in reduction or elimination of these essential programs, and a consequent weakening of our defense posture:

—*Weapons and equipment for the Army.* I requested a $1 billion increase to strengthen our ground forces, particularly our NATO-oriented forces, by providing more helicopters, combat vehicles and ammunition for our front-line forces. Adding the nuclear-powered aircraft carrier means eliminating $800 million of that increase.

—*Weapons and equipment for the Air Force.* I requested more funds for airlift, electronic warfare equipment and electronically guided ordnance. Adding the nuclear-powered aircraft carrier means eliminating $200 million of this increase.

—*Readiness funds.* It makes no sense to have military forces if their equipment is not in condition to fight. I requested an increase of $1 billion for items which are not glamorous, but which provide the immediate fighting capability of our forces—funds (requiring appropriation but not prior authorization) for repairs of weapons, spare parts for vehicles and aircraft, ship overhauls, training of personnel, communications, and logistical suppport to move equipment to where it is needed. Adding the nuclear-powered aircraft carrier means eliminating half of that increase in fighting capability—some $500 million.

—*Research and development.* To sustain our position of excellence in a world of weapons increasingly dependent on technology, I requested a 3% real growth in defense research and development. Adding the nuclear-powered aircraft carrier leads to an actual reduction in research and development. The bill also shifts some R&D funds from high priority programs to less important ones.

Our Navy has for a decade been moving in the direction of larger and larger, more-and-more-costly ships, and fewer of them. As a consequence our fleet today is smaller than at any time since 1940. We need a fleet that includes more vessels that can perform our Navy's mission but that are not, as this one would be, so designed as to be prohibitively expensive to build. The Navy does not need a fifth nuclear-powered aircraft carrier. It can maintain a twelve-carrier fleet and maintain the fighting capability it needs from a conventionally powered carrier, which I shall request in my budget for next year, at a saving of $1 billion for that single ship. Without this kind of discipline and control of the cost of ships, our Navy will not long be able to carry out its missions.

For these reasons, I must withhold my approval from H.R. 10929. I adhere firmly to my request that the Congress provide $126.0 billion for defense in Fiscal Year 1979. But I ask that the Congress delete the authorization for the nuclear-powered aircraft carrier, and use that essential $2 billion of that $126.0 billion instead for as many of our programs as possible from the following critical areas:

*$1 billion for Army and Air Force equipment*—For helicopters, transport aircraft, combat vehicles, electronic equipment, ammunition and ordnance and other weapons and equipment.

*$500 million for improving readiness in all the armed services*—For a wide variety of items, ranging from repair of weapons to spare parts stockage to improved training and logistical support.

*Up to $500 million for research and development*—For programs proposed in my FY 79 budget but deleted by one or another Congressional action.

*Naval Ships*—It is crucial to maintain an appropriate overall annual level of ship construction. The Congress should return all of the general purpose ships requested in our budget.

These are the ways in which our defense dollars need to be spent. These are the ways in which they will add to our military security, by obtaining the greatest military capability for each dollar and by focusing the effort where more effort is needed.

In light of the continuing Soviet build-up, we must not reduce our own real defense capability, either by cutting the budget amount I have requested, or by substituting for high priority defense requirements programs which are less urgent or less effective.

If we do not spend our defense dollars wisely, we do not provide adequately for the security of our country. I know that the Congress and I share common goals. I ask the Congress to cooperate with me to help our armed forces use their funds in ways which produce the greatest fighting power, and to provide the men and women of our armed forces with the kinds of weapons, equipment and other items of support which they need to do their jobs.

JIMMY CARTER.

THE WHITE HOUSE, *August 17, 1978.*

The SPEAKER. The objections of the President will be spread at large upon the Journal, and the message and bill will be printed as a House document.

Pursuant to the order of the House of August 17, 1978, further proceedings on the veto message will be postponed until Thursday, September 7, 1978.

## COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
*August 21, 1978.*

Hon. THOMAS P. O'NEILL, Jr.,
*The Speaker, U.S. House of Representatives, Washington, D.C.*

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 12:52 p.m. on Monday, August 21, 1978, and said to contain a message from the President wherein he transmits the report on international transfers of technology required by section 24(c) of Public Law 95–92, the International Security Assistance Act of 1977.

With kind regards, I am,
Sincerely,

EDMUND L. HENSHAW, Jr.,
*Clerk, House of Representatives.*
By W. RAYMOND COLLEY,
*Deputy Clerk.*

## REPORT ON INTERNATIONAL TRANSFERS OF TECHNOLOGY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on International Relations:

*To the Congress of the United States:*

I transmit herewith the report on international transfers of technology required by section 24(c) of Public Law 95–92, the International Security Assistance Act of 1977.

JIMMY CARTER,
THE WHITE HOUSE, *August 21, 1978.*

## COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
*August 31, 1978.*

Hon. THOMAS P. O'NEILL, Jr.,
*The Speaker, House of Representatives, Washington, D.C.*

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 2:35 p.m. on Thursday, August 31, 1978, and said to contain a message from the President wherein he transmits a Federal Pay Comparability Alternative Plan.

With kind regards, I am,
Sincerely,

EDMUND L. HENSHAW, Jr.,
*Clerk, House of Representatives*
By W. RAYMOND COLLEY,
*Deputy Clerk.*

## FEDERAL PAY COMPARABILITY ALTERNATIVE PLAN—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–378)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Post Office and Civil Service and ordered to be printed:

*To the Congress of the United States:*

Under the Pay Comparability Act of 1970, an adjustment in Federal white collar pay will be required on October 1.

I have reviewed the report of my Pay Agent and the recommendations of the Advisory Committee on Federal Pay relative to a pay adjustment. Their findings indicate that an average 8.4 percent increase, at a cost of $4.5 billion, will be required to achieve comparability with the private sector.

I support comparability in pay between the Federal Government and the private sector. It is essential to ensure that the Federal Government continues to attract and retain qualified and dedicated employees. The Federal Government's civilian and military personnel have given the country loyal and competent service, and I would normally have no hesitancy in ordering a pay raise achieving comparability. However, pay comparability must be viewed in the light of the overall economic situation now facing our country. For that reason, my decision about pay comparability this year is especially difficult.

Today the greatest single threat to our national economic growth and the jobs and prosperity of our people is inflation. It persists because all of us—business and labor, farmers and consumers—are caught on a treadmill that none of us stop alone. Each group desires to raise its income to meet rising costs; eventually we all lose the inflation battle together.

To curb the wage and price spiral, I proposed last spring that in each industry and sector of the economy, wage increases this year be held significantly below the average increases for the two preceding years. The Federal Government should set an example in this effort. A Federal white collar civilian and military increase of 5.5 percent would be consistent with this guideline.

The pay act gives me the authority to propose an alternative pay adjustment which I consider appropriate in the light of, "economic conditions affecting the general welfare." Therefore I am submitting to the Congress an alternative plan for a 5.5 percent pay increase. This will allow the Federal Government to set an example for labor and industry and lead the fight against inflation by example, and not just words alone.

Accordingly, I strongly urge the Congress to support the alternative recommendation which is attached.

JIMMY CARTER.

THE WHITE HOUSE, *August 31, 1978.*

## COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
*September 1, 1978.*

Hon. THOMAS P. O'NEILL, Jr.,
*The Speaker, House of Representatives,*
*Washington, D.C.*

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 3:20 p.m. on Friday, September 1, 1978, and said to contain a message from the President wherein he transmits a report on progress made towards a negotiated settlement on Cyprus.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
*Clerk, House of Representatives.*
By W. RAYMOND COLLEY,
*Deputy Clerk.*

## REPORT ON PROGRESS MADE TOWARD A NEGOTIATED SETTLEMENT ON CYPRUS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–379)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on International Relations and ordered to be printed:

*To the Congress of the United States:*

As required by Public Law 94–104, this report describes the progress that has been made towards a negotiated settlement on Cyprus in the past sixty days.

The last report described proposals submitted by the Turkish Cypriots on April 13, and noted several expressions of flexibility subsequently made by the Turkish side. In July there were further encouraging signs. Both the Government of Cyprus and the Turkish Cypriot leadership put forward fresh and promising proposals for the resettlement of the important commercial and resort city of Varosha (New Famagusta). Varosha has been deserted and under Turkish control since the 1974 fighting. Significantly, both sides foresee that progress on this issue will lead to a resumption of the intercommunal negotiations.

We have urged the two Cypriot parties to give these proposals careful consideration, and plan to continue to encourage a satisfactory compromise on Varosha, one we hope will lead them to reconvene the intercommunal negotiations under the aegis of the Secretary General of the United Nations.

Both the Congress and the Administration feel that the United States 1) should continue to play an active role in seeking a just and lasting Cyprus settlement, and 2) should continue to support the efforts of Secretary General Waldheim. On August 14, the conference committee on the Security Assistance Bill approved the language to end the Turkish Arms Embargo. I consider this action appropriate and necessary to our continuing impartial and constructive role.

JIMMY CARTER.

THE WHITE HOUSE, *September 1, 1978.*

## ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair desires to announce that pursuant to the authority granted him on Thursday, August 17, 1978, he did on Friday, August 25, 1978, sign the following enrolled joint resolution:

House Joint Resolution 554, joint resolution proposing an amendment to the Constitution to provide for representation of the District of Columbia in the Congress.

## ARE YOU SAFE IN AN AUTOMOBILE?

(Mr. COLLINS of Texas asked and was given permission to address the House for 1 minute).

Mr. COLLINS of Texas. Mr. Speaker, the Oversight Committee of Commerce has just completed an extensive study on car safety. This survey concentrated specifically on Firestone 500 automobile tires.

The basis of the survey was that over the past 5 years 34 people were killed in cars that had Firestone 500 tires. It was not shown conclusively that the tires themselves were the cause of any of these accidents as high speed and improper tire care were also contributing factors. But automobile safety data bears out that during this same 5-year period, about 106,000 people were killed in auto accidents involving the use of alcohol.

Yet the NHTSA has never come up with any study to solve DWI. Why not concentrate on our major automobile safety concern—drunk drivers.

Instead of worrying about 106,000, they concentrate on 34 cases. About 15 years ago, steel radial tries were introduced into the market on a large scale.

Just like the Model T Ford they started slowly and developed research and improved tires. When steel radial tires first came out, I left them alone, as I wanted to wait until they were fully developed.

Steel radial tires have successfully established many proved achievements. Steel radials get twice the mileage of regular tires. They provide 15 percent smoother ride on the highway. Steel radials get 15 percent better traction for safety on wet, slippery roads. Steel radials get 10 percent better gas mileage.

Yet we held hearings where some witnesses claimed that Firestone 500 tires had blown out under pressure. As the facts came out many cars were going at excessive speeds with some over 80 miles per hour. Also the facts indicated that many had low tire pressure. Many times the tires had been on rough and hot roads.

If the tires get twice the mileage, ride

smoother, save gasoline and provide better traction on slippery roads, that is a good record. The few tires with blowouts seemed to have the serious problem of a DWI driver, high speed or low air pressure.

I think this new Firestone 721 is as good as any tire on the road. After the hearings I had my two cars fully equipped with the Firestone 721.

Let's get on with something important. Let's find out how to get the DWI's off of the highway.

## INTRODUCTION OF CLARIFYING LEGISLATION TO GIVE TAX CREDIT TO HOG FARMERS

(Mr. GRASSLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GRASSLEY. Mr. Speaker, in 1971, during consideration of the Revenue Act passed in that year, the Senate Finance Committee stated specifically that the investment credit was to be allowed for "a unitary system for raising hogs which includes automatic feed systems, special airflow units, slatted flooring, pens and partitions." The committee noted further,

> There is no other practical use for the structure and it can, therefore, be expected to be used only so long as the equipment it houses is used.

Despite this crystal clear language, the IRS continues to disallow the credit for such facilities. Despite a specific tax court decision pertaining to a similar type of facility for poultry, in which the position of the IRS was overruled, the IRS continues to frustrate the efforts of farmers in need of the investment credit. Just this morning, the Wall Street Journal printed a story noting how hog supplies simply cannot grow adequately, in part due to the substantial investments that must now be made in hog facilities.

I have been in touch with the IRS on this matter on several occasions and, though in a recent letter the agency indicated its intent to publish a revenue ruling dealing specifically with hog facilities, it appears that we in Congress must act to get the IRS to recognize Congress' original intent. Thus, I have today introduced legislation to specifically clarify that intent as expressed in the 1971 Senate report, and to provide retroactively the credit many farmers should have received since that year, for investments in hog facilities.

## THE DETERIORATING SITUATION IN NICARAGUA

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks, and include extraneous matter.)

Mr. RUDD. Mr. Speaker, the situation in Central America is deplorable and is gradually deteriorating. The deteriorating situation in Nicaragua has been caused by the arguments on the floor of this House to withdraw support from that nation's Government and by the deplorable, vacillating foreign policy of President Jimmy Carter's administration. President Carter bases his nonsupport of the friendly, duly elected Nicaraguan Government on violations of human rights. In contradiction, he apparently supports human rights violators—our enemies, such as Fidel Castro in Cuba.

The withdrawal of support for the Government of the country of Nicaragua portends the taking away of freedoms of a freely elected government and the establishment of a Marxist government in that country, creating another Communist disaster for our own country and for the Western Hemisphere, causing problems for us for generations to come.

Mr. Speaker, this is as predictable as what happened in Fidel Castro's bloody takeover in Cuba.

## THE CARTER ADMINISTRATION'S FOREIGN POLICY BUNGLING IN LATIN AMERICA

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. RUDD. Mr. Speaker, certain State Department officials are conducting a calculated campaign of deceit and propaganda against our allied anti-Communist friends throughout Latin America.

A column by Rowland Evans and Robert Novak in this morning's Washington Post details the outrageous misinformation and lies about Argentina that have been stated in testimony before Congress by Assistant Secretary of State Patricia Derian.

Similar propaganda and behind-the-scenes action by other U.S. officials, which have all the appearances of left-wing zealotry against anti-Communist governments, has been targeted against Nicaragua.

Under the banner of human rights, Assistant Secretary Derian and other Carter appointees in the State Department have mounted a concerted assault on Latin American military governments that, because of the ever-present Communist guerrilla revolutionary activity in these countries, must maintain stability and freedom by implementing certain restrictions that are not acceptable in our own country.

Either the administration's officials in the State Department are hopelessly naive and misinformed about the true situation in Latin America, or they are ideologically alined with the revolutionary elements that seek to overthrow the legitimate governments of our allies. This is a situation that cannot be tolerated, and such officials should be dismissed.

I would like to include the Evans and Novak column at this point in the RECORD, along with two well-informed reports from Nicaragua by Arizona Republic Latin Affairs editor Harold Milks, which show that our allies are relying on astute Members of Congress to help maintain our friendships and stability in this important region of our hemisphere:

[From the Washington Post, Sept. 6, 1978]

"UNDIPLOMATIC" INCIDENT

(By Rowland Evans and Robert Novak)

A thrice-repeated but unsubstantiated indictment of Argentina by Assistant Secretary of State Patricia Derian testifying publicly before Congress reveals the shattering impact on U.S. foreign policy of human-rights crusading.

Under questioning Aug. 9 by the House Inter-American affairs subcommittee, human-rights chief Derian responded with language seldom used by one friendly power to another, accusing the Argentine regime of killings, kidnappings and torture. So harsh was her language that the State Department tried to expunge it from the record. But apart from being undiplomatic, there is considerable doubt of accuracy.

The impact could prove tragic for U.S.-Argentine relations and perhaps for Argentina itself. Moderate and pro-U.S. elements within the Argentine junta have been weakened; deterioration of the U.S. position in the strategic southern corner of South America has been accelerated.

This cannot be dismissed as merely unfortunate ardor by an idealist unfamiliar with diplomacy. Deterioration of U.S. relations with Brazil, Chile and now Argentina too closely follows the scenario of Latin American specialists in the Carter administration who privately predicted the human-rights crusade would foster the left in the Western Hemisphere.

Concern that the human-rights tail is wagging the foreign-policy dog is spreading in both the administration and Congress. On Capitol Hill, growing attention is paid to the imminent loss of up to $1.4 billion in sales to Argentina—including $620 million in Export-Import Bank transactions.

So, when Derian testified Aug. 9, she was asked by subcommittee chairman Gus Yatron (D-Pa.) why her human-rights office recommended against the Export-Import Bank loans. Even Derian's own aides were taken aback by her answer.

"The reason for our advice was the continuing violation of basic human rights by Argentina. The systematic use of torture, summary execution of political dissidents, the disappearance and the imprisonment of thousands of individuals without charge, including mothers, churchmen, nuns, labor leaders, journalists, professors and members of human-rights organizations."

Moments later, Derian repeated her indictment, adding "kidnappings" and "unwarranted killings" this time. In her soft Mississippi accent, she read the litany a third time, concluding, "We see nothing to indicate that there is a genuine trend toward human rights."

Horrified officials in the State Department's Inter-American Bureau crossed out Derian's indictment in the transcript, but it was too late. Wood had gone to Argentina, where Pat Derian has become a household word. The U.S. ambassador in Buenos Aires was called in for a stiff protest; the Argentine ambassador in Washington was called home.

The tragedy is that Derian's outburst may well weaken the junta's relatively moderate elements headed by the president, Gen. Jorge Rafael Videla, and strengthen the extreme right. While President Carter's human rights admonitions probably have improved condi-

tions in Argentina, the point of diminishing returns has been reached.

Apart from undiplomatic ravages, was Derian telling the truth? Her office insists the Argentine junta has "executed 3,000 persons since seizing power in 1976 and at least another 5,000 persons are missing. But those figures come from private sources of dubious reliability. U.S. government bureaus with vastly more experience than Derian's say the figures cannot be verified and seem inflated.

Actually, the junta, in confronting bloody far-left revolt in 1976, used an iron fist to prevent a communist takeover. But many killings and kidnappings are traceable to rightist paramilitary groups not under government control and should not be counted as government "executions." Moreover, objective observers agree that Argentina's human-rights record has improved markedly in the past year.

Those nuances are disregarded by Derian's office. While unable to draw distinctions between moderates and extremists inside the junta, the human-rights crusaders claim that military rule in Argentina cannot last much longer and that the United States should disengage from the junta. Such a prospect is rejected by Latin American experts, whatever their ideology.

But behind the naivete, a pattern emerges. Before Carter took office, a prediction was made by Brady Tyson, now with the U.S. mission to the United Nations, that human rights would be used to support revolutionary forces in the hemisphere. An identical prediction was made privately last year by Robert Pastor of the National Security Council staff. Derian's undiplomatic incident could help fulfill those prophecies.

NICARAGUA CHIEF "FED UP" WITH CARTER, BUSINESS PARTNER SAYS

(By Harold K. Milks)

MANAGUA, NICARAGUA.—President Anastasio Somoza has had it "up to here"—his neck—with the Carter administration but still depends on his friends in the U.S. Congress to maintain friendly relations, a Somoza confidant and business partner said Sunday.

Raymond Molino, a survivor of the Bay of Pigs invasion in Cuba and a bitter anti-communist, described Somoza's unhappiness with what Molino called the continued unfair treatment the Nicaraguan strongman has received at the hands of the Carter government.

A pro-Somoza newspaper, Novadades, published an interview Sunday in which Somoza reportedly said the Carter government "is in the hands of leftists and communists and shares with Russia the direction of a worldwide campaign against Nicaragua in an effort to oust Somoza from the presidency."

The comments by Molino, an unofficial spokesman for Somoza who said he was speaking as director of the Nicaraguan American Development Council, came in an interview during a weekend lull in a campaign by the leftist Sandinista guerrillas to end by force the 40-year-old Somoza family rule of this Central American nation.

"The Carter government is never satisfied with what Somoza does," said Molino. "In the name of human rights it makes demands and when these demands are met new demands are forthcoming which end with requests that Somoza resign."

Molino said this was the first time Somoza has spoken out so bluntly against what Molino described as "the leftist influences in Washington which have been harassing Nicaragua's leader."

Relations between Managua and Washington have been strained for some months over accusations that Nicaragua lacks human rights and Somoza's responses that the Carter administration has given strong moral support to procommunist forces opposing him in Nicaragua.

There were no reports of new anti-Somoza violence as Molino spoke to newsmen in the Managua Intercontinental Hotel near the "bunker," Somoza's home and headquarters within a military strongpoint in the heart of Managua.

A nationwide work stoppage aimed at forcing Somoza's resignation continued with government and anti-government sources disputing its effectiveness. There were reports that gasoline supplies were growing short in some areas of the capital. Officials said Somoza likely would order the national guard—Nicaragua's only armed force—to intervene if necessary to assure fuel for both public transport and private use.

While Nicaraguan officials hailed as a Somoza victory Venezuela's failure this weekend to persuade the U.N. Security Council to take action against alleged human rights violations here, Molino detailed what he called a Venezualan and Panamanian plot to help the Sandinian rebels in their campaign.

"They have a plan to help the Sandinian front to seize and hold at least one Nicaraguan city by force of arms," he said, "Then the two would recognize the rebels as a new government and would give them military, financial and political assistance in their campaign to unseat Somoza.

"This is similar to the plan the United States had at the time of the ill-fated Bay of Pigs (invasion) against Castro Cuba, to seize a portion of the country and set up a rival government which could be recognized by nations opposed to communism."

Sources here said such a plan would not be successful as long as Nicaragua's 7,500-man national guard, well trained and well armed, remains loyal to Somoza.

Molino, who lives in Florida, denied a report that Somoza had flown to Miami Sunday. He said the president was "somewhere in Nicaragua."

Military experts have noted that the Sandinista rebels who have been fighting the Somoza family for decades recently had shifted from rural to urban assaults.

They said there were three main rebel commands: one in the south led by a Costa Rican named Plutarco Hernandez, whose father is a communist member of the Costa Rican National Assembly; one in the north headed by Victor Tirado Lopez, a Mexican leftist guerrilla; and underground urban rebels responsible for numerous bomb and gun attacks against the Somoza regime.

These sources said the Somoza armed forces have identified 36 Sandinista guerrillas trained by the Palestine Liberation Organization, 18 trained in Russia and at least 86 trained in Cuba "where they maintained continuous contacts."

Several Sandinista commanders are not Nicaraguan nationals, these sources said, and at least 25 percent of the leftist activists are women.

"SOMOZA OR COMMUNISM," NICARAGUA LEADER WARNS

(By Harold K. Milks)

MANAGUA, NICARAGUA.—President Anastasio Somoza said in an exclusive interview Monday that the only choice for Nicaragua "is either Somoza or communism."

Rejecting any possibility that a so-called national government could rule this strife-torn country successfully before his own term ended in 1981, he added:

"I will not resign and turn Nicaragua over to certain domination by the communists. I do offer my people a good government ending in 1981 with free elections and a stable economic future."

The Nicaraguan strong man, target of criticism from such widely varying areas as the White House in Washington, the Castro government of Cuba and both Panama and Venezuela whose liberal rulers want him out, said his opposition "is on the run and cannot win."

"If the leftists take over Nicaragua a similar fate is in store for the rest of Central America," he said.

In an hour-long interview in his heavily guarded office, Somoza said such a takeover "is not going to happen."

As he spoke, his national guard troops were engaged in a massive roundup of political and business leaders responsible for a national work stoppage aimed at his removal from office.

Troops were also searching for terrorists who have been throwing bombs and building barricades in Nicaraguan streets since the strike began 11 days ago.

Conservative (opposition) Party spokesmen said at least 600 Nicaraguans have been arrested since Saturday including at least 40 political and business leaders.

"These people arrested will be charged with attempting to overthrow the government by force," Somoza said.

Lists of those arrested in Managua included a vice president of the National Institute of Development, an organization of businessmen and industrialists largely opposed to Somoza.

The institute vice president was seized Monday while en route to a news conference for foreign newsmen.

Others were Adolfo Calero, manager of the Coca-Cola bottling franchise in Managua, and Dr. Pedro Queintanilla, secretary general of a political group splintered from the Somoza party.

Friends said Dr. Noel Rivas, president of the Nicaraguan Chamber of Commerce which joined other groups in calling for the work stoppage against Somoza escaped immediate arrest when guardsmen searched his home while he was absent.

Somoza said the arrests followed days of investigation and "determination to keep the peace at any price."

"We were patient and gave the people of Nicaragua time to see the kind of people who are trying to force me out of office. But if they push we are going to push back and this is the result," he said.

The president said he has the loyalty of the national guard, Nicaragua's only armed force, "down to the last officer and soldier."

"And when my term ends and we hold a national election they will be just as loyal to the man who wins," he said.

Under Nicaragua's constitution, a president cannot succeed himself.

He attempted to soften previous reports that he had called the Carter administration leftist and communist.

"I have nothing against President Carter," he said softly. "Indeed, I am grateful that he attempted to get the president of Venezuela to moderate his actions against Nicaragua," he said.

"Our relations with the U.S. government and with the embassy here are normal and workable. But there are certain people in Washington who were against me and who were cooperating with the communists and they have since joined his (Carter's) government and they continue to work against me," Somoza said.

He said he was not prepared to name the men "at this time."

"But I do want the administration and my friends in the United States to know that they continue to work for my removal," he said.

Other Nicaraguan sources said the attacks on Somoza from Washington began two days after the Carter inauguration and were keyed to Carter's human rights campaign.

A dispute continued Monday over the effectiveness of the national work stoppage in Nicaragua.

Both Somoza and Roberto Incer Barquero, president of the Nicaraguan national bank, said the strike was about the same as it was Saturday. They estimated that about 25 percent of the large businesses and factories were closed.

Opposition leaders placed the figure at near 80 percent.

Somoza, who spoke repeatedly on the telephone with his field commanders and twice with persons in the United States during the interview, indicated he was ready to use whatever force was necessary to end the nationwide strike, the second this year.

A statement issued by the National Institution for Development denied that Nicaragua must choose between Somoza or communism.

"There is a third, democratic alternative," the statement said. "This implies social, political and economic reforms oriented toward improved living conditions for the Nicaraguan people."

There appeared little or no room for negotiation between the Somoza stand and that of his opponents.

Somoza said that if he should step down today the pro-communist rebels could move in unopposed.

Somoza's police measures have not completely eliminated those who would continue the tensions of an armed rebellion.

## CONSTITUTIONAL AUTHORITY OF COMMANDER IN CHIEF ON DEFENSE QUESTIONED

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, aside from President Carter's apparent confusion between the defense authorization bill and the defense appropriation bill, and aside from the erroneous contentions embodied in his veto message, the White House should be reminded that our Constitution specifically vests primary responsibility for the nature and size of our national defense in the Congress—not in the President, either as Chief Executive or as Commander in Chief.

When Stuart Eizenstat, Assistant to the President, appeared on television last week the question arose as to why the President would go to the extreme of vetoing a national defense bill, particularly when the Pentagon had concurred in most of its provisions. He responded that the President is also Commander in Chief, implying that as such he has the right to say what kind of defense we should have.

The fact is the Commander in Chief has no such constitutional authority, expressed or implied. The fact is that clauses 12, 13, and 14 of section 8, article 1, of our Constitution stipulates that—

> The Congress shall have the power: To raise and support Armies * * *; To provide and maintain a Navy; To make Rules for the Government and Regulation of the land and naval forces.

The role of the Commander in Chief is solely to administer and utilize to the best possible security advantage whatever we as representatives of the people provide.

In other words, just as the Constitution vests primary responsibility for the conduct of foreign relations with the President, the Constitution vests primary responsibility for the kind of national defense we shall have in the Congress.

We can take pride in the fact that the Congress has not allowed politics to enter into our foreign policy considerations but regret the President has allowed political considerations to enter into his veto of our defense bill.

## CIVIL RIGHTS COMMISSION ACT OF 1978

Mr. EDWARDS of California. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 12432) to extend the Commission on Civil Rights for 5 years, to authorize appropriations for the Commission, to effect certain technical changes to comply with changes in the law, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentlemen from California (Mr. EDWARDS).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 12432, with Mr. DE LA GARZA in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on Friday, July 28, 1978, the bill had been considered as having been read and open to amendment at any point.

Are there any further amendments to the bill at this time?

Mr. BUTLER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, during the district work period, some rather disconcerting news was reported on page 1 of the Washington Star. The Star learned that several employees of the Civil Rights Commission were involved in an alleged scheme to falsify time and attendance reports over a 6- or 7-month period. These discrepancies in pay purportedly involved the Commission paying overtime to full-time employees for work which was never performed.

Mr. Chairman, what is troubling in this instance is that the Commission never mentioned these abuses to the Subcommittee on Civil and Constitutional Rights, which is charged with overseeing the work of the Commission.

It may occur to some that it is not necessarily appropriate for the Commission to report these incidences to the Congress. I do not agree. The Subcommittee on Civil and Constitutional Rights held 4 days of hearings on this legislation, which not only extends the life of the Commission but authorizes appropriations for the next 2 fiscal years. Both the Commission and OMB testified on the Commission's budget request during these hearings. When we are specifically examining an agency's budgetary needs, we should be informed of any such discrepancies. It is entirely appropriate for the oversight subcommittee to be aware of how the Commission manages its money when we are deciding how much it should have.

The Star also indicates that as many as 10 employees are under investigation. In an agency of less than 300 employees this is, in my opinion, a serious matter. If an agency as small as this one could permit violations of overtime practices for as long as a 6- or 7-month period, this certainly is a matter about which our subcommittee should have been informed.

I cannot help but wonder whether we have given the Commission so much money that it feels it does not have to keep accurate records of its payroll and overtime allowances. With its expanded jurisdiction now reaching into the domain of the aged and the handicapped, the Commission will have additional employees and more money to monitor.

The most distressing factor in this unhappy set of circumstances are the charges raised by some Civil Rights Commission employees accusing the Staff Director and Commissioners of "covering up" allegations of embezzlement until the extension of the Commission's existence was whisked through Congress.

It is the obligation of the Judiciary Committee to learn whether these allegations are true. I urge the subcommittee to determine the scope of the overtime and pay discrepancies and to learn why we were not informed during one of our many hearings on this bill.

Mr. Chairman, I am inserting in the RECORD at this point a chart detailing the amount of overtime hours worked by employees in various pay grades during the first 10 months of fiscal year 1978.

*Number of employees, grade, and total overtime*

3; GS–2; 42 hours.
4; GS–3; 121 hours.
9; GS–4; 313 hours.
32; GS–5; 798 hours.
26; GS–6; 1,445 hours.
27; GS–7; 1,069 hours.
3; GS–8; 77 hours.
18; GS–9; 526 hours.
1; GS–10; 83 hours.
14; GS–11; 270 hours.
14; GS–12; 159 hours.
4; GS–13; 118 hours.
1; GS–14; 12 hours.
1; GS–15; 8 hours.

Apparently, employees over grade GS-10 have the option of being paid for overtime work or receiving compensatory time on an hour-by-hour basis. It would be interesting to learn from the Commission how much compensatory time was allotted for those in grades 11 and above and how much of this was for actual time spent at work.

Mr. Chairman, I am also inserting in the RECORD the article which appeared in the August 22, 1978, edition of the Washington Star:

RIGHTS UNIT EMPLOYEES INVESTIGATED

(BY BAILEY MORRIS)

The Justice Department is investigating allegation of embezzlement of Government funds by U.S. Civil Rights Commission employees, according to sources.

The scheme allegedly involved six to ten employees who were notified several weeks

ago by the U.S. attorney's office here that they had been placed under investigation, the sources said.

The Civil Rights Commission case is similar to one involving allegations of the doctoring of time and attendance by U.S. Forest Service employees who allegedly embezzled up to $100,000 over a two-year period. That case is in the hands of the U.S. attorney in Alexandria.

According to the sources, the Civil Rights Commission case involves the falsification of time and attendance reports by employees who put in for overtime payment ranging from $700 a person to $5,000 a person over a seven-month period.

The discrepancies, first discovered during an internal commission investigation and later confirmed by the FBI were charted only for a six- or seven-month period, sources said.

Results of the internal investigation conducted last April "were kept very quiet," sources said, because the commission's reauthorization for another 10 years was and still is pending before Congress.

Rep. Gladys Spellman, D-Md., said yesterday she planned to ask "the appropriate congressional committee to conduct an investigation to see whether the practice (embezzling funds by falsifying records) is widespread among government agencies."

Joan Kelly, spokesperson for the Civil Rights Commission, confirmed that an internal investigation had occurred and said administrative action involving three employees is pending.

One employee has resigned and another "was terminated," Kelly said. Still another employee was suspended for two months and is now back on the job, she said.

The administrative action could result in "suspensions or firings," Kelly said, and will be completed when the acting staff director, Louis Nunez, returns from vacation.

Some Civil Rights Commission employees have accused Nunez and others in management of trying to cover up the allegations of embezzlement for political reasons, sources said.

They claim that Nunez, a Nixon administration appointee who converted to career Civil Service status at the end of the Ford administration, did not want the matter made public until after the commission's extension is passed by Congress.

But Kelly disputed this view, saying the matter was handled as expeditiously as possible by the commission, which conducted its own investigation and then called in the FBI.

When the irregularities were confirmed, she said, the "Justice Department was notified, the U.S. attorney was called in and that is where it is now."

Mr. EDWARDS of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the news article that the gentleman from Virginia describes is factually defective in several respects, as to the number of employees involved, the amount of overpayment, the period of review, and the number of employees.

The news report strongly suggests a coverup by Commission officials in that they failed to notify the Congressional Oversight Committees in an effort to protect their Commission authorization request. Immediately upon reading the article, I requested the Commission explain the situation. The facts of the case show that after a Commission review of discrepancies in overtime payment versus actual overtime hours, the Commission itself found wrongful and possible criminal action on the part of seven Commission employees resulting in overtime payment of approximately $11,000 over an 18-month period.

After its preliminary investigation, the Commission itself notified the Department of Justice, and both administrative and criminal investigations are still pending. Mr. Chairman, I suggest that the Star characterization of this matter as a "coverup" is grossly unfair and inaccurate. In the Commission's own words, and I quote the Commission's own words, they say:

It did not notify Senate and House Oversight Committees earlier since the nature of the overtime problem encompassed internal investigation, criminal investigations and employee disciplinary actions. In deference to the rights of employees, and for the protection of the criminal investigation, the Commission has moved cautiously but expeditiously to resolve the problem.

Mr. Chairman, I regret that the Commission did not notify this subcommittee earlier, but I am satisfied that the Commission officials acted in a straightforward, lawful, and proper manner.

Mr. BUTLER. Mr. Chairman, will the gentleman yield for just one question?

Mr. EDWARDS of California. Yes, I yield.

Mr. BUTLER. Mr. Chairman, the gentleman will agree that should a similar occurrence be determined to exist hereafter by the Commission, it would be its responsibility to inform and to advise the subcommittee and its staff promptly of any developments of this nature?

Mr. EDWARDS of California. I am not at all sure that "at all times" is the proper way to describe it. Appropriate action should be, certainly, that the subcommittees of the Senate and House should be appropriately advised, and the Commission should certainly not be required to report to us about everything that they might suspect, with all sorts of problems of due process. I think they have used good judgment in this matter. Certainly, they have turned the matter over to the Justice Department at the appropriate time, and although perhaps it would have been more convenient for us to have known about it in advance, I will repeat that I am certain that the Commission officials have acted in a straightforward and honest manner.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I thank the gentleman for yielding. What concerns me is that our Judiciary Committee serves as an Oversight Committee. The fact that we get information of wrongdoing, of criminal investigation of perhaps overpayment or wrongful payment through a newspaper article and not directly from the Commission is really an affront to our committee.

Would the gentleman not agree that it would be highly preferable for the Commission to have come clean and been straightforward with us with respect to the allegations and the fact that an investigation was on going, rather than to have this information come to us through newspaper articles, and then having to get the facts, the straight facts, as the gentleman reports he is now revealing them, from the Commission?

Mr. EDWARDS of California. I am not at all certain that I would agree 100 percent with the gentleman. The subcommittee also has legislative and oversight jurisdiction over the Federal Bureau of Investigation.

When some of their employees have disciplinary problems and perhaps even have engaged in what might be described as "criminal activity," we do not expect the Director to rush to the subcommittee and to tell us in advance about what they suspect and what kind of investigations they are making. At the appropriate time then we certainly expect to be advised by the Federal Bureau of Investigation and indeed by any agency over which we have a certain amount of jurisdiction. But I do not think the problem is as simple as that.

The CHAIRMAN. The time of the gentleman from California (Mr. EDWARDS) has expired.

(On request of Mr. McCLORY, and by unanimous consent, Mr. EDWARDS of California was allowed to proceed for 2 additional minutes.)

Mr. McCLORY. Mr. Chairman, will the gentleman yield for a further question?

Mr. EDWARDS of California. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, then the only question in my mind is whether it is not preferable for the committee to get its information directly from the Commission rather than from a newspaper article?

Mr. EDWARDS of California. Yes, it would have been preferable. Yes.

Mr. McCLORY. I thank the gentleman.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I entirely agree that the protection of individuals would require that the agency not reveal to the committee the names of any who might have been suspected of wrongdoing. I think that would be outrageous unless the investigation is completed. But there is something that needs improvement in all our programs, whether CETA or any number of other programs. Perhaps, the FBI is a little different because of the necessity for secrecy, but it would help if all of the other agencies with which Congress has to deal would tell us whether the legislation needs correction or clarification or strengthening, so that we do not learn about wrongdoing from the newspapers.

I cannot tell you all that the newspapers are revealing to us in New Jersey about the CETA program. I have never heard anybody on this floor, and I do not know whether members of this Judiciary Committee, of which I am not a member, have known about what is going on. How can we draw up proper legislation, I ask my colleagues, unless we know where the possibilities for abuse lie, to say nothing of the actuality of abuse?

Mr. EDWARDS of California. I certainly agree with the gentlewoman that in all practical cases the oversight com-

mittees and subcommittees should be advised as to what is going on. However in this particular case, while it would have been better for us to have learned it directly, I want to reemphasize that after our examination or study of what the Commission on Civil Rights did, we feel that they acted appropriately.

Mrs. FENWICK. I am sure they did, if the gentleman says so.

The CHAIRMAN. The time of the gentleman from California (Mr. EDWARDS) has again expired.

(On request of Mrs. FENWICK, and by unanimous consent, Mr. EDWARDS of California was allowed to proceed for 30 additional seconds.)

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I wish we could send out to all agencies through the chairman and ranking members of the subcommittees a request that they advise us as to where the weaknesses in the legislation are, and where the possibilities of fraud and mismanagement might lie, so we do not have to learn about these scandals from some newspaper article.

Mr. EDWARDS of California. Yes, I appreciate what the gentlewoman has said.

AMENDMENT OFFERED BY MR. TREEN

Mr. TREEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. TREEN: Page 3, strike out the quotation marks on line 5, and after line 5 insert the following:

"(f) Nothing in this or any other Act shall be construed as authorizing the Commission, its Advisory Committees, or any person under its supervision or control to appraise, or to study and collect information about, laws and policies of the Federal Government, or any other governmental authority in the United States, with respect to abortion.".

Mr. TREEN. Mr. Chairman, I am proud to join my colleague TOM HAGEDORN in proposing this amendment.

Our amendment is not designed to hamper the work of the Civil Rights Commission. Our purpose is to focus the Commission's attention on the issues for which it was created—denials of equal protection because of race, color, religion, sex, or national origin. Our colleagues in the minority of the Judiciary Committee have pointed out that the Commission has not issued one report on discrimination based in religion and national origin since 1970. We would encourage the Commission to spend more of its resources in those areas and less on promoting the cause of abortion.

I first became interested in this subject when the Commission issued a report in April 1975, entitled "Constitutional Aspects of the Right to Limit Childbearing." I reviewed the statute establishing the Commission, because I could not believe that Congress had granted the Commission authority to issue reports on abortion. Antiabortion measures, such as the Hyde amendment, did not seem to constitute a denial of equal protection of the laws on the basis of race, color, religion, sex, or national origin. I asked GAO to review the Commission's authority to issue such a report.

The Comptroller General requested the Commission's justification of its actions. To quote GAO:

Since minority women are disproportionately represented among the poor, it is the Commission's judgment that the abortion issue directly affects the rights of minority women to equal protection. In its report to us on this matter the Commission states that there is a widely recognized connection between race, ethnicity, and poverty and that it was in this context that poverty was discussed in the Report.

The Comptroller goes on to cite an opinion of the Commission's General Counsel that—

There is a substantial issue whether the criminal abortion laws embody an unjustified, unequal burden on women.

Mr. Chairman, no one denies that, unfortunately, minorities are disproportionately represented among the poor. But that analysis surely does not authorize the Commission to appraise every law or policy of the United States or one of its States that may impact poor persons. There are those in the executive branch who contend that the tax bill now before Congress benefits middle and upper income taxpayers more than lower income taxpayers. Is it then the responsibility of the Civil Rights Commission to advise Congress that enacting H.R. 13511 would amount to discrimination against poor women, among whom racial and ethnic minority women are disproportionately represented?

The Civil Rights Commission surely does not have the mission of advising Congress that it must spend public funds on services of one sort or another for the poor, because not to do so denies "equal protection" to racial and ethnic minorities.

If we accept the reasoning that led the Commission to enter the field of Federal and State abortion policy, there is no limit to the scope of Commission activities. Let me cite the comments of the late David W. Louisell, professor of law at the University of California at Berkeley in a letter inserted in the RECORD by Congressman KINDNESS on the Hyde amendment controversy:

There are many instances where a person has a constitutional right to do something, but no right to have the public pay for it. For example, one has a constitutional right to possess pornography, but no right to have the public pay for it, or to have it put on public library shelves. One has a constitutional right to freely travel in interstate commerce, but no right to governmental air plane tickets. One has the constitutional right to send his or her child to private school, but no right to have the school supported from public funds . . . To attempt to make a constitutional equal protection argument . . . is preposterous.

We are not concerned with whether a Government policy is wise or not. We have congressional committees, and offices for policy development in most agencies, to consider the wisdom of our policies. The role of the Commission is to evaluate those policies in terms of the Constitution of the United States, particularly in light of the equal protection clauses of the 14th amendment which our courts have found applicable to both State and Federal Governments.

The Commission has raised equal protection questions about abortion in the past. It raised them most directly in a communication of July 18, 1977—sent without being requested—to the conferees on the Labor-HEW appropriations measure in 1977. Chairman Arthur Fleming told the conferees:

The prohibitions sought to be imposed by the House and the restrictions voted by the Senate are punitive and racially and economically discriminatory.

The 1975 report was previewed in correspondence between Chairman Fleming and Senator BAYH in 1975 in which Fleming said the Commission specifically urged the defeat of the Bartlett amendment, a variation on the Hyde amendment.

The 1975 report, "Constitutional Aspects of the Right to Limit Childbearing," sent to every Member of Congress, predicted "in all likelihood" restrictions on the use of public funds to pay for abortions would be declared unconstitutional by the Supreme Court and counseled Members that in passing such amendments they were only forcing the poor to undertake the legal expense of challenging patently unconstitutional laws. I do not doubt some of my colleagues voted against the Hyde amendment because of constitutional doubts made more compelling by the views of the Civil Rights Commission.

The Commission's analysis was erroneous. The U.S. Supreme Court in Maher against Roe found that the lower court had erred in holding that Connecticut's restrictions on use of public funds violated the Equal Protection Clause of the 14th amendment. To quote the court:

This case involves no discrimination against a suspect class. An indigent woman desiring an abortion does not come within the limited category of disadvantaged classes so recognized by our cases. Nor does the fact that the impact of the regulation falls upon those who cannot pay lead to a different conclusion. In a sense, every denial of welfare to an indigent creates a wealth classification as compared to nonindigents who are able to pay for the desired goods or services. But this Court has never held that financial need alone identified a suspect class for purposes of equal protection analysis . . . The District Court read our decisions in *Roe* v. *Wade*, supra, and the subsequent cases applying it as establishing a fundamental right to abortion and therefore concluded that nothing less than a compelling state interest would justify Connecticut's different treatment of abortion and childbirth. We think the District Court misconceived the nature and scope of the fundamental right recognized in Roe . . . were we to accept appellee's argument, an indigent parent could challenge the state policy of favoring public rather than private schools, or of preferring instruction in English rather than German, on grounds identical to those advanced here . . .

Finally, let me note that the Supreme Court decisions which were considered in the Commission's 1975 report were decided on due process grounds, not on grounds of "equal protection." In fact, the court in Doe against Bolton specifically stated that the equal protection ar-

gument advanced by plaintiffs "collapsed in all significant aspects" because of the court's other holdings.

I have a copy of the Commission's 1975 report "Constitutional Aspects of the Right to Limit Childbearing" if anyone would like to examine how responsible the Commission has been in appraising policies in this area in the past. I think that all of you will agree that it does not represent the best example of constitutional analysis available. Not only does it erroneously state that only two-thirds of the States are needed to ratify a constitutional amendment, but the report describes State laws requiring the consent of both parents before an abortion as violating the 13th amendment proscription of involuntary servitude. It finds that our colleague BILL WHITEHURST can have no "rational" purpose in proposing a States' rights abortion amendment to the Constitution except a desire to breed litigation. Why, the Commission even goes so far as to claim the Whitehurst amendment would authorize States to compel persons with a requisite number of children to undergo abortions in subsequent pregnancies.

This type of "appraisal" we do not need. It only serves to erode the credibility of the Civil Rights Commission on other subjects. I urge your support of the Hagedorn-Treen amendment.

Mr. HAGEDORN. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, the purpose of this amendment is to insure that the Commission does a better job in promoting legitimate civil rights objectives by making clear to it that it does not enjoy a roving commission to involve itself in whatever issue happens to momentarily attract its fancy.

In recent years, the Commission has made pronouncements, or issued weighty reports, on such issues as school busing, affirmative action, immigration, tuition tax credits, sterilization laws, insurance policies, and sex "stereotyping" on television. Although I personally question the propriety of the Commission asserting jurisdiction over much of this, I suppose that the creative and innovative legal counsels at the Commission can come up with some clever statutory justification.

I do not, however, read anything in the charter of the Commission which can justify its somewhat strident participation in the abortion controversy. This amendment would prohibit the Commission from further assertion of jurisdiction with respect to abortion.

In 1973, the General Counsel for the Commission, John H. Powell, Jr., expressed his opinion, in response to an inquiry from a Notre Dame law professor, that abortion was outside the ambit of Commission authority.

Shortly thereafter, with no change in statutory authority, and with no further direction from Congress or the appropriate committees, the Commission reversed this course. Its 1975 report on "The Constitutional Aspects of the Right to Limit Childbearing" concluded that virtually everything that Congress or the States wanted to do to limit the incidence of abortion, or the extent of public encouragement of abortion, was unconstitutional. The Commission even came to the remarkable conclusion that proposed amendments to the Constitution to limit abortions violated the 1st amendment of the Constitution.

The Commission managed to refute the antiabortion argument within the space of two sentences on page 74 of its analysis.

Since then, it has been active in lobbying Members of Congress in opposition to the Hyde amendment and similar measures. Its position can be summarized by its recommendations in its letter last year to conferees on the Labor-HEW appropriations bill:

> Congress should reject anti-abortion legislation and amendments and repeal those which have been enacted.

Mr. Chairman, I do not begrudge anyone their opinion on abortion. It is an issue that has heatedly separated this body on many occasions. But, whatever one's views on the substantive abortion issue, I think that most of us can agree that Federal agencies should not act on matters outside the purview of their legitimate authority. The issue of abortion, in itself, is a critical one—but, it is not a civil rights matter.

The Commission's statutory authority expressed in section 1975c(3) of the 1957 Civil Rights Act states that it shall appraise laws and policies of the Federal Government "in respect to denials of equal protection of the laws because of race, color, religion, sex, or national origin." Neither the Supreme Court decision in *Roe* v. *Wade* (410 U.S. 113), nor that in *Doe* v. *Bolton* (410 U.S. 179) was based upon a finding that State laws prohibiting abortion constituted denials of equal protection of the law.

In Doe against Bolton, the Court concluded that:

> The discrimination argument collapses in all significant aspects.

In both cases, State laws against abortion were struck down as violative of the due process clause of the 14th amendment which protected against State action what the Court referred to as the "right of privacy," including the "right" to terminate pregnancies.

Again in *Maher* v. *Roe* (432 U.S. 464), the Court held that abortion could not be justified on "equal protection" grounds finding that this provision did not require States participating in the medicaid program to pay nontherapeutic abortion expenses.

If both opponents of the Supreme Court decisions and the Supreme Court itself, as well apparently as a majority of this body, are in agreement that the abortion issue is not basically an "equal protection" issue, it seems rather presumptious of the Commission to act contrary to this. Whether the Commission likes it or not, their authority is limited. It has been limited by Congress to laws and policies which deny "equal protection of the laws of the Constitution."

To argue, as does the Commission that its involvement is on behalf of "equal protection of the poor" is quite simply to exceed its authority. It is, further, an argument on behalf of a Commission with few, if any, limits on its authority since there are few matters of economic policy that do not impact differently upon people based upon their wealth. In a sense, as noted by the Court in *Maher*, every denial of welfare benefits to an indigent creates a wealth classification as compared to nonindigents who are able to pay for such goods and services.

I strongly urge this body to pass this amendment so that the limited resources available to the Commission can be used in a manner in which they were intended.

[*Washington* v. *Davis* (426 U.S. 229): The disproportionate impact of a law, neutral on its face, does not warrant a conclusion of discrimination . . . A law is not unconstitutional solely because it has a racially disproportionate impact.]

Mr. EDWARDS of California. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, this is a most troubling amendment, and I hope that it is soundly defeated by the committee. It has aspects of book burning about it. Here we established an agency to report to us and to report to the American people, and then we say that the agency cannot report to us. What are we afraid of? Have we not learned that restraints on free speech and on free inquiry are self-defeating?

The "Dear Colleague" letter of July 10 sent to us by the distinguished proponents of this amendment says that abortion is not a civil rights matter. I suggest that the authors of the amendment ask the distinguished gentlemen from Illinois (Mr. HYDE) the author of the Hyde amendment, who on April 5, 1976, in the CONGRESSIONAL RECORD at page 9414 states:

> The right to life is the most precious of all civil rights.

Or they should ask those who disagree with the gentleman from Illinois (Mr. HYDE) and who support free choice. They say that the right of privacy as enunciated by the Supreme Court protects women in their decision to choose an abortion. So both sides of this problem agree that the issue is one of civil rights.

The "Dear Colleague" letter also alleges that the General Counsel of the Commission stated that abortion is not within the scope of the Commission's authority. That statement is unsupportable. In 1971, yes, the General Counsel did say that there was no authority to examine "the effect of abortion on the rights of the unborn." This is still true. However, the "Dear Colleague" letter conveniently ignores the fact that in 1972 Congress expanded the Commission's jurisdiction to include discrimination on the basis of sex, and the General Counsel, Mr. Powell, concluded that this congressional action clearly gives the Commission authority to review abortion.

Mr. Chairman, the Commission has published over 250 reports since 1957. How many on abortion? One, and that was entitled, "The Constitutional Aspects of the Right To Limit Childbearing." Incidentally, this report does not advocate

abortions. There have also, between October 1977 and June 1978, been 112 congressional requests. How many have been requests on abortion? Only a few. The Commission by law must respond to congressional requests. One certainly cannot describe this as excessive.

Mr. Chairman, the Supreme Court has interpreted the Constitution in Roe against Wade and Doe against Bolton and has concluded that the law of the land is that the Constitution guarantees, with certain limitations, the woman's right to privacy in the decision as to whether or not to seek an abortion, and for Congress to rule with this amendment that we do not want to know more about this subject, that a publicly financed, factfinding agency may not study or report on this key issue seems to me to be timid, smacking of censorship, and totally not in keeping with a society whose very life depends on the free flow of information and ideas.

The Civil Rights Commission is an independent factfinding agency. It is bipartisan. It cannot be dominated by any political party. It has no enforcement power. Yes, from time to time it has suggested change. Sometimes we disagree with the suggestions that the Civil Rights Commission makes. It does not mean that we should indulge in congressional censorship. I certainly urge a no vote on the amendment.

Mr. DRINAN. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentleman from Massachusetts.

Mr. DRINAN. Mr. Chairman, I am happy to associate myself with the remarks of the chairman of the subcommittee. I concur fully with his judgment and his conclusions, and I hope the amendment is soundly defeated.

Mr. EDWARDS of California. I thank the gentleman from Massachusetts.

Mr. TREEN. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentleman from Louisiana.

Mr. TREEN. Mr. Chairman, with regard to the "Dear Colleague" letter the gentleman mentioned in which the gentleman from Minnesota (Mr. HAGEDORN) and I stated that abortion is not a civil rights matter, that sentence taken by itself is subject to the interpretation which the gentleman gave it.

The CHAIRMAN. The time of the gentleman from California (Mr. EDWARDS) has expired.

(On request of Mr. TREEN, and by unanimous consent, Mr. EDWARDS of California was allowed to proceed for 1 additional minute.)

Mr. TREEN. Mr. Chairman, will the gentleman yield further?

Mr. EDWARDS of California. I yield to the gentleman from Louisiana.

Mr. TREEN. Mr. Chairman, if I may proceed, in the context of our Dear Colleague letter, and as I tried to say in my remarks about my amendment, while abortion may be a civil rights issue, the Civil Rights Commission statute directs the Commission to study denials of equal protection of the laws under the Constitution. It does not grant jurisdiction over all so-called civil rights. There are a lot of rights, such as the right to counsel, the right to a speedy trial, and the right to travel from one State to another, but these certainly are not rights to which the Commission has been directed by the statute.

So we are not really saying that the abortion question is not a civil rights question in the broad sense of that term. But it is not an issue of discrimination based upon race, sex, or religion. Further, I reject the idea that an antiabortion provision amounts to discrimination based upon sex, although only women may have children. That would not be a gender-related discrimination. Such would apply to all persons who, of course, may have the capacity for childbearing.

Mr. BAUMAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, when this bill was last debated on the floor on July 28, the gentleman from California (Mr. EDWARDS) and I engaged in a brief discussion of the amendment which was then pending, offered by the gentleman from Virginia (Mr. BUTLER) which would have outlawed lobbying by the Commission. That amendment was ultimately adopted.

At that time the gentleman from Maryland recalled to the gentleman from California (Mr. EDWARDS) the extreme and amazing coincidence last year when the Civil Rights Commission suddenly issued a report at the request of a Member of Congress—one of two such requests, I now learn from the remarks of the gentleman—asking for the opinion of this August Commission on the issue of abortion. The Commission report, which was lengthy and specific, citing the Constitution, the civil rights laws, and various other arguments, all in favor of abortion, appeared on the floor of this House, in the press, and in the media coincidental with a legislative battle on the so-called Hyde amendment at that time.

Since then the Commission report has been used repeatedly, as an argument in favor of Federal funding for abortions and indeed for abortion upon demand by the proponents of these odious views—at least many people hold them to be so.

It appears to me under the circumstances that the Civil Rights Commission has come down on the wrong side of the civil rights question. The right that we are concerned about is the right to life, a right of human beings that we thought was guaranteed even before the founding of this country. But the Commission has made itself an instrument of proabortion activities by its biased position on this issue, and by so doing it has placed itself as being against the most fundamental of all civil rights, the right to life.

Mr. Chairman, I think this amendment is perfectly in order, and the gentleman from Louisiana (Mr. TREEN) is certainly to be commended for offering it. I hope it is adopted.

● Mr. BUTLER. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Minnesota (Mr. HAGEDORN) and the gentleman from Louisiana (Mr. TREEN).

Mr. Chairman, whatever one's view on the substantive questions concerning abortion in the United States today, this amendment deserves careful consideration.

The duties and responsibilities of this Commission are spelled out quite clearly in its legislative charter. The Commission is charged with appraising laws and policies of the Federal Government with respect to the denials of equal protection of the laws because of race, color, religion, sex, or national origin.

The Commission insists that this is an area over which it has jurisdiction to study. The gentleman from Louisiana questions this.

Regardless of your view of this, Congress undoubtedly has the authority to say where the Commission shall direct its inquiries. I agree with the gentleman from Louisiana that the question of the availability of abortion is one that the Commission should no longer pursue.

This is merely another area in which the Commission has attempted to expand its role unwisely. The Commission is much too busy trying to keep its work in the eye of the public and the media instead of providing the hard facts for the Congress and the executive branch.

As I have noted before during this debate, the Commission has not produced one report since 1970, concerning denials of equal protection of the laws based on religion or national origin. Yet the Commission found time to publish an elaborate and very costly report on abortion.

A concise statement by Congress concerning our desires on the Commission's activities in this area would send a message to the Commission that the Congress is serious when it asked the Commission to study the areas mentioned in its legislative charter.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. TREEN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. M'CLOSKEY

Mr. McCLOSKEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McCLOSKEY: Page 3, strike out line 10 and insert in lieu thereof the following: "year ending September 30, 1981. The President shall conduct an investigation of the Commission's overall performance, including the study of the Commission's effectiveness in accomplishing its functions and not later than 180 days before the Commission ceases to exist under subsection (d) make public and submit to each House of the Congress a report of the results of that investigation. The committees of the House and Senate having primary oversight responsibility with respect to the Commission shall, not later than 90 days before the Commission ceases to exist under subsection (d), each conduct an inquiry into the performance and effectiveness of the Commission and make public a report of that committee's findings, conclusions, and recommendations".

Mr. McCLOSKEY. Mr. Chairman, I offer this amendment to the Committee, which simply does two things. It extends the life of this Commission for 3 years instead of 5, and it requires that in the last 6 months of the Commission's statutory life that a study be made by the

President, as well as by the committees of jurisdiction of the House and the Senate, as to whether the Commission is doing the job which it is mandated.

Mr. Chairman, I would call to the Committee's attention that there are two fundamental concerns of the House in this connection. We have the very real desire that our civil rights laws be adequate and that they be enforced.

That the laws be adequate is the job of the Congress. We owe the duty to enact proper laws if existing laws are not adequate. And it is the job of the executive branch to enforce the civil rights laws that we enact. In that connection, we in the Congress exercise an oversight function on the executive branch to make sure that they are enforcing the laws, and, if they are not, that we see that they enforce the laws or that we change the laws to make them enforceable.

The sole question with this Commission is whether or not, in addition to the legislative function of the Congress and the executive branch's responsibility to enforce the laws, should there be an appropriate independent agency to monitor enforcement.

I would call the Committee's attention to the language of this statute as it appears in section 42 of the United States Code, title 42. It is called "Duties, Reports and Termination." And when we set up this Commission in 1957, it had a specified life. It was going to pass out of existence in 1960. We have extended this Commission time and time again, 2 years, 2 years. 5 years, and, by this legislation, we would propose to extend it for another 5 years.

Mr. Chairman, what are the duties of the Commission? To study, to report, and recommend. And since 1957, we have stated in the law that the Commission, when it came to an end, would issue a final report.

I would suggest to my colleagues who feel strongly about civil rights, as I do, that we strengthen the enforcement of the civil rights law if we direct this Commission to give us a final report in 3 years instead of in 5 years. We do no service to people who suffer under discrimination, whether it be on race or sex or age or the handicapped, as we have added to this law, by granting a 5-year deadline on a governmental agency to give us a final report.

Running all through this authorizing legislation is the fact that the Commission is asked to render reports and, ultimately, to render a final report. I submit that what we have done, instead, is to have created a Government agency which continues to exist, because as G. Northcote Parkinson, in his book, "Parkinson's Law," pointed out, once a governmental agency is created, it expands its own constituency, and its continuation becomes a matter of governmental inertia.

I think the message to this Congress and to every State legislature, from proposition 13, is the simple complaint of the people of the United States that it is time that legislative bodies look to the termination of government; that we look at agencies and commissions and departments that were created years ago to answer a purpose which in that time was important; that we look at agencies such as the Bureau of Reclamation, created over 80 years ago, the Corps of Engineers' dam building activities, the Law Enforcement Assistance Administration; that perhaps we ought to look at HUD. It may be time to abolish that agency as well. We are looking at the Federal Maritime Commission, wondering whether or not it has outlived its usefulness. This Congress took its first step in 22 years to abolish a Government agency a few months ago when we wiped out the Renegotiation Board.

The CHAIRMAN. The time of the gentleman from California (Mr. McCLOSKEY) has expired.

(By unanimous consent, Mr. McCLOSKEY was allowed to proceed for 1 additional minute.)

Mr. McCLOSKEY. Mr. Chairman, I think we should say to this Commission, which performs a function which admittedly should be the function of the executive and the legislative branches, that in 3 years we would like its final report, and that we say to the executive branch, "Let us try to terminate this agency by requiring its final recommendations to us in 3 years instead of in 5 years." If those recommendations are to strengthen the law or to strengthen the enforcement of the law, that we do it as an act of Congress and that we follow up on our legislative responsibilities.

The existence of this Commission in 1978 presupposes either that our laws are not adequate or that they are not being adequately enforced. The remedy for either problem is not necessarily the continued existence in perpetuity of a governmental agency that was set up originally for only a 2-year life, but which we have now extended to a 20-year life.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. McCLOSKEY. I yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

Mr. Chairman, if the agency does terminate in 3 years and the final report is made, is it the gentleman's position then that the function presently performed by the Civil Rights Commission would also end and there be no Government agency handling civil rights, as far as determining whether or not they are being adequately enforced?

The CHAIRMAN. The time of the gentleman from California has again expired.

(At the request of Mr. VOLKMER and by unanimous consent, Mr. McCLOSKEY was allowed to proceed for 2 additional minutes.)

Mr. McCLOSKEY. That is correct. Studies, recommendations, and reports by an outside agency as to how the law is being enforced or whether the laws are adequate are properly functions of the Justice Department of the United States, and of the Congress. It seems to me that we postpone our responsibility in that respect by delegating it to an outside commission.

Mr. VOLKMER. Then, as far as determining whether or not the civil rights of individuals—and that is what we are talking about—are being protected and being enforced in this country, that would end also at the end of 3 years, is that correct?

Mr. McCLOSKEY. Not at all. We are a nation of laws and not of men, but I do not see the need for an additional agency to monitor the laws or the enforcement of the laws by the Government agencies charged with those responsibilities. What we are saying by extending this year after year after year is that we do not know yet whether our laws are adequate, and we do not believe they are properly enforced.

Mr. VOLKMER. I think the gentleman will find from the reports of the Commission and the testimony before us in the hearings that there are violations still prevalent throughout this country in housing and employment and in other areas.

Mr. McCLOSKEY. And if those violations are occuring, they should be enforced under the law, and we should mandate the appropriate agency to do so. Let me quote the gentleman's question from page 4 of the report:

"Whether the Commission's life should be extended." Yes.

"(a) Has its mandate to investigate and identify possible civil rights violations been achieved?" No.

Why give them 5 years? If they cannot do the job in 3 years, they should not do it at all. We should not put a fraud in the law that we mean to terminate an agency at some future time, and then not terminate it. By extending it, we indicate that they cannot do the job.

Mr. VOLKMER. Can we by law, then, change attitudes of individuals?

Mr. McCLOSKEY. I think enforcement of the law speedily encourages people who are violating it to stop violating it. That is the whole purpose. If one is discriminating based on race, then one ought to go to jail.

Mr. VOLKMER. We have had laws affecting housing, employment, for a good many years, have we not?

Mr. McCLOSKEY. We have, and if those laws are not adequate, it is our duty to change those laws, but we could create a governmental agency for many, many bona fide purposes. What I am questioning is that this committee in its interrogations did not ask the key question: Do civil rights problems today require the assistance of an unusual government organization to do that which the Congress and the executive branch should do?

"Has its mandate to investigate and identify possible civil rights violations been achieved?" No.

Has it been duplicated by other Federal agencies or departments? No. But, should it exist in perpetuity?

Mr. VOLKMER. Not necessarily in perpetuity, but for 5 years.

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. SEIBERLING and by unanimous consent, Mr. McCLOSKEY was allowed to proceed for 1 additional minute.)

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield for a question?

Mr. McCLOSKEY. I will be glad to yield to the gentleman from Ohio.

Mr. SEIBERLING. I have a little difficulty understanding what the difference is between 3 years and 5 years in the gentleman's thinking, yet it makes a difference, it seems to me, in terms of the ability of this Commission to really cover this field which, as we know, is a very much bigger field than we thought 22 years ago when this Commission was created. At that time, we were talking about a comparatively narrow range of discrimination, and since that time our consciousness has been raised.

We are now conscious that there is discrimination on the basis of sex, handicaps, Spanish language, et cetera—a whole range of discriminations that we were not consicous of, or most people were not. Why should we not give them an adequate amount of time?

Mr. McCLOSKEY. I might agree, but can the gentleman cite to me any task of Government today, whether it is development of an energy policy or development of a SALT posture or development of a civil rights posture, in which we would permit 5 years to carry out the intention of the law? The mandate of this Commission is clear. It is to study, to report, and to recommend. I know of no single task in Government in which that should not be accomplishable within 3 years.

Mr. EDWARDS of California. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this proposed amendment disturbs me greatly because it suggests a lack of knowledge and appreciation for the circumstances surrounding the creation of the Commission, its 21-year record and reputation for outstanding scholarly and objective work, and the authorization and oversight activities and responsibilities of the congressional committees and the President.

I can appreciate the need for "strong language" in a "Dear Colleague" to attract the reader's attention but at some point form must give way to substance.

Although the Commission's charter, the Civil Rights Act of 1957, and subsequent congressional action have designated it a temporary agency, we must look back to what was happening in 1957 at the time of its creation. To some, its temporary nature was justified by the hope that the American ideals embodied in the Constitution would be realized by all American citizens. But a realistic assessment of the legislative history surrounding its creation makes clear that regional animosities coupled with persons unwilling to begin the painful but necessary process of equitable change were far from enthusiastically supporting the Commission's establishment.

In retrospect, the Commission should have been established as a permanent agency to be subsequently terminated when the guarantee of equality of rights becomes truly available to all. Its temporary nature was and continues to be the necessary compromise for its creation by the 85th Congress and its continuation by the 95th Congress.

Both congressional oversight committees were mindful of this concern and asked each of the witnesses to address the issues of the length of the extension. Those most competent to respond to this point, representatives of civil rights and civil liberties organizations, unanimously agreed that the Commission's life should be extended for at least an additional 5 years.

In fact, each of the points raised by the gentleman from California have always been raised, addressed, and answered, most recently in our subcommittee and its report, when discussing Commission authorization and/or appropriations.

Let us again go back to the experts—leaders in the civil rights community—that is why we ask them to testify; is it not? They unanimously answered "no" to the allegation that the Commission's work is duplicative of other Federal agency studies.

I feel it is important to quote the statements of two of the witnesses on this issue—Clarence Mitchell, dean of the civil rights leaders and chairman of the Leadership Conference, representing 149 civil rights organizations; and Drew S. Days, Assistant Attorney General of the Civil Rights Division of the Department of Justice and speaking on behalf of the President:

Mr. Days stated in part:

> Commission reports have provided us with a clear concise statement of the problems confronting minorities and women in these areas and some helpful suggestions as to how the Justice Department, among other agencies, could perhaps make a meaningful contribution in dealing with these problems. . . . It is very difficult for any institution, even the most well-meaning and even with people at the head who have a very profound commitment to vindicating civil rights, to do that type of self-analysis and to be adequately critical of one's own performance, to make the types of changes that are necessary.
>
> And certainly, the Civil Rights Commission has not pulled many punches in this regard. They have criticized where criticism is due. And I think we have gained in the Justice Department from that attitude on the part of the Commission.

Mr. Mitchell provided the following cogent views:

> Some studies of the Commission may contain data that is similar to that buried in the archives of other Government agencies. But nowhere else can one find the comprehensive, correctly interpreted, constructively oriented materials that the Commission publishes. As a matter of fact, much of the information circulated by the Commission is dragged from reluctant Government agencies, who realize it could put them in an unfavorable light for not fulfilling their civil rights responsibilities.
>
> If in rare cases there is some duplication, perhaps it would be the wiser course to transfer the authority of the duplicating agency on that particular subject to the Commission.

It is true that the Commission's budget has grown since its inception in 1957. Inflation is but a partial explanation; more importantly, its responsibilities and areas of review have increased. Let me remind my colleague that his years in the Congress have been those very years where there have ben significant and meaningful changes in civil rights legislation, judicial decisions and executive action. Early Commission investigations and reports focused on blacks who were denied their right to vote—as a result of that early work the Congress enacted the Voting Rights Act of 1965. Today, the Commission looks to the problems confronting other racial and ethnic minorities, women, and in a recent special report, the aged.

These reports and recommendations have been and, I hope, will continue to be incorporated into legislative and executive action. The Commission has courageously identified our strengths and weaknesses as we meet the goal of equality of rights.

The allegation that the Commission has come "under increasing fire" for working "outside its congressionally mandated jurisdiction" is simply not supported by the facts. I ask my colleague to consider his understanding of human nature and the propensity of persons to characterize as ultra vires what is really a difference in point of view. Let me suggest that this is at the root of this allegation. Let the opponents come forth with facts and not unsubstantiated allegations.

I strongly disagree with the gentleman's statement that—

> Congressional oversight of the Commission has been limited to routine approval of additional money over and above the limit set by Congress itself 5 years ago.

Our most recent authorization and extension hearings delved deeply into the issues of usefulness of the Commission's work. The hearings in recent years have come to be internal and, on occasion, combative, as serious oversight hearings must be to be effective.

In addition we have had the Commission testify on their reports as well as on civil rights issues of concern to the subcommittee and to the Congress. We are well informed on past and present Commission activities at the national level and, perhaps more importantly, at the grassroots level in the several States. All of these hearings have occurred since the last extension in 1972.

Mr. Chairman, I strongly urge a no vote on this amendment. To leaders in the civil rights community and their constituencies such a provision must appear to be, at its best, a lack of understanding of the problems confronting millions of Americans who are older, nonwhite, poor, women, or handicapped and, at its worst, an effort to turn back the clock on the successes of the civil rights movement or any future civil rights legislation. We must all recognize that the promulgation of civil rights legislation is but the beginning—we are still awaiting the results of effective and lasting enforcement. And, the Commission is critical in the assessment of that enforcement effort.

Clarence Mitchell noted that perhaps at some future date he or other civil rights leaders can testify that the Sun should set on the Commission. He reminded us that he cannot make that

statement now because discrimination is still rampant, despite the significant progress that has been made in suppressing it since passage of the Civil Rights Act of 1957, when the Commission was first established:

It is simply unrealistic to believe that the effects of injustices that have occurred for over 300 years could be discovered and cured in two years, the original term of the Commission, or in the 21 years it has actually been in operation.

Many questions regarding the denial of rights to women, blacks, Chicanos, Puerto Ricans, Native Americans, other minorities, the poor, the aged, and the handicapped remain unanswered.

It is difficult for many of us here to appreciate the magnitude of these concerns but, let us not stifle this most important voice. We must recognize the need for the Commission until the rights guaranteed in the Constitution are rights available to all Americans.

Mr. McCLOSKEY. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentleman from California (Mr. McCLOSKEY).

Mr. McCLOSKEY. Mr. Chairman, I hope it is not inferred from my offering this amendment that I am questioning the value of the Commission or the value of its services. I have a tremendous respect for its vice chairman, Stephen Horn, who I think has done a superb job.

The question here is should it exist permanently? The chairman has said there may have been reason to commit it to a permanent condition, but if so, we should create a permanent institution and not one under the guise of extending it for 2 years or 5 years, talking about a temporary commission when we really want a permanent one.

My suggestion is that if it is a temporary commission like the Commission on Pornography, the Commission on Marihuana and the Commission on Population, for example, that have all been given a limited time, as was this one apparently at the time when it was created, then we should do so. I certainly agree with the gentleman that until we passed the 1964 Civil Rights Act, and the 1965 Voting Rights Act, it would have been perfectly justified to extend it, but would it not be doing a better job in making its final report, under this statute, if we gave it a 3-year limitation and not a 5-year limitation, as the chairman has suggested?

Mr. EDWARDS of California. Mr. Chairman, will the gentleman yield?

Mr. McCLOSKEY. I yield to the gentleman from California.

Mr. EDWARDS of California. Mr. Chairman, I thank the gentleman for the observations he has made and for yielding to me.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. EDWARDS of California, and by unanimous consent, Mr. McCLOSKEY was allowed to proceed for 2 additional minutes.)

Mr. EDWARDS of California. Mr. Chairman, if the gentleman will yield still further, let me say that I just wish the gentleman from California (Mr. McCLOSKEY) had picked out a better vehicle for his amendment, because if his amendment goes through, and I certainly hope it does not, it will be a signal to the civil rights leaders, in their communities to their constituencies, and, indeed, the disadvantaged people throughout America, that we have a complete lack of understanding of the problems confronting millions of Americans who are older, who are nonwhite, and who are women, and that it may be viewed as an effort to turn back the clock on the success of the civil rights movements, or for any future civil rights legislation.

Mr. BUTLER. Mr. Chairman, I move to strike the last word, and I rise in support of the amendment offered by the gentleman from California (Mr. McCLOSKEY).

In fact, I am somewhat horrified that the gentleman from California (Mr. EDWARDS) has suggested that should we pass this amendment, it will be a signal to the poor, to the unemployed, to those who are disadvantaged and, indeed, perhaps to the whole world that we do not care. The fact is that all this amendment does is limit the extension to a 3-year period instead of 5 years, and adds a sunset provision.

Not only that, Mr. Chairman, but the Senate has already done so in its version of the legislation. Therefore, the Senate has already sent that signal out, because it adopted an amendment limiting the extension to 3 years.

That is all this amendment would do.

Mr. Chairman, there is considerable evidence to support both a reduction in the Commission's extension and the addition of the sound principle of sunset.

Mr. EDWARDS of California. Mr. Chairman, will the gentleman yield?

Mr BUTLER. I yield to the gentleman from California.

Mr. EDWARDS of California. Mr. Chairman, I thank the gentleman for yielding, but I am afraid the gentleman from Virginia (Mr. BUTLER) has misread the amendment. The amendment does more than simply reduce the time to 3 years, it requires the President to conduct an investigation as to the problem and invests the House and Senate with the primary oversight. All of this is already done but, even so, the amendment does require more than the gentleman suggests.

Mr. BUTLER. The gentleman is entirely correct. That is the sunset provision, but there is also a 3-year provision instead of a 5-year provision. That is the real crux of it, reducing the extension from 5 to 3 years and it does have a sunset provision.

The Commission, if the gentleman recalls, was able to operate for under $1 million a year for the first 7 years of its existence. During its first 14 years, the Commission produced several major studies on voting rights, school desegregation, equal employment opportunity, and other civil rights issues of major importance at a cost of no more than $4 million per year. As recently as 1975, the Commission performed its congressionally mandated tasks for less than $7 million. During the last 3 years, however, the agency has received funding increases of close to 30 percent a year.

I am afraid that if we do not invoke sunset and limit the life of this Commission and take a sound look at what it is doing, we will not review their programs again until we are asked for another extension 5 years hence. The last extension was for a 5-year period. The only reason we saw the Commission during the intervening years was because they had to come back to the Congress and request additional money over and above their authorization ceiling. Five years ago Congress set a limitation on the Commission's appropriation at $7 million per year, and last year we approved $10,480,000.

It appears that the oversight we performed has not gotten the Commission back on track.

Not only did we find that their costs were escalating at an exorbitant level, but their work was duplicative of work performed by other Federal agencies.

Moreover, testimony in the subcommittee proved that the Commission is totally ignoring its jurisdiction to study religious and national origin discrimination. Not one report on either subject has been issued since 1970.

The subcommittee also expressed concern that the Commission's projects and reports were clearly on the borderline if not outside congressionally mandated jurisdiction. The subcommittee found that such projects as studying forcible rape against women, domestic violence, and coerced sterilization were duplicative of work performed by other Federal agencies and peripheral to the Commission's functions.

The Subcommittee on Civil and Constitutional Rights must continue to oversee the work of this Commission, and the Congress should have the opportunity to decide whether or not this group should continue beyond fiscal year 1981.

While I do not relish the idea of having to review the work of the Commission during the next 3 years, it is a necessity and our duty.

I believe that governmental units should go out of business when they no longer do the job they were originally established to perform. Sunset provisions are a valuable legislative tool; agencies are forced to do their job the way Congress intended. Congress should decide whether this Commission should stay in business in 3—not 5—years, and we should look to see what they are doing in order to find out whether they are performing their functions properly. That is what sunset provisions are all about.

Mr. Chairman, I commend the gentleman from California (Mr. McCLOSKEY) for his very well-thought-out and carefully drafted amendment.

I support the McCloskey amendment and urge the membership to do likewise.

Mr. SEIBERLING. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I just want to make this comment: I strongly support the concept of "sunset" provisions. I think that is the only way we are going to get a periodic, indepth review of the necessity or justification for the continuance of all of these programs and agencies which we create. Obviously, many of them have fulfilled their original objectives. I do not think we can say, and I do not understand that the gentleman from California is saying, that this Commission has outlived its usefulness. He is saying that at the end of 3 years he thinks it can complete its job. I say, then, let us give it what the subcommittee, after full hearings, decided was needed, namely, 5 years.

I do not see that we are opposing the "sunset" principle here, but let us not start out with the Civil Rights Commission as the first place in which we enforce a truly limiting sunset provision.

Mr. McCLOSKEY. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from California.

Mr. McCLOSKEY. Mr. Chairman, there really was no intent to single out the civil rights legislation. It just happened to come along.

The first step where we accomplished sunset, if the gentleman will remember, was the consumer bill, which was ultimately defeated. When we created the consumer agency, we agreed that it should terminate at the end of 5 years.

Just a few months ago, in fact, in a vote in July, we abolished the Renegotiation Board.

Mr. SEIBERLING. I voted against abolishing it.

Mr. McCLOSKEY. This is the next agency in line. There is certainly no intent to send a signal to the civil rights movement that we want to weaken it. Actually, if this Commission does its job in 3 years, hopefully, we will strengthen civil rights enforcement.

Mr. SEIBERLING. I think that the gentleman is trying to make a point here which is not a substantive point but a symbolic point, because whether it is 3 years or 5 years is not really a matter of great moment. I think what the gentleman is trying to do is to get us to send a message that we think perhaps the time for this Commission is at an end. I do not think that is so, and I do not think our committee's hearings support any such conclusion.

Mr. McCLOSKEY. If the gentleman will yield further, I want to say I agree with that last statement. It is not an attempt to say that the civil rights problem is at an end. It is an attempt to say if we are going to end it, let us have the recommendations of this committee, act on them in 3 years, instead of 5.

Mr. SEIBERLING. I think a strong case has been made out here for doing what we ought to be doing, and that is support the committee that has done the work and explored the subject in depth, instead of trying to rewrite this bill on the floor.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. McCLOSKEY).

The question was taken; and on a division (demanded by Mr. BUTLER) there were—ayes 14, noes 27.

So the amendment was rejected.

● Mr. GOLDWATER. Mr. Chairman, I intend to vote against the Civil Rights Commission Act of 1978, which is now before the House. I do so for three reasons, and only for these reasons.

First, the bill extends the jurisdiction of the Commission to the areas of age and physical disability. The Department of HEW currently has jurisdiction over these areas. There is no evidence that HEW is improperly or insufficiently executing its responsibilities. There is evidence that the Civil Rights Commission is already overburdened.

Second, I see in this bill the continuation of past congressional habits of expanding the Federal bureaucracy and spending more money in the process. Efficiency in Government must be one of our prime concerns and I do not see that concern reflected in this bill.

Third, the hearings held by the Judiciary Committee clearly reveal that the Civil Rights Commission is not carrying out all of its currently mandated responsibilities, particularly in the areas of discrimination based on religion and national origin.

While I understand the concern and motivation of the authors of this bill, I cannot support its administrative expansion and increased funding level when the current activities of the Commission are clearly indicated to be deficient. The taxpayer rightfully expects efficiency and effectiveness and deserves nothing less.●

● Mr. LEGGETT. Mr. Chairman, in 1957, the Truman Committee established an independent commission to insure that our Nation's civil rights policy served our society's needs. Since that time, the civil rights issue has mushroomed—more inequalities have emerged then have been resolved—and the focus of public attention, which it once singularly occupied, must now be shared with other major national issues. It is my view that now, more than ever, Congress needs the direction in civil rights that only this vital Commission can provide.

The Commission still offers an unbiased continuing appraisal of the status of civil rights, it oversees the usefulness of civil rights programs, and from its unique perspective, it can identify the inconsistencies and fill in the gaps of our civil rights policy. Although the executive agencies enforce our civil rights policy, the Commission, with its 51-State Advisory Committees insuring that programs and legislation are effective on the local level, coordinates the Nation's civil rights policy.

I urge my colleagues to vote in favor of the extension of the Civil Rights Commission. The termination of this one vital agency would mean that the agencies it oversees would not be monitored, would preclude the successful resolution of the emergent civil rights problems, and most seriously, would mean a sporadic treatment of one of this Nation's most chronic ills.

Much of the resources allocated to this Commission finance its role as the objective monitor of both the progress of civil rights agencies and the efficacy of civil rights legislation. What is, perhaps, its greatest contribution to this end is a series of evaluative studies called the Federal Civil Rights Enforcement Effort. In 190 reports to date, the Commission has provided both Congress and the executive branch with detailed information on the extent to which certain departments, for instance Health, Education, and Welfare, Housing and Urban Development, the Veterans' Administration, the Internal Revenue Service, perform their civil rights responsibilities in the areas of housing, education, employment, and revenue sharing.

Congress needs such an objective watchdog for information on the status of civil rights. We are in a sorry position when we must gather information from the various executive agencies who have a bureaucratic stake in making themselves look good. Because the Commission's value is determined, in part, by its success as the watchdog of civil rights reform, it has no interest in misrepresenting progress in the field of civil rights. As long as there are agencies to enforce civil rights policies, the Civil Rights Commission is needed to insure that the conscience of the Nation is accurately reflected in Government activity.

The Commission has a substantial indirect effect on policy information and its enforcement. Its influence in the policy making process is best reflected in the President's Reorganization Act of 1978 which embodies the Commission's recommendation to reform and strengthen the Equal Employment Opportunity Commission. As a result, the EEOC has become the leading agency in fair employment enforcement. The Civil Rights Commission's prominent role in civil rights legislation has also lead to the amendments to the Voting Rights Act, the Equal Opportunity Act, the Civil Rights Attorney's Fees Act, the nondiscriminatory provisions of the State and Local Fiscal Assistance Act, and the Mortgage Loan Disclosure Act. Unfortunately, legislation once passed, is never self-enforcing. The Commission, by virtue of the fact that it looks over the shoulder of such departments as Justice, Health, Education, and Welfare, Housing and Urban Development, plays an essential role in the enforcement of civil rights policies.

Congress relies on the Commission to identify the gaps in our civil rights policies and to determine the corrective measures needed to remedy discriminatory practices. The Commission's investigations of specific complaints of denial of the right to vote have resulted in Congress's extension of the Voting Rights Act of 1975. Their illuminating research in the area of non-English-speaking peoples has led to requirements of bilingual elections, the first definitive study on discrimination against Mexican-American children in the schools, and the expansion of numerous bilingual civil rights

programs. In response to its mandate to study the denial of equal protection of the laws in the administration of justice, the Commission has explored the area of civil rights violations among the administrators of justice which are most often in contact with our constituent—the local police departments.

The bill which is presently under consideration would authorize the Commission to investigate discrimination in a relatively untreated area—civil rights violations against the aged and the handicapped. If Congress expects to advance the cause of civil rights in the area of institutionalized persons, a proposal which we are also considering today, research on those people most often institutionalized, the aged and the handicapped, would be indispensable.

Congress, in view of both the recent and pending decisions in the civil rights area, needs the leadership of the Civil Rights Commission now more than ever. As the Bakke verdict, recently handed down by the Supreme Court, provides no definitive instruction on the enforcement of affirmative action programs, the Commission, through its network of State advisory committees, could provide Congress with the guidance to proceed to implement the decision by identifying those areas where discrimination exists and where the need for affirmative action is most pressing.

When the equal rights amendment is ratified, the Commission's function as a source of information to the public would help guarantee these significant advances in the eradication of sex discrimination will not be turned into unfortunate retreats. Through research and the collection of factual data, the Commission could help to insure that the ERA's broad language is translated into viable legislation.

When an executive agency or commission has accomplished all that it was created to do, when it has solved society's problems and has ceased to be useful, then I am quick to advocate that agency's termination. It is my regret, however, that the termination of the Civil Rights Commission would be premature. I wish that bureaucratic agencies were always responsible, that civil rights legislation was self-enforcing—but better yet, that the civil rights problems affecting this Nation cease to exist. It is my view that the work of the Civil Rights Commission is not yet finished. Unless Congress is prepared to assume the immense task of direct oversight of civil rights operations, to identify and fill the gaps of our civil rights policy, and is willing to proceed blindly in the implementation of nebulous civil rights decisions, I urge my colleagues to vote for the extension of the Civil Rights Commission.●

The CHAIRMAN. Are there further amendments? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. DE LA GARZA, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 12432) to extend the Commission on Civil Rights for 5 years, to authorize appropriations for the Commission, to effect certain technical changes to comply with changes in the law, and for other purposes, pursuant to House Resolution 1235, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment?

Mr. BAUMAN. Mr. Speaker, I demand a separate vote on the Treen amendment.

The SPEAKER. Is a separate vote demanded on any other amendments? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The Clerk will report the amendment on which a separate vote has been demanded.

The Clerk read as follows:

Amendment: Page 3, strike out the quotation marks on line 5, and after line 5 insert the following:

"(f) Nothing in this or any other Act shall be construed as authorizing the Commission, its Advisory Committees, or any person under its supervision or control to appraise, or to study and collect information about, laws and policies of the Federal Government, or any other governmental authority in the United States, with respect to abortion.".

The SPEAKER. The question is on the amendment.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 234, nays 131, not voting 67, as follows:

[Roll No. 725]

The Clerk announced the following pairs:

On this vote:

Mr. Cornwell for, with Mr. Krueger against.

Mr. Kasten for, with Mrs. Burke of California against.

Until further notice:

Mr. Chappell with Mr. Richmond.
Mrs. Lloyd of Tennessee with Mr. Abdnor.
Mr. Bevill with Mr. Cochran of Mississippi.
Mr. Garcia with Mr. Forsythe.
Mr. Fuqua with Mr. Johnson of Colorado.
Mr. Lehman with Mr. Mr. Quillen.
Mr. Mikva with Mr. Pressler.
Mr. Teague with Mr. Quie.
Mr. Rodino with Mr. Armstrong.
Mr. Rostenkowski with Mr. Madigan.
Mr. Shipley with Mr. Dickinson.
Mr. Wirth with Mr. Frey.
Mr. Alexander with Mr. Broyhill.
Mr. Ammerman with Mr. Dornan.
Mr. Beilenson with Mr. Ruppe.
Mr. Byron with Mr. Hansen.
Mr. Flippo with Mr. Buchanan.
Mr. Harrington with Mr. Harsha.
Mr. Bonker with Mr. Burke of Florida.
Mr. Flood with Mr. Del Clawson.
Mr. Duncan of Oregon with Mr. Fraser.
Mr. LaFalce with Mr. Gibbons.
Mr. Miller of California with Mr. Huckaby.
Mr. Pattison of New York with Mr. Milford.
Mrs. Spellman with Mrs. Pettis.
Mr. Stump with Mr. Sisk.
Mr. Watkins with Mr. Young of Alaska.
Mr. Thone with Mr. Wiggins.
Mr. Tsongas with Mr. Wydler.
Mr. Flowers with Mr. Flynt.

Messrs. LEDERER, NOLAN, and MAHON changed their vote from "nay" to "yea."

Mr. GORE changed his vote from "yea" to "nay."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 3067) to extend the Commission on Civil Rights for 3 years, to authorize appropriations for the Commission, to effect certain changes to comply with other changes in the law, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 3067

An act to extend the Commission on Civil Rights for three years, to authorize appropriations for the Commission, to effect certain changes to comply with other changes in the law, and for other purposes

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Civil Rights Commission Act of 1978".

SEC. 2. (a) Section 103(a) of the Civil Rights Act of 1957 (42 U.S.C. 1975b(a)) is amended by striking out "section 5 of the Administrative Expenses Act of 1946, as amended (5 U.S.C. 73b–2; 60 Stat. 808)." and inserting in lieu thereof the following: "section 5703 of title 5 of the United States Code.".

(b) Section 103(b) of the Civil Rights Act of 1957 (42 U.S.C. 1975b(b)) is amended by striking out "the provisions of the Travel Expenses Act of 1949, as amended (5 U.S.C. 835–42; 63 Stat. 166)" and inserting in lieu thereof the following: "subchapter I of chapter 57 of title 5 of the United States Code".

SEC. 3. (a) Section 104 of the Civil Rights Act of 1957 (42 U.S.C. 1975c) is amended—

(1) in each of subsections (a)(1) and (a)(2) by inserting "age, handicap," after "sex,";

(2) in each of subsections (a)(3) and (a)(4), by inserting ", age, handicap," after "sex";

(3) in subsection (a)(2) by inserting "discrimination or" before "a denial";

(4) in each of subsections (a)(3) and (a)(4), by inserting "discrimination or" before "denials";

(5) by redesignating paragraph (6) of subsection (a) as subsection (b);

(6) by redesignating subsections (b) and (c) as (c) and (d), respectively; and

(7) by adding at the end the following:

"(e) As used in this section, the term 'handicap' means, with respect to an individual, a circumstance that would make that individual a handicapped individual as defined in the second sentence of section 7(6) of the Rehabilitation Act of 1973 (29 U.S.C. 76(6)).".

(b) Subsection (b) (which is redesignated as subsection (c) by this Act) of section 14 of the Civil Rights Act of 1957 (42 U.S.C. 1975c(b)) is amended by striking out "fiscal year 1978" and inserting in lieu thereof "the fiscal year ending September 30, 1981".

SEC. 4. Section 105(a) of the Civil Rights Act of 1957 (42 U.S.C. 1975d(a)) is amended by striking out "and who shall receive compensation at a rate, to be fixed by the President, not in excess of $22,500 a year".

SEC. 5. Section 105(c) of the Civil Rights Act of 1957 (42 U.S.C. 1975d(c)) is amended by striking out "composed of citizens of that State and" and inserting in lieu thereof the following: "as it deems advisable but the Commission shall constitute at least one such advisory committee within each State. The Commission".

SEC. 6. Section 105(d) of the Civil Rights Act of 1957 (42 U.S.C. 1975(d)) is amended by striking out "sections 281, 283, 284, 434, and 1914 of title 18 of the United States Code, and section 190 of the Revised Statutes (15 U.S.C. 99)" and inserting in lieu thereof the following: "sections 203, 205, 207, 208, and 209 of title 18 of the United States Code".

SEC. 7. Section 106 of the Civil Rights Act of 1957 (42 U.S.C. 1975e) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 106. There are authorized to be appropriated such sums as are necessary to carry out the provisions of this Act during fiscal year 1979.".

MOTION OFFERED BY MR. EDWARDS OF CALIFORNIA

Mr. EDWARDS of California. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. EDWARDS of California moves to strike out all after the enacting clause of S. 3067, and to insert in lieu thereof the provisions of H.R. 12432, as passed by the House, as follows:

That this Act may be cited as the "Civil Rights Commission Act of 1978".

SEC. 2. (a) Section 103(a) of the Civil Rights Act of 1957 (42 U.S.C. 1975b(a)) is amended by striking out "section 5 of the Administrative Expenses Act of 1946, as amended (5 U.S.C. 73b–2; 60 Stat. 808)." and inserting in lieu thereof the following: "section 5703 of title 5 of the United States Code.".

(b) Section 103(b) of the Civil Rights Act of 1957 (42 U.S.C. 1975b(b)) is amended by striking out "the provisions of the Travel Expenses Act of 1949, as amended (5 U.S.C. 835–42; 63 Stat. 166)" and inserting in lieu thereof the following: "subchapter I of chapter 57 of title 5 of the United States Code".

SEC. 3. (a) Section 104 of the Civil Rights Act of 1957 (42 U.S.C. 1975c) is amended—

(1) in each of subsections (a)(1) and (a)(2), by inserting "age, handicap," after "sex,";

(2) in each of subsections (a)(3) and (a)(4), by inserting ", age, handicap," after "sex";

(3) in subsection (a)(2) by inserting "discrimination or" before "a denial";

(4) in each of subsections (a)(3) and (a)(4), by inserting "discrimination or" before "denials";

(5) by redesignating paragraph (6) of subsection (a) as subsection (b);

(6) by redesignating subsections (b) and (c) as (c) and (d), respectively; and

(7) by adding at the end the following:

"(e) As used in this section, the term 'handicap' means, with respect to an individual, a circumstance that would make that individual a handicapped individual as defined in the second sentence of section 7(6) of the Rehabilitation Act of 1973 (29 U.S.C. 706(6)).

"(f) Nothing in this or any other Act shall be construed as authorizing the Commission, its Advisory Committees, or any person under its supervision or control to appraise, or to study and collect information about, laws and policies of the Federal Government, or any other governmental authority in the United States, with respect to abortion.".

(b) Subsection (b) (which is redesignated as subsection (c) by this Act) of section 104 of the Civil Rights Act of 1957 (42 U.S.C. 1975c(b)) is amended by striking out "fiscal year 1978" and inserting in lieu thereof "the fiscal year ending September 30, 1983".

SEC. 4. Section 105(a) of the Civil Rights Act of 1957 (42 U.S.C. 1975d(a)) is amended by striking out "and who shall receive compensation at a rate, to be fixed by the President, not in excess of $22,500 a year".

SEC. 5. Section 105(c) of the Civil Rights Act of 1957 (42 U.S.C. 1975d(c)) is amended—

(1) by striking out "may constitute such advisory committees within States" and inserting in lieu thereof the following: "shall constitute an advisory committee within each State"; and

(2) by striking out "and may consult" and inserting in lieu thereof the following: ". The Commission may consult".

SEC. 6. Section 105(d) of the Civil Rights Act of 1957 (42 U.S.C. 1975(d)) is amended by striking out "sections 281, 283, 284, 434, and 1914 of title 18 of the United States Code, and section 190 of the Revised Statutes (5 U.S.C. 99)" and inserting in lieu thereof the following: "sections 203, 205, 207, 208, and 209 of title 18 of the United States Code".

SEC. 7. Section 106 of the Civil Rights Act of 1957 (42 U.S.C. 1975e) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 106. (a) There are authorized to be appropriated not to exceed $12,752,000 for the fiscal year ending September 30, 1979, and not to exceed $14,000,000 for the fiscal year end-

ing September 30, 1980, to carry out the provisions of this Act.

"(b) No sums made available to the Commission shall be used at any time, directly or indirectly, to undertake to influence the passage or defeat of any legislation by the Congress of the United States or by any State or local legislative bodies, except when the Commission is requested to give an opinion.".

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "An act to extend the Commission on Civil Rights for five years, to authorize appropriations for the Commission, to effect certain technical changes to comply with changes in the law, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 12432) was laid on the table.

## GENERAL LEAVE

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

## NEW YORK CITY LOAN GUARANTEES

Mr. MAHON. Mr. Speaker, pursuant to the order of the House of Wednesday, August 2, 1978, I call up the joint resolution (H.J. Res. 1088) providing financial assistance for the city of New York, and ask for its consideration in the House as in the Committee of the Whole.

The Clerk read the title of the joint resolution.

GENERAL LEAVE

Mr. MAHON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks in connection with consideration of House Joint Resolution 1088.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 1088

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Secretary of the Treasury is authorized to guarantee the payment of principal and interest on loans in accordance with the provisions of the New York City Loan Guarantee Act of 1978 in amounts not to exceed $1,650,000,000 in principal outstanding at any time, and there is hereby appropriated effective October 1, 1978, such amounts as may be necessary for payment of principal and interest on loans in default and guaranteed pursuant to the New York City Loan Guarantee Act of 1978, to remain available until September 30, 1998.

Mr. MAHON. Mr. Speaker, I move to strike the last word.

Mr. Speaker, House Joint Resolution 1088 provides for the actual loan guarantee authority for the city of New York and appropriations in the case of any eventual default as authorized and required by Public Law 95–339, of August 8, 1978.

Public Law 95–339 authorizes the Secretary of the Treasury to guarantee loans to the city of New York to such an extent, and in such amounts, as are provided in an appropriation act.

The Committee on Appropriations reported House Joint Resolution 1088 on August 1, 1978, promptly after the authorization had been approved. The resolution was handled in the committee by the HUD-Independent Agency Subcommittee, under the able chairmanship of the distinguished gentleman from Massachusetts (Mr. BOLAND)—and in a few moments I shall yield to the gentleman.

Mr. Speaker, I might say that there are differences of opinion among the Members as to what should be done about the Loan Guarantees Act of 1978 for the city of New York.

I myself voted against the authorization when it was before the House, feeling that New York City had not acted sufficiently to get its fiscal affairs in order. And further, Mr. Speaker, I continue to be dismayed over the manner in which New York City made a shambles of its fiscal affairs in the first place.

However, the House and Senate have spoken, and the President has now approved the authorizing legislation, and so the Federal Government is committed to provide loan guarantees for the city of New York in order to prevent bankruptcy and difficulty otherwise. In view of this I think the only responsible course at this time is to vote for the appropriation measure before the House.

It is true that we have a lot of loan guarantees. We have them in the Veterans' Administration, in the Housing and Urban Development legislation; and we have them in the Farmers Home Administration. In fact, the Federal Government has loan guarantees, as of fiscal year 1979, in the total sum of $360 billion, a rather shocking and impressive figure.

Mr. Speaker, what we have to do now to point out to the Speaker and to the which was passed, and that is to take the necessary steps in the appropriations process so as to make sure that the loan guarantee program for the city of New York is made effective.

Mr. BOLAND. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Massachusetts, the distinguished chairman of the subcommittee.

Mr. BOLAND. Mr. Speaker, as the distinguished chairman of the full Committee on Appropriations has indicated, tion for the deterioration. Our response propriation authorized by the New York City Loan Guarantee Act of 1978. That bill passed the House on June 8 by 92 votes, 247 to 155. It passed the Senate on June 29 by a vote of 53 to 27. The House adopted the conference report on July 25 by a vote of 244 to 157, by 87 votes; and the Senate adopted the conference report on July 27 by a vote of 58 to 35. The President signed the act on August 8 of this year.

This joint resolution, Mr. Speaker, provides financial assistance for the city of New York. Section 111 of the authorization bill, the New York City Loan Guarantee Act of 1978, provides that the authority of the Secretary of the Treasury to guarantee loans for New York City shall be limited to such extent or amounts as provided in advance in appropriation acts. It also authorizes to be appropriated such sums as may be necessary to carry out the act.

We are doing those two things, Mr. Speaker, in this joint resolution. First, we are providing the authority for the Secretary of the Treasury to guarantee the payment of principal and interest on up to $1,650,000,000—the full amount authorized—in loans to city and State employee pension funds. Loans from these funds are the only loans which may be guaranteed under the act by the U.S. Government.

These loan guarantees may be made over the next 4 years, until June 30, 1982; but the loan duration may not exceed 15 years. The $1,650,000,000 in loan guarantees is available in four installments: $750,000,000 in city fiscal year 1979, $250,000,000 in 1980, $325,000,000 in 1981, and $325,000,000 in 1982.

The legislation provides that in 1979 not more than $500,000,000 of long-term guarantees and not more than $325,000,000 of short-term guarantees may be issued; but in no instance may the total exceed $750,000,000 for fiscal year 1979. The short-term proviso is for 1 year only, and those loans, Mr. Speaker, must be repaid by June 30, 1979. The guarantee authority is cumulative and repaid short-term authority is available for long-term guarantees.

Secondly, we are recommending an indefinite appropriation, to be available from October 1, 1978, to September 30, 1998, to cover possible defaults on loans guaranteed. We do not expect that New York City will default on the loans but the appropriation is made available in the event that happens.

Mr. Speaker, I have some reservations about Federal loan guarantees for municipal governments. But I am also firmly committed to providing financial assistance for New York City to avoid the possibility of bankruptcy. I hope that this assistance will not only enable New York City to avert bankruptcy, but also will give the city an entree to the credit markets. I believe we need to remind ourselves, however, that the solution to New York City's problems rests not with Washington, but with New York City.

When the authorization bill was before the House on June 7 the indication

was that unless further financial assistance was given to New York City by the beginning of July, insolvency and perhaps bankruptcy would soon follow. A loan of $565,000,000 from city pension funds and over $200,000,000 in unanticipated real estate taxes have put off that date. Representatives of the city of New York and the Department of the Treasury now state that final action on the appropriation measure is required by mid-September.

That, Mr. Speaker, in substance, is what is carried in this resolution, and I urge its adoption.

Mr. COUGHLIN. Mr. Speaker, to the extent I could hear the distinguished chairman of the committee, he stated the case, indeed, very well.

I think there are three very important facts that are involved here. First, this is a loan guarantee program, a loan guarantee program with a limitation, which will result in Federal outlays only in the event of a default on the bonds guaranteed.

Second, the legislative bill provides some very substantial safeguards for these guarantees. The Secretary of the Treasury can make the guarantees only if there is a reasonable prospect for repayment.

Finally, even if there were to be a default on one of these loans, the U.S. Government would have the recourse to withhold any payment from the Federal Government to the city or State which may be or may become due pursuant to any law, so that it is really a no-lose proposition, as far as the Federal Government is concerned, and I urge support of this resolution.

Mr. CHARLES H. WILSON of California. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. . I thank the gentleman for yielding.

I wonder if the gentleman can respond. I was interested in the closing remarks of the gentleman from Massachusetts (Mr. BOLAND) where he says up to 1998 in the event of defaults. Does that mean there could be direct payments from the Treasury in the event of defaults on any of these loans?

Mr. COUGHLIN. That means that there is an appropriation of as much money as might be necessary for default, but the Federal Government would have recourse then against other payments that it makes to the city of New York to cover those defaults.

Mr. CHARLES H. WILSON of California. There are no other cities or States where the Government would have anything comparable to this?

Mr. COUGHLIN. There is nothing directly comparable to this loan guarantee program for the city of New York.

Mr. BAUMAN. Mr. Speaker, I move to strike the last word.

Mr. Speaker, the gentleman from Massachusetts (Mr. BOLAND) referred to the previous acts of the House and the other body on the authorizing legislation, and the appropriation is now before us for still more aid to New York City. I assume that whenever either body of the Congress acts and the facts are subsequently changed in a substantial manner that the Members might want to know about that before they vote again. It may have escaped some of the membership's attention that there is a group called the Citizens' Budget Commission, made up of both civic and business leaders in New York City which has been in existence since 1932. The commission's purpose is to monitor New York City's finances and operations. That group reported a few weeks ago, after both Houses had acted, that the entire premise on which this package, the legislation and the appropriation, was presented to this Congress is not only faulty but, to use the commission's term, "full of gimmicks." They predicted that there is no way that the city of New York can live up to the commitments that the mayor and the other officials made to the Congress and on which basis some of you voted to pass this legislation. They predicted that this $1.65 billion on which we are now about to vote is only another installment payment in the sense that it will require possibly a half billion to a billion dollars more because of the recent labor settlement with the unions in New York City.

The commission also pointed out that the entire premise of this aid was riddled with unspecified city economies which will never take place and is based on Federal funds which are anticipated but in no way guaranteed to the tune of possibly $1.2 billion, creating an enormous gap between what we are appropriating today and what will eventually be needed. They went on to say that the only way the city will be able to avoid bankruptcy in a year or two, as some of us have predicted, is to come back for still more new guarantees and new loans.

Mr. Speaker, none of that may be of any interest to this House, but I think it is interesting to the taxpayers back home. Maybe some of the Members went on junkets recently and did not go back and talk to their people. But this is what the people of America are saying and here is the first chance for us to save some money for the people back home and at the same time force fiscal responsibility on the city of New York. I urge a "no" vote.

Mr. KELLY. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I would like to point out to the Speaker and to the Members of the House that an awful lot of what we do here in Congress does not make any sense. I think that is something we have gotten used to, but I would like to make the proposition that it does not really have to be this way.

One of the things that we are doing right now is trying to refurbish many of our cities that are dying. The reason these cities are dying is because they are being mismanaged and the business base and the private sector cannot survive there.

The congressional response is to build more buildings, rather than find a solution for the deterioration. Our response is to build more buildings so that there will be a target for civil insurrection.

The problem of New York hits right in the middle of this. What we need to do to help New York and what New York needs in the way of help is to quit spending so much money. They do not need to have new financing of the existing mismanagement. They already have too much financing of their mismanagement. What they need to do is to have a little good management and to quit spending so much money. We should not pass up an opportunity to help them get what they need.

That is one proposition. Another "proposition" is one called 13, and that is from the people in California.

Mr. Speaker, my really delightful remarks are so intermingled with the confusion here that I cannot tell which is the most confusing. Could the Speaker help me with getting some order in the Chamber?

The SPEAKER. The House will be in order.

Mr. KELLY. I thank the Speaker. That is infinitely better.

Back to this proposition 13, what the people in California clearly indicated for themselves and the rest of us was that they were tired of growing government. There was also indicated something that is tragic and dangerous, and that is that the people were not able to get the government they wanted from their duly elected officials. So the result was they had to go to volunteers like Jarvis because the people they elected through the constitutional process would not do what the people wanted.

Clearly, the people in New York are much more burdened with taxes than the people in California. The people in New York are not more tolerant of high taxes. What is going on in New York is that the subtlety of tax collection is more sophisticated in New York, because they are collecting their taxes through the withholding method, the same fine method we have established on the Federal level. They are also doing it with one of the highest sales taxes in the United States. Neither of which is as obvious as property taxes paid once or twice a year in a lump sum. As a matter of fact they even pay property taxes in quarterly installments in New York.

So, Mr. Speaker, what we need to do is to help the people of New York, because we are the elected officials of this country. We need to help them get the government that the people want. This nonsense about financing continuing mismanagement is going to bring the same kind of decay to the whole Nation that it has brought to New York and to many of our cities.

Mr. Speaker, it is entirely possible that we can go on for a few more years like we have been going.

Mr. Speaker, are we having a problem with the order in the House? Mr. Speaker, I make the point of order that the House is not in order.

The SPEAKER. The House will be in order.

Mr. KELLY. Mr. Speaker, if my colleagues would pay close attention, they might find that down in amongst all these verbal brambles I might say something intelligent. [Laughter.] Well, I am from Zephryhills, and that is a leg up.

But this is a serious matter when the people have to look elsewhere for the kind of government that they clearly want.

Mr. Speaker, New York is the prime example of everything that is bad in the mismanagement of this country, and we all know it. That is why they are bankrupt. New York is the richest city in America. They are bankrupt. The policies that have bankrupted them are the same policies we are using to bankrupt the United States.

So this is just an opportunity to give the people what they want as their elected officials. Let us not pass it up. Let us vote against more spending in New York.

Mr. Speaker, the following remarks appeared in a recent publication, and these remarks should be considered by my colleagues in Congress:

THE FLAWS IN NEW YORK'S RECOVERY PLAN

President Carter, surrounded by smiling politicians, sat in front of New York City's 19th-century city hall on Aug. 8 and signed the hard-won law providing federal loan guarantees to the city. A week later, Sidney Schwartz, the special state deputy comptroller who monitors the city's financial performance, charged that its current budget—which city officials say is in legal balance—actually contains a potential deficit of some $289 million.

Schwartz' audit, one of several recent reports questioning elements of the city's present and future budgets, comes as a rude reminder that the Big Apple's financial problems are not over. In the eyes of Felix G. Rohatyn, chairman of the Municipal Assistance Corp. of New York, the city has been wrestling with two problems: one of financing, which was relatively unpolitical and readily solvable; the other of budgetary control, which is highly political and may even defy solution. The federal legislation signed by Carter goes a long way toward ending the financial problem and the frequent cash crises that have bedeviled the city over the past three years. But Mayor Edward I. Koch has been understandably slow in trying to tackle the politically explosive problem of making cuts in the budget. Every cut angers some city constituency.

The new federal aid provides no new money. It provides loan guarantees that enable the city to put into effect its own four-year financial plan—a plan that aims at achieving a truly balanced budget by fiscal 1982, at reopening the credit markets to the city, and at starting on an essential, long-delayed program of capital improvements. To do this, city officials must hold down spending.

Donald D. Kummerfeld, executive director of the Emergency Financial Control Board (EFCB), the state agency that must oversee and approve city budgets, says flatly: "The struggle to reduce budget expenses is not over. There will be pain and outcries. But the city has no choice."

Spending cuts. Already doubts are being heard over whether city politicians are ready to start cutting. Says one official closely involved with city finances, "The mayor should be doing more now to cut spending." Adds another expert: "He is delaying essential cuts. He doesn't want to take any unpopular actions."

Eliminating jobs, of course, is especially unpopular, yet the four-year plan calls for a 10-percent reduction in the city's work force through attrition. But the way the mayor is doing this, says a recent EFCB report, "appears to be backloaded." Initially, he proposed to cut 4 percent in the current fiscal year, then 3 percent, 2 percent, and 1 percent. Instead, the new plan calls for a 1-percent cut this fiscal year, with 3 percent in each suceeding year. The EFCB report points out that this approach deprives the city of considerable savings. Postponing attrition, the report concludes, "not only compounds the problem for future years but raises serious questions about the achievability of the entire plan."

What stirs such early concern is the riskiness of the city's plan. Basically, it is a series of revenue and expense estimates for fiscal 1979 through fiscal 1982. These projections produce annual deficits rising to $702 million in the final year. To close these gaps, the plan specifies savings the city expects to make in its expenses and the new revenues it expects to receive, mainly from federal and state aid programs.

Reducing the work force is a major test of the city administration's willingness to carry out its plan. The current reversal of the attrition schedule strengthens the conviction that Mayor Koch is simply delaying these and other cuts in hopes that new federal help will spare him from taking painful actions.

FUTURE RISKS

The danger to the city, though, is that such tactics will impose the need for even heavier cuts later should other parts of the plan slip badly. Studies by the EFCB and Comptroller Schwartz, as well as by the private watchdog Citizens Budget Commission Inc (CBC), make plain that the plan is shot through with risky assumptions.

The EFBC questions, for example, the city's hopes for holding down spending on payments and supplies and for savings from "as yet unspecified" management improvements. Other items, such as rising hospital costs, could exceed projections. Most significant, though, are unplanned-for labor costs and too-heavy reliance on uncertain federal programs that, says one man, "may be just optimistic speculation."

In a stinging report, the CBC says that because the city sacrificed cost-saving and productivity requirements in cost-of-living agreements, the true costs of recent labor settlements could run to more than $1 billion. To finance some of these costs, it charges, the city has resorted to "gimmicks" and "one-shot revenues." Deputy Mayor Philip L. Toia says the report is filled with "mischief and naivete." But the EFBC adds that city projections do not "include any provisions for wage increases" that new agreements in mid-1980 may bring.

The EFBC report also says "the major revenue uncertainties" of the past three years of the plan center on federal and state help. The city counts heavily on countercyclical revenue-sharing, a program now stalled in Congress, and on Community Employment Training Assistance. In fiscal 1979, in fact, the total city work force will increase, rather than decrease as planned, because the city is adding more CETA-funded workers than it cuts from the city payrolls.

The city and its watchdogs arrive at different budget deficits depending on how they assess the risks. But variations in the numbers count for less today than the fact that all estimates are large, and few experts doubt that the city eventually will have to cut back harshly, even more than it is now planning. The issue, say the experts, is no longer how the city can raise money to do all it wants to do but how it can push down spending. Says Herbert J. Ranschburg, research director of the CBC, "The real issue is not financing the city, it's how to get the city back on an even keel so that it doesn't damage the private economy.

● Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I rise to support House Joint Resolution 1088. This appropriations legislation is necessary to enable the Secretary of the Treasury to begin implementation of the New York City Loan Guarantee Act of 1978, which we passed in this House in early June by a nearly 2 to 1 margin, and again 2 weeks ago, by a similar vote when we approved the conference report.

New York City is now in the second month of its fiscal 1979 year, the first year of its 4-year financial program to get back into the credit market. The Federal guarantees are an integral part of the 4-year financial plan. The city needs to borrow $4.5 billion over the next 4 years. This amount will enable New York, if it adheres to the program it has set for itself, to bring its budget into true balance and stand on its own financial feet by 1982. The $1.65 billion of Federally guaranteed borrowings from the city and State employee pension funds will provide an assured base on which the lenders for the ungaranteed portion of the $4.5 billion can depend.

The Appropriations Committee is wisely proposing granting the Secretary of the Treasury authority for the full amount of this guarantee authority. I support this proposal because it will represent the measure of assurance which those unguaranteed lenders need that, subject to the very specific conditions of the enabling legislation, the guarantee authority is in place.

Mr. Speaker, the conditions and other provisions of the enabling legislation will serve as the standards by which the Secretary may issue the guarantees. Before obtaining Federal guarantees New York City must, among other things, do the following:

Adopt and adhere to stringent budget-balancing requirements starting in this fiscal year, and running out through the entire period the guarantees are in effect;

Be under the supervision of an independent fiscal monitor for the entire period of the guarantees;

Set aside a reserve fund to cover possible defaults and begin to retire the guaranteed securities as soon as it is back in and credit markets;

Attempt to market its own notes and bonds beginning in 1980;

Suffer the withholding of city and State Federal transfer payments in the event of default; and

Secure commitments for the unguaranteed portion of its financial needs.

In addition, there are restraints on the authority of the Secretary of the Treasury to issue the guarantees. Annual amounts are specified in the act, and in 1980 and 1981, these could be vetoed by either House of Congress. The 1982 portion is subject to the city's having adopted a budget balanced in accordance with generally accepted accounting principles.

Mr. Speaker, the Congress has enacted a bill containing a set of requirements which will both help New York get back on its financial feet and provide the greatest protection for the Federal liability which will be involved. I urge my colleagues to vote for this appropriation measure so the New York City Loan Guarantee Act may be implemented. ●

Mr. MAHON. Mr. Speaker, I move the previous question on the joint resolution to final passage.

The previous question was ordered.

The SPEAKER. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the joint resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. CHARLES H. WILSON of California. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device and there were—yeas 233, nays 132, not voting 67, as follows:

[Roll No. 726]

Mr. Wirth with Mr. Young of Alaska.
Mr. Tsongas with Mr. Dickinson.
Mr. Flowers with Mr. Fraser.
Mr. Duncan of Oregon with Mr. Stump.
Mr. Rostenkowski with Mr. Gibbons.

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## APPOINTMENT OF CONFEREES ON H.R. 15, EDUCATION AMENDMENTS OF 1978

Mr. PERKINS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill, H.R. 15, to extend and amend expiring elementary and secondary education programs, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky? The Chair hears none, and appoints the following conferees: Messrs. PERKINS, FORD of Michigan, ANDREWS of North Carolina, BLOUIN, SIMON, ZEFERETTI, MOTTL, MURPHY of Pennsylvania, LE FANTE, WEISS, HEFTEL, CORRADA, KILDEE, MILLER of California, QUIE, BUCHANAN, GOODLING, PURSELL, ERLENBORN, and JEFFORDS.

## CONFERENCE REPORT ON H.R. 12598, FOREIGN RELATIONS AUTHORIZATION ACT, FISCAL YEAR 1979

Mr. FASCELL submitted the following conference report and statement on the bill (H.R. 12598) to authorize appropriations for fiscal year 1979 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, to make changes in the laws relating to those agencies, to make changes in the Foreign Service personnel system, to establish policies and responsibilities with respect to science, technology, and American diplomacy, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 95–1535)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 12598) to authorize appropriations for fiscal year 1979 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, to make changes in the laws relating to those agencies, to make changes in the Foreign Service personnel system, to establish policies and responsibilities with respect to science, technology, and American diplomacy, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Foreign Relations Authorization Act, Fiscal Year 1978".

## TITLE I—DEPARTMENT OF STATE

AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1979

SEC. 101. (a) There are authorized to be appropriated for the Department of State for the fiscal year 1979 to carry out the authorities, functions, duties, and responsibilities in the conduct of the foreign affairs of the United States, including trade negotiations, and other purposes authorized by law, the following amounts:

(1) For "Administration of Foreign Affairs", $849,118,000.

(2) For "International Organizations and Conferences", $412,826,000.

(3) For "International Commissions", $20,773,000.

(4) For "Migration and Refugee Assistance", $116,536,000.

(5) For increases in salary, pay, retirement, and other employee benefits authorized by law, and for other nondiscretionary costs, such amounts as may be necessary.

(b) Amounts appropriated under this section are authorized to remain available until expended.

(c) Funds authorized to be appropriated for the fiscal year 1979 by paragraphs (1) through (4) of subsection (a) may be appropriated for the fiscal year 1979 for a purpose for which appropriations are authorized by any other of those paragraphs, except that the total amount appropriated for a purpose described in any of those paragraphs may not exceed by more than 10 percent the amount specifically authorized for that purpose by subsection (a).

SUPPLEMENTAL AUTHORIZATION FOR FISCAL YEAR 1978 FOR INTERNATIONAL ORGANIZATIONS AND CONFERENCES

SEC. 102. Section 101(a)(2) of the Foreign Relations Authorization Act, Fiscal Year 1978, is amended by striking out "$389,412,000" and inserting in lieu thereof "$426,687,000".

UNITED NATIONS CONFERENCE ON SCIENCE AND TECHNOLOGY FOR DEVELOPMENT

SEC. 103. (a) The Congress finds that—

(1) science and technology are keys to eradicating hunger and poverty in developing countries;

(2) the ability of the developing countries to achieve self-sustaining growth has been hindered by the lack of an indigenous scientific and technological base;

(3) this scientific and technological base is vital to the emergence of developing countries as full and equal partners in the international system;

(4) expanded cooperation with respect to science and technology can significantly contribute to an improved North-South relationship; and

(5) the United Nations Conference on Science and Technology for Development offers a valuable forum for the analysis of problems of development that might be alleviated or solved with the aid of scientific and technical expertise.

(b) It is therefore the sense of the Congress that the United States should strongly support the purpose of the United Nations Conference on Science and Technology for Development and that the United States delegation to this conference should actively develop and offer proposals which would facilitate an expansion of mutually beneficial cooperation among developed and developing countries with respect to science and technology, including joint education and research and development programs.

(c) In addition to amounts otherwise available for such purpose, $945,000 of the amount authorized to be appropriated by section 101(a)(1) of this Act shall be available only for expenses incurred by the Department of State in connection with the United Nations Conference on Science and Technology for Development, including expenses for preparatory conferences and seminars held in the United States.

MEMORIAL STATUE OF GENERAL MARSHALL

SEC. 104. (a) The Secretary of State is authorized to acquire on behalf of the United States a memorial statue or bust of General George C. Marshall (hereafter in this section referred to as the "memorial") to be placed in an appropriate location within the Department of State.

(b)(1) To assist the Secretary of State in carrying out the provisions of subsection (a), there is established a Commission to be composed of seven members as follows:

(A) The Secretary, who shall be the chairman of the Commission.

(B) Two members appointed by the Secretary.

(C) Two members appointed by the chairman of the Committee on Foreign Relations of the Senate.

(D) Two members appointed by the chairman of the Committee on International Relations of the House of Representatives.

Members of the Commission shall serve without compensation.

(2) The Commission shall operate under the direction of the Secretary of State and, subject to final approval by the Secretary, shall select the sculptor for the memorial and select its size, style, design, and material.

(3) The Commission shall cease to exist upon completion of its functions under this section, as determined by the Secretary.

(c)(1) Of the funds authorized to be appropriated by section 101(a)(1) of this Act, not more than $10,000 may be used for payment of costs incurred in carrying out subsection (a) of this section.

(2) All other costs incurred in carrying out subsection (a) shall be paid by the Secretary of State with funds contributed to the United States for such purpose.

(d) The Secretary of State shall be responsible for maintenance and care of the memorial.

FOREIGN MISSION SOLAR ENERGY DEMONSTRATION

SEC. 105. (a) It is the purpose of this section to provide for the demonstration of solar energy and other renewable energy technologies in foreign countries through the use of such energy in buildings acquired under subsection (a) of the first section of the Foreign Service Buildings Act, 1926 (22 U.S.C. 292(a)), in order that—

(1) countries in which such buildings are located may be given visible incentives to develop and use local solar energy or other renewable energy resources to reduce dependence upon petroleum and petroleum products;

(2) markets may be developed for American solar energy systems and components in order to stimulate investment in such systems and components and to reduce the costs of such systems and components to reasonable levels;

(3) in furtherance of the purpose of section 119 of the Foreign Assistance Act of 1961 (22 U.S.C. 2151q), cooperation may be developed between the United States and other countries in an effort to develop solar energy or other renewable energy systems within a short period of time; and

(4) equipment which is vital to the operation of sensitive systems within United States missions abroad may be made more reliable and less dependent upon interruptible local energy supplies.

(b)(1) The Secretary of State shall implement projects for the application of solar energy or other forms of renewable energy in buildings acquired under subsection (a) of the first section of the Foreign Service Buildings Act, 1926.

(2) The Secretary of State shall select projects under paragraph (1) in consultation with the Secretary of Energy. Such projects shall apply available solar energy and other renewable energy technologies, including those for—

(A) the heating and cooling of buildings;

(B) solar thermal electric systems;

(C) solar photovoltaic conversion systems;

(D) wind energy systems; and

(E) systems for developing fuels from biomass.

The Secretary of Energy shall inform the Secretary of State of all such technologies which are feasible for such projects, taking into account the resources and environmental conditions of the countries in which such projects are to be implemented. Upon the request of the Secretary of State, the Secretary of Energy shall provide to the Secretary of State any technical information or other technical assistance which the Secretary of State considers necessary with respect to any such project. Any project selected under this section should be similar to projects which have been demonstrated by the Department of Energy (or any of its predecessor agencies) to be reliable, maintainable, and technically feasible.

(3) Any project selected under this section shall be adaptable to the local resources, climatic conditions, and economic circumstances of the country in which such project is implemented in order that such country will be more likely to implement similar projects.

(4) The Secretary of State shall insure that any project selected under this section is demonstrated to, and available for inspection by, officials and other citizens of the country in which such project is implemented.

(5) In selecting projects under this section, the Secretary of State shall give priority to projects to be implemented in developing countries.

(c) Whenever any building is constructed under the authority contained in the first section of the Foreign Service Buildings Act, 1926, the Secretary of State shall insure that the planning for such construction takes into account those renewable energy systems which are available in the country in which the building is to be constructed.

(d) In addition to amounts otherwise available for such purposes, $4,000,000 of the amount authorized to be appropriated by section 101(a)(1) of this Act shall be available only to carry out the purposes of this section.

ASSISTANCE FOR REFUGEE SETTLING IN ISRAEL

SEC. 106. Of the amount authorized to be appropriated by section 101(a)(4) of this Act, $25,000,000 shall be available only for assistance for the resettlement in Israel of refugees from the Union of Soviet Socialist Republics and from Communist countries in Eastern Europe.

ASSISTANCE FOR REFUGEES IN AFRICA

SEC. 107. In addition to amounts otherwise available for such purpose, $5,000,000 of the amount authorized to be appropriated by section 101(a)(4) of this Act shall be available only for assistance for refugees in Africa.

AID TO DESTITUTE AMERICANS ABROAD

SEC. 108. (a) Section 3(j) of the Act entitled "An Act to provide certain basic authority for the Department of State", approved August 1, 1956 (22 U.S.C. 2670(j)), is amended by inserting "or destitute United States citizens abroad" immediately after "incarcerated abroad".

(b) The amendment made by this section shall take effect on October 1, 1978.

WORKING CAPITAL FUND

SEC. 109. (a) Section 13 of the Act entitled "An Act to provide certain basic authority for the Department of State", approved August 1, 1956 (22 U.S.C. 2684), is amended—

(1) by striking out "supply" in clause (2) in the first sentence;

(2) by striking out ", and" at the end of clause (2) in the first sentence and inserting in lieu thereof a semicolon;

(3) by inserting immediately before the period at the end of the first sentence "; and (4) medical and health care services";

(4) by striking out the third sentence; and

(5) by inserting "(a)" immediately after "SEC. 13." and by adding the following new subsection at the end of the section:

"(b) The current value of supplies returned to the working capital fund by a post, activity, or agency may be charged to the fund. The proceeds thereof shall, if otherwise authorized, be credited to current applicable appropriations and shall remain available for expenditures for the same purposes for which those appropriations are available. Credits may not be made to appropriations under this subsection as the result of capitalization of inventories.".

(b) The amendments made by this section shall take effect on October 1, 1978.

REPRESENTATION EXPENSES OF THE INTERNATIONAL JOINT COMMISSION, UNITED STATES AND CANADA

SEC. 110. (a) Section 19 of the Act entitled "An Act to provide certain basic authority for the Department of State", approved August 1, 1956 (22 U.S.C. 2689), is amended by striking out "not to exceed $1,500 of the".

(b) The amendment made by this section shall take effect on October 1, 1978.

CONSOLIDATION OF ADMINISTRATIVE SERVICES

SEC. 111. (a) The Act entitled "An Act to provide certain basic authority for the Department of State", approved August 1, 1956, is amended by adding at the end thereof the following new section:

"SEC. 23. Whenever the head of any Federal agency performing any foreign affairs functions (including, but not limited to, the Department of State, the International Communication Agency, the Agency for International Development, and the Arms Control and Disarmament Agency) determines that administrative services performed in common by the Department of State and one or more other such agencies may be performed more advantageously and more economically on a consolidated basis, the Secretary of State and the heads of the other agencies concerned may, subject to the approval of the Director of the Office of Management and Budget, conclude an agreement which provides for the transfer to and consolidation within the Department or within one of the other agencies concerned of so much of the functions, personnel, property, records, and funds of the Department and of the other agencies concerned as may be necessary to enable the performance of those administrative services on a consolidated basis for the benefit of all agencies concerned. Agreements for consolidation of administrative services under this section shall provide for reimbursement or advances of funds from the agency receiving the service to the agency performing the service in amounts which will approximate the expense of providing administrative services for the serviced agency.".

(b) The amendment made by this section shall take effect on October 1, 1978.

POST EMPLOYEE SERVICES

SEC. 112. (a) Part C of title IX of the Foreign Service Act of 1946 (22 U.S.C. 1139) is amended—

(1) by striking out "Commissary Service" in the heading for that part and inserting in lieu thereof "Post Employee Services"; and

(2) by amending subsections (b) and (c) of section 921 to read as follows:

"(b) The Secretary, under such regulations as he may prescribe, may authorize and assist in the establishment, maintenance, and operation by officers and employees of the Service of non-Government-operated services and facilities at posts abroad, including the furnishing of space, utilities, and properties owned or leased by the United States for use by its diplomatic and consular missions. The provisions of the Foreign Service Buildings Act, 1926 (22 U.S.C. 292–300), and section 13 of the Act entitled 'An Act to provide certain basic authority for the Department of State', approved August 1, 1956 (22 U.S.C. 2684), may be utilized by the Secretary in providing such assistance. Services and facilities established under this subsection shall be made available, insofar as practicable, to officers and employees of other Government agencies and their dependents who are stationed abroad. Such services and facilities shall not be established in localities where another United States agency operates similar services or facilities unless the Secretary determines that such additional services or facilities are necessary.

"(c) Charges at any post abroad for a service or facility authorized or assisted under this section shall be at the same rate for all civilian personnel of the Government serviced thereby, and all charges for supplies furnished to such a service or facility abroad by any Government agency shall be at the same rate as that charged by the furnishing agency to its comparable civilian services and facilities.".

(b) The amendments made by this section shall take effect on October 1, 1978.

FURNISHING MEDICAL SERVICES ABROAD

SEC. 113. (a) Part E of title IX of the Foreign Service Act of 1946 is amended—

(1) in section 942 (22 U.S.C. 1157) by striking out "(a)" and by striking out subsection (b); and

(2) by adding at the end of that part the following new section:

"FURNISHING MEDICAL SERVICES ABROAD

"SEC. 945. The Secretary may establish medical treatment and health care facilities and provide for the services of physicians, nurses, or other medical or health care personnel at a post at which, in the opinion of the Secretary, sufficient personnel are employed to warrant such facilities or services.".

(b) The amendments made by this section shall take effect on October 1, 1978.

UNDER SECRETARY OF STATE FOR MANAGEMENT

SEC. 114. (a)(1) The first section of the Act entitled "An Act to strengthen and improve the organization and administration of the Department of State, and for other purposes", approved May 26, 1949 (22 U.S.C. 2652), is amended by striking out "a Deputy Under Secretary of State" and inserting in lieu thereof "an Under Secretary of State for Management".

(2) The individual holding the office of Deputy Under Secretary of State on the effective date of this section shall assume the duties of Under Secretary of State for Management and shall not be required to be reappointed by reason of the enactment of this section.

(b)(1) Paragraph (9) of section 5314 of title 5, United States Code, is amended by inserting "and Under Secretary of State for Management" immediately after "Programs".

(2) Paragraph (10) of section 5315 of such title is repealed.

(c) The amendments made by this section shall take effect on October 1, 1978.

ASSISTANT SECRETARY OF STATE FOR INTERNATIONAL NARCOTICS MATTERS

SEC. 115. (a) There is established in the Department of State, in addition to the positions provided under the first section of the Act of May 26, 1949 (22 U.S.C. 2652), an Assistant Secretary of State for International Narcotics Matters, who shall be appointed by the President, by and with the advice and consent of the Senate. The Assistant Secretary shall be responsible for the overall coordination of the role of the Department of State in the international aspects of narcotics problems.

(b)(1) Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following new paragraph:

"(122) Assistant Secretary for International Narcotics Matters, Department of State.".

(2) The amendment made by paragraph (1) of this subsection shall take effect on October 1, 1978.

DEFINITION OF CHIEF OF MISSION

SEC. 116. Paragraph (9) of section 121 of the Foreign Service Act of 1946 (22 U.S.C. 802(9)) is amended by striking out "or diplomatic agent" and inserting in lieu thereof "diplomatic agent, or the head of a United States office abroad which is designated by the Secretary as having a purpose diplomatic in nature".

RESPONSIBILITIES OF A CHIEF OF MISSION

SEC. 117. Section 16 of the Act entitled "An Act to provide certain basic authority for the Department of State", approved August 1, 1956 (22 U.S.C. 2680a), is amended—

(1) in paragraph (1) by striking out "Ambassador to" and inserting in lieu thereof "chief of mission (as defined in section 121 (9) of the Foreign Service Act of 1946) in";

(2) in paragraph (2) by striking out "Ambassador" and inserting in lieu thereof "chief of mission"; and

(3) in paragraph (3)—

(A) by striking out "Ambassador to" and inserting in lieu thereof "chief of mission in"; and

(B) by striking out "the Ambassador" and inserting in lieu thereof "the chief of mission".

DETAILING OF STATE DEPARTMENT PERSONNEL

SEC. 118. Section 11(a) of the Department of State Appropriations Authorization Act of 1973 (22 U.S.C. 2685(a)) is amended—

(1) by striking out "ninety days" and inserting in lieu thereof "one year"; and

(2) by adding at the end thereof the following new sentence: "Officers and employees of the Department of State who are detailed, assigned, or otherwise made available to another Executive agency for a period of not to exceed one year shall not be counted toward any personnel ceiling for the Department of State established by the Director of the Office of Management and Budget.".

EXCLUSION OF CERTAIN ALIENS FROM THE UNITED STATES

SEC. 119. Section 21 of the Act entitled "An Act to provide certain basic authority for the Department of State", approved August 1, 1956 (22 U.S.C. 2691), is amended by adding at the end thereof the following new sentence: "Nothing in this section may be construed as authorizing or requiring the admission to the United States of any alien who is excludible for reasons other than membership in or affiliation with a proscribed organization.".

PUBLICATION OF HISTORICAL DOCUMENTS BY THE DEPARTMENT OF STATE

SEC. 120. (a) The Congress finds that the Department of State publication "Foreign Relations of the United States" plays an important role in making the documentary record of United States foreign relations available to the Congress and the American public.

(b) The Secretary of State shall therefore insure that publication of the "Foreign Re-

lations of the United States" volumes is continued in such a manner as will maintain the high standard of comprehensive documentation already established by past volumes.

ASSISTANCE TO BEREAVED UNITED STATES FAMILIES

SEC. 121. (a) The Congress finds that the Department of State should, in the performance of its consular duties, render all reasonable administrative assistance to a United States citizen who is making necessary arrangements following the death of another United States citizen abroad.

(b) The Secretary of State shall—

(1) analyze alternative procedures by which the Department of State could, where necessary and appropriate, provide loans or other forms of assistance to facilitate such arrangements; and

(2) not later than January 20, 1979, transmit to the Speaker of the House of Represenatives and the chairman of the Committee on Foreign Relations of the Senate a report describing fully and completely such alternate procedures, including associated costs, and presenting his views and recommendations with respect to such procedures.

SEC. 122. (a) The Congress finds that—

(1) international political, economic, and other studies prepared systematically by analysts of the Department of State as needed background information for executive branch policymakers could be similarly valuable to the Committee on International Relations of the House of Representatives and the Committee on Foreign Relations of the Senate in fulfilling their responsibilities; and

(2) a formal information-sharing arrangement between the Department of State and such congressional committees could therefore serve the national interest, provided that controls on dissemination are established which insure that neither the process of analysis nor necessary confidentiality is jeopardized.

(b) Not later than January 20, 1979, the Secretary of State shall transmit to the chairman of the Committee on International Relations of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate recommendations with respect to the establishment of such an information-sharing arrangement.

ASSISTING MINORITY ENTERPRISE

SEC. 123. (a) The Congress finds that the Inter-Agency Council for Minority Enterprise has been created to assist minority owned and operated businesses in establishing broader markets, including markets with respect to procurement by the United States Government.

(b) It is the sense of the Congress that the Secretary of State, in cooperation with such Council, should—

(1) broaden minority business participation in the provision of goods and services for the Department of State; and

(2) establish and expand export markets for minority businesses.

LIMITATION ON GEOGRAPHICAL TRAVEL RESTRICTIONS IN UNITED STATES PASSPORTS

SEC. 124. For the purpose of achieving greater United States compliance with the provisions of the Final Act of the Conference on Security and Cooperation in Europe (signed at Helsinki on August 1, 1975) and for the purpose of encouraging other countries which are signatories to the Final Act to comply with those provisions, the first section of the Act entitled "An Act to regulate the issue and validity of passports, and for other purposes", approved July 3, 1926 (22 U.S.C. 211a), is amended by adding at the end thereof the following: "Unless authorized by law, a passport may not be designated as restricted for travel to or for use in any country other than a country with which the United States is at war, where armed hostilities are in progress, or where there is imminent danger to the public health or the physical safety of United States travellers.".

DIPLOMATIC AND OFFICIAL PASSPORTS

SEC. 125. It is the sense of the Congress that a diplomatic or official United States passport should be issued only to, and used only by, a person who holds a diplomatic or other official position in the United States Government or who is otherwise eligible for such a passport under conditions specifically authorized by law.

TRAVEL RESTRICTIONS ON FOREIGN CITIZENS

SEC. 126. (a) For the purpose of implementing general principles of the Final Act of the Conference on Security and Cooperation in Europe (signed at Helsinki on August 1, 1975) emphasizing the lowering of international barriers to the free movement of people and ideas and in accordance with provisions of the Vienna Convention on Diplomatic Relations establishing the legal principles of nondiscrimination and reciprocity, it shall be the general policy of the United States to impose restrictions on travel within the United States by citizens of another country only when the government of that country imposes restrictions on travel by United States citizens within that country.

(b) The Secretary of State shall

(1) insure that this policy is clearly conveyed to any foreign government imposing travel restrictions on United States citizens; and

(2) seek the elimination, on a mutual and reciprocal basis, of travel restrictions imposed by such government and by the Government of the United States on each other's citizens.

(c) Not later than January 20, 1979, and at intervals of one year thereafter for a period of three years, the Secretary of State shall transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report describing—

(1) domestic travel restrictions then being imposed by the United States Government on citizens of other countries and by foreign governments on United States citizens; and

(2) the progress of efforts undertaken pursuant to subsection

(b) to achieve the elimination of such restrictions.

(d) Subsection (a) may not be construed as limiting any restrictions on travel within the United States which are imposed by the United States Government, on a reciprocal basis, with respect to the officials of particular foreign governments.

## TITLE II—INTERNATIONAL COMMUNICATION AGENCY

AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1979

SEC. 201. (a) There is authorized to be appropriated for the International Communication Agency for fiscal year 1979 to carry out international communication, educational, cultural, and exchange programs under the United States Information and Educational Exchange Act of 1948, the Mutual Educational and Cultural Exchange Act of 1961, and Reorganization Plan Numbered 2 of 1977, and other purposes authorized by law, $420,577,000, and such additional amounts as may be necessary for increases in salary, pay, retirement, and other employee benefits authorized by law, and for other nondiscretionary cost.

(b) Amounts appropriated under this section are authorized to remain available until expended.

MISSION OF THE INTERNATIONAL COMMUNICATION AGENCY

SEC. 202. The mission of the International Communication Agency shall be to further the national interest by improving United States relations with other countries and peoples through the broadest possible sharing of ideas, information, and educational and cultural activities. In carrying out this mission, the International Communication Agency shall, among other activities—

(1) conduct Government-sponsored information, educational, and cultural activities designed—

(A) to provide other peoples with a better understanding of the policies, values, institutions, and culture of the United States; and

(B) within the statutory limits governing domestic activities of the Agency, to enhance understanding on the part of the Government and people of the United States of the history, culture, attitudes, perceptions, and aspirations of others;

(2) encourage private institutions in the United States to develop their own exchange activities, and provide assistance for those exchange activities which are in the broadest national interest;

(3) coordinate international informational, educational, or cultural activities conducted or planned by departments and agencies of the United States Government;

(4) assist in the development of a comprehensive national policy on international communications; and

(5) promote United States participation in international events relevant to the mission of the Agency.

EXPANDED EXCHANGE ACTIVITIES

SEC. 203. The President shall, by a process of gradual expansion during the four-year period beginning October 1, 1979, increase significantly the financial resources expended annually by the International Communication Agency for exchange-of-persons activities. The President shall prepare at an early date a general plan for the accomplishment of this goal and shall adjust that plan annually, as he finds appropriate, in consultation with the Congress.

TECHNICAL AND CLARIFYING AMENDMENTS ON PERSONNEL AND OTHER MATTERS

SEC. 204. (a) Section 104(e)(1) of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2454(e)(1) is amended by striking out "President" and inserting in lieu thereof "Director of the International Communication Agency".

(b)(1) The Act entitled "An Act to promote the foreign policy of the United States by strengthening and improving the Foreign Service personnel system of the United States Information Agency through establishment of a Foreign Service Information Officer Corps", approved August 20, 1968, is amended in the first section, section 2, and section 12 (22 U.S.C. 1221, 1222, and 1232) by striking out "United States Information" and inserting in lieu thereof "International Communication".

(2) Section 4 of that Act (22 U.S.C. 1224) is amended to read as follows:

"AUTHORITY OF THE DIRECTOR

"SEC. 4. Foreign Service information officers, Foreign Service Reserve officers, Foreign Service staff officers and employees, and alien clerks and employees of the Agency shall be under the direction and authority of the Director. Authority available to the Secretary of State with respect to Foreign Service officers, Foreign Service Reserve officers, Foreign Service staff officers and employees, or alien clerks and employees of the Department of State shall be available on the same basis to the Director with respect to Foreign Service information officers, Foreign Service Reserve officers, Foreign Service staff officers and employees, and alien clerks and employees of the Agency, except as provided in section 11 of this Act.".

(3) Section 10 of that Act (22 U.S.C. 1230) is amended to read as follows:

"OTHER APPLICABLE PROVISIONS OF LAW

"SEC. 10. All provisions of the Foreign Service Act of 1946 or of any other law, which apply to Foreign Service officers, Foreign Service Reserve officers, Foreign Service staff officers and employees, or alien clerks and employees of the Department of State and which are not referred to in sections 6 through 9 of this Act, shall be applicable to Foreign Service information officers, Foreign Service Reserve officers, Foreign Service staff officers and employees, or alien clerks and employees, as the case may be, of the Agency.".

(4) Section 11 of that Act (22 U.S.C. 1231) is amended to read as follows:

"COMMISSIONING AND ASSIGNMENT AS DIPLOMATIC AND CONSULAR OFFICERS

"SEC. 11. (a) The Secretary of State may, upon request of the Director, recommend to the President that Foreign Service information officers or Foreign Service Reserve officers of the Agency be commissioned as diplomatic or consular officers, or both, in accordance with section 512 or 524 of the Foreign Service Act of 1946.

"(b) The Secretary of State may, upon request of the Director, assign Foreign Service information officers or Foreign Service Reserve officers of the Agency, commissioned as diplomatic or consular officers, to serve under such commissions in accordance with sections 512 and 514 or section 524 of the Foreign Service Act of 1946.".

(5)(A) The title of the Act of August 20, 1968, is amended to read as follows: "An Act to promote the foreign policy of the United States by strengthening and improving the Foreign Service personnel system of the International Communication Agency through establishment of a Foreign Service Information Officer Corps.".

(B) Effective October 1, 1978, clause (xv) of paragraph (2) of section 5541 of title 5 of the United States Code, as added by section 412(a)(1)(C) of the Foreign Relations Authorization Act, Fiscal Year 1978, is amended by striking out "United States Information" and inserting in lieu thereof "International Communication".

(6) Paragraph (3) of section 522 of the Foreign Service Act of 1946 (22 U.S.C. 922(3)) is amended by striking out "United States Information" and inserting in lieu thereof "International Communication".

(7) Section 803(a)(4) of that Act (22 U.S.C. 1063(a)(4) is amended by striking "United States Information" and inserting in lieu thereof "International Communication".

(c) Title VIII of the United States Information and Educational Exchange Act of 1948 (22 U.S.C. 1471–1475a) is amended by adding at the end thereof the following new section:

"SEAL OF THE INTERNATIONAL COMMUNICATION AGENCY

"SEC. 807. The seal of the International Communication Agency shall be the arms and crest of the United States, encircled by the words 'International Communication Agency'. Judicial notice shall be taken of the seal.".

FUNCTIONS RELATING TO THE NATIONAL GALLERY OF ART

SEC. 205. The Secretary of State may delegate to the Director of the International Communication Agency, with the consent of the Director, the functions vested in the Secretary by section 2(a) of the joint resolution entitled "Joint Resolution providing for the construction and maintenance of a National Gallery of Art", approved March 24, 1937 (20 U.S.C. 72(a)).

FUNCTIONS RELATING TO THE WOODROW WILSON INTERNATIONAL CENTER FOR SCHOLARS

SEC. 206. (a) Subsection (b) of section 3 of the Woodrow Wilson Memorial Act of 1968 (20 U.S.C. 80f(b)) is amended—

(1) in the text preceding paragraph (1) by striking out "fifteen" in inserting in lieu thereof "sixteen";

(2) by redesignating paragraphs (2) through (8) as paragraphs (3) through (9), respectively; and

(3) by striking out paragraph (1) and inserting in lieu thereof the following new paragraphs:

"(1) the Secretary of State;

"(2) the Director of the International Communication Agency;".

(b)(1) Subsection (c) of that section (20 U.S.C. 80f(c)) is amended by striking out "(7)" and inserting in lieu thereof "(8)".

(2) Subsection (d) of that section (20 U.S.C. 80f(d)) is amended by striking out "(8)" and inserting in lieu thereof "(9)".

DISTRIBUTION WITHIN THE UNITED STATES OF AN INTERNATIONAL COMMUNICATION AGENCY FILM ON ROY WILKINS

SEC. 207. Notwithstanding the second sentence of section 501 of the United States Information and Educational Exchange Act of 1948 (22 U.S.C. 1461), the Director of the International Communication Agency shall, upon receipt of reimbursement for any expenses involved, make available to the Administrator of General Services, for deposit in the National Archives of the United States, a master copy of the film entitled "The Right to Dignity", and the Administrator shall make copies of such film available for purchase and public viewing in the United States.

## TITLE III—BOARD FOR INTERNATIONAL BROADCASTING

AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1979

SEC. 301. (a) Section 8(a) of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2877(a)) is amended—

(1) in the text preceding paragraph (1) by striking out "1978" and inserting in lieu thereof "1979"; and

(2) in paragraph (1), as amended by section 302 of this Act, by striking out "$79,448,000" and "$8,500,000" and inserting in lieu thereof "$88,180,000" and "$5,000,000", respectively.

(b) The amendments made by subsection (a) of this section shall take effect on October 1, 1978.

SUPPLEMENTAL AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1978

SEC. 302. Section 8(a)(1) of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2877(a)(1)) is amended by striking out "$68,980,000" and "$5,000,000" and inserting in lieu thereof "$79,448,000" and "$8,500,000", respectively.

COMPOSITION OF BOARD

SEC. 303. Section 3(b) of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2872(b)) is amended—

(1) in paragraph (1)—

(A) by amending the first sentence to read as follows: "The Board shall consist of seven members, two of whom shall be ex officio members."; and

(B) by striking out "of RFE/RL, Incorporated, shall be an ex officio member" in the last sentence and inserting in lieu thereof "and the chairman of the Board of Directors of RFE/RL, Incorporated, shall be ex officio members"; and

(2) by amending paragraph (4) to read as follows:

(4) TERM OF OFFICE OF EX OFFICIO MEMBERS.—An ex officio member of the Board shall serve on the Board during his or her term of service as chief operating executive or as chairman of the Board of Directors of RFE/RL, Incorporated, as the case may be.".

REPRESENTATIONAL EXPENSES

SEC. 304. (a) Section 4(a) of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2873(a)) is amended—

(1) by redesignating paragraphs (8) and (9) as paragraphs (9) and (10), respectively; and

(2) by inserting the following new paragraph (8) immediately after paragraph (7):

"(8) to make available for its own use or for the use of RFE/RL, Incorporated, for official reception and representational expenses not to exceed $65,000 of the funds made available to carry out this Act each fiscal year;".

(b) The amendment made by subsection (a)(2) of this section does not apply with respect to funds appropriated before the date of enactment of this Act.

DISCLOSURE OF CONTRIBUTIONS

SEC. 305. Section 5(c) of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2874(c)) is amended by inserting "(including a contribution made to any corporation or other entity having a principal purpose of receiving private contributions on behalf of RFE/RL, Incorporated)" immediately after "a contribution to RFE/RL, Incorporated,".

TECHNICAL AMENDMENTS

SEC. 306. (a) Section 8(a)(1) of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2877(a)(1)) is amended by striking out "Radio Free Europe and Radio Liberty" and inserting in lieu thereof "RFE/RL, Incorporated."

(b) Section 8(b) of such Act (22 U.S.C. 2877(b)) is amended by striking out "Radio Free Europe and Radio Liberty" and inserting in lieu thereof "RFE/RL, Incorporated".

USE OF BROADCASTING FACILITIES BY COMMUNIST COUNTRIES

SEC. 307. The Board for International Broadcasting Act of 1973 (22 U.S.C. 2871–2877) is amended by adding at the end thereof the following new section:

"USE OF BROADCASTING FACILITIES BY COMMUNIST COUNTRIES

"SEC. 9. No funds or other assistance may be provided by the Board under this Act to RFE/RL, Incorporated, if RFE/RL, Incorporated, permits any Communist country (within the meaning of section 620(f) of the Foreign Assistance Act of 1961) to use its broadcasting facilities unless that Communist country permits RFE/RL, Incorporated, to use that country's broadcasting facilities on a comparable basis.".

## TITLE IV—FOREIGN SERVICE AND OTHER PERSONNEL

EMPLOYMENT OF FAMILY MEMBERS OVERSEAS

SEC. 401. (a) In order to expand employment opportunities for family members of United States Government personnel assigned abroad, the President shall—

(1) seek to conclude such bilateral and multilateral agreements as will facilitate the employment of such family members in foreign economies; and

(2) direct that at any United States post abroad where a qualified family member is available to be hired, consideration shall be given, when continuity over a long term is not a significant consideration, to converting a vacant alien position to an American position for staffing by that family member.

(b)(1) The section heading of section 444 of the Foreign Service Act of 1946 (22 U.S.C. 889) is amended to read as follows: "LOCAL COMPENSATION PLANS".

(2) Subsection (a)(1) of such section is amended to read as follows:

"(a)(1) The Secretary shall, in accordance with such regulations as he may prescribe, establish compensation plans for alien employees of the Service and for United States citizens employed by the Department abroad who are family members of Government personnel serving in the same country. Such compensation plans shall be based upon prevailing wage rates and compensation practices for corresponding types of positions in the locality, to the extent consist-

ent with the public interest. Compensation plans established pursuant to this section may include provision for leave of absence with pay for alien employees in accordance with prevailing law and employment practices in the locality of employment, without regard to section 6310 of title 5, United States Code.".

(3) Subsection (b) of such section is amended by striking out "alien employee programs" and inserting in lieu thereof "employment programs for aliens, and for family members of Government personnel serving abroad,".

(4) Such section is further amended by adding at the end thereof the following new subsection:

"(d) The Secretary of State shall prescribe regulations authorizing the employment abroad, and providing for the compensation, of family members of Government personnel.".

(c) Not later than January 20, 1979, the Secretary of State shall transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report describing fully and completely the actions taken by the Department of State pursuant to this section and section 413 of the Foreign Relations Authorization Act, Fiscal Year 1978.

SPECIAL ALLOWANCES

SEC. 402. (a) Title IV of the Foreign Service Act of 1946 (22 U.S.C. 861–890) is amended by adding at the end thereof the following new part:

"PART F—ADDITIONAL COMPENSATION

"SPECIAL ALLOWANCES

"SEC. 451. If he finds it to be in the best interests of the Service, the Secretary may, under such conditions as he may determine, pay special allowances, in addition to compensation otherwise authorized, to Foreign Service officers who are required because of the nature of their assignments to perform additional work on a regular basis in substantial excess of normal requirements.".

(b) The amendment made by this section shall take effect on October 1, 1978.

ASSIGNMENTS TO PUBLIC OR PRIVATE NONPROFIT ORGANIZATIONS

SEC. 403. (a) Section 576 of the Foreign Service Act of 1946 (22 U.S.C. 966) is amended—

(1) in the section heading by inserting "OR PRIVATE NONPROFIT" immediately after "PUBLIC";

(2) in subsection (a)(1)—

(A) by striking out "before their fifteenth year of service as such officers" and inserting in lieu thereof "after their seventh year of service (counting service as a Foreign Service officer and prior service as a Foreign Service Reserve officer)"; and

(B) by inserting "or private nonprofit" immediately after "or other public";

(3) at the end of subsection (a)(2) by inserting the following: "Reimbursement for an assignment to a Member or office of the Senate shall be made at the rate of one-half of the current salary of the Foreign Service officer (who shall continue to be paid his or her full salary by the Department of State).."; and

(4) by striking out subsection (f) and inserting in lieu thereof the following new subsection:

"(f) The Secretary may reimburse a Foreign Service officer for relocation expenses incident to household moves necessitated by an assignment under this section for which the officer is not entitled to be reimbursed under any other provision of law. For purposes of such reimbursement, regulations issued pursuant to section 572a(a)(3) of title 5, United States Code, shall apply to the same extent as if the officer were entitled to be reimbursed for travel and transportation expenses under section 5724(a) of that title.".

(b) Section 576(f) of the Foreign Service Act of 1946, as added by subsection (a)(4) of this section, shall take effect on October 1, 1978, but shall apply with respect to relocation expenses incurred after the date of enactment of this Act.

FACILITATING VOLUNTARY RETIREMENTS

SEC. 404. Part D of title VI of the Foreign Service Act of 1946 (22 U.S.C. 1001–1008) is amended by adding at the end thereof the following new section:

"FACILITATING VOLUNTARY RETIREMENTS

"SEC. 639. In order to facilitate their transition from the Service, the Secretary may provide professional career counseling, advice, and placement assistance, by contract or otherwise (subject to the availability of appropriations), to officers and employees of the Service, other than those separated for cause.".

ORIENTATION AND LANGUAGE TRAINING FOR FAMILY MEMBERS

SEC. 405 (a)(1) Title VII of the Foreign Service Act of 1946 (22 U.S.C. 1041–1047) is amended by adding at the end thereof the following new section:

"ORIENTATION AND LANGUAGE TRAINING FOR FAMILY MEMBERS

"SEC. 708. (a) To facilitate orientation and language training provided to members of families of officers and employees of the Government pursuant to section 701, the Secretary may make grants to family members attending language and orientation programs of study of the Institute. No such grant may exceed the amount actually expended for necessary costs incurred in conjunction with such attendance, and in no event may any such grant exceed $300 per month per individual. No individual may receive such a grant for more than six months in connection with any one assignment.

"(b) If a member of the family of an officer or employee of the Government who is assigned abroad is unable to participate in language training provided by the Department at the Institute or elsewhere, the Secretary may partially compensate that family member for language training, related to the assignment abroad, which is undertaken at a public or private institution.".

(2) The amendment made by paragraph (1) of this subsection shall take effect on October 1, 1978.

(b) Not later than January 1, 1980, the Secretary of State shall transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report on the programs authorized by the amendment made by this section. The Secretary shall include in this report a recommendation with regard to whether those programs should remain in effect, be modified, or be terminated.

SPECIAL COMPUTATION OF ANNUITIES

SEC. 406. Notwithstanding the first sentence of section 821(a) of the Foreign Service Act of 1946 (22 U.S.C. 1076(a)), the annuity of any participant in the Foreign Service Retirement and Disability System whose salary was or is limited by the provisions of section 5308 of title 5, United States Code, and who retires during the period beginning October 1, 1978, and ending December 31, 1979, shall be equal to 2 per centum of his or her basic salary for the highest year of service for which contributions have been made to the Foreign Service Retirement and Disability Fund multiplied by the number of years, not exceeding thirty-five, of service credit obtained in accordance with the provisions of sections 851 and 853 of the Foreign Service Act of 1946 (22 U.S.C. 1091 and 1093).

REST AND RECUPERATION TRAVEL

SEC. 407. (a) Section 911(9) of the Foreign Service Act of 1946 (22 U.S.C. 1136(9)) is amended by inserting "or to the United States" immediately after "serving" the second place it appears.

(b) The amendment made by subsection (a) shall take effect on October 1, 1978.

REDUCING FAMILY SEPARATIONS DURING TEMPORARY ASSIGNMENTS

SEC. 408. (a) Section 911(10) of the Foreign Service Act of 1946 (22 U.S.C. 1136(10)) is amended by striking out "his" and inserting in lieu thereof "or from a".

(b) The amendment made by subsection (a) shall take effect on October 1, 1978.

PER DIEM AND SUBSISTENCE ALLOWANCES

SEC. 409. (a) Section 911 of the Foreign Service Act of 1946 (22 U.S.C. 1136) is amended—

(1) by striking out the period at the end of paragraph (11) and inserting in lieu thereof "; and"; and

(2) by adding at the end thereof the following new paragraph:

"(12) without regard to rates provided under the authority of section 5702 of title 5, United States Code, the travel expenses of employees of the Department on protective security missions within the United States, its territories and possessions, the Commonwealth of Puerto Rico, and the Canal Zone, at not to exceed the cost of lodging plus $24 per day.".

(b) The amendments made by subsection (a) shall take effect on October 1, 1978.

COMPENSATION FOR JUNIOR FOREIGN SERVICE OFFICERS

SEC. 410. Section 412(b) of the Foreign Relations Authorization Act, Fiscal Year 1978, is repealed.

COMPENSATORY TIME OFF AT CERTAIN POSTS IN FOREIGN AREAS

SEC. 411. (a) Subchapter III of chapter 59 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 5926. Compensatory time off at certain posts in foreign areas

"(a) Under regulations prescribed pursuant to this subchapter, and notwithstanding subchapter V of chapter 55 of this title or any other law, the head of an agency may, on request of an employee serving in a foreign area—

"(1) at an isolated post performing functions required to be maintained on a substantially continuous basis, grant the employee compensatory time off for an equal amount of time spent in regularly scheduled overtime work; or

"(2) at a point in a locality that customarily observes irregular hours of work or where other special conditions are present, in order to cope with those special circumstances, grant the employee compensatory time off for an equal amount of time spent in regularly scheduled overtime work for use during the pay period in which it is earned. Credit for compensatory time off earned under paragraph (2) shall not form the basis for any additional compensation.

"(b) Compensatory time earned under this section shall be for use only while the employee is assigned to the post where it is earned. Any such compensatory time not used at the time the employee is reassigned to another post shall be forfeited.".

(b) The section analysis for such chapter is amended by inserting the following new item immediately after the item relating to section 5925:

"5926. Compensatory time off at certain posts in foreign areas.".

TECHNICAL AMENDMENTS CORRECTING PRINTING ERRORS

SEC. 412. (a) Section 444(c)(1)(B) of the Foreign Service Act of 1946 (22 U.S.C. 889(c)(1)(B)) is amended by striking out "chap-

ter 8" and inserting in lieu thereof "chapter 81".

(b) Section 411(a) of the Foreign Relations Act, Fiscal Year 1978, is amended by striking out "section 824" and inserting in lieu thereof "section 821".

(c) The amendments made by this section shall be effective as of August 17, 1977.

REVIEW OF FOREIGN SERVICE PERSONNEL REQUIREMENTS AND COMPENSATION

SEC. 413. (a) The Congress finds that—

(1) since 1960, the United States has expanded its diplomatic representation abroad from approximately eighty countries to approximately one hundred and thirty countries;

(2) despite such expanded responsibilities, and despite a significantly increased consular workload in all countries in which the United States is represented, the total number of personnel of the Department of State has remained approximately the same; and

(3) although the responsibilities and necessary qualifications for individual Foreign Service positions continue to change, compensation for Foreign Service personnel continues to be linked to compensation for General Schedule employees at a level established years ago.

(b) It is therefore the sense of the Congress that the Secretary of State should conduct a thorough review of the personnel needs of the Foreign Service and of the suitability of the current compensation system.

(c) Not later than January 20, 1979, the Secretary of State shall transmit to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate a report setting forth fully and completely—

(1) the results of such review; and

(2) such recommendations as the Secretary finds appropriate.

## TITLE V—SCIENCE, TECHNOLOGY, AND AMERICAN DIPLOMACY

FINDINGS

SEC. 501. The Congress finds that—

(1) the consequences of modern scientific and technological advances are of such major significance in United States foreign policy that understanding and appropriate knowledge of modern science and technology by officers and employees of the United States Government are essential in the conduct of modern diplomacy;

(2) many problems and opportunities for development in modern diplomacy lie in scientific and technological fields;

(3) in the formulation, implementation, and evaluation of the technological aspects of United States foreign policy, the United States Government should seek out and consult with both public and private industrial academic, and research institutions concerned with modern technology; and

(4) the effective use of science and technology in international relations for the mutual benefit of all countries requires the development and use of the skills and methods of long-range planning.

DECLARATION OF POLICY

SEC. 502. In order to maximize the benefits and to minimize the adverse consequences of science and technology in the conduct of foreign policy, the Congress declares the following to be the policy of the United States:

(1) Technological opportunities, impacts, changes, and threats should be anticipated and assessed, and appropriate measures should be implemented to influence such technological developments in ways beneficial to the United States and other countries.

(2) The mutually beneficial applications of technology in bilateral and multilateral agreements and activities the United States and foreign countries or international organizations should be recognized and supported as an important element of United States foreign policy.

(3) The United States Government should implement appropriate measures to insure that individuals are trained in the use of science and technology as an instrument in international relations and that officers and employees of the United States Government engaged in formal and informal exchanges of scientific and technical information, personnel, and hardware are knowledgeable in international affairs.

(4) In recognition of the environmental and technological factors that change relations among countries and in recognition of the growing interdependence between the domestic and foreign policies and programs of the United States, United States foreign policy should be continually reviewed by the executive and legislative branches of the Government to insure appropriate and timely application of science and technology to the conduct of United States foreign policy.

RESPONSIBILITIES OF THE PRESIDENT

SEC. 503. (a) The President, in consultation with the Director of the Office of Science and Technology Policy and other officials whom the President considers appropriate, shall—

(1) notwithstanding any other provision of law, insure that the Secretary of State is informed and consulted before any agency of the United States Government takes any major action, primarily involving science or technology, with respect to any foreign government or international organization;

(2) identify and evaluate elements of major domestic science and technology programs and activities of the United States Government with significant international implications;

(3) identify and evaluate international scientific or technological developments with significant implications for domestic programs and activities of the United States Government; and

(4) assess and initiate appropriate international scientific and technological activities which are based upon domestic scientific and technological activities of the United States Government and which are beneficial to the United States and foreign countries.

(b) The President shall study and not later than January 31, 1980, and not later than January 31 of each year thereafter, shall transmit to the Congress a report containing recommendations with respect to—

(1) personnel requirements, and standards and training for service of officers and employees of the United States Government, with respect to assignments in any Federal agency which involve foreign relations and science or technology; and

(2) the continuation of existing bilateral and multilateral activities and agreements primarily involving science and technology, including (A) an analysis of the foreign policy implications and the scientific and technological benefits of such activities or agreements for the United States and other parties, (B) the adequacy of the funding for and administration of such activities and agreements, and (C) plans for future evaluation of such activities and agreements on a routine basis.

(c) Except as otherwise provided by law, nothing in this section shall be construed as requiring the public disclosure of sensitive information relating to intelligence sources or methods or to persons engaged in monitoring scientific or technological developments for intelligence purposes.

RESPONSIBILITIES OF THE SECRETARY OF STATE

SEC. 504. (a) In order to implement the policy set forth in section 502 of this title, the Secretary of State (hereafter in this section referred to as the "Secretary") shall have primary responsibility for coordination and oversight with respect to all major science or science and technology agreements and activities between the United States and foreign countries, international organizations, or commissions of which the United States and one or more foreign countries are members.

(b) The Secretary shall, to such extent or in such amounts as are provided in appropriation Acts, enter into long-term contracts, including contracts for the services of consultants, and shall make grants and take other appropriate measures in order to obtain studies, analyses, and recommendations from knowledgeable persons and organizations with respect to the application of science or technology to problems of foreign policy.

(c) The Secretary shall, to such extent or in such amounts as are provided in appropriation Acts, enter into short-term and long-term contracts, including contracts for the services of consultants, and shall make grants and take other appropriate measures in order to obtain assistance from knowledgeable persons and organizations in training officers and employees of the United States Government, at all levels of the Foreign Service and Civil Service—

(1) in the application of science and technology to problems of United States foreign policy and international relations generally; and

(2) in the skills of long-range planning and analysis with respect to the scientific and technological aspects of United States foreign policy.

(d) In obtaining assistance pursuant to subsection (c) in training personnel who are officers or employees of the Department of State, the Secretary may provide for detached service for graduate study at accredited colleges and universities.

(e) Not later than January 20, 1979, the Secretary shall transmit to the Committee on Appropriations and the Committee on International Relations of the House of Representatives, and to the Committee on Appropriations and the Committee on Foreign Relations of the Senate, a report on the implementation of the responsibilities of the Secretary under this title. Such report shall include the following information: an assessment of the personnel required in order to carry out such responsibilities; existing and planned programs for research and analysis to support long-range planning for the application of science and technology to foreign policy; existing and planned programs for training officers and employees of the United States Government pursuant to subsection (c) of this section; and existing and planned programs to enter into long-term contracts with academic and other organizations for assistance in training and in obtaining studies, analyses, and recommendations with respect to the application of science or technology to problems of foreign policy.

## TITLE VI—POLICY PROVISIONS

INTERNATIONAL COMMUNICATIONS POLICY

SEC. 601. (a) The Congress finds that—

(1) a series of multilateral meetings scheduled to convene in 1978 and 1979 (including the twentieth General Conference of the United Nations Educational, Scientific, and Cultural Organization; the Thirty-second United Nations General Assembly; the United Nations Conference on Science and Technology for Development; and the World Administrative Radio Conference of the International Telecommunications Union) will address a complex variety of international communications and information issues and will likely, through the promulgation of binding agreements relating to such issues, have a significant and lasting effect on the free flow of information and ideas among the countries of the world; and

(2) since the United States is the leading user of communications channels and information in the world, the United States Government should have a comprehensive policy regarding the various communications and

information issues that have entered international discussions and should establish an effective mechanism by which to develop and coordinate United States policy on such issues.

(b) Not later than January 20, 1979, the President shall transmit to the Speaker of the House of Representatives, and to the chairman of the Committee on Foreign Relations and the chairman of the Committee on Commerce, Science, and Transportation of the Senate, a report describing fully and completely—

(1) procedures the President has established by which to develop and maintain a comprehensive United States policy regarding international communications and information issues; and

(2) goals and positions of the United States with regard to anticipated international meetings which will address communications and information issues.

The President shall transmit supplementary reports to the Congress as modifications, if any, occur in such goals and positions.

ACTION CONCERNING MARINE RESOURCES

SEC. 602. It is the sense of the Congress that the President should convey to all countries having an interest in cetacean sea life the serious concern of the Congress regarding the continuing destruction of these marine mammals (highlighted by the recent slaughter of dolphins in the Sea of Japan by Japanese fishermen) and should encourage such countries—

(1) to join in international discussions with other such countries in order to adavnce general understanding of catacean life and thereby facilitate an effective use of the living marine resources of the world which does not jeopardize the natural balance of the aquatic environment;

(2) to participate in an exchange of information with tne National Marine Fisheries Service of the United States Department of Commerce, including cooperation in studies of—

(A) the impact of cetaceans on ecologically related human foodstuffs. and

(B) alternative methods of dealing with cetacean problems as they occur;

(3) to cooperate in establishnig an international cetacean commission to advance understanding of cetacean life and to insure the effective conservation and protection of cetaceans on a global scale; and

(4) to adopt comprehensive marine mammal protection legislation.

INTERNATIONAL JOURNALISTIC FREEDOM

SEC. 603. (a) The Congress finds that—

(1) news disseminations and the free flow of information across national boundaries are vital to international understanding and to healthy relations among countries; and

(2) recurring and reliable reports strongly indicate that in many countries foreign news correspondents are subject to governmental harassment and restriction, including the denial of access to legitimate news sources, the imposition of censorship, and detention, incarceration, and expulsion.

(b) It is therefore the sense of the Congress that the President should—

(1) advise the appropriate officials of any foreign government which subjects foreign news correspondents to harassment and restrictions that the United States considers such mistreatment a significant and potentially damaging factor in overall relations of the United States with such country; and

(2) raise in appropriate international forums the issue of the treatment of foreign news correspondents, with a view toward gaining multilateral support for the legitimate rights of such correspondents.

(c) Not later than January 2, 1979, the President shall transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report describing fully and completely actions taken pursuant to subsection (b).

INTERNATIONAL FOOD RESERVE

SEC. 604. (a) The Congress finds that—

(1) half a billion people suffer regularly from malnutrition or undernutrition;

(2) even very modest shortfalls in crop production can result in greatly increased human suffering, and undercut the benefits of bilateral and multilateral assistance programs, in poor developing countries with chronic food deficits;

(3) increasing variability in world food production and trade presents a serious threat not only to consumers but also to producers;

(4) the World Food Conference recognized the urgent need for an international undertaking to achieve a system of world food security based largely upon strategic food reserves;

(5) the Congress through legislation has repeatedly urged the President to negotiate with other nations to establish such a system of reserves;

(6) although the nations of the world have agreed to begin discussions on a system of grain reserves to regulate food availability, agreement on a global network of nationally held reserves still eludes the international community;

(7) while some progress has taken place in the United States in creating domestic farmer held reserves, the scale of such reserves does not insure adequate protection against fluctuations in world production and price; and

(8) the United States, as the world's leading producer of foodstuffs, remains in a unique position to provide the leadership necessary to make world food security a reality.

(b) It is therefore the sense of the Congress that the President should continue his efforts directed toward achievement of an agreement establishing an international network of nationally held grain reserves which provides for supply assurance to consumers and income security to producers.

SPANISH DEMOCRACY

SEC. 605. (a) The Congress finds that—

(1) the Senate, in rendering its advice and consent to ratification of the Treaty of Friendship and Cooperation between the United States and Spain (signed on January 24, 1976), declared its hope and intent that the Treaty would serve to support and foster Spain's progress toward free institutions;

(2) this declaration reflected the strong desire of the United States Government and the American people to see a restoration of democracy in Spain and an expansion of mutually beneficial relations between Spain and the democracies of America and Europe; and

(3) political developments in Spain during the past two years constitute a major step toward the construction of a stable and lasting Spanish democracy.

(b) The Congress finds further that—

(1) the masterpiece "Guernica", painted by Pablo Picasso, has for four decades been a powerful and poignant symbol of the horror of war;

(2) this treasured painting, while universal in its significance, holds special meaning for the people of Spain by its representation of the tragic civil war which destroyed Spanish democracy;

(3) Pablo Picasso, having painted "Guernica" for the Spanish Republican Government and concerned for Spain's future when that government fell, stipulated that the painting should remain in the custody of the Museum of Modern Art in New York until Spanish democracy had been restored; and

(4) the United States and Spain, in a Supplementary Agreement entered into with the Treaty of Friendship and Cooperation, have committed themselves to expand their cooperation in the fields of education and culture.

(c) It is therefore the sense of the Congress, anticipating the continuance of recent promising developments in Spanish political life, that "Guernica" should, at some point in the near future and through appropriate legal procedures, be transferred to the people and Government of a democratic Spain.

(d) It is further the sense of the Congress that the American people, having long benefited from this treasure and admiring Spain's achievement, would wish, as an expression of appreciation and congratulation upon the transfer of "Guernica" to Spain, to assist in the preparation of facilities for the permanent display of the painting, if such assistance is found to be appropriate by the elected leaders of Spain.

DISCRIMINATORY TRADE PRACTICES AFFECTING UNITED STATES FOREIGN RELATIONS

SEC. 606. (a) The Congress finds that those provisions of United States statutes which authorize or require suspension of or discrimination with respect to all trade between the United States and a particular foreign country and which affect, directly and significantly, the conduct of the United States foreign relations should be periodically reevaluated by the President and the Congress.

(b) Therefore, not later than January 20, 1979, the President shall transmit to the Speaker of the House of Representatives, and to the chairman of the Committee on Foreign Relations and the chairmen of other appropriate committees of the Senate, a report which—

(1) identifies all statutory provisions which provide for such discriminatory trade practices;

(2) evaluates each such practice; and

(3) recommends, in the form of draft legislation, such amendments to those provisions as the President certifies would in his judgment advance United States foreign policy interests.

CONDUCT OF DIPLOMATIC RELATIONS

SEC. 607. The Congress finds that the conduct of diplomatic relations with a foreign government has as its principal purpose the discussion and negotiation with that government of outstanding issues and, like the recognition of a foreign government, does not in itself imply approval of that government or of the political-economic system it represents.

NUCLEAR-POWERED SATELLITES

SEC. 608. (a) The Congress finds that—

(1) no international regime governs the use of nuclear-powered satellites in space;

(2) the unregulated use of such technology poses the possibility of catastrophic damage to human life and the global environment; and

(3) this danger has been evidenced by mishaps encountered, despite certain precautions, by nuclear-powered satellites of both the United States and the Soviet Union.

(b) It is therefore the sense of the Congress that the United States should take the initiative immediately in seeking a multilateral agreement governing the use of nuclear-powered satellites in space.

(c) Not later than January 20, 1979, the Secretary of State shall transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report on actions taken by the United States Government pursuant to subsection (b).

WORLD ALTERNATE ENERGY CONFERENCE

SEC. 609. (a) The Congress finds that—

(1) increasing global dependence on fossil fuels, particularly oil and natural gas, when existing supplies are rapidly being depleted, is costly to developed and developing countries both environmentally and economically;

(2) the uncontrolled spread of nuclear power carries serious dangers due to waste pollution and the possibility of accidents or material diversion;

(3) expanded development and use of alternate, nonconventional, or renewable sources of energy (including solar energy, wind, biomass waste materials, and alcohol fuels) could assist all countries in satisfying rising energy demands, while reducing environmental and economic risk;

(4) no international agency exists at present which assists countries in exchanging information and technical assistance concerning energy-related problems or which promotes the development and use of alternate energy sources; and

(5) an international agency performing these functions could be of benefit to all countries and could be particularly effective in assisting developing countries to become more self-sufficient and thereby to increase their standard of living.

(b) It is therefore the sense of the Congress that the United States should encourage the United Nations to convene a World Alternate Energy Conference in 1981 for the purpose of considering ways to meet the energy needs of the world through the development and use of alternate energy sources. Among proposals considered at such a conference should be the establishment, under United Nations auspices, of an International Alternate Energy Commission to encourage the worldwide use of alternate energy sources by assisting in the dissemination of information and by other appropriate means.

(c) Not later than January 20, 1980, the Secretary of State shall transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report on actions taken pursuant to subsection (b).

ATROCITIES IN CAMBODIA AND UGANDA

SEC. 610. (a) The Congress finds that reliable reports of events in Cambodia and Uganda attest to the existence of governmental practices in those countries of such systematic and extensive brutality as to require special notice and continuing condemnation by outside observers.

(b) Recognizing the limited direct influence of the United States in Cambodia and Uganda, the Congress urges the President to move aggressively to support multilateral action by the United Nations and other international organizations, and to encourage bilateral action by countries having more extensive relations with Cambodia and Uganda, to bring an end to the brutal and inhumane practices of the government of those two countries.

(c) Not later than January 20, 1979, the Secretary of State shall transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report describing fully and completely actions taken pursuant to subsection (b).

(d) It is the sense of the Congress that the President should—

(1) prohibit the export of military, paramilitary, and police equipment to Uganda;

(2) direct that the visa application of any official or employee of the Government of Uganda seeking to enter the United States for the purpose of military, paramilitary, or police training, may be approved by a consular officer only after the appropriate official of the Department of State in Washington has reviewed the application and has determined that the Government of Uganda has demonstrated a proper respect for the rule of law and for internationally recognized human rights; and

(3) instruct the Permanent Representative of the United States to the United Nations to submit to the Security Council of the United Nations for its consideraion a resolution imposing a mandatory arms embargo on Uganda by all members of the United Nations.

EQUITABLE TREATMENT OF UNITED STATES CITIZENS LIVING ABROAD

SEC. 611. (a) The Congress finds that—

(1) United States citizens living abroad should be provided fair and equitable treatment by the United States Government with regard to taxation, citizenship of progency, veterans' benefits, voting rights, Social Security benefits, and other obligations, rights, and benefits; and

(2) such fair and equitable treatment would be facilitated by a periodic review of statutes and regulations affecting Americans living abroad.

(b) Not later than January 20, 1979, the President shall transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report which—

(1) identifies all United States statutes and regulations which discriminate against United States citizens living abroad;

(2) evaluates each such discriminatory practice; and

(3) recommends legislation and any other remedial action the President finds appropriate to eliminate unfair or inequitable treatment of Americans living abroad.

UNITED STATES-CANADIAN NEGOTIATIONS ON AIR QUALITY

SEC. 612. (a) The Congress finds that—

(1) the United States and Canada share a common environment along a 5,500 mile border;

(2) the United States and Canada are both becoming increasingly concerned about the effects of pollution, particularly that resulting from power generation facilities, since the facilities of each country affect the environment of the other;

(3) the United States and Canada have subscribed to international conventions; have joined in the environmental work of the United Nations, the Organization for Economic Cooperation and Development, and other international environmental forums; and have entered into and implemented effectively the provisions of the historic Boundary Waters Treaty of 1909; and

(4) the United States and Canada have a tradition of cooperative resolution of issues of mutual concern which is nowhere more evident than in the environmental area.

(b) It is the sense of the Congress that the President should make every effort to negotiate a cooperative agreement with the Government of Canada aimed at preserving the mutual airshed of the United States and Canada so as to protect and enhance air resources and insure the attainment and maintenance of air quality protective of public health and welfare.

(c) It is further the sense of the Congress that the President, through the Secretary of State working in concert with interested Federal agencies and the affected States, should take whatever diplomatic actions appear necessary to reduce or eliminate any undesirable impact upon the United States and Canada resulting from air pollution from any source.

CUBAN PRESENCE IN AFRICA

SEC. 613. (a) The Congress finds that—

(1) the President authorized the exchange of notes of May 30, 1977, between the Governments of the United States and Cuba which established an Interests Section for the United States in the Embassy of Switzerland in Havana and an Interests Section for Cuba in the Embassy of Czechoslovakia in Washington;

(2) the President has the authority under the Export Administration Act of 1969 to limit trade with Cuba being conducted by subsidiaries of American firms operating in third countries;

(3) the President has the power to sever all diplomatic and economic relations with Cuba; and

(4) there has been a sharp increase in the number of Cuban military personnel serving in Africa in the past year.

(b) It is therefore the sense of the Congress that the President should—

(1) undertake a comprehensive review of United States diplomatic and economic relations with Cuba; and

(2) not later than January 20, 1979, transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report based on such review.

PALESTINIAN RIGHTS UNITS

SEC. 614. (a) The Congress, noting United Nations General Assembly Resolution 3376 (XXX) which established the Committee on the Exercise of the Inalienable Rights of the Palestinian People and noting United Nations General Assembly Resolutions 32/40/A and 32/40/B which continued the mandate of that Committee and requested that the Secretary General establish within the Secretariat of the United Nations a Special Unit on Palestinian Rights, declares that—

(1) the continuation of the Committee on the Exercise of the Inalienable Rights of the Palestinian People and the creation of the Special Unit on Palestinian Rights are wasteful expenditures of limited United Nations resources at a time when the United Nations is experiencing severe financial difficulties and when the United Nations is under close scrutiny from contributing members;

(2) the work of the Committee on the Exercise of the Inalienable Rights of the Palestinian People does not contribute to the process of peacemaking underway at present in the Middle East; and

(3) the United States Ambassador to the United Nations should be instructed to continue to oppose extensions of the mandate of that Committee as well as extensions of the Special Unit on Palestinian Rights.

(b) It is the sense of the Congress that the President should direct the Permanent Representative of the United States to the United Nations to use all means at his disposal to obtain action by the General Assembly terminating the Committee on the Exercise of the Inalienable Rights of the Palestinian People and the Special Unit on Palestinian Rights.

## TITLE VII—MISCELLANEOUS PROVISIONS

ANNUAL REPORT OF THE GORGAS MEMORIAL INSTITUTE

SEC. 701. (a) Section 3 of the Act entitled "An Act to authorize a permanent annual appropriation for the maintenance and operation of the Gorgas Memorial Laboratory", approved May 7, 1928 (22 U.S.C. 278a), is amended in the first sentence—

(1) by striking out "annually, on the first Monday in December" and inserting in lieu thereof ", on April 1 of each year"; and

(2) by striking out "up to the first of November next preceding" and inserting in lieu thereof "during the fiscal year ending the preceding September 30".

(b) Title I of the Departments of State, Justice, and Commerce Appropriation Act, 1945, is amended in the first paragraph under the heading "INTERNATIONAL OBLIGATIONS" by striking out ": *Provided*," and all that follows through "each such session" (22 U.S.C. 278b).

COMMISSION ON SECURITY AND COOPERATION IN EUROPE

SEC. 702. (a) Section 7(a) of the Act entitled "An Act to establish a Commission on Security and Cooperation in Europe", approved June 3, 1976 (22 U.S.C. 3007(a)), is amended by striking out "$350,000" and inserting in lieu thereof "$550,000".

JAPAN-UNITED STATES FRIENDSHIP COMMISSION

SEC. 703. (a) Section 6 of the Japan-United States Friendship Act (22 U.S.C. 2905) is amended—

(1) by striking out "and" at the end of paragraph (9);

(2) by striking out the period at the end of paragraph (10) and inserting in lieu thereof "; and"; and

(3) by inserting immediately after paragraph (10) the following new paragraph:

"(11) transmit its official mail as penalty mail in the same manner and upon the same conditions as an officer of the United States other than a Member of Congress is permitted to transmit official mail as penalty mail under section 3202 of title 39 of the United States Code.".

(b) The amendments made by this section shall take effect on October 1, 1978.

CONTRIBUTION TO THE INTERNATIONAL TIN COUNCIL

SEC. 704. Effective October 1, 1978, there is authorized to be appropriated to the President $60,000,000 for the purpose of acquiring tin metal to contribute to the buffer stock of the International Tin Council established under the Fifth International Tin Agreement.

PROHIBITION ON AID OR REPARATIONS TO VIETNAM

SEC. 705. (a) None of the funds authorized to be appropriated in this Act may be used for the purpose of reparations, aid, or any other form of payment to the Socialist Republic of Vietnam.

(b) The President shall continue to take all possible steps to obtain a final accounting of all Americans missing in action in Vietnam.

USE OF FOREIGN AIR CARRIERS

SEC. 706. Notwithstanding the limitations established by section 1117 of the Federal Aviation Act of 1958 (49 U.S.C. 1517), funds appropriated after the date of enactment of this Act to the Department of State, the International Communication Agency, the Agency for International Development (or any successor agency), and the Arms Control and Disarmament Agency may be used to pay for the transportation, between two places both of which are outside the United States, of officers and employees of those agencies, their dependents, and accompanying baggage, aboard air carriers which do not hold certificates under section 401 of that Act.

TRAVEL DOCUMENTATION OF ALIENS AND CITIZENS

SEC. 707. (a) Subsection (a) of section 215 of the Immigration and Nationality Act (8 U.S.C. 1185) is amended by striking out "When the United States" and all that follows through "be unlawful" and inserting in lieu thereof "Unless otherwise ordered by the President, it shall be unlawful".

(b) Subsection (b) of such section is amended to read as follows:

"(b) Except as otherwise provided by the President and subject to such limitations and exceptions as the President may authorize and prescribe, it shall be unlawful for any citizen of the United States to depart from or enter, or attempt to depart from or enter, the United States unless he bears a valid passport.".

(c) Subsection (f) of such section is amended by striking out "proclamation," both places it appears.

(d) Such section is further amended by striking out ubsection (c) and redesignating subsections (d), (e), (f), and (g) as subsections (c), (d), (e), and (f), respectively.

(e) The heading of such section is amended to read as follows: "TRAVEL DOCUMENTATION OF ALIENS AND CITIZENS".

(f) The item relating to section 215 in the table of contents of the Immigration and Nationality Act is amended to read as follows: "Sec. 215. Travel documentation of aliens and citizens.".

REPORTING AND COORDINATION OF INTERNATIONAL AGREEMENTS

SEC. 708. Section 112b of title 1, United Code, is amended—

(1) by inserting "(including the text of any oral international agreement, which agreement shall be reduced to writing)" immediately after "international agreement" in the first sentence;

(2) by inserting "(a)" immediately before the first sentence; and

(3) by adding at the end thereof the following new subsections:

"(b) Not later than March 1, 1979, and at yearly intervals thereafter, the President shall, under his own signature, transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report with respect to each international agreement which, during the preceding year, was transmitted to the Congress after the expiration of the 60-day period referred to in the first sentence of subsection (a), describing fully and completely the reasons for the late transmittal.

"(c) Notwithstanding any other provision of law, an international agreement may not be signed or otherwise concluded on behalf of the United States without prior consultation with the Secretary of State. Such consultation may encompass a class of agreements rather than a particular agreement.

"(d) The Secretary of State shall determine for and within the executive branch whether an arrangement constitutes an international agreement within the meaning of this section.

"(e) The President shall, through the Secretary of State, promulgate such rules and regulations as may be necessary to carry out this section.".

PANAMA CANAL TREATIES

SEC. 709. None of the funds authorized to be appropriated by this Act may be used directly or indirectly to effect implementation of the Panama Canal Treaty or the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, each signed on September 7, 1977, unless authorized by the Constitution or by Act of Congress.

INTERPARLIAMENTARY UNION

SEC. 710. The first section of the Act entitled "An Act to authorize participation by the United States in the Interparliamentary Union", approved June 28, 1935 (22 U.S.C. 276), is amended by striking out "$45,000" in paragraph (2) and inserting in lieu thereof "$90,000".

COMMISSION ON HUNGER AND MALNUTRITION

SEC. 711. There are authorized to be appropriated $1,500,000 for the fiscal year 1979 and $1,500,000 for the fiscal year 1980 for a commission on global hunger and malnutrition to be created by Executive order by the President. This commission shall (1) assess the policies, organization, and structure of current Federal programs which have an impact on hunger and malnutrition; (2) coordinate, sponsor, and oversee such projects, studies, events, and other activities as the commission deems necessary or desirable, making maximum use of past and ongoing related efforts; (3) conduct such studies, inquiries, meetings, and hearings as the commission deems necessary; and (4) make recommendations to the President and the Congress on policies to increase the capacity of the United States to reduce hunger and malnutrition. Funds authorized to be appropriated by this section shall be expended under the direction of the chairman of the commission.

FOREIGN GIFTS AND DECORATIONS RECEIVED BY SENATORS AND SENATE EMPLOYEES

SEC. 712. (a) Section 7342(a)(6) of title 5, United States Code, is amended—

(1) by striking out "(e)" in subparagraph (A) and inserting in lieu thereof "(e)(1)"; and

(2) by inserting before the semicolon at the end of subparagraph (B) the following: ", except that those responsibilities (other than responsibilities involving approval of the employing agency) specified in subsections (c)(2), (d), and (g)(2)(B) shall be carried out by the Secretary of the Senate".

(b)(1) The last sentence of section 7342(c)(2) of such title is amended by striking out "subsection (e)" and inserting in lieu thereof "subsection (e)(1) or provide for its disposal in accordance with subsection (e)(2)".

(2) The last sentence of section 7342(d) of such title is amended—

(A) by striking out "or" and inserting in lieu thereof ", for"; and

(B) by striking out "subsection (e)" and inserting in lieu thereof "subsection (e)(1), or for disposal in accordance with subsection (e)(2)".

(c) Section 7342(e) of such title is amended—

(1) by striking out "Gifts" and inserting in lieu thereof "(1) Except as provided in paragraph (2), gifts";

(2) by striking out "(1)" and "(2)" and inserting in lieu thereof "(A)" and "(B)", respectively; and

(3) by adding at the end thereof the following new paragraph:

"(2) Gifts and decorations received by a Senator or an employee of the Senate that are deposited with the Secretary of the Senate for disposal, or are deposited for an official use which has terminated, shall be disposed of by the Commission on Arts and Antiquities of the United States Senate. Any such gift or decoration may be returned by the Commission to the donor or may be transferred or donated by the Commission, subject to such terms and conditions as it may prescribe, (A) to an agency or instrumentality of (i) the United States, (ii) a State, territory, or possession of the United States, or a political subdivision of the foregoing, or (iii) the District of Columbia, or (B) to an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 which is exempt from taxation under section 501(a) of such Code. Any such gift or decoration not disposed of as provided in the preceding sentence shall be forwarded to the Administrator of General Services for disposal in accordance with paragraph (1). If the Administrator does not dispose of such gift or decoration within one year, he shall, at the request of the Commission, return it to the Commission and the Commission may dispose of such gift or decoration in such manner as it considers proper, except that such gift or decoration may be sold only with the approval of the Secretary of State upon a determination that the sale will not adversely affect the foreign relations of the United States.".

(d) In the event that the space and facilities available to the Secretary of the Senate for carrying out his responsibilities in storing and safeguarding property in his custody under section 7342 of title 5, United States Code, are insufficient for such purpose, he may, with the approval of the Committee on Rules and Administration of the Senate, lease such space and facilities as may be necessary for such purpose. Rental

payments under any such lease and expenses incurred in connection therewith shall be paid from the contingent fund of the Senate upon vouchers approved by the Secretary of the Senate.

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 12598) to authorize appropriations for fiscal year 1979 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, to make changes in the laws relating to those agencies, to make changes in the Foreign Service personnel system, to establish policies and responsibilities with respect to science, technology, and American diplomacy, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached in the committee of conference, and minor drafting and clarifying changes.

AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1979

The conference substitute contains authorizations for fiscal year 1979 appropriations of $1,969,710,000 for the Department of State, the International Communication Agency, the Board for International Broadcasting, and other programs and activities. The amount authorized to be appropriated in the conference substitute is $27,030,000 less than the total Senate authorization, $29,974,000 more than the total House authorization, and $57,470,000 more than the executive branch request.

The amounts contained in the conference substitute compared to the amounts requested by the executive branch and recommended by the House and Senate follow:

EXECUTIVE BRANCH REQUEST, THE PROVISIONS OF THE HOUSE BILL, THE SENATE AMENDMENT, AND THE CONFERENCE SUBSTITUTE, WITH RESPECT TO THE AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1979

[In thousands of dollars]

| | Executive branch request | House bill | Senate amendment | Conference substitute |

[1] In addition to the executive branch request for administration of foreign affairs, the conference substitute earmarks $945,000 for the U.N. Conference on Science and Technology for Development and provides $1,000,000 for the undocumented alien program, $30,000 for strengthening the legal staff of the Consular Affairs Bureau, $1,300,000 for increased language training, $6,300,000 for ncreased property acquisitions, $400,000 for regularizing the employment status of seasonal employees of the Passport Office, and $1,000,000 for increased costs of rest and recuperation for Foreign Service employees.

[2] The Senate amendment included an authorization of $37,275,000 for the payment of United States arrearages to the United Nations Educational and Cultural Organization (UNESCO). The same amount was included in the House bill as a supplemental fiscal year 1978 authorization as requested by the executive branch. The conference substitute is the same as the House provisions.

[3] In addition to the executive branch request for International Organizations and Conferences, the conference substitute authorizes an increase of $45,000 in the annual funding level for U.S. participation in the Interparliamentary Union.

[4] In addition to the original executive branch request for migration and refugee assistance, the conference substitute earmarks $25,000,000 for Soviet and Eastern European refugees resettling in Israel, $5,000,000 for refugees in Africa, and provides $30,000,000 assistance for Indochina refugees (pursuant to a subsequent executive branch request of $34,500,000 for Indochina refugees) and $200,000 for an increased U.S. contribution to the International Red Cross.

[5] In addition to the executive branch request for the International Communication Agency (ICA), the conference substitute provides $7,000,000 for increased exchange of persons activities and $250,000 for an increase in rest and recuperation costs for ICA employees serving at hardship posts abroad.

[6] In addition to the fiscal year 1979 authorization for the Board for International Broadcasting, the conference substitute also contains a fiscal year 1979 supplemental authorization of $10,468,000 for that agency pursuant to an executive branch request. Both the House bill and the Senate amendment contained the supplemental authorization.

SUPPLEMENTAL AUTHORIZATION FOR UNESCO

The House bill authorized the appropriation of $37,275,000 for fiscal year 1978 to pay U.S. arrearages to United Nations Educational, Scientific and Cultural Organization.

The Senate amendment increased the authorization in this bill for the "International Organizations and Conferences" account by $37,275,000 to pay these arrearages in fiscal year 1979.

The conference substitute is identical to the House provision.

STRENGTHENING VISA PROCESSING

The House bill earmarked $1.25 million to strengthen visa processing in connection with the President's undocumented alien program.

The Senate amendment did not contain a comparable provision.

The conference substitute contains no provision on this issue. The committee of conference, however, agreed to include, in the total amount authorized for the "Administration of Foreign Affairs" account, $1 million to be used to strengthen the Department of State's ability to carry out effectively its responsibilities for the issuance of visas.

CLARIFICATION OF INFORMATION REPORTING REQUIREMENT

The Senate amendment sought to clarify existing law which requires that "any Federal department, agency, or independent establishment shall furnish any information requested by either" the House International Relations Committee or the Senate Foreign Relations Committee "relating to any activity or responsibility" within the jurisdiction of these committees by adding, after "any information", the following: (notwithstanding the department, agency, or independent establishment of origin)." The amendment thus was intended to make clear that such requests cannot be refused simply because the information requested was originally derived from a different agency.

The House bill did not contain a comparable provision.

The conference substitute contains no provision on this issue. The committee of conference agreed that the amendment proposed by the Senate is unnecessary in view of the existing legal requirement that "any" information be furnished and that "any" information includes information derived from another agency. The committee of conference stresses that the so-called "third agency rule" may not, therefore, be used as an impediment to the timely furnishing of information requested by these congressional committees. The executive branch has assured the Congress that the rule will be used as intended and not as a tool to thwart intentionally congressional inquiry or otherwise delay such requests. Specifically, the committee of conference understands that, in the event any of the information requested from a particular department, agency or independent establishment was supplied by another such entity, the department, agency or independent establishment receiving the request shall (1) immediately inform the originating entity and request that entity's permission to release such information; and (2) immediately inform the requesting committee that the originating entity has been asked for permission to release such information to the requesting committee. If the originating entity denies permission to such department, agency or independent establishment, for the release of such items of information, the originating entity shall so inform the requesting committee, describing the items of information whose release has been denied.

The committee of conference intends that the procedure described above constitute the advice sought by Secretary of State Vance on August 2, 1978, regarding a means of resolving difficulties confronted by the foreign relations committees with respect to the "third agency rule."

U.N. CONFERENCE ON SCIENCE AND TECHNOLOGY

The House bill earmarked $945,000 for State Department expenses in conjunction with the U.N. Conference on Science and Technology for Development.

The Senate amendment contained findings on the importance of science and technology for development and expresed the sense of Congress that the United States should strongly support the purpose of the U.N. Conference and develop proposals for same. No funds were earmarked.

The conference substitute incorporates both the earmarking of $945,000 contained in the House provision and the findings and policy statement contained in the Senate amendment.

ASSISTANCE FOR REFUGEES IN AFRICA

The House bill earmarked $10 million of the amount authorized for the "Migration and Refugee Assistance" account for refugees in Africa.

The Senate amendment did not contain a comparable provision.

The conference substitute includes an earmarking for refugees in Africa, but reduces the amount to $5 million. In the total amount authorized to be appropriated for migration and refugee assistance, in addition to the executive branch request, the conference substitute includes $5 million for African refugees. The committee of conference agreed that emerging refugee problems in Africa may well require even more funds than are included in the total amount authorized by this bill. It is the expectation of the committee of conference that additional requirements for refugees in Africa or elsewhere during fiscal year 1979 will be funded under the authorization provided for appropriations to the U.S. Emergency Refugee and Migration Assistance Fund If requirements for appropriations for refugee purposes exceed existing authorizations for appropriations, the Congress would expect the executive branch to submit a request for supplemental authorization legislation.

DISADVANTAGED CHILDREN IN THAILAND

The Senate amendment contained an earmarking of $500,000 of the funds authorized for the "Migration and Refugee Assistance" account for children in Thailand born of American fathers and Asian mothers.

The House bill did not contain a comparable provision.

The conference substitute contains no provision on this issue. The committee of conference agreed on the need to provide assistance to disadvantaged children in Thailand and agreed that funds should be used for this purpose under the authority of the International Development and Food Assistance Act of 1978 (H.R. 12222).

CONSOLIDATION OF ADMINISTRATIVE SERVICES

The House bill provided authority for the consolidation of administrative services performed in common by the Department of State and other Federal agencies performing foreign affairs functions.

The Senate amendment did not contain a comparable provision.

The conference substitute is similar to the House provision with minor changes which were adopted in order to insure that each of the foreign affairs agencies would be on equal footing with the State Department with respect to consolidation of administrative services.

FOREIGN MISSION SOLAR ENERGY DEMONSTRATION

The House bill established a policy of using solar energy and other renewable energy technologies in buildings acquired under authority of the Foreign Service Buildings Act of 1926 and earmarked $4 million for this purpose. The House provision also required that the Secretary of State select the projects in consultation with the Secretary of Energy and otherwise called for involvement by the Department of Energy.

The Senate amendment was similar to the House provision, but contained no consultation requirement on the selection of projects and in general did not require as much involvement of the Department of Energy.

The conference substitute is the same as the House provision.

PALESTINIAN RIGHTS UNITS

The House bill expressed the sense of Congress that the U.N. Committee on the Exercise of the Inalienable Rights of the Palestinian People and the U.N. Special Unit on Palestinian Rights ought to be terminated and that the permanent U.S. representative to the United Nations should use all means at his disposal to obtain such termination.

The Senate amendment provided for a reduction in the 1979 U.S. contribution to the United Nations equal to the amount of our 1978 U.N. contribution which was used for these two units.

The conference substitute is the same as the House provision.

ASSISTANT SECRETARY OF STATE FOR NARCOTICS MATTERS

The House bill authorized an additional Assistant Secretary in the Department of State with the title of Assistant Secretary of State for International Narcotics Matters who would be responsible for the overall coordination of the role of the Department of State in the international aspects of narcotics problems.

The Senate amendment contained a similar provision, but provided that the Assistant Secretary was to be responsible to the Secretary of State for all matters pertaining to narcotics in the conduct of foreign policy and international narcotics control programs funded under section 482 of the Foreign Assistance Act of 1961 and was to assume the full duties and responsibilities currently carried out by the senior adviser to the Secretary of State for International Narcotics Control. In addition to establishing the position of Assistant Secretary for International Narcotics Matters, the Senate amendment required the Secretary of State to submit, within 6 months of enactment of this legislation, a comprehensive report on the Office of the Assistant Secretary for International Narcotics Matters, including its mandate and operations, the mandate and operations of its predecessor office, and proposals and recommendations to strengthen international narcotics control.

The conference substitute is the same as the House provision. The committee of conference, however, agreed that a report on the implementation of this provision would be useful. The Secretary of State is therefore requested to submit to the Committee on International Relations of the House of Representatives and to the Committee on Foreign Relations of the Senate, within 6 months of enactment of this legislation, a comprehensive report on the Office of the Assistant Secretary of State for International Narcotics Matters, containing the information specified in the Senate amendment.

WORLD ALTERNATE ENERGY CONFERENCE

The House bill expressed the sense of Congress that the United States ought to encourage the United Nations to hold a World Alternate Energy Conference in 1981, a main purpose of which should be consideration of the establishment of an international alternative energy organization.

The Senate amendment expressed a similar sense of Congress, but set the date for the conference as 1980, included five findings concerning world energy supplies and usages, provided that establishment of an International Alternate Energy Commission should be one of the proposals considered, and required a report by January 20, 1979, on actions taken by the United States to promote such a conference.

The conference substitute is the same as the Senate provision except that the target date for the conference was changed to 1981 and the date of the report required to be submitted to Congress was changed to January 20, 1980.

TRAVEL DOCUMENTATION OF ALIENS AND CITIZENS

The House bill made permanent the authority of the President to regulate the entry of aliens into the United States and to require American citizens to bear valid passports when entering or leaving the United States. This authority, which is now exercised on an "emergency" basis, would otherwise lapse in September 1978, pursuant to the National Emergencies Act enacted in 1976. The House bill also repealed the criminal penalties for violations of these travel controls.

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the House provision.

EXCLUSION OF CERTAIN ALIENS FROM THE UNITED STATES

The Senate amendment stated that the Secretary of State "shall" make a favorable recommendation for admission to the United States in any case where a prospective visitor is excludable only for reasons of organizational affiliation. Existing law says he "should" make such a recommendation. The Senate amendment also contained a provision emphasizing that other reasons for exclusion retain their force.

The House bill contained no comparable provision.

The conference substitute incorporates a provision emphasizing that reasons other than membership in a proscribed organization continue to be grounds for denying admission to the United States, but does not include the other change proposed by the Senate.

DIPLOMATIC AND OFFICIAL PASSPORTS

The Senate amendment expressed the sense of Congress that diplomatic or official passports should be issued only to, and used only by, persons holding U.S. Government diplomatic or other official positions or persons otherwise eligible for such passports under conditions specifically authorized under law. The Senate amendment further directed the Secretary of State to transmit to Congress, no later than January 20, 1979, proposed legislation specifying those categories of persons eligible for such passports and the Secretary's certification that U.S. passport procedures insure that such passport will not be used by persons whose eligibility is terminated.

The House bill did not contain a comparable provision.

The conference substitute expresses the sense of Congress that diplomatic or official passports should be issued only to, and used only by, persons holding U.S. Government diplomatic or other official positions or who are otherwise eligible for such passports under conditions specifically authorized under law.

TRAVEL RESTRICTIONS ON FOREIGN CITIZENS

The Senate amendment stated that, in accordance with the general principles of the Helsinki Final Act and the Vienna Convention on Diplomatic Relations, it shall be the general policy of the United States to impose restrictions on travel within the United States by foreign citizens only when their governments impose travel restrictions on U.S. citizens. The Senate amendment further required the Secretary of State to convey this policy to foreign governments imposing travel restrictions on U.S. citizens and to seek, on a reciprocal basis, the elimination of such restrictions. Finally, the Senate amendment directed the Secretary of State to transmit to Congress, not later than January 20, 1979, and annually thereafter for 3 years, a report describing existing travel restrictions imposed by the United States and foreign governments and the progress toward eliminating such restrictions.

The House bill did not contain a comparable provision.

LIMITATION ON GEOGRAPHICAL TRAVEL RESTRICTIONS

The Senate amendment prohibited restrictions on the use of U.S. passports for travel to any nation unless that nation is at war with the United States or armed hostilities are in progress.

The House bill did not contain a comparable provision.

The conference substitute is similar to the Senate provision except that it would add to the specified exceptions allowed in the Senate amendment nations where conditions threaten the public health or the physical safety of U.S. citizens.

USE OF FOREIGN AIR CARRIERS

The Senate amendment provided authority for U.S. foreign affairs agencies to use foreign air carriers for transportation of personnel and accompanying baggage between two points outside of the United States.

The House bill did not contain a comparable provision.

The conference substitute is similar to the Senate amendment except that it restricts the authority to use foreign air carriers to employees of the Department of State, the International Communication Agency, the Agency for International Development, and the Arms Control and Disarmament Agency, their dependents and accompanying baggage. In granting this authority, the committee of conference recognizes that existing law has created substantial hardships for U.S. Government personnel required to travel overseas to carry out their official duties and has frequently resulted in increased costs to the U.S. Government. The committee of conference, however, does not intend that this authority be implemented in a broad and sweeping manner. Therefore, it is fully expected that this authority will be implemented in a manner which will continue to encourage U.S. Government employees to use U.S. air carriers to the maximum practical extent. In establishing regulations to implement this new authority, the heads of affected agencies are expected to take into account both the continuing policy of Congress that U.S. airlines be used to the greatest practical extent and also any significant adverse economic impact which use of this authority may have on the revenues of any U.S. certificated air carrier. The heads of agencies affected by this provision are requested to provide to the Committee on Foreign Relations of the Senate and the Committee on International Relations of the House of Representatives, not later than 14 months after enactment of this legislation, a comprehensive report on implementation of this provision.

The conference substitute is similar to the Senate provision but makes clear that this provision is not intended to limit any restrictions on travel within the United States which are imposed by the United States Government, on a reciprocal basis, with respect to the officials of particular foreign governments.

INTERNATIONAL JOINT COMMISSION REPRESENTATION EXPENSES

The Senate amendment removed the current limitation of $1,500 on annual representation and official entertainment expenses by the American section of the International Joint Commission, United States and Canada.

The House bill did not contain a comparable provision.

The conference substiutte is the same as the Senate amendment.

IMPROVING FUNDING OF INTERNATIONAL JOINT COMMISSION

The Senate amendment earmarked $800,000 of the funds authorized to be appropriated to the Department of State each year for the purpose of providing for studies requested by the U.S. Government to be carried out by the International Joint Commission. It also required the Secretary of State to conduct a study of possible measures to improve the budgetary procedures of the United States with respect to support for the International Joint Commission. The results of the study were to be submitted to Congress by January 20, 1979.

The House bill did not contain a comparable provision although it did include $800,000 for a similar purpose in the funds authorized to be appropriated to the Department of State for fiscal year 1979 for the "International Commissions" account.

The conference substitute contains no provision on this issue. The committee of conference, however, did agree to the inclusion of an additional $800,000 in funds authorized to be appropriated to the Department of State for fiscal year 1979 for the "International Commissions" account in order to permit the International Joint Commission, United States and Canada, to strengthen its staff and to permit it to more promptly initiate studies requested by the two Governments as recommended by the General Accounting Office. The Secretary of State is requested, no later than January 20, 1979, to submit to the Committee on Foreign Relations of the Senate and the Committee on International Relations of the House a report on ways to improve budgetary procedures governing U.S. participation in the activities of the International Joint Commission. This report should take into account the recommendations of the General Accounting Office, contained in its report on "How the United States Can and Should Improve its Funding of International Joint Commission Activities," dated February 8, 1978.

MEMORIAL STATUE OF GEN. GEORGE C. MARSHALL

The Senate amendment contained a provision authorizing acquisition by the Department of State a memorial statue or bust of Gen. George C. Marshall to be placed within the Department of State.

The House bill did not contain a comparable provision. The House of Representatives, however, passed a bill, H.R. 9165, essentially the same as this provision on January 23, 1978.

The conference substitute is the same as the Senate provision.

HISTORICAL PUBLICATION OF THE STATE DEPARTMENT

The Senate amendment contained a provision to prevent a shift from letterpress to microfilm in the production of the State Department historical publication "Foreign Relations of the United States," by stipulating a minimum number of pages for these volumes (i.e., two-thirds of the number of pages in the volumes for 1947–49).

The House bill did not contain a comparable provision.

The conference substitute contains a congressional finding on the important role this publication plays in establishing the documentary record of U.S. foreign relations and directs the Secretary of State to insure that publication of volumes in the series is continued in a way which maintains the high standards of comprehensive documentation established by previous volumes. The State Department's "Foreign Relations" series is an immensely valuable research tool for understanding the history of American foreign policy, and the series should therefore continue to make available the comprehensive information which has made this publication useful to scholars and the public. To insure that the publication retains its utility and that the series is readily accessible to the public, the committee of conference expects the Department of State to consult fully with scholars in diplomacy and other fields, university and other libraries, and interested members of the public about the most appropriate method of publishing the series in the future. Before making any major changes either in the standards affecting what is included in volumes of the series or in the method of publication or distribution of the series, the Department of State is expected to consult formally with the House Committee on International Relations and the Senate Committee on Foreign Relations.

ASSISTING MINORITY ENTERPRISE

The Senate amendment directed the Secretary of State to cooperate with the Inter-Agency Council for Minority Enterprise to assist minority-owned and operated businesses to establish broader export markets and broaden minority business participation in State Department procurement.

The House bill did not contain a comparable provision.

The conference substitute is essentially the same as the Senate provision except that the wording was slightly modified in recognition of advances already made in this area by the Department of State.

INTERNATIONAL COMMUNICATION AGENCY (ICA) FILM

The Senate amendment allowed an exception to the general prohibition against the domestic dissemination of International Communication Agency materials, so as to allow American groups to purchase from the General Services Administration an ICA film on National Association for the Advancement of Colored People leader Roy Wilkins.

The House bill did not contain a comparable provision.

The conference substitute is essentially the same as the Senate provision.

TECHNICAL AMENDMENTS RELATING TO THE INTERNATIONAL COMMUNICATION AGENCY

*Per diem*

The House bill gave the Director of the International Communication Agency authority to prescribe per diem rates. (Under existing law the President has this authority.)

The Senate amendment did not contain a comparable provision.

The conference substitute is identical to the House provision.

*Administrative services for Japan-United States Friendship Commission*

The House bill amended the Japan-United States Friendship Act to specify that the Japan-United States Friendship Commission may obtain such administrative support, services, and personnel as the Commission deems necessary and appropriate "from the Director of the International Communication Agency, on a reimbursable basis."

The Senate amendment did not contain a comparable provision.

The conference substitute contains no provision on this issue.

MISSION OF THE INTERNATIONAL COMMUNICATION AGENCY

The Senate amendment provided a statutory mandate for the International Communication Agency.

The House bill did not contain a comparable provision.

The conference substitute is identical to the Senate provision.

NAME CHANGE FOR THE INTERNATIONAL COMMUNICATION AGENCY

The Senate amendment provided for the name of the International Communication Agency (ICA) to be changed to the "United States Agency for Information and Cultural Exchange" by January 1, 1979.

The House bill did not contain a comparable provision.

The conference substitute contains no provision on this issue.

VOICE OF AMERICA (VOA) BROADCASTS

The Senate amendment stated the sense of the Senate that the provisions of section 503 of the Information and Educational Exchange Act of 1948 shall apply to all broadcasts of the Voice of America without regard to any policies of distorting the truth, including censorship, of governments of countries to which the Voice of America broadcasts. (Section 503 states that "VOA will serve as a consistently reliable and authoritative source of news. VOA news will be accurate, objective, and comprehensive.")

The House bill did not contain a comparable provision.

The conference substitute contains no provision on this issue.

The committee of conference judged that, since the essence of the Senate provision is in existing law, the provision would have been redundant.

COMPOSITION OF THE BOARD FOR INTERNATIONAL BROADCASTING (BIB)

The House bill amended the Board for International Broadcasting Act of 1973 to make the Chairman of the Board of Directors of RFE/RL, Inc. (Radio Free Europe and Radio Liberty), instead of the chief operating officer of the radios, an ex-officio, nonvoting member of the Board.

The Senate amendment did not contain a comparable provision.

The conference substitute amends the Board for International Broadcasting Act of 1973 to make both the Chairman of the Board of Directors of RFE/RL, Inc., and the chief operating officer of the radios ex-officio, nonvoting members of the Board for International Broadcasting.

BIB REPRESENTATIONAL EXPENSES

The House bill amended the Board for International Broadcasting Act of 1973 to clarify the authority of the Board directly or for RFE/RL, Inc., to use appropriated funds for representational expenses, but limited the use of such funds for this purpose to $65,000 each fiscal year.

The Senate amendment did not contain a comparable provision.

The conference substitute is essentially the same as the Senate provision.

DISCLOSURE OF CONTRIBUTIONS TO BIB

The Senate amendment amended the Board for International Broadcasting Act of 1973 to make clear that the requirement of full and timely disclosure of contributions applies not only to contributions to RFE/RL, Inc., itself, but also to any fund or foundation expressly created to solicit or receive contributions on behalf of RFE/RL, Inc.

The House bill did not contain a comparable provision.

The conference substitute is essentially the same as the Senate provision.

DEFINITION OF CHIEF OF MISSION

The House bill contained a provision which expanded the definition of "Chief of Mission" to include the head of any U.S. office abroad which is diplomatic in nature, in order to clarify the authority of any individual heading a diplomatic post of the United States, whether or not that person is an Ambassador.

The Senate amendment did not contain a comparable provision.

The conference substitute is identical to the House provision.

EMPLOYMENT OF FAMILY MEMBERS OVERSEAS

The Senate amendment required the Secretary of State to establish compensation plans for family members of U.S. Government employees serving overseas and required a report on actions taken to increase opportunities for employment of family members overseas. In addition, the Senate amendment directed the Secretary of State to (1) seek to create bilateral and multilateral agreements which will facilitate the employment of family members of Foreign Service personnel in foreign countries and (2) give consideration to converting vacant alien positions to American positions for staffing by qualified family members when long-term continuity is not a significant consideration.

The House bill did not contain a comparable provision.

The conference substitute is essentially the same as the Senate provision except for technical amendments to make clear that the provision applies to family members of all U.S. Government personnel abroad. The committee of conference intends that this provision be applicable to family members of U.S. military personnel abroad as well as to family members of civilian employees.

ASSIGNMENTS TO PUBLIC OR PRIVATE NONPROFIT ORGANIZATIONS

The House bill provided for expansion of the so-called Pearson program which provides for assignments of Foreign Service officers to the Congress, State, and local government agencies, and other public organizations. The House provision permitted officers who have served at least 7 years (existing law allows assignment only of officers in their 10th to 15th year) to be assigned to duty with private nonprofit and public organizations (existing law does not allow assignment to private organizations).

The Senate amendment was similar to the House provision, but prohibited officers from being assigned under the Pearson program after their 22d year of service, and provided for a gradual increase over 5 years in the number of officers taking part in the program so that by fiscal year 1984 at least 50 officers would participate each year. The Senate amendment additionally provided that any reimbursement to the Department for assignments to a Member or office of the Congress was to be made at the rate of one-half the current salary of the Foreign Service officer.

The conference substitute is similar to the House provision with an amendment to require reimbursement of one-half the salary of Pearson program personnel assigned to the Senate. It is the intent of the Congress that the Secretary of State make every effort to increase the number of Foreign Service officers assigned under the Pearson program. Significant benefits accrue to the Department of State and the Congress or other recipient organizations from vigorous use of this program, with the result that the recipient organization receives the benefit of trained Foreign Service officers while the Department acquires Foreign Service officers with a greater understanding of the recipient organization. Therefore, as soon as practicable, the Secretary should strive for a minimum level of 50 officers taking part in the program.

CAREER COUNSELING

The House bill authorized career counseling for Foreign Service officers and employees "in order to facilitate their transition from the Foreign Service."

The Senate amendment was similar, but authorized such counseling "for the purpose of maintaining an appropriate distribution of officers and employees among the various ranks" during the periods when the Secretary judges it necessary to encourage voluntary retirements.

The conference substitute incorporates the House provision.

REST AND RECUPERATION TRAVEL

The Senate amendment contained a provision to permit employees of the foreign affairs agencies and their dependents who are eligible for "rest and recuperation" leave to elect to have their round-trip transportation paid to the United States, or to "other locations abroad" rather than just the latter, as is the case under present law.

The House bill did not contain a comparable provision.

The conference substitute retains the Senate provision with a modification in wording which makes clear that rest and recuperation leave will continue to be governed by regulations promulgated by the Secretary of State. It is the intent of the committee of conference to establish the option for Foreign Service officers and their dependents to return to the United States whenever eligibility for rest and recuperation leave is attained, pursuant to regulations promulgated by the Secretary. The Senate amendment provided, for the State Department and for the ICA, additional funds calculated to meet the extra costs attendant to providing this opportunity; and the committee of conference approved these amounts in the expectation that the regulations promulgated by the Secretary will provide for the "return-to-the-U.S. option" to be available except in unusual circumstances. The committee of conference emphasizes that air transport for such rest and recuperation should be procured, whenever possible, from U.S. carriers and at economy fares. In establishing the regulations to govern this provision, the Secretary should give appropriate consideration to the benefits to employee morale to be derived from this provision as well as to the budgetary impact the provision may have on other agency programs and activities.

RETIREMENT BENEFITS FOR BINATIONAL CENTER GRANTEES

The Senate amendment provided for participation in the Foreign Service retirement system by any person who served as a Binational Center grantee and who has 5 years of creditable service.

The House bill did not contain a comparable provision.

The conference substitute does not contain a provision on this issue. In deleting the Senate provision, the Congress is acting without prejudice regarding the possible merits of the claim by certain former grantees of Binational Centers that they are entitled to participation in a U.S. Government retirement program.

ORIENTATION AND LANGUAGE TRAINING FOR FAMILY MEMBERS

The House bill provided authority to the Secretary of State to make grants, not to exceed $300 per month per individual, to family members of Foreign Service officer and employees to offset expenses associated with attendance at language and orientation programs of the Foreign Service Institute (FSI). The House bill also required a report evaluating the grant program to be submitted to the Congress no later than January 1, 1980.

The Senate amendment provided for partial compensation for language training for

dependents of Foreign Service officers outside the FSI, specified no great amount, but required certification that the dependent is unable to participate in the departmental training program.

The conference substitute incorporates both the House and Senate provisions. In an effort to provide the best and most comprehensive orientation and language training for Foreign Service family members, the Congress intends to provide flexibility to the Department of State to provide this training both at the Foreign Service Institute and at locations outside FSI. The provisions, however, require that training may take place outside the Institute only when the family member is unable to participate in training at the Institute. The Secretary of State is also provided authority to make grants to individuals taking part in FSI or outside training to offset costs incurred in conjunction with this training. No grant may exceed the actual costs associated with attendance and a limitation of $300 per months for no more than 6 months is placed on the grant authority for FSI training. The committee of conference does not consider the $300-per-month grant authority to be a precedent for use elsewhere in Government. The justification for this authority is that it will make it possible for additional dependents (primarily spouses) to attend orientation and language training prior to departure for a foreign assignment. Lack of such training now leads to a number of broken assignments because of the failure of the family to adjust to the foreign culture. The $300-per-month grant is a small price to pay to reduce the number of such costly broken assignments. This provision is not to be interpreted as a limitation on the authority in section 701 of the Foreign Service Act of 1946.

SPECIAL COMPUTATION OF ANNUITIES

The House bill provided a special computation of retirement annuities for certain Foreign Service officers and other participants in the Foreign Service Retirement System who retire between October 1, 1978, and December 31, 1979, equal to 2 percent of the basic salary for the highest single year of service (rather than the highest 3 years of service as under existing law) multiplied by the number of years of service credit obtained.

The Senate amendment did not contain a comparable provision.

The conference substitute is identical to the House provision.

This provision applies only to the Foreign Service (indeed only to a relatively small number of Foreign Service employees) for a specific and limited period of months. It is included in this act because of the serious personnel surplus in senior Foreign Service ranks. It is not to be construed as a precedent for broadening other Government retirement inducement authorities now or in the future. Both the House International Relations Committee and the House Post Office and Civil Service Committee Chairmen have agreed that enacting this provision will not constitute a precedent for other U.S. Government personnel systems.

The civil service system has authority for both reduction-in-force and early retirement inducements to handle similar personnel problems. Temporary and specific retirement inducements are used in civil service-staffed agencies when such agencies face difficult personnel problems such as that now confronting the Foreign Service.

This section is necessitated by the separate personnel system of the Foreign Service which has neither reduction-in-force nor special retirement inducement authority. It would also assist in resolving the central current Foreign Service management problem which is caused by the lack of senior retirements as described in the committee reports on this authorization bill.

The committee of conference finds that this provision will save money and will result in some reduction in the number of senior Foreign Service employees as well as in the average grade of Foreign Service employees of officer rank. Both the House Committee on International Relations and the Senate Committee on Foreign Relations plan to follow the implementation of this provision to insure that these results are realized.

REDUCING FAMILY SEPARATIONS DURING TEMPORARY ASSIGNMENTS

The Senate amendment provided authority for the Secretary of State to pay travel expenses of family members of an officer or employee who is assigned to temporary duty. (Under existing law, these travel expenses may be paid only if the officer is assigned to temporary duty while en route to his post assignment.)

The House bill did not contain a comparable provision.

The conference substitute is similar to the Senate amendment with a change which restricts application of the provision to temporary duty ordered in connection with a change in assignment. This will insure that the provision applies only to temporary duty ordered in connection with transfers involving family travel, and does not include temporary duty where the employee simply travels to another city to perform the duty and then returns home.

SPECIAL ALLOWANCES

The House bill provided authority to the Secretary of State to pay compensation for extra duty required of certain Foreign Service officers.

The Senate amendment did not contain a comparable provision.

The conference substitute is the same as the House provision except for a technical amendment to make clear that any payments provided under authority of this provision are taxable as compensation under the Internal Revenue Code. The committee of conference agreed (*a*) that in appyling this new authority, the Secretary of State should insure that no officer working in the immediate office of a Principal Officer (i.e., persons paid at Executive Levels I, II, or III) of the Department of State, the International Communication Agency, and the Agency for International Development, would benefit from the special allowance; and (*b*) that the grades of the positions eligible for consideration for the special allowance should be limited to Foreign Service officers in classes 8 through 4.

REPORTING TO A CHIEF OF MISSION

The Senate amendment reaffirmed existing law, which requires all employees of the U.S. Government stationed abroad, regardless of agency, to keep the Chief of Mission fully informed as to their activities. The amendment did so by adding to existing law the phrase "notwithstanding any other provision of law."

The House bill did not contain a comparable provision.

The conference substitute contains no provision on this issue. The committee of conference decided to delete the Senate provision in light of the administration's agreement that the "Authority of Ambassador" provision in existing law "means that disclosure of intelligence information to Ambassadors is authorized within the meaning of the National Security Act of 1947." The principal purpose of the Senate amendment was to make that clear.

DETAILING OF STATE DEPARTMENT PERSONNEL

The House bill extended from 90 days to 1 year the maximum period an officer or employee of the Department of State can be detailed to another executive agency without reimbursement to the Department. It also required that these detailed officers and employees not be counted toward any personnel ceiling imposed on the Department.

The Senate amendment did not contain a comparable provision.

The conference substitute is identical to the House provision. In approving this provision, the committee of conference wishes to make clear its intent that the number of employees detailed under this authority continue to be limited, that the personnel ceiling of the Department administratively imposed by the Office of Mangement and Budget not be reduced by reason of this provision, and that any nonreimbursable assignments under this authority not made pursuant to an exchange agreement with another executive agency and which exceed 90 days be reported to the Committees on Foreign Relations and International Relations.

PERSONNEL REQUIREMENTS AND COMPENSATION

The Senate amendment stated the finding of Congress that despite the steady expansion of U.S. diplomatic representation abroad, the total number of State Department personnel has not increased and although the responsibilities and necessary qualifications for Foreign Service positions continue to change, compensation for such personnel remains linked to that of the General Schedule employees. The Senate amendment further expressed the sense of Congress that the Secretary of State should conduct a review of the personnel and compensation needs of the Foreign Service and required that he report the results and recommendations of the review to Congress not later than January 20, 1979.

The House bill did not contain a comparable provision.

The conference substitute is identical to the Senate provision.

PREMIUM PAY

The House bill repealed section 412 of the Foreign Relations Authorization Act, Fiscal Year 1978, which would prohibit premium pay to all Foreign Service officers and Foreign Service information officers for overtime, night, holiday and Sunday work after September 30, 1978, but would grant Foreign Service officers in classes 5 through 8 a one-time $250 per year increase in salary.

The Senate amendment did not contain a comparable provision.

The conference substitute repeals the requirement that Foreign Service officers in classes 5 through 8 be paid an additional $250 per year in lieu of premium pay, but allows the prohibition of premium pay to take effect on October 1, 1978.

SCIENCE, TECHNOLOGY, AND AMERICAN DIPLOMACY

*Findings*

The House bill contained four findings of the Congress on the importance of science and technology to American foreign policy: the consequences of science and technology require appropriate knowledge and understanding of these fields in order to conduct effective diplomacy; many opportunities in diplomacy lie in scientific and technological fields; individuals and organizations concerned with technology should be consulted in the formulation, implementation, and evaluation of foreign policy; and effective application of science and technology to problems of international relations requires the development and use of long-range planning.

The Senate amendment did not contain a comparable provision.

The conference substitute is identical to the House provision.

*Declaration of policy and diplomacy*

The House bill enunciated a policy on the application of science and technology to foreign policy. Four elements of policy were stated: technological developments should be anticipated and assessed and ap-

propriate measures implemented to influence such developments in ways beneficial to the United States and other nations: the mutually beneficial applications of science and technology evidenced by U.S. participation in international agreements should be supported as important elements of U.S. foreign policy; employees and officers of the United States should be trained in the application of science and technology to foreign policy and in the international implications of scientific and technological developments; and U.S. foreign policy should be continually reviewed to insure appropriate and timely application of science and technology to foreign policy.

The Senate amendment did not contain a comparable provision.

The conference substitute is identical to the House provision.

*Responsibilities of the President*

The House bill required the President, through the Secretary of State, the Director of the Office of Science and Technology Policy, and other officials the President may designate, to implement the policy set forth above.

The Senate amendment did not contain a comparable provision.

The conference substitute incorporates the House provision with the following amendments:

The conference substitute deletes the requirement that the President carry out his responsibilities under this provision through the Secretary of State. While the committee of conference intends that the Secretary of State be a principal assistant to the President in implementing this section, it was agreed that the deleted requirement would unnecessarily impinge on the authority of the President to fulfill his responsibilities under this provision.

Further, the conference substitute deletes the word, "fully," which modified the phrase, "informed and consulted," in order to simplify interagency coordination and to eliminate confusion over interpretation of the provision.

The conference substitute also substitutes the phrase "take any major action primarily involving science and technology" for the phrase "take any initiative involving science and technology." This change clarifies the scope of the legislation by focusing the coordination and oversight activities of the Department of State on major international actions of the U.S. Government primarily involving science and technology, rather than on all international discussions and actions which may in some manner touch upon or involve science and technology. The committee of conference intends that intelligence collection activities be excluded from the scope of this provision.

Finally, the conference substitute adds the word "major" to modify the phrase "domestic science and technology programs" in order to make clear that the President should identify and evaluate the international implications of important, but not all, domestic science and technology programs and activities of the U.S. Government.

*Authority of the Secretary of State*

The House bill established the authority and responsibilities of the Secretary of State for implementing the policy enunciated above and for undertaking actions to improve the ability of the Department of State to apply science and technology to problems of diplomacy and international relations.

The Senate amendment did not contain a comparable provision.

The conference substitute retains the House provision but adds the word "major" to modify the phrase "science or science and technology agreements and activities." This amendment clarifies the role of the State Department in coordinating and overseeing international scientific and technological activities of the U.S. Government to insure consistency with overall foreign policy. It directs the attention of the State Department to those international agreements and activities of greatest importance. The amendment makes clear that the State Department need not coordinate and oversee all international scientific or technological activities undertaken to implement international agreements on which State was previously informed and consulted if such implementing activities are not deemed to be "major" activities.

*Earmarking of funds*

The House bill earmarked $4,071,000 of the total amount authorized to be appropriated by this legislation for administration of foreign affairs for the Department of State for the purpose of carrying out during fiscal year 1979 the responsibilities given the Department under the provisions described above.

The Senate amendment did not contain a comparable provision.

The conference substitute does not include an earmarking. The committee of conference expects the Department of State to expend at least $4 million of the sums authorized to be appropriated for the administration of foreign affairs for fiscal year 1979 on activities relating to the application of science and technology to American diplomacy in addition to the activities of the Department already programed in such areas as oceans, international environmental affairs, international scientific affairs, international energy matters, preparations for the United Nations Conference on Science and Technology for Development, and external research. The committee of conference intends that the $4 million be expended on the following new activities: The establishment of long-term research and training relationships with nongovernmental and academic institutions on the application of science and technology to international problems; the augmentation of programed external research; the augmentation of course offerings at the Foreign Service Institute; the development of a cadre of officers sensitive to the international implications of scientific and technological developments; the development of a government-wide management information system to facilitate executive branch coordination and oversight of international scientific and technological activities of the U.S. Government and State Department implementation of specific scientific and technological cooperation agreements where personnel, budgetary, and other resources of the Department permit.

GORGAS MEMORIAL INSTITUTE

The House bill contained a series of technical amendments which change the date for submission of the Institute's annual report to Congress from January to April.

The Senate amendment did not contain a comparable provision.

The conference substitute is identical to the House provision.

COMMISSION ON SECURITY AND COOPERATION IN EUROPE

The House bill provided an increase of $200,000 in the annual authorization of appropriations for the Commission on Security and Cooperation in Europe.

The Senate amendment did not contain a comparable provision.

The conference substitute is identical to the House provision.

PANAMA CANAL TREATIES

The House bill provided that none of the funds authorized in the bill shall be used directly or indirectly to effect implementation of the Panama Canal Treaties of 1978 without a specific act of Congress authorizing such implementation.

The Senate amendment did not contain a comparable provision.

The conference substitute provides that none of the funds authorized in the bill may be used directly or indirectly to effect implementation of the Panama Canal Treaties unless authorized by the Constitution or by act of Congress.

INTERPARLIAMENTARY UNION

The Senate amendment increased the annual authorization for expenses of U.S. participation in the Interparliamentary Union (IPU) from $45,000 to $100,000.

The House bill did not contain a comparable provision.

The conference substitute increases the authorization to $90,000. In order to improve the accounting of expenses, the committee of conference expects that henceforth, in the reports required by applicable U.S. statutes, the U.S. delegation to the IPU will provide a full detailed accounting of all expenses, including transportation costs borne by the Department of Defense, and that such information will be provided by and made available to both the House and Senate.

UNITED STATES-EUROPEAN COMMUNITY INTERPARLIAMENTARY GROUP

The Senate amendment established a statutory base for a "United States-European Community Interparliamentary Group." The language was similar to the statutes underlying the North Atlantic Assembly, the Interparliamentary Union, the Mexico-United States Interparliamentary Group and the Canada-United States Interparliamentary Group. An annual authorization of $50,000 was provided.

The House bill did not contain a comparable provision.

The conference substitute contains no provision on this issue.

EXPANDED EXCHANGE ACTIVITIES

The Senate amendment mandated a gradual increase, over 5 years, in the real resources devoted to exchange-of-persons activities conducted by the ICA. Specifically, the Senate amendment (1) recognized the importance of the exchange-of-persons program; (2) directed the President to prepare a 5-year plan for the achievement of a significant increase in exchange-of-persons activities; (3) provided that such plan would be submitted to Congress in January 1979 and then be adjusted annually by the President and the Congress; and (4) directed the President to include necessary funds for the plan in his annual budget submission to Congress.

The House bill did not contain a comparable provision.

The conference substitute provides that the President shall, through a gradual expansion during the 4-year period beginning October 1, 1979, significantly increase the financial resources annually expended by the ICA for exchange-of-persons activities. The conference substitute further provides that the President shall prepare a general plan for such expansion and shall adjust such plan annually if necessary in consultation with the Congress. This plan should be submitted to the House Committee on International Relations and the Senate Committee on Foreign Relations not later than January 20, 1979. In such submission, the committee of conference also requests that the President provide the two committees an analysis of the executive branch's past efforts in this area including an accounting of individual recipients for the past 10 years.

INTERNATIONAL COMMUNICATIONS POLICY

The Senate amendment stated the finding of Congress that (1) certain forthcoming international conferences will have a significant impact on the free flow of in-

formation and ideas among the nations of the world; and (2) although the United States is the leading user of communications channels and information, the U.S. Government does not have a comprehensive policy regarding international communications issues or an effective mechanism for developing and coordinating such a policy. It directed the President to transmit to the Congress by January 20, 1979, a report detailing the policymaking mechanism which has been developed for this purpose, and the goals and positions of the United States with regard to anticipated international meetings which will address communications and information issues. Supplemental reports were required if any modification of these goals or positions occur.

The House bill did not contain a comparable provision.

The conference substitute is essentially the same as the Senate amendment. Minor revisions in language were made in recognition of executive branch efforts to formulate a comprehensive international communications policy.

NEEDED ACTION CONCERNING MARINE RESOURCES

The Senate amendment stated the sense of Congress that the Secretary of State should convey to all nations having an interest in cetacean sea life the serious concern of the Congress regarding the continuing destruction of such marine mammals and should encourage such nations to (1) join in the international discussions on this subject at the June 1978 International Whaling Commission meeting; (2) participate in an exchange of information with the National Marine Fisheries Service of the U.S. Department of Commerce; (3) cooperate in establishing an international cetacean commission; and (4) adopt comprehensive marine mammal protection legislation.

The House bill did not contain a comparable provision.

The conference substitute is essentially the same as the Senate provision.

ACTION TO SUPPORT INTERNATIONAL JOURNALISTIC FREEDOM

The Senate amendment stated the finding of the Congress that news dissemination and the free flow of information across international boundaries are vital to good relations among nations and that there are strong indications that in many countries foreign journalists are subject to governmental harassment and restrictions. The Senate amendment also stated the sense of the Congress that the President should advise foreign governments engaging in such harassment and restrictions of journalists that the United States regards such actions as a significant and potentially damaging factor in U.S. relations with such country and that the President should raise the issue of the treatment of foreign journalists in appropriate international forums and directed the President to report to the Congress by January 20, 1979, on actions taken pursuant to this section. Further, the Senate amendment condemned the action taken by Soviet authorities in the detention of Craig Whitney of the New York Times and Harold Piper of the Baltimore Sun.

The House bill did not contain a comparable provision.

The conference substitute incorporates the Senate provision with the exception of the reference to the Soviet authorities' detention of certain specified journalists.

INTERNATIONAL FOOD RESERVE

The Senate amendment stated several findings of the Congress with respect to the world food situation and expressed the sense of Congress that the President should sustain a major initiative directed toward reaching an agreement to establish an international network of nationally held grain reserves and directed the President to report to the Congress not later than January 20, 1979, on actions taken toward achieving such a goal.

The House bill did not contain a comparable provision.

The conference substitute is essentially the same as the Senate provision with the exception of the requirement for a report to Congress.

CONSOLIDATION OF FOREIGN RELATIONS LAW

The Senate amendment stated the finding of Congress that the clarity of statutes governing the conduct of U.S. foreign relations could be improved through consolidation and directed the Secretary of State, the Directors of the International Communication Agency and the Arms Control and Disarmament Agency, and the Chairman of the Board for International Broadcasting to prepare draft legislation to consolidate such statutes for transmittal to the Congress not later than January 20, 1979.

The House bill did not contain a comparable provision.

The conference substitute contains no provision on this issue.

SYSTEMATIC INFORMATION-SHARING

The Senate amendment stated the finding of Congress that State Department international political, economic, and other studies could be valuable to the two foreign relations committees of the Congress and that a formal information-sharing arrangement between the State Department and the two committees could serve the national interest provided that controls are established to protect necessary confidentiality. The Senate amendment directed the Secretary of State to transmit to the Congress, not later than January 20, 1979, recommendations for establishing such an information-sharing arrangement.

The House bill did not contain a comparable provision.

The conference subsititute is the same as the Senate provision.

EQUITABLE TREATMENT OF U.S. CITIZENS LIVING ABROAD

The Senate amendment stated the finding of Congress that American citizens living abroad should be treated fairly and equitably by the U.S. Government with respect to taxation and other rights and benefits and that such treatment would be facilitated by a periodic review of laws and regulations affecting Americans living abroad. The Senate amendment directed the President to transmit to Congress, no later than January 20, 1979, a report which identifies and evaluates all laws and regulations which discriminate against Americans living abroad and recommended legislation to eliminate unfair and inequitable treatment.

The House bill did not contain a comparable provision.

The conference subsititute is the same as the Senate provision.

SPANISH DEMOCRACY

The Senate amendment set forth certain findings of Congress with respect to (*a*) Spain's progress toward the construction of a stable and lasting democracy, and (*b*) the symbolic importance of the Picasso painting "Guernica." The Senate amendment further expressed the sense of Congress that "Guernica" should be transferred to Spain and that "the American people, having long benefited from this treasure and admiring Spain's achievement today, would wish, as an expression of appreciation and congratulation, to contribute to the preparation of any special facilities as may be suitable for the painting's permanent display." The amendment authorized an appropriation of up to $500,000 for such a contribution if it were to be "found appropriate by the elected leaders of Spain."

The House bill did not contain a comparable provision.

The conference substitute is essentially the same as the Senate provision except that the authorization of $500,000 is removed. While the committee of conference agreed to include language affirming the desirability of American assistance in the preparation of the painting's permanent display, if such assistance is found appropriate by the elected leaders of Spain, the authorization of an appropriation for this purpose was found to be premature and was therefore deleted without prejudice to future consideration.

ASSISTANCE TO BEREAVED U.S. FAMILIES

The Senate amendment stated the finding of Congress that the Department of State should render all reasonable administrative assistance to any U.S. citizen who is making arrangements following the death of another U.S. citizen abroad; directed the Secretary of State to examine alternative procedures by which the Department could, where needed and appropriate, provide loan assistance or other assistance to facilitate such arrangements; and required a report to the Congress not later than January 20, 1979, on such alternative procedures including associated costs.

The House bill did not contain a comparable provision; however, the report of the Committee on International Relations on this bill contained a statement requesting a State Department study on this problem to be completed and submitted to the Committee by December 1, 1978.

The conference substitute is the same as the Senate provision.

REVIEWING DISCRIMINATORY TRADE PRACTICES

The Senate amendment stated the finding of Congress that all U.S. statutes and regulations requiring discrimination with respect to all trade between the United States and any foreign country were enacted for reasons relating solely to the conduct of U.S. foreign policy and that such statutes and regulations should be periodically reevaluated by the President and the Congress. The Senate amendment directed the President to transmit to Congress not later than January 20, 1979, a report that (1) identifies all such statutes and regulations, (2) evaluates each, and (3) recommends amendments which would in his judgment advance U.S. foreign policy interests.

The House bill did not contain a comparable provision.

The conference substitute expresses the finding of Congress that:

"United States statutes which authorize or require suspension or discrimination with respect to all trade between the United States and a particular foreign country, and which affect, directly and significantly, the conduct of United States foreign relations, should be periodically reevaluated by the President and the Congress."

The conference substitute retains the reporting requirement contained in the Senate amendment, with a technical amendment making clear that all appropriate congressional committees are to receive a copy of such report.

NORMAL DIPLOMATIC RELATIONS

The Senate amendment stated the finding of Congress that a principal purpose of the conduct of diplomatic relations with a foreign government is the discussion and negotiation of outstanding issues and that such relations do not imply approval of such government. The Senate amendment further stated the finding of Congress that achievement of the President's goal of establishing normal diplomatic relations with all nations would serve long-term U.S. interests provided that such diplomatic relationships are conducted on a reciprocal basis and are consistent with existing U.S. commitments to other nations. Finally, the Senate amendment directed the Secretary of State to transmit to Congress, not later than January 20, 1979, a report identifying those countries with which

the United States does not maintain normal diplomatic relations and setting forth the reasons therefor.

The House bill did not contain a comparable provision.

The conference substitute retains only the finding with respect to the purpose and significance of diplomatic relations with a foreign government. The committee of conference requests that the Secretary of State transmit to the House Committee on International Relations and the Senate Committee on Foreign Relations, not later than January 20, 1979, a report identifying those countries with which the United States does not maintain normal diplomatic relations and setting forth the reasons therefor.

NUCLEAR-POWERED SATELLITES

The Senate amendment stated findings of Congress with respect to the dangers posed by the unregulated use of nuclear-powered satellites and expressed the sense of Congress that the United States should take the lead in seeking a multilateral agreement governing the use of such satellites. The Senate amendment further directed the Secretary of State to transmit to the Congress, not later than January 20, 1979, a report on efforts to reach such an agreement.

The House bill did not contain a comparable provision.

The conference substitute is the same as the Senate provision.

ATROCITIES IN CAMBODIA AND UGANDA

The Senate amendment stated the finding of Congress that reliable reports attest to the existence of atrocities in Cambodia and Uganda which require special notice and condemnation. The Senate amendment further urged the President to support multilateral action and bilateral action by countries having extensive relations with the two countries to bring about a lessening of inhumane practices and directed the Secretary of State to transmit to Congress, not later than January 20, 1979, a report on actions taken to that end. The Senate amendment also stated that the President should (1) prohibit the export of military and related equipment to Uganda; (2) prohibit the issuance of a visa to any Ugandan official for the purpose of military, paramilitary, or police training in the United States unless the Department of State determines that Uganda has demonstrated proper respect for the rule of law and human rights; and (3) instruct the U.S. permanent representative at the United Nations to submit a resolution imposing a mandatory arms embargo on Uganda.

The House provision did not contain a comparable provision.

The conference substitute is essentially the same as the Senate provision.

REPORTING AND COORDINATION OF INTERNATIONAL AGREEMENTS

The Senate amendment amended the Case-Zablocki Act (1 U.S.C. 112b), by (1) requiring that oral international agreements be reduced to writing and submitted to Congress; (2) requiring a written report signed by the President with respect to all agreements transmitted after the 60-day period stipulated in the Case-Zablocki Act; (3) forbidding the signing or conclusion of any international agreement without the prior approval of the Secretary of State or the President; (4) stipulating that the Secretary of State shall determine, for the executive branch, whether an arrangement constitutes an international agreement within the meaning of the Case-Zablocki Act; and (5) requiring the President, through the Secretary of State, to promulgate such rules and regulations as may be necessary to carry out the provisions of the Case-Zablocki Act.

The House bill did not contain a comparable provision.

The conference substitute is essentially the same as the Senate amendment except that item (3) was modified to provide for "prior consultation with" rather than "prior approval of" the Secretary of State or the President; such consultation may encompass a class of agreements. As regards item No. 1, relating to the transmission of oral agreements, it is the understanding of the committee of conference that the current administrative practice is to reduce oral international agreements of consequence to writing; thus the amendment merely codifies existing procedure.

It is the understanding of the committee that intelligence liaison agreements between U.S. intelligence agencies and foreign governments are also subject to the oversight of the intelligence committees of the House and Senate. Therefore, those committees, in addition to the House Committee on International Relations and the Senate Committee on Foreign Relations, will continue to examine such agreements within the context of their respective jurisdictions.

TREATIES AND INTERNATIONAL AGREEMENTS

The Senate amendment expressed the sense of the Senate that the President should have prior consultations with the Senate Foreign Relations Committee as to whether particular agreements between the United States and other countries should be a treaty or an Executive agreement.

The House bill did not contain a comparable provision.

The conference substitute contains no provision on this issue.

FREEDOM OF COMMUNICATION

The Senate amendment stated that no directive may be issued which inhibits any State Department, International Communication Agency, Arms Control and Disarmament Agency, Board for International Broadcasting, or Agency for International Development employee from communicating with Members and employees of Congress.

The House bill did not contain a comparable provision.

The conference substitute deletes the Senate provision in view of the fact that a comparable provision is contained in existing law (5 U.S.C. 7102).

COMMISSION ON HUNGER AND MALNUTRITION

The Senate amendment authorized an appropriation of $1.5 million for each of the fiscal years 1979 and 1980 for a Commission on Global Hunger and Malnutrition which would (1) assess current Federal programs which have an impact on hunger and malnutrition; (2) sponsor and oversee relevant activities; and (3) make recommendations to the President and Congress on policies to increase the capacity of the United States to reduce hunger and malnutrition.

The House bill did not contain a comparable provision.

FOREIGN GIFTS AND DECORATIONS RECEIVED BY SENATORS AND SENATE EMPLOYEES

The Senate amendment amended the Foreign Gifts and Decorations Act (5 U.S.C. 7342) by setting forth certain procedures for the disposal of foreign gifts and decorations received by Senators and Senate employees.

The House bill did not contain a comparable provision.

The conference substitute is the same as the Senate provision. A similar provision with respect to Members and employees of the House included in the Foreign Relations Authorization Act of 1977.

RHODESIA

The Senate amendment expressed the sense of the Congress with respect to U.S. policy toward Rhodesia.

The House bill did not contain a comparable provision.

The conference substitute deletes the Senate provision.

NEGOTIATIONS ON AIR QUALITY

The Senate amendment stated the finding of Congress with respect to certain environmental problems shared by the United States and Canada and stated the sense of Congress that the Secretary of State should try to negotiate a cooperative agreement with Canada to protect and preserve the two countries' mutual airshed and to enhance air quality. The Senate amendment further expressed the sense of Congress that the Secretary of State should, in concert with other interested Federal agencies and affected states, take appropriate diplomatic actions to reduce or eliminate air pollution from any source, which affects both countries. Finally, the Senate amendment expressed the sense of Congress that the United States should negotiate with Canada to develop an agreement on air quality standards to be regulated by the International Joint Commission, United States and Canada, and that the American section of the IJC monitor air quality along the border if it will facilitate negotiations. The Secretary of State was directed to report to Congress not later than January 20, 1979, on the status of such negotiations.

The House bill did not contain a comparable provision.

The conference substitute states the findings of Congress with respect to joint United States and Canadian concerns about protection of the environment and expresses the sense of Congress that the President should try to negotiate a cooperative agreement with Canada to protect and preserve air quality. The conference substitute also expresses the sense of Congress that the Secretary of State should, in concert with other Federal agencies, and affected States, take appropriate diplomatic actions to reduce or eliminate any undesirable impact upon both countries resulting from air pollution.

DIPLOMATIC RELATIONS WITH ANGOLA

The Senate amendment prohibited the use of funds under this legislation to establish diplomatic relations with Angola as long as Cuban military forces are there unless the President certifies that the establishment of diplomatic relations would serve U.S. national interests.

The House bill did not contain a comparable provision.

The conference substitute contains no provision on this issue.

CUBAN PRESENCE IN AFRICA

The Senate amendment contained certain findings concerning Cuban involvement in Africa and U.S. relations with Cuba and expressed the sense of Congress that the President should sever existing diplomatic and economic relations with Cuba until Cuba removes its military forces from Africa.

The House bill did not contain a comparable provision.

The conference substitute states the finding of Congress that Cuban personnel serving in Africa have sharply increased in the past year and expresses the sense of Congress that the President should undertake a comprehensive review of U.S. diplomatic and economic relations with Cuba and transmit a report of such review to the Speaker of the House and the Senate Committee on Foreign Relations not later than January 20, 1979.

EFFECTIVE DATES

The House bill included in various provisions an effective date of October 1, 1978, in order to comply with House rules regarding appropriations of funds and with the requirements of the Congressional Budget Act.

The Senate amendment did not contain a comparable provision.

The conference substitute includes the October 1, 1978 effective dates.

## CONFERENCE REPORT ON H.R 6669, NATIONAL CLIMATE PROGRAM ACT

Mr. BROWN of California. Mr. Speaker, I call up the conference report on the bill (H.R. 6669) to establish a national climate program, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of August 14, 1978.)

Mr. BROWN of California (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER. The gentleman from California (Mr. BROWN) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. WALKER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. BROWN).

Mr. BROWN of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the conference report on H.R. 6669, the National Climate Program Act. This bill would establish a comprehensive national climate program to enable the Nation to understand and respond to natural and man-induced climate processes and their implications. I want to explain very briefly the background, significance and provisions of this bill, and I think that will make it very clear as to why the House should quickly adopt this conference report.

After hearings in both this Congress and the previous one, the bill was ordered reported by the Committee on Science and Technology on May 6, 1977. The report accompanying the bill, House Report 95-266, gave extensive background on the need for the bill and fully explained our intentions, which have been maintained in this conference report. On September 9, 1977, the House passed the bill by a vote of 282 to 60.

After hearings in the Senate Committee on Commerce, Science and Transportation, the Senate passed their version of the bill on April 24, 1978, by a voice vote. The two bills were different in structure but very similar in their intent.

The administration, demonstrating its support for the bill and the program, has taken steps toward implementing the national climate program. They were able to do this effectively because the bills are so similar in intent. The joint explanatory statement of the managers accompanying the conference report explains in several places how the common intent of the two Houses is expressed in the compromise language which the conferees agreed upon.

Now let me discuss what benefits we expect from this legislation. Put very simply, I feel that by increasing our understanding of climate and how and why it changes we can make our society and our economy much more adaptable to changes in the weather. There have been a great many comments that as we become a more and more tightly integrated society, more and more of a mass society, that we are thereby losing our resiliency, our ability to adapt. This bill would certainly increase our national ability to adapt to changes in climate and climate-induced events.

For example, let me ask you to remember the ferocious winter of 1976–77, and the shortages of heating fuel that occurred when that cold wave gripped the Nation. We had plenty of heating fuel, but it was in the wrong place at the wrong time. This was most poignantly exemplified when barges loaded with desperately needed fuel oil were frozen in place on the Ohio River. It was very clear that if we had been able to anticipate such cold weather the barges could have gotten through the river long before it froze.

We expect similar benefits from the application of climatic knowledge and information to agriculture, fisheries, transportation and energy policy decisions, among other things. In this legislation, we have provided mechanisms to assure that the needed information will be developed and applied to pressing climate-related problems that we face. The bill does this by assuring the board involvement of many disciplines, groups and agencies in the program. For example, we expect the Department of Agriculture to be the principal agent in carrying out assessments of the impact of climate or climate change on our crops and crop yields. Very importantly, the bill also provides for the active participation of users of climate information in planning and directing the program. By users we do not mean merely other climatologists, but rather those people who need information to plan their activities—for example, people who are interested in the impact of climate on agriculture or people who need to know about anticipated weather in order to schedule construction projects. Thus, this bill does not provide for a program which would generate information in the hope that it might be used, but rather provides for users to make input to the program to assure that the information they need is in fact developed.

I want to mention that both the House bill and the conference report provide for a unique program planning process in which there will be broad participation by representatives from all involved areas and disciplines with major emphasis on participation by users of climate information.

The conference report also calls for international cooperation. For those less-developed nations that have marginal, subsistence economies, better climatic information would be extremely valuable. I want to point out that sharing an understanding of the causes of climate change and the ability to predict those changes could be a very inexpensive and very effective form of foreign aid. The reason for this is that in order to make useful predictions with regard to the climate in the United States, we need global information and global climate models because of the scale of climate phenomena. Thus, to a significant extent, the understanding, the information and the models developed for use in this country can also be applied to other nations.

At this point, I would like to say just a few words about several salient points which are more fully explained in the printed joint statement of the conferees accompanying the conference report.

The bill establishes a national climate program which is to be strongly multiagency in its operation. As implemented, the program will consist of the coordinated climate-related efforts of the various agencies.

In addition, the intergovernmental program described in section 6 of the bill must be an integral part of the national program. (That section refers to climate activities to be carried out by the States or groups of States and funded up to 50 percent by Federal grants under this act.) The intergovernmental program is especially important in that it will help bring the Federal involvement down to the local level and also provide a channel for information from local users back into the program. The bill provides that the Department of Commerce will be the principal entity responsible for administering the program.

Based on actions already taken by the administration, it appears that this will be done by a National Climate Program Office in the National Oceanic and Atmospheric Administration of the Department of Commerce. To successfully carry out the intent of this bill, the program office must act so as to stimulate cooperation and coordination between the vari-

ous Federal and intergovernmental climate activities.

The NOAA office cannot attempt in any way to operate as a "Climate Czar" because the various agencies and departments have perfectly legitimate missions which are impacted in one way or another by climate considerations. Some of these missions involve the development of climate information, while others involve the use of climate information. The purpose of this legislation is to bring together the various climate activities in a programmatic sense to make a stronger whole without organization change. To help accomplish this, the bill provides for: First, a unified budget request—to be prepared by the Office of Management and Budget and to include climate-related budgets from all the agencies; and second, a comprehensive 5-year plan covering all Federal climate activities to be prepared in consultation between all the pertinent agencies. Thus, the role of the program office must be to take actions to coordinate, strengthen, and supplement the various climate activities of the mission agencies. This should in no way result in any jurisdictional disputes between agencies or struggles over agency missions. There is no language anywhere in this bill that would take away from any agency any of its legitimate, traditional missions. Rather, the purpose and the intent is to encourage cooperation between the agencies in climate-related matters.

As a specific example, we do not expect the lead agency, the Department of Commerce, to control all program funding. For example, some program funds will continue to be sought directly by the mission agencies under their existing authorities. Of course, any such budgeted funds would be included in the unified budget of the climate program, and the activities should be included in the 5-year plan. Further, we expect that the Department of Commerce will conduct a planned passthrough program by which, as lead agency, it will support with passthrough funds, certain program activities in the appropriate mission agencies.

Mr. Speaker, I think you can see that we have put a great deal of thought and work into this bill and that it is addressing in a unique way a major national need. For this reason, and for all the reasons enumerated above, I urge adoption of this conference report.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. BROWN of California. I will be happy to yield to the gentleman from Pennsylvania whose participation and support has contributed greatly to the development of this legislation.

Mr. WALKER. Mr. Speaker, I have a question about section 5(e)(1) of the bill, which provides for an advisory committee. I support the idea that the Secretary should seek advice on the conduct of the program from outside the Federal Government, and that she should specifically look to users of climate data, information and services in securing this advice. However, Mr. Speaker, I do have a question about the permissive autnority for the Secretary to compensate members of the committee at the daily rate for GS–16 of the general schedule for each day in which they are engaged in the actual performance of their committee duties. I understand that this compensation would be in addition to the travel expenses and per diem in lieu of subsistence. I raise this question in part because similar language was stricken by amendment in the Science Committee and I want to insure that the intention of the House has not been lost on this point. I also raise this question because I believe in general that it is broadly significant to advisory committees throughout Government.

First, I note that the authority given the Secretary is permissive.

Mr. BROWN of California. That is correct. The Secretary is under no obligation to provide this compensation to members of the committee.

Mr. WALKER. Then I take it that this compensation is only to be paid in cases when a particular individual is not able to participate without such pay and when such an individual would stand to lose personal income by participating in committee activities.

In other words, if I understand you correctly, you feel that there are some individuals—or there might be some individuals—who would be only able to participate in this program and participate on the Advisory Committee if the Secretary could provide additional incentive in the form of payment to secure their participation?

Mr. BROWN of California. Yes; that is our intention.

We did consider the position of the House that compensation should not be paid at all. As you remember, the language that was stricken in the Science Committee would have called for mandatory payment of compensation by the Secretary. That would not have been right. However, because we are seeking broad involvement in this advisory committee, specifically the involvement of representatives of users of climate information, we thought that the Secretary should have the authority to make such payments in order to secure participation of people whose advice would make for a stronger program and who would suffer financial hardship in participation without pay.

Mr. WALKER. Mr. Speaker, we have established that the authority is strictly permissive, but I would like to inquire as to the frequency with which you anticipate it will be exercised?

Mr. BROWN of California. I anticipate that this authority will be used infrequently—only in rare and extraordinary circumstances.

I would expect that almost everyone whose advice would be sought on this advisory committee would be able to participate without this compensation. Most would find that their employer would be happy to pay their salary while they were participating on such an important committee. Indeed, some individuals might be willing to participate at their own expense just because of the honor of serving on such a committee. For this reason, I would expect that the authority would be used only in rare and extraordinary circumstances.

Further, I am prepared to send a letter to Secretary Kreps explaining the points that have been made and requesting that she keep us fully and currently informed on this matter. I would specifically request that she inform us whenever some individual declines to serve on the committee because he is not going to be paid for his services. I will include the letter in the RECORD.

Mr. WALKER. Thank you very much, Mr. Speaker.

Mr. BROWN of California. Mr. Speaker, I include the following material:

COMMITTEE ON SCIENCE AND TECHNOLOGY, HOUSE OF REPRESENTATIVES,

*Washington, D.C.*

Hon. JUANITA KREPS,
*Secretary, Department of Commerce, Washington, D.C.*

DEAR SECRETARY KREPS: As Chairman of the Subcommittee on the Environment and the Atmosphere I have been deeply involved in the evolution of the Climate Act, H.R. 6669, which has just been reported by a Committee of Conference. As one of the House Conferees on this legislation I want to ensure that there is no confusion as to the Congressional intent of Section 5(e)(1) of the Act.

Included in Section 5(e)(1) is permissive authority for the Secretary of Commerce to provide compensation at the daily rate for GS–16 of the General Schedule for members of the Advisory Committee for each day engaged in the actual performance of their duties. Similar language, which was mandatory in nature, was included in the first draft of this legislation and was removed by the Committee on Science and Technology at the time the Committee considered the bill. That position was later sustained when the bill was passed by the House of Representatives.

It is the intention of the House Conferees that this permissive authority is provided for use only in rare and extraordinary circumstances. We realize that there may be occasions in which the participation of particular individuals may be highly advantageous to achieving the goals of the Act and that these particular individuals would suffer financial hardship if they accepted appointment without compensation. However, we expect that such circumstances would be few and far between.

The Subcommittee on the Environment and the Atmosphere requests that you notify the Chairman and the Ranking Minority Member of any utilization of this permissive authority and the circumstances which justify such use. A number of Members of the Subcommittee have expressed the opinion that they believe that most citizens are willing to contribute their time and talent to national advisory committees and that they consider the public honor of being invited to participate sufficient to compensate them for their time. Therefore, we also request that you provide us with the particulars concerning any prospective member of this advisory committee who indicates that he is unwilling to accept appointment based solely on the lack of daily compensation.

For the Committee I want to express my deep appreciation for your cooperation.

Sincerely,

GEORGE E. BROWN, Jr.,
*Chairman, Subcommittee on the Environment and the Atmosphere.*

Mr. BROWN of California. Mr. Speaker, I have no further requests for time, and I yield back the remainder of my time.

The SPEAKER. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. BROWN of California. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

## PROVIDING FOR CORRECTION IN THE ENROLLMENT OF H.R. 6669, NATIONAL CLIMATE PROGRAM

Mr. BROWN of California. Mr. Speaker, I call up the Senate concurrent resolution (S. Con. Res. 103) to correct the enrollment of H.R. 6669 and ask unanimous consent for its immediate consideration.

The Clerk read the Senate concurrent resolution as follows:

S. CON. RES. 103

*Resolved by the Senate (the House of Representatives concurring)*, That in the enrollment of the bill (H.R. 6669), to establish a national climate program, and for other purposes, the Clerk of the House of Representatives shall make the following correction:

In section 5(b)(1), strike "(8)" and insert in lieu thereof "(9)".

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

## REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 13471, FINANCIAL INSTITUTIONS REGULATORY ACT OF 1978

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 95–1536) on the resolution (H. Res. 1333) providing for consideration of the bill (H.R. 13471) to strengthen the supervisory authority of Federal agencies which regulate depository institutions, to prohibit interlocking management and director relationships between financial institutions, to amend the Federal Deposit Insurance Act, to restrict conflicts of interest involving officials of financial supervisory agencies, to control the sale of insured financial institutions, to regulate the use of correspondence accounts, to establish a Federal Bank Examination Council, and for other purposes, which was referred to the House Calendar and ordered to be printed.

## FOREIGN INTELLIGENCE SURVEILLANCE ACT OF 1978

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1266 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1266

*Resolved*, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7308) to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information. After general debate, which shall be confined to the bill and shall continue not to exceed three hours, one and one-half hours to be equally divided and controlled by the chairman and ranking minority member of the Permanent Select Committee on Intelligence and one and one-half hours to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substiute recommended by the Permanent Select Committee on Intelligence now printed in the bill as an original bill for the purpose of amendment, said substitute shall be read for amendment by titles instead of by sections, and all points of order against said substitute for failure to comply with the provisions of clause 5, rule XXI are hereby waived. No amendment to said substitute shall be in order except germane amendments printed in the Congressional Record at least three legislative days before their consideration, pro forma amendments for the purpose of debate, and amendments recommended by the Permanent Select Committee on Intelligence. It shall be in order to consider en bloc amendments to said substitute printed in the Congressional Record of July 17 by Representative McClory of Illinois. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions. After passage of H.R. 7308, the Committee on the Judiciary shall be discharged from the further consideration of the bill S. 1566; and it shall then be in order in the House to move to strike out all after enacting clause of said Senate bill and insert in lieu thereof the text of H.R. 7308 as passed by the House.

The SPEAKER pro tempore (Mr. BROWN of California). The gentleman from Missouri (Mr. BOLLING) is recognized for 1 hour.

Mr. BOLLING. Mr. Speaker, I yield 30 minutes to the gentleman from Ohio (Mr. LATTA), and pending that I yield myself such time as I may consume.

Mr. Speaker, those Members who listened to the reading of the rule will know that this rule provides for 3 hours of general debate, 1½ hours to be equally divided and controlled by the chairman and ranking minority member of the Permanent Select Committee on Intelligence and 1½ hours to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary. The committee amendment in the nature of a substitute will be read by titles for the purpose of amendment.

The only amendments to be allowed are committee amendments and those amendments which have been printed in the RECORD at least 3 days in advance of their offering. The so-called McClory amendments which appear in the July 17 RECORD may be considered en bloc. A motion to recommit, with or without instructions, is in order, and then the matter will be sent to conference with the Senate bill.

Mr. Speaker, I know there is controversy over the matter that will be brought up by this rule, but I do not have the feeling that there is opposition as such to the rule. Therefore, I reserve the balance of my time.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to point out to the House that this is a very, very important piece of legislation, because it deals with foreign intelligence matters, and the security of this Nation might at some time in the future be jeopardized by what we may or may not do here.

As a matter of fact, when the matter was before the Committee on Rules, I raised the question as to whether or not there was any provision in this legislation which would allow the President of the United States to authorize warrantless electronic surveillance during times of war, and I found out that there was not, and that the President would, the way this legislation is written, have to come back to the Congress to have an amendment drafted along those lines.

So thinking into the future, I have discussed the matter with the gentleman from Illinois (Mr. MCCLORY), who has had a considerable amount to do with this legislation and who is to be commended for his efforts, and we have drafted an amendment which I will propose, which would allow the President to authorize warrantless electronic surveillance for periods of up to 1 year during times of war or national emergency. Hopefully, when this matter is being debated under the 5-minute rule, we will see fit to give the President and the Nation this particular safeguard.

Mr. Speaker, this rule provides 3 hours of general debate for the consideration of H.R. 7308, the Foreign Intelligence Surveillance Act of 1978. The time will be equally divided between the Permanent Select Committee on Intelligence and the Committee on the Judiciary.

The rule makes in order an amendment in the nature of a substitute recommended by the Permanent Select Committee on Intelligence. In order to preserve the normal amending process, the substitute is made in order as an original for the purpose of amendment.

Points of order are waived against the substitute for failure to comply with clause 5 of rule XXI, which prohibits appropriations on a legislative bill. The bill provides that funds appropriated for the Department of Justice may be used for the operation of the special court and the special court of appeals set up by this legislation. Technically this constitutes an appropriation on legislation, and therefore the waiver is required.

The rule does contain limitations on the offering of amendments. No amend-

ments will be in order except, first, germane amendments printed in the CONGRESSIONAL RECORD at least 3 legislative days before their consideration; second, committee amendments; and third, pro forma amendments for the purpose of debate.

The rule also makes it in order to consider en bloc amendments to be offered by the gentleman from Illinois (Mr. MCCLORY).

Finally in order to expedite a conference, after passage of the House-passed bill, it will be in order to insert the House-passed language in the Senate bill number.

Mr. MCCLORY. Mr. Speaker, will the gentleman yield to me?

Mr. LATTA. I am happy to yield to the gentleman from Illinois.

Mr. MCCLORY. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise not in opposition to the rule, but only to explain that the rule does limit and does restrict the Members with regard to offering amendments to this extremely controversial and complex legislation. In other words, Members who have not drafted amendments and had them placed in the RECORD and printed for at least 3 days prior to this date are going to be excluded from offering amendments.

To that extent I think this is a very unfair rule. It is not an open rule. It is a rule subject to that kind of limitation and restriction. On this very complex legislation which was brought before the Committee on the Judiciary and the Permanent Select Committee on Intelligence, it seems to me that it is extremely unfair and unfortunate that we have this kind of a situation.

As a matter of fact, one of the reasons why the Committee on the Judiciary did not take up this subject was because members of the Committee on the Judiciary represented that we would not mark up the bill before the committee because we would have an opportunity when the bill came up on the floor of the House of Representatives to mark it up at that time. We heard that same kind of argument when we were in the Permanent Select Committee on Intelligence in the markup stage. The members said that this would all be done by action on the floor.

We are now in a situation where, if we have not already put our amendments in the RECORD and they have not been printed, we are not going to have an opportunity to offer amendments to this bill.

I think it is important for the Members at this stage to realize that the extent of this legislation is very far reaching. This legislation is unprecedented. It is unprecedented in our entire legislative and judicial history. There has never been an instance of a special court provided which would be able to pass upon the exercise of executive authority with regard to national security or foreign affairs matters.

As a matter of fact, it goes precisely against the constitutional authority which is reposed in the President. If this measure passes, the President will not hereafter be authorized to exercise his Executive authority with respect to securing national security intelligence information. And I am talking now about information. I am not talking about espionage, or anything else. I am talking just about intelligence information gathering. And the President would not be authorized to secure this information unless it is approved by the judge, a member of a special court that is established by this legislation.

This special court itself is unprecedented. The secret hearings are unprecedented. The secret record is unprecedented. This is all part of what is called a very carefully crafted piece of legislation. I think the word "crafted" may be a very apropos word, because it may be craftily put together. In fact, the Members will find that there is a tremendous input here, not only on the part of the Intelligence Committee, the Department of Justice, and others, but a very substantial input insofar as the American Civil Liberties Union is concerned, as far as other agencies are concerned, whose interests are not our national security, but whose interests are entirely something else.

So I think it is well for the Members to have in mind that there is a compromise made with regard to our national security intelligence-gathering capability in this legislation, a compromise made with the ACLU, a compromise made with Morton Halperin, a compromise made with those who are looking out not for the intelligence-gathering capability but who, in many instances, would like to have this capability eliminated entirely. There are a great many who feel that we should have no intelligence capability with regard to clandestine or secret or private investigations or activities. And with regard to those persons, why, of course, this would be entirely satisfactory. But insofar as providing support for our intelligence agencies, the Members will find that all of the former intelligence officers, the entire organization, is opposed to this legislation, and many others who are knowledgeable on the subject. It is legislation which has not been considered at the markup stage by the Committee on the Judiciary, has not come before the full Committee on the Judiciary, although it was assigned and referred to the Committee on the Judiciary, and it has not received the consideration with respect to constitutional issues that are concerned, legal issues that are concerned, or, in my opinion, many of the practical subjects that are concerned with regard to this legislation.

Let me say that the Intelligence Committee did accept one amendment. It accepted one substantial amendment. So in this respect, the measure is substantially different from the measure which was passed over in the Senate. It is not the same bill. When people say that they support the bill that was passed in the Senate by a wide margin, they are not talking about the same bill. This is a different bill. I think this bill should be considered on its own merits, and I think that each and every amendment offered should be considered—and there will be a great many amendments offered.

Mr. BOLAND. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Massachusetts.

Mr. BOLAND. I thank the gentleman for yielding.

Mr. Speaker, I was wondering whether or not the gentleman from Illinois (Mr. MCCLORY), who has worked long and hard on this bill—as a matter of fact, I would even go so far as to say that this is "Bob McClory Day," because the gentleman has done a good job on the bill—I am wondering whether or not, if we presented the Senate bill, would the gentleman vote for the Senate bill, if we presented the bill here today.

Mr. MCCLORY. No. I would say the Senate bill is worse than the bill we have today. We have made a substantial improvement over the Senate bill. We have made many, many additional improvements. I think it is unfortunate, and it must be embarrassing to the other body that passed a bill 95 to 1 that this committee on both sides of the aisle rejected, in the sense that we adopted a substantial amendment in the committee which is now a part of the bill. And I commend the committee for that amendment.

Mr. BOLLING. Mr. Speaker, I yield 5 minutes to the gentleman from Kentucky (Mr. MAZZOLI).

Mr. MAZZOLI. Mr. Speaker, I rise in support of H.R. 7308, and particularly I rise to commend my distinguished colleague, the gentleman from Wisconsin (Mr. KASTENMEIER).

Mr. KASTENMEIER was responsible, in my judgment, for the way the distinguished House Committee on the Judiciary, and particularly his Subcommittee on Courts, Civil Liberties, and Administration of Justice, has handled this bill. I am a member of the House Intelligence Committee, as well as the Judiciary Committee, although not a member of Mr. KASTENMEIER's own subcommittee.

Mr. KASTENMEIER was kind enough, however, to allow me to sit in with his subcommittee during the hearings on H.R. 7308. Having sat with his subcommittee and having appeared before it as a witness, I can state with assurance that the 3 days of hearings which Mr. KASTENMEIER's committee held on H.R. 7308 were comprehensive and complete. The subcommittee heard a full range of views in the subject of foreign intelligence surveillance. Also, the subcommittee drew upon past-year hearings and on the extensive record compiled by the House Intelligence Committee.

While some members of the subcommittee had reservations about H.R. 7308, and I think no thoughtful person can have other than some reservations about certain provisions, the subcommittee decided, following careful study, that H.R. 7308 was worthy of being discussed, debated, and voted upon by the full House.

The subcommittee acted in recognition, also, of the little time remaining in this session of the Congress. Further delays awaiting full Judiciary Committee action have led to the demise of the bill.

Mr. KASTENMEIER. Mr. Speaker, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. Mr. Speaker, the gentleman from Kentucky accurately states the situation, and I want to express my thanks to him for making that explanation. We were very pleased to have his testimony and have him sit with the subcommittee, along with our colleague from Illinois (Mr. McCLORY), who was also not only present and testified before my subcommittee, but was able to suggest witnesses for us as we deliberated this question.

Mr. Speaker, again I want to express my appreciation for the gentleman's statements.

Mr. MAZZOLI. Mr. Speaker, let me first say that I think the gentleman from Wisconsin, in his truly modest way, never gives himself full credit. It was a very difficult situation; it was a very difficult parliamentary situation; it was a very difficult tactical situation, and I thought the gentleman handled it with real aplomb and gave full and complete hearings to the matters, and I think he has produced a good bill.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, I just want to acknowledge that there were some hearings, and the gentleman in the well and I did testify. However, I would also like to emphasize that there was no markup session by either the subcommittee or by the full committee; so that this was, in a way, window dressing. This was a concession to me, I guess, because I had requested hearings, but when the subcommittee moved to table and the motion to table succeeded, then in effect the subcommittee decided that the bill would remain in the Judiciary Committee without being considered by that committee.

So, it is not appropriate to bring this bill to the floor with any suggestion or representation that it has received full Judiciary Committee consideration, because it has received none insofar as the markup stage is concerned.

Mr. MAZZOLI. I would like to state to the gentleman, having sat with the subcommittee as I did, and having heard the gentleman himself as a witness, and having heard some of his witnesses testify to the defects as they perceived them in the bill, having listened to the debate and the colloquies that raged in that committee room for 3 days, I would have to say that the committee record which the gentleman has on the table is complete and contains information supporting the gentleman's position that certain changes should be made in the bill.

So, while there may not have been technically the kind of markup that a committee usually conducts where amendments are offered and argued, certain assertions were made during the committee hearing chaired by the gentleman from Wisconsin, which will be referred to by the gentleman from Illinois in support of his position that H.R. 7308 needs to be amended.

Mr. Speaker, the subcommittee's action—and I think this is important to note—the subcommittee that is headed by the gentleman from Wisconsin (Mr. KASTENMEIER), its action on H.R. 7308 in no way waives the Judiciary Committee's right of jurisdiction over foreign intelligence electronic surveillance or any other related subject matters, so, what is done today waives in no way or in no sense preempts the Judiciary Committee from taking action on this type of bill or any other kind of bill in the future.

And while the Judiciary Committee in this instance, Mr. Speaker, graciously agreed to let the full House work its will on this bill, the committee in the years ahead will play a vital and vigorous role in overseeing the provisions of H.R. 7308. I urge therefore that the House pass the bill, a measure to regulate foreign intelligence electronic surveillances, and again let me commend the gentleman from Wisconsin (Mr. KASTENMEIER).

Mr. BOLLING. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Illinois (Mr. MURPHY).

(Mr. MURPHY of Illinois asked and was given permission to revise and extend his remarks.)

Mr. MURPHY of Illinois. Mr. Speaker, with regard to the rule today, the gentleman from Illinois, my colleague on the committee states that this is an unfair rule. Let me tell my colleagues that this rule was issued on July 12. The gentleman said there was not enough opportunity for amendments to be offered. Let me tell my colleagues there are over 50 pending amendments to this piece of legislation, so anybody who feels he has been short changed has not been reading the RECORD. My colleague, the gentleman from Illinois, has been lobbying almost every Member on both sides of the aisle with regard to this bill and his opposition to this bill. He has had two opportunities before the House Select Committee on Intelligence where he was given every chance to bring witnesses supporting his point of view. He cross-examined every head of every intelligence agency of the United States. He was given the same opportunity, and the same witnesses appeared, before the House Judiciary Committee.

I would like to read to my colleagues today a letter I received from Attorney General Griffin B. Bell:

OFFICE OF THE ATTORNEY GENERAL,
*Washington, D.C., September 6, 1978.*

Hon. MORGAN F. MURPHY,
*U.S. House of Representatives,*
*Washington, D.C.*

DEAR CONGRESSMAN MURPHY: The President today issued the enclosed statement in support of the passage of the Foreign Intelligence Surveillance Act (H.R. 7308). I join the President in his belief that this bipartisan effort of the Executive Branch and Congress will strengthen the capability of our intelligence agencies to deal with foreign espionage and international terrorism while also safeguarding the privacy rights of Americans.

The bill is scheduled for a vote in the House of Representatives this week. The Director of Central Intelligence, the Secretary of Defense, the Director of NSA and the Director of the FBI join me in strongly supporting this legislation.

Yours sincerely,

GRIFFIN B. BELL,
*Attorney General.*

Mr. Speaker, I would like also to read the President's message, issued today:

STATEMENT BY THE PRESIDENT

The House of Representatives is scheduled to vote this week on the Foreign Intelligence Surveillance Act, one of the most significant legislative initiatives involving our intelligence agencies in the last three decades.

This Act will establish the nation's first legislative controls over foreign intelligence surveillance conducted by the United States Government. Most importantly, those controls will be established so as to protect both the strength of our nation's intelligence agencies and the privacy rights of our citizens.

American citizens will be assured that the intelligence agencies so vital to protecting our security will be able to perform their tasks fully and effectively. The bill also assures intelligence officers who serve our country that their proper activities in this field will be authorized by statute.

By providing clear statutory standards, this legislation will help strengthen the ability of our intelligence agencies to deal with foreign espionage and international terrorism. The strong support of this legislation by every intelligence agency clearly reflects this fact.

The passage of this legislation is also a major step toward eliminating the potential for abuse of electronic surveillance by the Federal Government. Americans will now be afforded the safeguards of a judicial warrant procedure for any electronic surveillance which might affect their rights.

This legislation has been carefully developed over several years, by Executive and Congressional leaders of both parties. The kind of bipartisan cooperation needed to develop legislation in the intelligence area, which is so important to the defense of our nation, was demonstrated earlier this year by the overwhelming Senate vote, 95–1, passing the bill.

I urge the Members of the House to vote for passage of this legislation, so that we can promptly begin to implement this well-balanced, long-overdue initiative.

Mr. Speaker, I urge my colleagues to vote for the passage of this rule.

Mr. LATTA. Mr. Speaker, I yield 5 minutes to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Speaker, as a Member of this body who served for 20 years as a special agent for the Federal Bureau of Investigation, with many years in the area of foreign intelligence, I will tell you that this proposed legislation is fatally flawed.

It will have the effect of seriously weakening any effective intelligence-gathering capability by our Government.

Such effective intelligence-gathering is entirely dependent upon speed and confidentiality of sensitive sources. Both of these factors would be severely compromised by the warrant provisions, and the involvement of the judicial branch, in the area of authorizing electronic surveillance.

First, let me say that legislation just because it contains a warrant provision will not provide a special shield against prosecution for the loyal FBI agent or other Government official who is instructed to conduct electronic surveillance.

Any law which would guarantee immunity from criminal prosecution or

civil suit to a Government officer or employee conducting such surveillance authorized by the Attorney General would provide such a shield.

In fact, the warrant provision will destroy the FBI's ability to collect intelligence on the movement and plans of known terrorists in an emergency situaiton, as one major example of this bill's defects.

As a result of the Kearney case, and the current indictment of three other major FBI officials who were involved in the surveillance of people under authority of the Attorney General, in order to locate and apprehend fugitive members of the Weather Underground terrorist organization, a chilling effect has already been imposed upon the legitimate intelligence function of the FBI and other agencies.

The destructive nature of the Kearney case and what has followed will be severely compounded if a warrant requirement is imposed for foreign intelligence purposes that do not necessarily involve an American person in a crime.

Here we have a situation where the current administration has set a precedent that loyal FBI subordinates may be prosecuted and, if convicted, imprisoned for carrying out instructions of their superiors, authorized by the Attorney General and even the President himself, if those instructions are later considered to be wrong.

So what happens in an emergency situation under this bill, if the FBI is informed by border officials at the Canada-Vermont border that a suspected member of the German terrorist Baader-Meinhof Gang has just passed into the United States? Such a circumstance occurred just last month.

There is no firm evidence that the foreign citizen, who has a passport and a visa is a member of this terrorist group. But the possibility is strong, and some very valuable intelligence information could be gained by having this person followed and electronically surveilled at any stopping point, even including the home of some collaborator or contact within the United States along the way.

In this situation, time is of the essence. Even minutes lost could mean that a dangerous terrorist would be on the loose among our own people, and that valuable intelligence about that person's objectives or domestic contacts and sources of support would remain unknown to our Government.

Under this proposed legislation, what do our intelligence officials—what does the FBI do?

Right now, there is no question about what would be done. The Attorney General would be alerted. He could instruct the FBI to follow the individual and to conduct electronic and other surveillance at every possible point, in order to collect intelligence that is essential to the Government for the protection of our people.

If any criminal activity is indicated, a warrant would be sought for further authority to collect evidence by electronic surveillance and other means.

But under this bill, before any criminal activity is evidenced and an investigation for that purpose can be started, nothing could be done to collect vital intelligence information, maybe leading to prevention of harm to the public.

The warrant provision for foreign intelligence purposes is the reason that nothing would probably be done in the precious few minutes and hours at the outset, when the most valuable intelligence could be obtained.

Yes, there is a supposed 24-hour emergency grace period under this bill, where electronic surveillance can be conducted while a warrant is being sought for such surveillance.

But what FBI special agent will be willing to conduct this surveillance during the 24-hour period without a warrant, once a warrant is required, under the risk that the judge may not approve the warrant?

Under the Kearney precedent, the loyal FBI agent would be out on the end of the proverbial tree limb, after the judge has sawed it off.

The good information and good judgment of this FBI agent's superiors, and even the Attorney General himself, will not save the FBI subordinate from the specter of prosecution in such a case—and most certainly from the probability of civil suit if the parties involved become aware of what has happened, which they will under this bill.

And so this bill—despite its supposed 24-hour warrantless foreign intelligence electronic surveillance—will prevent the possibility that any FBI agent or other official can prudently, in his own best interests, conduct such surveillance and remain protected from later possible recriminations.

For the public, this means that hundreds, maybe thousands of situations such as the one involving alleged members of the terrorist Baader-Meinhof Gang coming into the United States to meet up with comrades in the United States will go by the boards in their initial stages, where the most valuable intelligence work against foreign threats must be done.

Let us make no mistake about the time that will be lost in such a situation. Under current procedures, top-level authority for electronic surveillance within the executive branch must already be obtained.

This includes authority from the Attorney General himself and maybe at the Presidential level as well, which can be obtained immediately.

Under this bill, in addition to these procedures, a Federal judge must give his approval. This will involve additional administrative preparation, time lost locating and appearing before the judge and in obtaining his decision. Here we are only talking about the problems confronting our intelligence community in an emergency situation. This does not even consider the serious mistake of involving the judicial branch in the executive's foreign intelligence-gathering function in the first place.

Mr. Speaker, under this bill a warrant would be required to conduct wiretaps to collect foreign intelligence in every instance. Even surveillance of the Soviet and other Communist government embassies would require a warrant.

It is inevitable that American citizens and resident aliens will call such embassies. Even with minimization procedures required by this bill, such surveillance to determine domestic contacts and supporters of Communist government goals and activities in the United States would require a warrant. And under the Freedom of Information Act and through other means, this information provided to the court to obtain necessary warrants would inevitably wind up in the hand of the wrong people.

Take the case of Orlando Letelier, who was Chile's Ambassador to the United States during the Marxist regime of Salvadore Allende. Letelier made contacts and friends among leftists in our own country—even in the Congress. Letelier was a close friend and comrade of Fidel Castro and his allies.

When the Allende regime ended, Letelier sought and obtained asylum in the United States and worked full time until his death in pro-Communist causes in our country.

Evidence obtained from his briefcase when he died showed that Letelier was receiving financial support from the Castro government through Allende's daughter, who was living in Cuba. This evidence also showed that Letelier used these funds to pay for his lobbying and intelligence-gathering activities in the United States. He developed extensive contacts with U.S. Government and congressional officials.

Under this bill, in order for our intelligence officials to follow up on such evidence, and to inform the President and other Government officials of the relationship and support between American citizens and hostile foreign governments, judicial warrants will be required.

Sensitive information such as that I have described involving Letelier and highly placed officials will then, by law, be required to be made part of the court record.

These records, either legally under the Freedom of Information Act, or through litigation, or as the result of leaks to the news media and other illegal methods, will inevitably be publicized and compromised through disclosure.

The only way to prevent disclosure of sensitive intelligence information is to severely restrict access to it. Under this bill, it will be required that such sensitive information and documentation be turned over to a special new court—maybe two courts—involving 17 judges, their clerks, reporters, bailiffs, and so forth. It is inevitable that our most sensitive, highly classified, and explosive intelligence information will be compromised and disclosed publicly under such an unreasonable arrangement.

If for no other reason than the highly important news value of such court files to our energetic, probing news media, who of necessity are always digging for the best story, this intelligence information will be perpetual game for leaking and publication.

We cannot afford to allow such a thing to happen. We cannot allow a law to be passed that will destroy the speed, the sureness, and the confidentiality of our intelligence-gathering capability

that is so essential to the President's responsibility as our Commander in Chief and top foreign policy officer.

I implore my colleagues to defeat H.R. 7308. If legislation is needed in this area, the McClory substitute is certainly the only prudent way to accomplish that objective.

Mr. BOLLING. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. MURPHY of Illinois. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7308) to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information.

The SPEAKER pro tempore (Mr. BROWN of California). The question is on the motion offered by the gentleman from Illinois (Mr. MURPHY).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 7308, with Mr. YATES in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Illinois (Mr. MURPHY) will be recognized for 45 minutes, the gentleman from Illinois (Mr. MCCLORY) will be recognized for 45 minutes, the gentleman from Wisconsin (Mr. KASTENMEIER) will be recognized for 45 minutes, and the gentleman from Virgina (Mr. BUTLER) will be recognized for 45 minutes.

The Chair now recognizes the gentleman from Illinois (Mr. MURPHY).

Mr. MURPHY of Illinois. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, H.R. 7308, as reported by the permanent Select Committee on Intelligence, is the culmination of over 4 years of detailed inquiry by two administrations and six congressional committees into the unique area of foreign intelligence electronic surveillance. It has, with its predecessor from the Ford administration been the subject of hearings on seven different occasions over 3 years, and of five different markups and five committee reports.

This inquiry was conducted against the backdrop of both the abuses revealed by the Church and Pike committees and the recognition that an efficient intelligence collection capability is vital to the national interest.

Two basic conclusions have been reached:

First. Electronic surveillance is a necessary and proper means of collecting foreign intelligence information; and

Second. The rights of our citizens can best be protected by requiring a judicial warrant for such surveillance undertaken in the United States.

H.R. 7308 is based on these conclusions and will insure that both legitimate intelligence activities and the privacy interests of our people are furthered. H.R. 7308, as amended, would enact a new law entitled the "Foreign Intelligence Surveillance Act of 1978." The purpose of the bill is to provide a statutory procedure authorizing the use of electronic surveillance in the United States for foreign intelligence purposes. The procedures in the bill would be the exclusive means by which electronic surveillance, as defined, could be used for foreign intelligence purposes. The following techniques of electronic surveillance would fall within the bill's prescriptions:

First. The acquisition of a wire or radio communication sent to or from the United States by intentionally targeting a known U.S. person in the United States under circumstances in which the person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes;

Second. A wiretap in the United States to intercept a wire communication, such as a telephone or telegram communication;

Third. The acquisition of private radio transmissions where all of the communicants are located within the United States; or

Fourth. The use in the United States of any electronic, mechanical, or other surveillance device to acquire information other than from a wire communication or radio communication under circumstances in which the person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes.

H.R. 7308, as amended, creates a special court in Washington, D.C., composed of at least one judge designated by the Chief Justice from each of the judicial circuits and a special court of appeals composed of six judges designated by the Chief Justice from the Greater Washington, D.C., area.

The bill would require a prior judicial warrant for all electronic surveillance for foreign intelligence purposes with three limited exceptions. First, where certain types of electronic surveillance are targeted against certain types of foreign powers, under circumstances where it is extremely unlikely that a U.S. person's communication would be intercepted, no warrant is required. Instead, Attorney General approval is required. Parenthetically, I would note that this exception to the warrant requirement was suggested by my colleague from Illinois (Mr. MCCLORY). It was agreed to by the Intelligence Committee in a spirit of compromise. I and a majority of my colleagues on the committee made a good faith effort to obtain the support of the gentleman for the bill. Obviously, we have not succeeded.

Second, emergency surveillance without a warrant would be permitted in limited circumstances, but a warrant would have to be obtained within 24 hours of the initiation of the surveillance.

Third, surveillance solely for the purposes of testing equipment, training personnel, or "sweeps" to discover unlawful electronic surveillance are authorized without a warrant under rigorous controls to insure that no information concerning U.S. persons is improperly used, retained, or disseminated.

The bill would authorize the Attorney General to make applications to the special court for a court order approving the use of electronic surveillance. Approval of an application under the bill would require a finding by a judge that the target of the surveillance is either a "foreign power" or an "agent of a foreign power," terms defined in the bill, and that the facilities or places at which the surveillance is directed are being used or are about to be used by a foreign power or agent of a foreign power. Where official foreign powers are the target of a surveillance, the standards for obtaining a warrant are less strict than for other surveillances, and both the amount of information provided the judge and the findings he must make are reduced.

A "foreign power" may include a foreign government, a faction of a foreign government, a group engaged in international terrorism, a foreign-based political organization, or an entity directed and controlled by a foreign government or governments. An "agent of a foreign power" includes nonresident aliens who act in the United States as officers, members, or employees of foreign powers or who act on behalf of foreign powers which engage in clandestine intelligence activities in the United States contrary to the interests of this country. U.S. persons meet the "agent of a foreign power" criteria if they engage in certain activities on behalf of a foreign power which involve or may involve criminal acts.

The court would also be required to find that procedures proposed in the application adequately minimize the acquisition, retention, and dissemination of information concerning U.S. persons consistent with the need of the United States to obtain, produce, and disseminate foreign intelligence information.

Every application for an order must contain a certification or certifications made by the Assistant to the President for National Security Affairs or an executive branch official or officials designated by the President from among those executive officers with responsibilities for national security or defense who are appointed by the President with the advice and consent of the Senate. Those officials would be required to certify that any information sought by the surveillance relates to, and if concerning a U.S. person is necessary to, the national defense or the conduct of foreign affairs of the United States or the ability of the United States to protect against grave hostile acts or the terrorist, sabotage, or clandestine intelligence activities of a foreign power. The court would be required to review each certification for surveillance of a U.S. person and to determine that the certification is not clearly erroneous.

The court could approve electronic surveillance for foreign intelligence pur-

poses for a period of 90 days or, in the case of surveillance of a foreign government, faction, or entity openly controlled by a foreign government, for a period of up to 1 year. Any extension of the surveillance beyond that period would require a reapplication to the court and new findings as required for the original order.

H.R. 7308 requires annual reports to the Administrative Office of the U.S. Courts and to the Congress of statistics regarding applications and orders for electronic surveillance. The Attorney General is also required, on a semiannual basis, to inform the House Permanent Select Committee on Intelligence and the Senate Select Committee on Intelligence fully concerning all electronic surveillance under the bill; and nothing in the bill restricts the authority of those committees to obtain further information related to their congressional oversight responsibilities.

This, admittedly, is a short outline of a very complex and detailed piece of legislation. Its very complexity, however, is evidence of the attention the Intelligence Committee has given to the important national security and civil liberties issues involved.

As introduced, H.R. 7308 was fully supported by the administration and, to a lesser extent, supported by the intelligence community. The bill was opposed by civil liberties groups. The Intelligence Committee worked hard on the bill, involving in discussion both civil liberties groups and officials of the intelligence community. The result is a better bill from the perspectives of both civil libertarians and intelligence officials. It is a good bill, albeit a very complex and confusing one, because it assures that the abuses of the past cannot be repeated, while at the same time preserving, and in certain respects, improving, the necessary collection of foreign intelligence important to this Nation's security.

This is not to say that it is a bill about which reasonable men and women may not differ. Some believe on the basis of moral principle that electronic surveillance simply is wrong and can never be justified, except perhaps if it were essential to the continued existence of our country. Others believe, again on the basis of moral principle, that judges should never be involved in the approval process for foreign intelligence electronic surveillances. Obviously, the bill is not responsive to either of these positions.

Rather, the majority of the House Intelligence Committee was convinced on the one hand that the electronic surveillances which would be regulated by H.R. 7308 can be, and often are, important to the national security. On the other hand, the majority of the committee was equally convinced that these important surveillances could be conducted in a manner which would fully protect the legitimate privacy rights of Americans. The bill as reported by the committee, I believe, authorizes and facilitates those important surveillances, while protecting the rights of those involved, and prohibits those illegitimate surveillances which were the abuses of the past.

A red, white, and blue herring that has been raised is a so-called threat to the national security. No intelligence community witness before the House Intelligence Committee suggested that H.R. 7308, as introduced or as reported, threatened the national security. No intelligence community witness has expressed any reservation about the bill, as reported, impeding legitimate intelligence collection. No intelligence community witness suggested that the bill's procedures would threaten whatever speed is necessary for foreign intelligence surveillances. Only two witnesses expressed a reservation concerning risks of disclosure with respect to the bill as introduced. Those witnesses were Admiral Murphy of the Defense Department and Admiral Inman of NSA. Today, both Admirals Murphy and Inman support H.R. 7308, as reported, without reservation.

It is alleged that reams of classified material will be given to large numbers of judges and court personnel. This is nonsense. An application is made to one judge, not many, and the bill explicitly allows for executive branch personnel to serve as any necessary court support.

Another herring that is dragged across the trail is that judges are unequipped to make subtle political and operational decisions necessary in the foreign intelligence field. The bill recognizes this fact full well and does not allow judges to make such decisions. Much of the bill's complexity arises from the need to specify exactly what the judges' duties and powers are under the bill. Those duties and powers are of the same nature as currently exercised under the law regulating law enforcement surveillances; that is, applying facts to a statutory standard.

The vehicle that keeps judges from second-guessing the executive's political judgments is the certification which must accompany each application for a warrant. That certification must be signed by a high executive branch official with responsibility for intelligence or foreign affairs matters. It will contain statements by that official that the object and the purpose of the surveillance is to obtain a particular type of "foreign intelligence" as defined, that this foreign intelligence cannot be otherwise obtained and it will provide the basis for the official's belief that such information will result from the surveillance. Such a certification can only be questioned if these statements are clearly erroneous on their face.

The so-called criminal standard is also a herring to the extent that anyone suggests that it will impede legitimate intelligence collection. The presence of the criminal standard does not mean that the purpose of the surveillance is prosecution, or only to gather evidence of a crime, and there is certainly no limitation in the bill that would so restrict such surveillances. Nor was the so-called criminal standard adopted because of any belief that the Constitution required it. Rather, it was adopted as a matter of policy and principle, that this Government should not target electronic surveillance against individual Americans absent probable cause to believe that they at least may be involved in a violation of law. If this principle had any negative impact on the collection of necessary intelligence, a debate over this criminal standard might be called for, but the Director of the FBI has indicated in the strongest possible terms that the criminal standard in H.R. 7308, as reported, will not impede the FBI's intelligence collection by means of electronic surveillance.

Finally, it has been suggested that congressional oversight is a more proper check on the executive than a judicial warrant. But, it is clear to me at least that congressional committees are simply not equipped to conduct oversight of the day-to-day operation of electronic surveillance, and it is also clear to me that the executive will not provide us the information to do the job even if we were in a position to do it. Such uncertain, after-the-fact oversight is no substitute for prior approval of these surveillances.

The benefits of H.R. 7308, as reported, and its improvements over current practice both from national security and civil liberty viewpoints are substantial.

It is not a bill designed to punish the intelligence community.

It is not a bill that was hastily written in response to media pressure.

And, it is not a bill that will hamstring the intelligence agencies now or in the future.

Rather, it is a much needed piece of legislation that will remove the existing uncertainties as to what are proper intelligence activities while protecting the rights of our citizens.

It will enable the dedicated and patriotic men and women of our intelligence agencies to go about their important business secure in the knowledge that their endeavors are supported by the Congress and the people and that their actions will not subject them to public scorn and ridicule * * *.

Mr. KASTENMEIER. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of Illinois. I yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. I thank the gentleman for yielding, and I want to commend him, and particularly, the chairman of the full committee, the gentleman from Massachusetts (Mr. BOLAND), and the entire Intelligence Committee for the work they have done on H.R. 7308.

I know, from having grappled with this vexatious issue in my own committee, how difficult it is. One of the difficulties in the bill, perhaps not a major one, but nonetheless one I would like to ask the gentleman from Illinois about, is as follows:

I notice that the directive language contained in section 102(a)(3)(A) and in section 105(b)(2)(B) of H.R. 7308 provides that common carriers shall furnish information, facilities, or technical assistance necessary to accomplish the electronic surveillance, and here are the important words, "in such a manner as will protect its secrecy". That language is different from the directive language of title III of the Omnibus Crime Control Act of 1968 where common carriers

are required to provide information, facilities, and technical assistance "necessary to accomplish interception unobtrusively". My question is this, What is the difference between "in such a manner as will protect its secrecy" and "unobtrusively" in the two statutes? Is it the intent of the drafters of the language that the Government is authorized to request different or more information, facilities or technical assistance under H.R. 7308 than is authorized under title III and if such is intended, what is the nature of that additional or different cooperation which may be required?

Mr. MURPHY of Illinois. Let me say to the gentleman that he is correct in that a court order or an Attorney General's order obtained under this bill may direct an officer, employee, or agent of a communications common carrier to provide certain assistance to Government agents implementing those orders.

The nature and scope of such assistance is intended to be identical to that which is authorized by section 2518(4)(e) of chapter 119 of title 18 of United States Code, commonly referred to as title III of the Omnibus Crime Control Act of 1968, as amended. The reason that the language of H.R. 7308 in the sections to which the gentleman refers is different than the language of title III is because the drafters and the committee wished to make very clear that these electronic surveillances which seek to collect foreign intelligence information in this country are extremely sensitive in nature and must be protected from disclosure in the strictest possible fashion.

These electronic surveillances are different from wiretaps authorized by title III where the law requires that notice eventually be given to the subjects of those wiretaps. H.R. 7308 makes clear that no notice will be given the subjects of electronic surveillance as defined under the bill because of the important national security interests to be protected. Accordingly, the language of the statute reads "in such a manner as will protect its secrecy."

This does not seek to authorize in some indirect fashion a different kind of cooperation than is currently authorized to be requested under title III, but simply to create a statutory obligation to keep such surveillances as secure from disclosure as is humanly possible.

In other words, if an application is made to the special court and an order is issued approving the application, and the surveillance is then undertaken, the agents in the field go out to the common carrier and ask for their cooperation, and that common carrier, as it would have to under title III of the Omnibus Crime Control and Safe Streets Act, might, if asked, notify the subject of the surveillance that his wire is being tapped.

To protect the secrecy of these surveillances, we are not requiring that. The reason for that is simple. It is because if we went out and told a Russian spy that the FBI's Counterintelligence Division, which conducts these surveillances for our national security, was tapping his wire, I do not have to tell the gentleman what would happen. Whatever system that spy was using, he would adopt a different method or he would leave the country, leave the jurisdiction. That is the reason for it.

Mr. KASTENMEIER. I thank my colleague for his explanation.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of Illinois. I yield to the gentleman from Illinois.

Mr. McCLORY. I thank the gentleman for yielding to me.

Mr. Chairman, I just want to say that I commend the gentleman for his administration of our subcommittee, and I do not have any complaints as far as the opportunity to present evidence there is concerned. The evidence presented by a former deputy attorney, Laurence Silberman, I thought was rather persuasive, and we had other testimony as well.

However, the gentleman states that Admiral Inman, who originally objected to the bill, now no longer has any objection. I understand that we have exempted his operation from the coverage of this legislation.

However, Admiral Murphy—no relation to the gentleman in the well—who testified, I think, in January of this year before our committee, said that there was a very high risk and very limited benefit for the rights of Americans were we to require a warrant with regard to the targeting of foreign agents and foreign powers.

What if anything did we do in this bill in order to get him to change his mind about this legislation?

Mr. MURPHY of Illinois. I think it was the gentleman's amendment, the amendment offered by the gentleman from Illinois (Mr. McCLORY), which satisfied both Admiral Inman and Admiral Murphy. As the gentleman will recall, there were members of the committee who objected to his amendment, but as chairman of the Subcommittee on Legislation I supported his amendment, as did Mr. BOLAND, chairman of the full committee, and other Democrats.

In a spirit of cooperation I thought we would be able to bring this bill to the floor, as the Senate did, in a bipartisan manner. The Senate passed it by a vote of 95 to 1. Senators on both sides of the political continuum, both political philosophies—I will not mention their names because we are not supposed to do that—but both spectrums were covered fully, and they passed this bill in an hour after years of debates and hearings.

I thought when the gentleman offered his amendment and we adopted it, then we would come to the floor to our colleagues with the same bipartisan effort.

Admiral Inman and Admiral Murphy both have written me, and say that not only do they support the legislation, but I am sure they would not have used the words "enthusiastically support it" if they had any qualms at all. Admiral Inman, as the gentleman knows, has called Members of Congress asking them to pass this legislation. He is the man in charge of probably the most sensitive of all the operations taking place today in the area of electronic surveillance.

Mr. McCLORY. If the gentleman will yield further, I can understand Admiral Inman's enthusiasm because we have eliminated, we have exempted, his operation from the scope of this legislation. But, I question that we have done anything with respect to Admiral Murphy. I do not think we have affected his operations in any way.

Mr. MURPHY of Illinois. We have exempted Admiral Inman in one specific operation that we are prohibited from talking about in public, and the gentleman is fully aware of it, but it is not his whole operation.

Every operation of the NSA which falls under the definition of electronic surveillance, as defined in the bill, is covered by the bill.

It was suggested to the committee in the testimony of representatives from the Department of Defense and from the National Security Agency that some very sensitive activities need not require a judicial warrant under the bill, because they would not involve the interception of communications of U.S. persons.

The committee considered this approach very carefully and eventually agreed to an amendment offered by the gentleman from Illinois (Mr. McCLORY) the effect of which was to exempt from the warrant requirement, but not from the other provisions of the bill, and certainly not from Attorney General approval, those operations which would by definition not involve U.S. persons.

Members will understand why I am reluctant to discuss the particulars of the very sensitive surveillances that are involved.

However, it certainly can be said that those operations which constitute electronic surveillance but which are handled under section 102(a) of the bill, that section which permits Attorney General authorization of these particular surveillances are of a segregable class about which it can be said with certainty that U.S. persons will not be intercepted.

The committee felt that adopting the amendment oflered by the gentleman from Illinois did no violence to the principles which underlie H.R. 7308.

It was felt that this legislation was introduced and has received the support that it has because it did not attempt to in any way dismember or destroy intelligence operations.

However, it does attempt, and I think does a very good job at it, to protect U.S. persons whenever they become inadvertently involved in electronic surveillances in this country that seek to collect foreign intelligence information.

Therefore, the different treatment provided under the bill for surveillances which do not involve U.S. persons is attuned to the fundamental principle of the legislation to protect innocent U.S. persons.

The committee found a happy marriage between security concerns and protection of U.S. persons and stands by its judgment in adopting that amendment.

This is not to say, however, that the NSA is in any way exempt from this bill.

NSA operations remain covered by its provisions, although different treatment may be given to different types of operations.

This, however, is fully consistent with the legitimate interests which have driven the drafting and consideration of this legislation in its present form.

Mr. McCLORY. If the gentleman will yield for this further comment, I do not want there to be any misunderstanding as far as the amendment I offered in the committee. The amendment I proposed to offer in the committee, would have been an amendment which would, if accepted, have provided an opportunity to bring this measure to the floor under an agreement. That amendment would have exempted from the warrant requirements all foreign powers and agents. I do not believe we should be required to have a judicial warrant to have electronic surveillance over foreign powers and agents.

Mr. MURPHY of Illinois. The gentleman is aware that if a U.S. citizen calls an embassy and requests information about some foreign event in the United States, that his conversation will not be used politically against him. The Church committee and the Pike committee uncovered clear evidence that past Executive practices have intercepted Americans' conversations with foreign embassies, which have been disclosed and used politically against these citizens.

Mr. McCLORY. If the gentleman will yield further, that is the purpose of the minimization procedure which I would offer.

Mr. MURPHY of Illinois. The minimization procedures would not have come into being had there been warrant procedures; and they would not have been abused as they have been in the past had there been a warrant procedure.

Mr. McCLORY. Mr. Chairman, I yield 7 minutes to the ranking minority member of the Intelligence Committee, the gentleman from California (Mr. BOB WILSON).

Mr. BOB WILSON. Mr. Chairman, the permanent Select Committee on Intelligence has the responsibility to carry out the mandate of the House expressed in House Resolution 658. This responsibility is particularly heavy at this time, as the committee brings to the House the first substantive policy bill to emerge from our examination of the intelligence community. This bill—the Foreign Intelligence Surveillance Act of 1978—will, in whatever form it takes, impact our intelligence organizations now and in the future with respect to their ability to further the national security interests of this country and its citizenry.

The work of this committee, and particularly the Subcommittee on Legislation, has been difficult. We are dealing in a complex matter, with very sensitive subjects. The issues have centered on the balance between our country's national security requirements, and the individual rights and liberties of our citizens. Our hearings, the testimony we have received, and the debates which have occurred in committee, have not provided clear, unequivocal guidelines upon which we could all agree. Throughout this long and difficult period, the committee chairman, the distinguished gentleman from Massachusetts (Mr. BOLAND) has guided our efforts to insure this most serious matter was not examined as a partisan issue, nor an issue between liberals and conservatives, but rather as an important matter of genuine, general concern. I would especially like to express my warmest appreciation for his even-handed and fair treatment of controversial areas and issues, and particularly for his very fair treatment and unfailing courtesy to those of us on the minority side.

The bill before the House today is important for, first, the subject matter is important, because the evidence has been overwhelming that electronic surveillance within the United States for foreign intelligence collection is vital to the national security interests of the United States, and to the continued freedom and well-being of our citizens.

This bill is important, because it will establish a precedent for other deliberations of this body as we undertake our responsibilities to oversee the intelligence and intelligence-related activities of the U.S. Government.

I am confident that responsible Americans understand the importance of obtaining foreign intelligence information, both abroad and at home, against those foreign powers whose interests and ambitions are inimical to our continued freedom. We are aware that the needs for accurate, timely foreign intelligence information have expanded rapidly in recent years, both in categories of information required, and in the sources of this information. A common thread that runs throughout foreign intelligence deals with communications. To control agents; to task these agents against targets within the United States; and to acquire the information gathered: All require communications networks. Thus, it is evident that electronic surveillance within the United States for foreign intelligence collection is as necessary today as it was when the practice was instituted during the Roosevelt administration. In fact, it has become indispensable to the viability of our intelligence organizations.

The first subject which I would like to address is the need for any legislation. Testimony to the Congress over the past several years has revealed several facts about domestic use of electronic surveillance for foreign intelligence collection. First, each administration since F.D.R. has determined that such surveillance was essential to the national security of the United States. Second, each administration from President Roosevelt through President Nixon handled the matter of domestic electronic surveillance in great secrecy. Third, in each administration, to varying degrees, rights of Americans were violated in the name of national security when no national security interest was evident. In other words, each administration engaged in electronic surveillance in the interest of national security; events and activities were handled in secret, few checks and balances existed, and some abuses occurred.

Starting with the Ford administration, and continuing through the current administration, domestic electronic surveillance for foreign intelligence collection has been conducted under the strict provisions of widely publicized Executive orders. For example, President Carter's Executive Order 12036 contains the following provisions for domestic electronic surveillance for foreign intelligence collection. First, these activities can only be undertaken as permitted by the Executive order, under procedures established by the agency head and approved by the Attorney General. Second, these procedures shall, first, protect constitutional rights and privacy; second, insure that information is gathered by the least intrusive means possible; and third, limit the use of information gathered to lawful Government purposes. Further, electronic surveillance shall not be conducted against a U.S. person without a judicial warrant, unless the President has authorized the type of activity involved, and unless the Attorney General has both approved the particular activity and determined there is probable cause to believe the U.S. person is an agent of a foreign power.

The net effect of Executive Order 12036, and its predecessor, Executive Order 11095, according to all evidence received in committee, has been a responsive intelligence collection program which has not impinged on the rights or liberties of U.S. persons. What then is the rationale for legislation? Much emphasis is placed on the fact that, even though intelligence operations have not been unduly constrained, and the rights of our citizens have been protected, Executive orders can be changed, and that future administrations might engage in domestic electronic surveillance in the name of national security to the detriment of the American people. I do not find this a compelling argument. First, I believe in the power of accountability. Executive Order 12036 clearly defines what is permitted, under what circumstances, and establishes a chain of accountability to officials elected by the people of the United States.

A second argument presented by some witnesses concerned the apparent uncertainty, and uneasiness of our Executive department officials, about the legality of these operations, particularly as courts hear more cases in which foreign intelligence electronic surveillance is involved. But this ignores the fact that the courts have ruled overwhelmingly that the President has the constitutional authority to authorize domestic electronic surveillance for national security purposes.

Nevertheless, I do believe that there is a need to pass legislation to regulate the use of electronic surveillance for foreign intelligence in the United States.

What type of legislation is required? The efforts of the permanent Select Committee on Intelligence have centered on one major area—the involvement of the judiciary. But, I believe an aspect other than involvement of the judiciary has not received sufficient attention. That aspect concerns the focus of our efforts. We should not be drafting legislation which hobbles the collection capabilities of our intelligence or-

ganizations. During the past 20 years, the world has grown smaller, the number of potential adversaries has increased, greater areas of the Earth are of vital concern to the United States. Our potential enemies are more active in this country. More sophisticated techniques are available to foreign agents and technology has greatly diminished time and distance factors. Further, the Nation is involved more frequently in crises, in various parts of the world, crises which develop and change rapidly. Therefore, as our needs for intelligence increase and become more urgent, opportunities to collect this vital information also increase. At this time, successful performance by our intelligence organizations becomes highly dependent on their ability to react positively and quickly to collection opportunities. At this time, our national security interests become paramount, and legislation must provide for an effective, efficient, legal way for our intelligence organizations to operate.

Therefore, the legislation which should be adopted by this distinguished body should be balanced, and have the following characteristics. It should:

First. Be supportive of our vital intelligence organizations, and conducive to enhancing our national security interests.

Second. Be flexible enough to provide responsiveness in times of crisis and war.

Third. Be protective of individual rights and liberties of U.S. persons.

Fourth. Provide for effective congressional oversight.

This legislation should not:

First. Restrict the legitimate functions and responsibilities of the intelligence services.

Second. Overreact to abuses which admittedly are not taking place now or to grant to foreign intelligence agents the rights enjoyed by the American people.

Third. And finally, should not transfer constitutional responsibilities for national security and foreign policy from the President and the Congress to the judiciary on matters so essential to our well-being.

I would hope then, following our consideration of H.R. 7308 and the amendments which will be offered, the resultant legislation will serve our national security interests well, protect the rights of U.S. citizens, and that this legislation will serve as an effective precedent for future legislation in providing our intelligence organizations a sound, legal basis for their continued contribution to our national security and the freedom of all our people.

Mr. McCLORY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I appreciate the very generous remarks which have been made here regarding "McClory Day before the House of Representatives." However, I would like to say that, in my view, this is a day in which we want to consider very carefully the national security interests of our Nation, particularly the activities of our various intelligence agencies.

Mr. Chairman, I merely want to indicate my interest in this subject in behalf of what I believe are the best interests of our Nation in this area; and I have no personal or individual interest in this legislation other than to undertake to do what I think is in the best interests of our Nation.

Mr. Chairman, although I am controlling one-quarter of the time for general debate, as ranking member of the Committee on the Judiciary, I would like to switch hats for a moment to thank the chairman of the other committee on which I sit, and I might say that I am controlling the time for the Select Committee on Intelligence, and say that the distinguished gentleman from Massachusetts must be commended for both his outstanding ability and for his sincere interest in this and other legislation and in the other activities of our committee.

Also, as I said before, I want to commend the gentleman from Illinois (Mr. MURPHY), with whom I worked in this subcommittee. Both of these men have devoted a great deal of time to the consideration of this very complex issue or the number of issues which are encompassed in this legislation. While we have different opinions, I am sure we are all looking toward the same end in what we are doing here.

Mr. Chairman, in my view, what we should undertake to do is to repose responsibility and accountability in the executive branch of Government and not permit that responsibility or accountability to be transferred to the Judiciary.

H.R. 7308 would prevent our intelligence agencies, operating on the President's constitutional mandate to protect our national security, from taking timely and direct action to obtain vital foreign intelligence information. The bill would require the President, on the other hand, to abstain from securing this information or exercising his responsibility in this area until after he first secured a warrant from a newly established special court. It is true that there is a 24-hour leeway there, which is authorized in cases of emergency. However, what if during the 24-hour period the President should decide he wants to have this authority exercised, and at the end of that 24-hour period the court says, "No, you cannot exercise that authority!" Then what happens? It all of a sudden comes to a stop; and of course, the President has been doing something which the court says he never should have been authorized to do in the first place.

Mr. Chairman, this business of reposing all this authority in a special court is an extreme overreaction to the so-called Watergate period and to the abuses which occurred during a period of some 2, 3, or 4 years ago, and perhaps during a long period of time prior to that.

As a matter of fact, in recent years, the intelligence agencies have been operating under Executive order, an Executive order first issued by President Ford and subsequently an Executive order issued by President Carter. There is no evidence, no evidence whatsoever, in the testimony before the Committee on the Judiciary or before the Intelligence Committee which would indicate any violation of any individual rights or any abuses by any of the intelligence agencies during this period.

Therefore, what is it which we are trying to correct through this legislation? It is not abuses which are now occurring. I defy anyone to suggest that there are such abuses occurring now. What we are trying to correct apparently are some abuses which have occurred some time ago and which have been corrected by the Executive orders which are being complied with.

This whole area of foreign intelligence information securing and the entire field of foreign affairs is not appropriately vested in the judiciary in any sense.

Mr. Chairman, as Justice Jackson said in the Chicago Southern versus Waterman Steamship C. case—

> Issues involving the national security are delicate and complex and involve large elements of proficiency. They are and should be undertaken only by those directly responsible to the people whose welfare they advance or imperil.

Mr. Chairman, the persons referred to by Justice Jackson are the elected officials of the people, the President of the United States and the Members of Congress, that is, those of us in this Chamber and in the other body and down on Pennsylvania Avenue in the White House. The persons referred to by Justice Jackson are not members of the judicial branch of Government, who are not elected by the people.

Let us take, for instance, the question of the abuse of authority by the judiciary in this area. Who takes care of that kind of abuse? No one. There is no discipline, no discipline in this legislation or anywhere, with respect to the judiciary.

Mr. DRINAN. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Massachusetts.

Mr. DRINAN. Mr. Chairman, I want to commend the gentleman from Illinois (Mr. McCLORY) on that statement and I agree with him, perhaps for somewhat different reasons than those which the gentleman from Illinois has expressed.

I wonder if the gentleman would speculate on this. Assuming that this bill passes and becomes law and then we have reason to feel that some Federal judges are too lax in giving out the judicial warrant, does the gentleman feel that there is any way by which we as a legislative branch could even question these judges?

Mr. McCLORY. I do not know of any existing machinery by which we could take any disciplinary action against the court. I might say one of the reasons given for vesting this kind of authority in the judiciary is, that while we have had the warrant requirement with regard to so-called title III provisions of the omnibus crime bill, with regard to domestic security, and with regard to organized crime, and the charge is made, or the statement is made, well, the courts have given warrants in all except three cases. What that indicates to me is that maybe those who are in support of this special court feel that the court is going to be some kind of a patsy for the Executive who might in the abuse of

authority be able to fall back on the judicial imprimatur and say, "Well, I have abused my authority, but it is OK because the judge said it is OK."

Mr. DRINAN. If the gentleman would yield further, under the bill it is provided that Federal judges may hire people from the executive branch. People from the CIA, in other words, will present the case, and people who will even be law clerks, so to speak. Does the gentleman think under this bill they could resist any questioning by the Congress, saying that "We are actually court officers. After all, we are paid for by the executive branch"?

Does the gentleman think that is a further barrier to adequate oversight by the Congress of what the courts will do?

Mr. McCLORY. From the gentleman's statement, of course, it demonstrates that we are venturing forth in an entirely unexplored area. We are establishing for the first time in our history a body of secret law. Some people have referred to this kind of secret court proceeding as a star chamber proceeding. I would not want to characterize it in that way, but I would say it is unprecedented that the personnel in the court, if they are going to be part of the judiciary, are going to pose additional risks. If they are not part of the judiciary, then we are implanting in the judiciary another branch of Government in a sort of hybrid system that I say is unprecedented, and for which I say there is no constitutional authority.

Mr. DRINAN. I agree with the gentleman from Illinois. We are doing something totally unprecedented in the whole history of Anglo-Saxon jurisprudence.

Mr. McCLORY. I just want to say to conclude my remarks that I do not see the role that I or others who are objecting to this legislation have as engaging in any flag waving or being superpatriots here today. It seems to me that what we are doing is trying to respect the judgment of those who are the most experienced in this field. When I speak as I do, I speak in the interest of a statement which the chairman of the subcommittee, the gentleman from Wisconsin (Mr. KASTENMEIER) has received from a former Director of the CIA, William Colby, who says that this warrant requirement should not be extended to include foreign powers and foreign agents, but should be limited to American citizens, and I will be offering an amendment in that regard. I likewise am referring to the support for my position on this legislation which has been expressed by John S. Warner, former General Counsel, Central Intelligence Agency; John M. Maury, former Legislative Counsel, Central Intelligence Agency and former Assistant Secretary of Defense for Legislative Affairs; Lawrence R. Houston, former General Counsel, Central Intelligence Agency; Walter L. Pforzheimer, former Legislative Counsel, Central Intelligence Agency; Ray S. Cline—a well known individual—former Deputy Director of Intelligence, Central Intelligence Agency; and Daniel O. Graham—Gen. Daniel O. Graham, retired—former Director of the Defense Intelligence Agency. All of those persons have expressed themselves forcefully in opposition to this legislation and in support of the position I am advancing.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Chairman, I ask my colleagues to join with me in opposition to H.R. 7308, Foreign Intelligence Surveillance Act of 1978, and in support of the McClory amendment.

On June 25 of this year, the New York Times carried a story entitled "CIA Refuses Foreign Bids For Anti-Terrorist Help." The article goes on to relate that out of fear of violating legal prohibitions against engaging in covert activities abroad, the CIA refused a request from the Italian Government for a psychiatrist trained in terrorist matters, and for sophisticated eavesdropping equipment to help deal with the Red Brigade's kidnaping of Aldo Moro. I submit that this timorous attitude has been generated by harsh and unrelenting domestic criticism of the Agency, which apparently is made without considering the effect such criticism has on the Agency's ability to function. Now it seems that the effectiveness of the CIA is severely impaired. And in this context, the result of this proposed legislation might well be to administer a coup de grace to the CIA.

It is difficult to think of a more inappropriate and misguided policy to adopt toward our Nation's intelligence agencies than that embodied in this bill, which would impose judicial processes and standards on the surveillance of the activities of foreign agents operating in this country. The measure of sound policy is that the principles which are choosen to govern action should be suited to the particular circumstances in question. A recent example of the inappropriate application of principles to circumstances, was the debate over Cuban involvement in the invasion of Zaire's Shaba Province. Critics of the administration's evidence of Cuban involvement were not persuaded because the administration's evidence was largely circumstantial. But is that not all one can reasonably expect given the difficulties of acquiring information about covert activities conducted in a faraway land? Did the critics believe we could have issued subpenas, and given the rebels court appointed counsel?

Thus we can see that the surveillance of foreign agents operating in this country, by its nature requires secrecy and speed of execution—characteristics of the executive branch of government. As Justice Robert Jackson wrote in the Court's decision in Chicago & Southern Air Lines, Inc. against Waterman Steamship Corp., the judiciary is not equipped to deal with matters concerning foreign intelligence:

> The President, both as Commander-in-Chief and as the nation's organ for foreign affairs, has available intelligence services whose reports are not and ought not to be published to the world. It would be intolerable that courts, without the relevant information, should review and perhaps nullify actions of the Executive taken on information properly held secret. Nor can courts sit in camera in order to be taken into executive confidences. But even if courts could require full disclosure, the very nature of executive decisions as to foreign policy is political, not judicial. Such decisions are wholly confined by our Constitution to the political departments of the government, Executive and Legislative. They are delicate, complex, and involve large elements of prophecy. They are and should be undertaken only by those directly responsible to the people whose welfare they advance or imperil. They are decisions of a kind for which the Judiciary has neither the aptitude, facilities nor responsibility and which has long been held to belong in the domain of political power not subject to judicial intrusion or inquiry.

Furthermore, as Justice Jackson's opinion implies, not only is this legislation inappropriate and unwise, but that it may well be unconstitutional to involve the judicial branch in matters left by the Constitution to the executive and legislative branches.

Primarily as a result of the machinations of those minions of the Kremlin, the KGB, international politics largely resembles the state of nature described by Thomas Hobbes as the "war of all against all," in which life is "nasty, brutish, and short." Faced with such an inexorable and grim necessity, prudence dictates that we resort to whatever measures are necessary to insure our own existence. The means which would be shackled by H.R. 7308 are merely defensive in nature, and thus constitute the necessary, but by no means, sufficient conditions of national survival. Is it really necessary for this Nation to unilaterally disarm its intelligence agencies? What possible principle can justify the extension of the protections of the Bill of Rights to cover the KGB?

I urge the support of the McClory amendment.

Mr. McCLORY. Mr. Chairman, I agree with the statement of the gentleman from California (Mr. LAGOMARSINO).

Mr. Chairman, I might just add that if we do involve the judiciary in this area, what we are doing is involving all three branches of Government in national security and intelligence matters, because we already have the two committees of the House and the Senate exercising extensive oversight, plus the executive. And now to involve the judiciary means that we have all branches of Government in this one area.

I want to emphasize that opposition to this legislation is certainly not in any way a partisan effort. There is strong bipartisan opposition to this legislation, as many of the Members know who have received "Dear Colleague" letters. I think one was signed by 21 Democratic Members of the House and 16 Republican Members of the House. There are strong objections to this legislation on both sides of the aisles, and there are amendments that will be offered by Members on both sides of the aisle.

One gentleman who has raised objections and made very strong statements

in the printed report of the Committee on the Judiciary and who questions some of this legislation is the gentleman from Pennsylvania (Mr. ERTEL), and I now yield to the gentleman from Pennsylvania.

Mr. ERTEL. Mr. Chairman, I thank the gentleman from Illinois (Mr. McCLORY) for yielding.

Mr. Chairman, I would like to direct a couple of questions to the gentleman.

In relation to the comments offered by the gentleman from Massachusetts (Mr. DRINAN), I note he asked: What do we do if they issue warrants lackadaisically or without purpose and easily? If warrants are issued, how do we know whether or not the courts are in fact issuing these warrants on a rather regular and routine basis without really examining them? How would we ever know that if this is a secret court.

Mr. Chairman, could the gentleman answer that question?

Mr. McCLORY. Mr. Chairman, the only way I could answer that is to say that we will continue to have our House and Senate Intelligence Committees operating, and we will continue to exercise oversight. But with respect to information that is supplied to the court, I question that we would be able to delve into the secret proceedings of the court. I think the court would have to control that, so in a way our Intelligence Committee would be further limited in oversight by whatever the court decided.

Mr. ERTEL. Mr. Chairman, would we in fact be able to go back and try to determine whether there was in fact justification based upon the written reports by the Executive to the judiciary?

Mr. McCLORY. I doubt that we could do that. However, the measure provides for the retention of records, and I assume this means the retention of records by the judge or by the court, for 10 years. That again suggests that there is very apt to be extensive litigation following the enactment of this legislation, if it ever gets enacted, because those records could be made available to a person who might suspect that he was the subject of an electronic surveillance.

As we know and as the Attorney General now knows, a judge who wants information can subject a person to all kinds of proceedings. I might say that the city of Chicago is now under a very serious attack because of an action by the ACLU to delve into the records of the intelligence activities carried on 10 years ago.

Mr. Chairman, if seems to me that getting this information into the courts' jurisdictions suggests all kinds of horrendous involvements.

Mr. MURPHY of Illinois. Mr. Chairman, will the gentleman yield on that point?

Mr. McCLORY. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. Mr. Chairman, the gentleman from Illinois (Mr. McCLORY) is on the Committee on the Judiciary in the House, and he is perfectly conversant with the Freedom of Information Act. If this were left exclusively with the executive, anyone could under the Freedom of Information Act petition for every file and every wiretapping conducted today. That is what is being done.

Furthermore, there have been suits brought against agents who conducted these surveillances, and we cannot get our counterintelligence agents to conduct surveillances today because they have no statutory protection as exists in this proposed bill.

Mr. McCLORY. I am certainly not opposed to any statutory language which would supplement the existing guidelines. As the gentleman knows, I have offered that kind of legislation, which would be as full and complete protection as would be these judicial procedures with all its faults.

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. I thank the gentleman for yielding.

If in fact a warrant is issued for a person's communications, or there is an electronic bug placed in his home and no useful national security information comes out of it in any way, shape or form, and there is no threat to national security, is there any provision in this law, as it is being proposed, to advise that individual that he has been tapped, that he has been investigated, and there may have been an entry into his residence, even after they have determined there is absolutely unwarranted invasion of his privacy?

Mr. McCLORY. Mr. Chairman, I would answer the gentleman from Pennsylvania by saying no. I know the gentleman has an amendment that he proposes to offer along that line, and I guess I would consider that subject at that time.

Mr. KASTENMEIER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the gentleman from Illinois (Mr. MURPHY), and others, have discussed the provisions of this bill quite ably. I would, however, like to put the matter in some historical context, particularly insofar as the Committee on the Judiciary is concerned.

The Judiciary Subcommittee on Courts, Civil Liberties, and the Administration of Justice began studying the issue of national security wiretapping over 4 years ago, in April 1974, when we held hearings on several bills, including a proposal to require a court order prior to any interception of oral or wire communications in national security cases.

At that time, the Assistant Attorney General, Henry Petersen, speaking for the administration, stated to the subcommittee, "Let me be very brief. We oppose these bills. That is it." During the subsequent 2-year period, Mr. Petersen and his successors, as well as intervening attorneys general, consistently opposed the concept of legislation imposing judicial restraints on national security wiretapping.

However, in 1976, President Ford announced a change in policy. He indicated a willingness to work with Congress to develop a system of court supervision of national security wiretapping. In fact, in response to his invitation for congressional input, the gentleman from Illinois (Mr. RAILSBACK), a member of my subcommittee, and myself, wrote to the President offering our cooperation and included draft language for a bill on national security surveillance. Indeed, following consultation with Members of Congress, a draft bill was introduced in the House by the gentleman from New Jersey, Chairman PETER RODINO, as H.R. 12750, the Foreign Intelligence Surveillance Act of 1976.

An identical bill was introduced in the Senate. While these bills represented a distinct departure from the former administration's long opposition to any statutory controls on foreign intelligence wiretapping, they were considerably more limited in scope than bills which earlier had been considered by our subcommittee. A broad coalition of civil liberties groups, in fact, argued that the bill simply constituted a disguised method of legitimatizing the questionable practices which had in the past been represented by warrantless wiretapping. These groups, led by the American Civil Liberties Union, pointed out that the bill did not require a showing of criminal probable cause, did not permit judicial evaluation of the facts supporting a wiretap application, and failed to eliminate all exceptions to the warrant requirement.

While our subcommittee held 3 days of hearings on H.R. 12750 in the 94th Congress, it failed to move to markup on the measure for the reason that the Senate, with which the administration had collaborated originally in developing the legislation, failed to act.

With the convening of the 95th Congress, those of us who in the past had been involved with the issue, had an opportunity to reexamine the whole question of national security wiretapping with a fresh perspective, and after consultations with the administration and Members of Congress, legislation was introduced as H.R. 7308 in the House and S. 1566 in the Senate.

In the House, a new Permanent Select Committee on Intelligence was created for the sole purpose of focusing on the legislative and oversight responsibilities necessary to assure the effective and ethical operation of our Nation's intelligence system. That committee and its legislation subcommittee, under the leadership of the gentleman from Illinois (Mr. MURPHY), immediately began consideration of H.R. 7308 and related bills on the subject of foreign intelligence surveillance.

The Subcommittee on Legislation conducted eight hearings and markup sessions, followed by additional markup, of course, in the full Intelligence Committee. In discharging its newly assigned responsibilities, the permanent Subcommittee on Intelligence did not work within a vacuum. The select committee built upon the experience of three other legislative committees, including the Judiciary Committee, all spanning a period of three Congresses. Since the Senate

committees had already completed their consideration of the legislation prior to subcommittee markup in the House, the Select Committee on Intelligence was able to begin its deliberations with an already highly developed bill, and one which, as was reported, passed the Senate by an overwhelming bipartisan vote of 95 to 1.

Furthermore, two of the three members of the Legislative Subcommittee which drafted the bulk of H.R. 7308 as it is to be considered by the House today, also serve on the House Judiciary Committee. Therefore, the special expertise which the Judiciary Committee might have brought to the legislative process was clearly utilized in the processing of this legislation by the permanent Select Committee on Intelligence.

Following the favorable report on the bill by the Intelligence Committee, our Judiciary Subcommittee began separate consideration of the measure, conducting 3 days of hearings. We heard from a number of witnesses, including Attorney General Bell, former CIA Director William Colby, former Solicitor General Robert Bork, Senator EDWARD KENNEDY of the other body; our colleagues, the gentleman from Illinois (Mr. MCCLORY), the gentleman from Illinois (Mr. MURPHY), the gentleman from Kentucky (Mr. MAZZOLI), as well as Mr. Shattuck and Mr. Jerry Berman of the American Civil Liberties Union; Dr. Morton Halperin, representing both the ACLU and the National Security Study Center.

Upon conclusion of the hearings, the subcommittee met to discuss the best course of action to take with respect to the bill, and voted to table the bill. The purpose of the tabling motion was to permit the consideration of the legislation by the Rules Committee, in essence truly freeing up the bill for possible consideration even at this late date in September, 1978, by the Committee of the Whole on the House floor.

Given the fact that the committee had already spent three sessions of Congress considering similar legislation; the further fact that the Intelligence Committee product represented, I believe, a fragile but broadly based consensus of the intelligence agencies, two Presidential administrations, and the U.S. Senate, we concluded that we would do a great disservice to our colleagues if, by further delay, we prevented early consideration of an already well-defined bill by the House. To subject the measure to full Judiciary Committee markup would be, in a large sense, duplicative and would threaten to delay the opportunity we have today for its consideration.

Clearly, H.R. 7308 as reported by the House Committee on Intelligence is meritorious legislation, and I believe deserves passage without further amendment by the House. The bill is supported, as I have indicated, by a broad coalition of individuals, legislators, Government agencies, and public interest groups. Witnesses before our committee, from the Attorney General on one side to the ACLU on the other side, favored passage of the measure, although I should say that the American Civil Liberties Union does have traditional reservations about any measure that authorizes wiretapping. But, I think even they must realize that the failure to pass this bill would literally thrust us back into the Dark Ages when we were ruled in this field by the Executive in utter secrecy.

Indeed Dr. Morton Halperin, who himself was the subject of illegal foreign intelligence wiretaps for 18 months, testified in favor of the bill as reported by the Intelligence Committee and stated at that time in testimony that:

> Efforts to regulate the activities of the Executive branch and to require a warrant, seem to me to be imperative. In my view the standards in this bill would prevent most, if not all, of the abuses which have come to light.

Of course, Dr. Halperin was speaking for the civil liberties community.

However, the Nation's intelligence community also supports the legislation and endorses the procedures recommended in the bill by the Intelligence Committee. In a letter to me dated June 22 of this year, Adm. Stansfield Turner, Director of the Central Intelligence Agency wrote:

> I support the bill because I believe it strikes a fair balance between intelligence needs and privacy interests, both of which are vitally important. In my view the legislation will place the activities with which it deals on a solid and reliable legal footing and help to build public confidence in the national intelligence collection effort and in the agencies of the Government principally engaged in that effort . . . for these reasons I strongly urge that this legislation be enacted as soon as possible.

It has now been over 6 years since the Supreme Court in the famous Keith case cast a cloud over warrantless wiretapping procedures and in that landmark decision Mr. Justice Powell, writing for the Court, specifically invited the Congress:

> . . . to consider protective standards . . . which differ from those already prescribed for specified crimes in title III . . . Different standards may be compatible with the Fourth Amendment if they are reasonable both in relation to the legitimate need of government for intelligence and the protected rights of our citizens.

Finally, after years of work by four congressional committees and two administrations, a bill has been developed which is supported by a unique historical consensus. I believe it is imperative that this consensus not be allowed to disintegrate. Therefore, I invite my colleagues not to vote against the bill. Any shift, I believe, in the delicate balance of interests represented in this measure would jeopardize its passage, and even if an amended bill were passed, its effective implementation would undoubtedly be resisted in the courts by dissatisfied individuals and interest groups.

Mr. Chairman, very few bills come to the floor of this House with the history of thoughtful and careful scrutiny and legislative drafting as is represented by this bill. I urge all Members to support it without amendment.

Mr. EDWARDS of California. Mr. Chairman, will the gentleman yield?

Mr. KASTENMEIER. I yield to the gentleman from California (Mr. EDWARDS).

Mr. EDWARDS of California. Mr. Chairman, I rise in support of this legislation, although I would have preferred that a provision had been added requiring an adversary procedure whenever application is made for a warrant. It seems clear to me that the judge would do a much better job were there a third party, someone in the nature of a public defender, whose duty it would be to represent the interests of the unknowing, absent person whose conversations were about to be listened to by the Government.

However, realistically such an amendment would have little chance of acceptance, and so I am prepared to vote for the bill as submitted.

As chairman of the Judiciary Subcommittee on Civil and Constitutional Rights I have had a duty to be uniquely aware of possible and actual encroachments of the privacy rights of American citizens. My subcommittee has reviewed the occasionally distressing history of the Federal Bureau of Investigation in this regard, and I have come to the firm conviction that all too often the Federal Government has been in the business of spying on the Nation's citizens and visitors with little or no legitimate purpose. As we are now seeing in Federal courts, these practices have apparently led to excesses that are criminal in extent. This documented history of abuse and a respect for the Constitution's sensitivity to privacy rights have led me to oppose all wiretapping as a law enforcement device and intelligence gathering tool. I am committed to a constant scrutiny of these techniques so that we may more accurately judge their effectiveness and legal justification. In the end, I suspect that the evidence will support my view that this inevitably intrusive surveillance technique is not necessary or wise.

However, I am well aware that neither the administration nor this Congress is prepared today to prohibit wiretapping for either law enforcement or intelligence gathering purposes. On the contrary, the bill which has been brought to the floor today has reached this point only after painstaking debate and compromise between the intelligence and civil liberties communities. Therefore, in a spirit of pragmatism and hope that we can make realistic, although modest, improvements in the state of the law, I support this legislation for the following reasons:

For the first time, the executive branch will be bound by statutory restrictions; no longer will a claim of inherent executive authority to conduct national security wiretapping be recognized. The rule of law will be brought to this practice.

For the first time, the law will require that a criminal standard for U.S. persons be met prior to approval of a national security wiretap on them.

For the first time, an objective third party, a Federal judge, will be required to review and approve applications for these taps, using explicit statutory standards.

For the first time, the law will require extensive minimization procedures for national security wiretaps, thus requiring that extraneous information which may be gathered incidental to a tap is destroyed.

For the first time Congressional oversight of national security wiretapping procedures will be provided by law. I can personally attest to the difficulty congressional committees and subcommittees have had in getting accurate, detailed information on the activities of the intelligence community. This requirement will be an important, substantative safeguard against the blatant abuses that have occurred in the past.

Lastly, this legislation will provide an important precedent for the crucial FBI charter legislation which my subcommittee and the Intelligence Committee will be considering next year. I consider the bill before us today to be part of an ongoing effort to return the rule of law and the resultant public respect to the Nation's intelligence community. I urge my colleagues to join me in supporting this bill.

Mr. EDWARDS of California. Mr. Chairman, I would like to ask several questions of the gentleman from Wisconsin, the distinguished chairman of the subcommittee.

Mr. Chairman, is it clear that this bill eliminates the "inherent power" of the President to electronically surveil U.S. citizens without a warrant?

Mr. KASTENMEIER. In answer to the question of my colleague, the gentleman from California (Mr. EDWARDS), I would say yes. It is very explicit in the language of the bill itself in that it repeals section 2511, subsection 3 of title 18, United States Code, which under present law constitutes that reservation.

Furthermore, the Attorney General was quite clear that he agreed with the committee report on such language. In testimony before my subcommittee, in response to this question: Does the President intend to act only pursuant to the authority granted by this legislation should it become law? the Attorney General answered, and I quote:

He made that pledge.

We agreed to take out the provision in the bill in the last Congress. The President was not waiving his inherent power to that effect. We took that out in the Senate. The President agreed to go only on the statute.

Mr. EDWARDS of California. I thank the chairman of the subcommittee.

Is it clear that this bill establishes a criminal probable cause standard for all electronic surveillance of American citizens and permanent resident aliens in the United States for foreign intelligence purposes?

Mr. KASTENMEIER. Mr. Chairman, in answer to the gentleman's question, I would say yes. Section 101(b)(2), which sets forth the definition of a foreign agent who is a U.S. person, specifically requires in addition to a showing that the individual knowingly engages in intelligence gathering on behalf of a foreign power, that he is also engaged in activities "which * * * involve or may involve a violation of the criminal statutes of the United States."

Mr. EDWARDS of California. Mr. Chairman, I thank the gentleman for his response.

Is it clear that this bill places an affirmative obligation on the attorney general to adopt procedures designed to minimize the incidental collection of information not relevant to foreign intelligence?

Mr. KASTENMEIER. Yes. Section 101(h) defining minimization procedures specifically requires the attorney general to adopt such procedures.

Mr. EDWARDS of California. Again I thank the gentleman.

My last question:

Is it clear that this bill gives the Committee on the Judiciary, as well as the Permanent Select Committee on Intelligence oversight responsibility for the conduct of electronic surveillance within the United States?

Mr. KASTENMEIER. I am pleased the gentleman asked that question.

The answer is: Yes. For the record and on behalf of the Committee on the Judiciary, let me state that the committee does and will maintain its responsibility for oversight of foreign intelligence surveillance activities and I will state personally that this is a responsibility that is taken quite seriously by the members of the committee. The Judiciary Committee has a unique expertise in this somewhat complicated legal area and we intend to continue to use that expertise, taking note of the fact that section 109 provides for a special requirement that there be a report to the Select Committee on Intelligence biannually, notwithstanding that the Committee on the Judiciary has that.

Mr. EDWARDS of California. I thank the gentleman.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. KASTENMEIER. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I would just like to make this comment with reference to the suggestion by the gentleman from California (Mr. EDWARDS) that he would prefer to have an adversary proceeding. That suggests that when we seek to gather intelligence by electronic means, primarily against a foreign agent or a foreign power, that somehow or other the foreign agent or the foreign power should be represented by counsel in court, and it would be a case or a proceeding such as you have in a contested proceeding. I just believe it is completely unthinkable that we would want to adopt that kind of system in this or any other legislation.

I have two questions with respect to the colloquy that just went on.

First, it is the gentleman's feeling that a constitutional power that is delegated or mandated to the President in the Constitution can be delegated to another branch of the Government, and that this inherent power of the President, which he has with respect to national security, can, somehow or other, by one President, be renounced and sent to another branch of the Government, such as is attempted in this case?

Mr. KASTENMEIER. In response to the inquiry of the gentleman from Illinois, first of all, let me comment and say, notwithstanding the fact that I share the idealistic views of my friend the gentleman from California (Mr. EDWARDS) that somehow the target ought to be represented in an adversary proceeding; that, obviously, the Intelligence Committee was not able to so formulate that. I know it was a matter of very considerable debate, and that does not appear in the bill.

I do not know that it would be possible to accommodate that desired end. We are not able, clearly, to do it in this bill. I think that is well understood.

On the second point the gentleman raised with regard to the President's inherent constitutional powers:

We cannot ever prevent a President from claiming an inherent constitutional authority to do something. Very often Congress has provided statutory endorsement for that type of enterprise. We have specifically declined to do that here, and we have the policy announcement that the President does not intend to exercise any inherent constitutional authority to wiretap beyond the contours or limitations of this bill.

Mr. McCLORY. If the gentleman will yield further, we could implement the constitutional authority by statute, but we could not abrogate the constitutional authority by statute.

May I just ask a question with regard to one other point, and that is the requirement for a criminal standard with regard to intelligence gathering where a United States person is involved. Is it not true that most intelligence gathering has nothing at all to do with the commission of a Federal crime; and if we are going to be limited in intelligence gathering to an allegation that a Federal crime has been committed—and I think the bill provides that a Federal crime is about to be committed or may be committed—are we not restricting about 95 percent of the intelligence gathering information which is unrelated to the commission of any Federal crime but is just information which we feel is important to our national security?

Mr. KASTENMEIER. I think it might have the effect of curtailing some rather arbitrary intelligence gathering exercises against individuals or I should say American citizens; but as the gentleman knows, many of the targets are not U.S. citizens, but are foreign powers, agencies of foreign powers, and others who are not so protected within this bill. Those, I would suggest to the gentleman, are likely to be the principal targets, and U.S. citizens would less likely be the targets by virtue of this standard.

Mr. MURPHY of Illinois. Mr. Chairman, will the gentleman yield?

Mr. KASTENMEIER. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. Mr. Chairman, I would like to state that that particular standard was the suggestion of the FBI, the Federal Bureau of Investigation. It was they whom we consulted when we drafted this provision, and they were positively satisfied with it.

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. KASTENMEIER. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. Mr. Chairman, I would like to ask the gentleman from Wisconsin (Mr. KASTENMEIER) a couple of questions. I know he is a distinguished lawyer and also a constitutional lawyer, but, under this bill, since we have a secret court, and there does not seem to be any provision here for transferring an opinion from one phase of that court to another, nor is there a written opinion required or it does not appear from this bill that there should be or will be, therefore, there is no stare decisis, so I ask the gentleman whether he would agree that they will just issue orders; there is no written opinion, no stare decisis, no case law developed within this court; is that correct?

Mr. KASTENMEIER. I am inclined to agree with the gentleman's observations.

Mr. ERTEL. Then I would ask the gentleman, and this is not, obviously, the Judiciary's report, but in a statement of need, under section 2 of the Intelligence Committee's report, one of the basic needs they outline is the need for consistent case law to be developed. How do we answer that need when, in fact, the legislation prevents the development of case law? There is no report, no decision; there is no stare decisis; but yet the report states that one of the needs of this legislation is to have consistency. This is a catch 22 situation, it seems.

Mr. KASTENMEIER. I cannot answer fully for the Committee on Intelligence. In that respect I assume that what is meant is rather than relying on printed decisions, which do not exist here, that the control of the consistency occurs, in fact, because we have a special court and a special court of appeals. Therefore, we do have an interrelationship between these bodies as far as trying to establish some uniformity with respect to decisionmaking as to warrant applications is concerned; and certainly this will, I think, very practically evolve. Also, the existence of a clear statute will eliminate much of the current legal debate.

Furthermore, the special court and the special court of appeals created by this legislation will have to arrive at their own rules and procedures in connection with many of the practices that they are going to have to follow which are not specifically provided for in the legislation and, indeed, I would suggest ought not to be provided.

Mr. ERTEL. If I may follow a bit further on that, if they are going to try to develop case law, and the exact thrust of this is not to develop case law, I think it is a Catch 22. But if I may make one other point, I would like to read a section on page 21 of the committee report and then I want to ask the gentleman a question, if I might.

> Finally, the decision as to the standards governing when and how foreign intelligence electronic surveillances should be conducted is and should be a political decision, in the best sense of the term, because it involves the weighing of important public policy concerns—civil liberties and the national security. Such a political decision is one properly made by the political branches of Government together, not adopted by one branch on its own and with no regard for the other.

It seems to me that is the exact antithesis of our form of government. We have three separate and distinct branches of Government. The judiciary is separate and distinct and should not be involved in the political decisions. Does that kind of statement, that kind of language, square with our constitutional form of government?

Mr. KASTENMEIER. If I may answer the gentleman, I think the term "political" as used by the committee in its report is not meant in that fashion. The context in which it is used refers to the sort of policy exercised by the courts that it traditionally has been, whether one uses the word "political" or anything else with respect to policy. I must honestly say that I think the bill does appropriately involve all three branches of our Government. This involvement recognizes that in fact we do face and have faced a crisis in confidence in our intelligence agencies. We do provide here a significant role for the Congress, both in the writing of this legislation and in the oversight which will follow. We are no longer relying on the secret operations of the executive branch in and of itself. We are not relying on them for policing themselves. This is where the committee and all the others who have recommended this legislation essentially differ from the gentleman from Illinois (Mr. MCCLORY) who conscientiously believes that the executive branch ought to itself police its own abuses. This bill suggests a wider sharing of responsibility for that. As I understand the subcommittee's language in broad context, it is appropriate for that purpose.

Mr. ERTEL. If the gentleman would yield further, is the gentleman assuring me this is constitutional, the way it is drafted, inasmuch as the court has the obligation under the bill to modify any order, by requiring the court to establish the minimization proceedings, does the court not wind up with the Executive negotiating with the Judiciary on the order? Do we want to do this? In the minimization proceedings which the court must consider and may change, does not the court get into a negotiating position with the Executive is without any adversary, and does not have a case or controversy under the Constitution? This is a negotiating proceeding. I suggest we should not do it in this manner. Are we not making the courts draft the guidelines how the surveillance is going to be conducted? Are they not then the experts in foreign policy? Does that not give the gentleman concern as to the implications for our judicial system.

Mr. KASTENMEIER. If I may respond further to my friend, that, may I say, reflects a general concern we have with the courts, in fact, and we feel they ought not be engaging in "negotiations."

I would not accept that word as describing the role of the courts in considering applications made. It seems to me the proper role of the court is to deny applications when they are inappropriate or when the procedures are inadequate, and then it is up to the executive branch to make a reapplication. This is the sort of thing that takes place all the time.

We had a bill here on the floor, as the gentleman knows, because he and I both worked on it—and that is H.R. 9400—where we have the Federal courts involved in issuing extensive orders to public institutions in America which have been guilty of abuses. That is a far greater involvement of the Federal judiciary in the affairs of our country than is proposed here. Such orders are more than negotiations, and the courts in those instances are actually said to be running institutions. I would not describe those acts as negotiations.

It is true that the courts will require standards, and the applications and procedures will have to meet those standards. Otherwise the special courts here will reject them. I would not consider that "negotiations." The gentleman may, of course, so construe it in that fashion if he wishes.

Mr. MCCLORY. Mr. Chairman, will the gentleman yield?

Mr. KASTENMEIER. I yield to the gentleman from Illinois.

Mr. MCCLORY. Mr. Chairman, the gentleman made reference to the fact that my perception of this operation is that the Executive should police his own abuses, and I want to emphasize or reemphasize my strong support of the House and Senate Intelligence Committees and their exercise of oversight.

I do feel that the Executive should have accountability, and I question that accountability will be as strict or as sure as it should be if we repose authority in the judiciary or in this special court to pass upon applications which provide very, very limited information, because it seems to me we will be eliminating a high percentage of accountability from the Executive by providing an excuse for abuses that otherwise the Executive would be held accountable for.

The gentleman made one other mention, and that was with respect to the retention, as I understood it, of a certain inherent constitutional power in the President regardless of the enactment of statutory authority for the judiciary to grant warrants with regard to foreign intelligence surveillance. I would like to call the gentleman's attention to the fact that on page 67 of the bill we are now considering, it is stated specifically that the procedures of title III of the 1968 act and of the Foreign Intelligence Surveillance Act of 1978, "shall be the exclusive means by which electronic surveillance, as defined in section 101 of such act, and the interception of domestic wire and oral communications may be conducted."

In other words, what the legislation provides is that the President is deprived of his inherent constitutional authority. Instead, that authority is reposed exclusively under this legislation in the judiciary with regard to the decisionmaking on whether or not electronic surveillance should or should not be undertaken.

Mr. KASTENMEIER. Mr. Chairman, the gentleman from Illinois (Mr. MCCLORY) is correct. In the first instance, I accept his characterization of his own plan.

I must say that congressional oversight alone, which has been exercised for many, many years, is not, I think, sufficient totally for the reestablishment of confidence in our intelligence gathering.

As a matter of fact, the question I asked the Attorney General was predicated on a quotation of the subcommittee's language, with which the President and the Attorney General agreed, and as far as any expression in law is concerned, this bill will be the sole repository of authority to conduct intelligence surveillance of this character.

Subsequently, some President may state that he has inherent constitutional authority to do otherwise, but that President will have to assert so, and that President will probably have to be tested in the highest courts as to whether he indeed did exercise an inherent constitutional power. The Congress will not by virtue of this statute have yielded that power to him, and that is what is involved here.

Mr. McCLORY. Mr. Chairman, will the gentleman yield further?

Mr. KASTENMEIER. Yes, I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, may I ask, would it not be preferable to put language like that in the bill by way of amendment? For instance, would it not be well to insert language in the bill stating that there would be an exemption from this judicial warrant requirement in case of war or something of that nature?

Mr. KASTENMEIER. In answer to the gentleman's question, I would say, absolutely not. That is the whole purpose of this. The purpose of this bill is to set up a procedure where all this country, its citizens, its intelligence community, and its President know what the rules of the game are.

And to do anything else I think would be a mistake. I support the subcommittee entirely in this connection.

---

Mr. BUTLER. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio (Mr. ASHBROOK), a member of the full committee.

Mr. ASHBROOK. Mr. Chairman, first, I would like to say that we have had several unique arguments here.

Page 101 of the report indicates that section 201(c) would repeal 18 United States Code, section 2511(3), which states that nothing in chapter 119 or section 605 of the Communications Act of 1934 shall limit the constitutional power of the President to gather necessary intelligence to protect the national security.

This report goes on to say that the Keith case held that the Congress was not really taking anything from or adding anything to the President's power, just "merely provided that it shall not be interpreted to limit or disturb such power as the President may have under the Constitution. In short, Congress simply left Presidential powers where it found them."

Judging from the last colloquy, there are a number of Members of this body who think that we can take that constitutional power of the President, the inherent power of the President, and alter or limit it by a statute. Clearly what we are doing, as was pointed out by my colleague, the gentleman from Illinois (Mr. McCLORY), is to delete the statement of the Congress in the 1968 Omnibus Crime Act, by language on page 67 which cleverly states that exclusive means for electronic surveillance shall be those that are in this particular statute. This effectively removes the language in section 2511(c).

I do not think we can take away the inherent power of the President. If President Carter wants to say, for his short time in office, that he is not going to use the powers, that is fine. But I do not think President Carter can limit what a future President does under the proper constitutional prerogatives of that future President. To try to end run this issue is, I think, not only bad policy, but may very well be unconstitutional.

Every Federal judicial circuit which has had cause to rule on the issue has held that the President has constitutional power to order warrantless electronic surveillance to gather foreign intelligence information. That is, the third, fifth, and ninth circuits. This was also recognized in the recent Humphrey-Truong spy case.

Before Judge Bell became Politician Bell, this is what he said, as a judge on the Fifth Circuit Court of Appeals:

> Because of the President's constitutional duty to act for the United States in the field of foreign relations, and his inherent power to protect national security in the context of foreign affairs . . . The President may constitutionally authorize warrantless wiretaps for the purpose of gathering foreign intelligence information. Restrictions upon the President's power which are appropriate in cases of domestic security become artificial in the context of the international sphere.

As I said, that was before Judge Bell became Politician Bell.

The second thing I would like to point out is that my friend and colleague, the gentleman from Wisconsin, indicated there was a unique coalition here. Well, I think it is a unique coalition. The only thing unique about it is the way you define "coalition." It reminds me of the columnist, Dorothy Thompson, who, some 30 years ago, referring to a lover of a great writer—I will not mention his name—and indicated that his emotions ran the alphabetical gambit from A to C. That is about the way this coalition runs. It is a coalition running the alphabetical spectrum from A to C. Mr. Halperin's group, and groups of that type, run the philosophical gambit from about A to C. Where are the other 23 letters of the alphabet? We have not heard anybody mention the American Legion, American Security Council, Veterans of Foreign Wars, broad-based groups which have millions of members. Oh, no. You take a little narrow group, which has worked together on this bill, and say that they represent a broad consensus. Unique maybe, a consensus, no.

Well, the thing that is unique is to call it a consensus, because they started out in the same place and ended up in the same place. So, there really was not any consensus. Nobody has talked about the former FBI agents. The Society of Former FBI Agents is opposed to the overreach of this legislation. The Association of Former Intelligence Officers—CIA—opposes this bill. The only people who are for this bill are the administration people who, as in most administrations, are under the iron heel of administration policy. They dutifully come forward and say, "Yes, we support this legislation."

No former director of the CIA supports it. None of the down in the ranks officers who have worked in the field—and I have talked to hundreds of them—support it. I know of not one FBI agent who supports it.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. BUTLER. Mr. Chairman, I yield 3 additional minutes to the gentleman from Ohio.

Mr. ASHBROOK. No former FBI agent supports it; no former CIA agent who had the responsibility out in the field, who came before our committee, who wrote or communicated to many of us, said, "I favor this legislation."

So, when we are talking about a unique coalition, a unique consensus, we are not really talking about that. We are talking about a unique definition of coalition and consensus because it is basically outside of this Congress—I do not point the finger at Members of this Congress—but my main complaint is that H.R. 7308 has largely been written by people outside this Congress, and largely by the anti-intelligence clique which is a part of this so-called unique consensus.

These are many amendments which should be offered. I will offer a number myself. I will support the amendments offered by my colleague, the hardworking and able gentleman from Illinois (Mr. McCLORY). I would hope that we could amend this bill so, that it would be something that would help rather than hinder the intelligence gathering operations of this country.

The bill before us today is the product of considerable work and effort by a large number of people in and out of government. These range from administration officials and former intelligence officers to spokesmen for anti-intelligence groups that wish to dismantle our intelligence gathering ability. The House Permanent Select Committee on Intelligence and its dedicated staff have taken all of the views into consideration in reporting out this bill.

The basic issue in H.R. 7308 is to what extent it limits intelligence gathering, and to what extent it authorizes it. My concern is that too much attention has been paid to those who would limit our intelligence gathering ability. While protecting the rights of Americans, we should not confer these rights on foreign agents. Even Vice President MONDALE when he was in the Senate, said:

> As far as I am concerned, foreign spies in this country should have no rights. Probably that is a little crudely put, but a KGB agent and so on—I shouldn't say it—I could care less how we proceed to get information from them or influence their behavior while they are in this country. What I am worried about is the application of these activities and their effect on American citizens. That is what I

am talking about. (Testimony before the Senate Intelligence Committee, June 29, 1976, p. 69.)

I have a number of concerns about this bill. One of the main issues is the introduction of the courts into the intelligence gathering process. There is clearly some security risk as a result of more people having access to the information, despite the support given to the bill by the leadership of the intelligence community. Some of those leaders, who support the bill, have indicated that they do so as part of the administration team or that they can "live with the bill." On the other hand, working level members of the intelligence community have major problems with H.R. 7308.

H.R. 13442 introduced by the gentleman from Illinois (Mr. McCLORY) would solve the problem of the courts. This is a major constitutional problem. Although the congressional proponents of the bill argue that it takes no position on whether the President has the inherent power to conduct national security wiretaps. Common Cause, an active supporter of H.R. 7308 argues that the bill—

Eliminates once and for all the doctrine that the Executive Branch has inherent power to conduct national security wiretaps. (Letter to all Members of Congress, August 7, 1978.)

There are other problems as well. For example, the bill would provide criminal penalties for FBI agents who violate the minimization procedures. Certainly, an administrative punishment would be sufficient. What a contradiction. The anti-intelligence extremists want to be able to jail FBI agents while those who collaborate with hostile foreign governments could not even be surveilled. We must make sure that this bill does not accommodate either of these desires. It should instead set standards for the intelligence gathering so vital to our national security.

This legislation has been referred to as a bellweather for future restrictions on the intelligence community. A bill proposed by the ACLU and other extremist groups such as the Committee for Public Justice and the Center for National Security Studies would require warrants for informants and undercover agents. The proposed bill is aptly titled "A Law to Control the FBI." A warrant for informants and undercover agents is the ridiculous but logical continuation of a requirement for a warrant to electronically surveil a foreign embassy or agent.

Let us take a real case, and see what this bill would do. On July 16, 1978, Kristina Berster, a member of the Baader-Meinhof terrorist gang, was apprehended trying to cross the U.S. border from Canada. She was in possession of a stolen and altered Iranian passport.

Investigation revealed that she had been in close association with three other people while in Canada. These people all claimed to be U.S. persons. They are now under indictment.

Under this bill, neither the individuals nor the groups could have been electronically surveilled even with a warrant. The Attorney General would have had to prove to a judge that each of these persons, "knowingly engages in sabotage or international terrorism, or activities that are in preparation therefor, for or on behalf of a foreign power." The group could have been targeted as "a faction of a foreign nation" only if it was "not substantially composed of United States persons"—something difficult if not impossible to prove.

The purpose of the surveillance would have been to determine if these people were involved with the Baader-Meinhof terrorist, Kristina Berster in planned terrorism in the United States. Under H.R. 7308 they could not have been electronically surveilled to obtain this information.

I have amendments to propose to this bill, and I will support amendments that will be introduced by some of our colleagues.

The House Permanent Select Committee on Intelligence has already amended this bill. A significant amendment which was passed by voice vote by the committee was one which I had proposed. This amendment added the word "member" to the definition of agent of a foreign power. Just as some "foreign powers" have employees, others such as terrorist groups or foreign based political organizations have members. Of course not every foreigner who falls under this definition would be surveilled, but it would be possible to do so if necessary.

It will be a difficult job, but this Congress should pass a bill that will authorize intelligence gathering against hostile foreign powers and terrorists, without violating the rights of the American people. That is the kind of bill that I could support. I ask my colleagues to join with me in amending H.R. 7308 so that it is consistent with the needs of this country and its people. The first duty of the Congress is to provide for the safety and security of the American people against their enemies, both foreign and domestic. A bill that does less than that does not deserve our support.

Mr. MURPHY of Illinois. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. Mr. Chairman, I would just like to indicate one organization which supports this bill, the American Bar Association. Will the gentleman concede that it is a broad-based organization?

Mr. ASHBROOK. It is at least broad.

Mr. MURPHY of Illinois. As a member of the Pike committee, I had before me at that time former members of the CIA. When we asked them why the abuses occurred they said, "We had nobody to go to. There was no statutory standard by which we could refuse an executive who was requesting and ordering us to engage in improper activities."

Mr. ASHBROOK. I agree with the gentleman 100 percent. I agree that they need a charter. I must observe that the charter should be enacted before we come along with this bill, but I doubt if my colleague, who is a very honest and very able colleague, could say that they supported the provisions in this bill.

Mr. MURPHY of Illinois. The gentleman was also present in our hearings when we discussed the FBI, and the Attorney General said that agents were hesitant to go into the field today and conduct needed intelligence surveillances because they were being sued all over the United States, including himself, the Attorney General. They needed some statutory protection in this matter, and this is what this bill gives them.

Mr. ASHBROOK. This bill gives them that and a lot more.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I would say that certainly we should provide the FBI with statutory protection, but to create a new special court to divest the executive of responsibility and accountability in this area in order to protect FBI agents seems to me to be an overreaction. What we should do is provide further protection through legislation. We do provide it in the substitute bill I have offered, but not through this mechanism.

The CHAIRMAN. The time of the gentleman from Ohio has again expired.

Mr. BUTLER. Mr. Chairman, I yield 1 additional minute to the gentleman from Ohio.

Mr. McCLORY. I would like to point out that I saw this letter from the president of the American Bar Association. I do not know what kind of survey of the members of the American Bar Association was made. I will say that this bill before us now is substantially different from the bill that was over in the Senate. It is a far reach from the legislation just considered in the subcommittee headed by Mr. KASTENMEIER 2 or 3 years ago, at which time they considered mass coverage and all kinds of other subjects; so that it seems to me that that kind of a statement must be a statement which is not based on knowledge of what this legislation undertakes to do, or what it provides.

Mr. ASHBROOK. I thank my colleague, and I agree with him completely.

Mr. BUTLER. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, I think the points which I would have made in my formal statement have been covered very well by the gentleman from Ohio (Mr. ASHBROOK) and the gentleman from Illinois (Mr. McCLORY), as well as the other Members who have spoken. So, at the risk of repeating myself or repeating what has been said, I will not return to those points except to say that I share the reservations about the constitutionality of what we are about to undertake.

But one thing that has not been touched on is a matter which I would like to mention, because it did come up in the Senate debate.

H.R. 7308 represents a bill that may well prove unconstitutional, while at the same time severely undermine and endanger the Nation's security. Moreover, the bill, in light of recent events, is un-

necessary and a prime example of congressional overkill.

My principal concern is that the bill raises serious constitutional questions, in that it may violate article II of the Constitution. H.R. 7308 denies the existence of any inherent authority on the part of the Executive to conduct warrantless electronic surveillance by vesting Federal courts with the jurisdiction to authorize—or to refuse to authorize, through a warrant procedure, foreign intelligence gathering activities. In Presidential power to conduct foreign intelligence surveillance arises under the President's article II powers as Commander in Chief of the Armed Forces of this country and as the officer primarily responsible for the conduct of our foreign affairs. This Executive power to conduct warrantless electronic surveillance for foreign intelligence purposes has been asserted by every President at least since Franklin D. Roosevelt.

The judicial warrant approach in the administration's bill is premised on the proposition that the fourth amendment to the Constitution presumptively requires a warrant for every search. The underlying reasoning for this assertion is the Supreme Court's holding in the Keith case, where it ruled that a warrant is required for electronic surveillance employed for domestic security purposes. However, the warrant requirement in the Keith case was limited to domestic security cases, as the Court made it clear that they were in no way addressing the issues involved in foreign intelligence electronic surveillance. By the same token, the circuit courts that have considered the issue of the inherent constitutional right of the President to authorize warrantless electronic surveillance have held that such power does exist.

Coupled with the judicial recognition of the inherent power of the President to authorize warrantless electronic surveillance, is the fact that there is no existing case authority for vesting the Federal courts with jurisdiction to authorize or refuse to authorize foreign intelligence gathering activities as proposed in H.R. 7308. The U.S. Supreme Court rejects such authority in *Chicago & Southern Air Lines Inc.* v. *Waterman Steamship Corp.*, 333 U.S. 103, 111 (1948) holding:

. . . It would be intolerable that courts, without the relevant information should review and perhaps nullify actions of the Executive taken on information properly held secret. Nor can courts sit in camera in order to be taken into executive confidences. But even if courts could require full disclosure, the very nature of executive decisions as to foreign policy is political, not judicial. Such decisions are wholly confided by our Constitution to the political departments of the Government, Executive and Legislative. They are delicate, complex, and involve large elements of prophecy. They are and should be undertaken only by those directly responsible to the people whose welfare they advance or imperil. They are decisions of a kind for which the Judiciary has neither aptitude, facilities nor responsibility and which has long been held to belong in the domain of political power not subject to judicial intrusion or inquiry.

The constitutionally questionable provisions of HR. 7308 culminate for the express purpose of protecting the privacy of Americans against their own intelligence agencies. This bill comes at a time when the Soviet Union and other hostile foreign governments are enjoying increased opportunities for espionage in this country. During the Senate debate of S. 1566, Senator MOYNIHAN stated that—

I would not be surprised if upwards of one million American citizens were, at this moment, having their telephone calls listened to by the KGB, the committee of state security of the Soviet Union. They are overheard by receivers on the top of the Soviet Embassy here in Washington.

A new Soviet Embassy soon to be built on a hill in Washington will, for this purpose no doubt, be even better situated for the interception of the telephone calls of anyone on this floor, or in the gallery, or who will read this Record. . . .

Given this present state of events, I believe the proper focus of legislation should be in the direction of protecting the American people and our country from the espionage activities of foreign governments. Instead, we will be unduly restricting our foreign intelligence capabilities by this bill, and as a result, needlessly subjecting the American people to the increasing espionage activities of foreign intelligence agencies.

Closely alined with the fact that we should be legislating to protect the American people from foreign intelligence operations, is the fact that H.R. 7308 ignores the experience of the past few years under Executive orders issued by Presidents Ford and Carter.

The guidelines contained in the Executive orders have, according to all the evidence, rendered the gathering of foreign intelligence by U.S officials abuse-free. This given situation further illustrates that there is no need for H.R. 7308. Accordingly, I urge my colleagues to reject H.R. 7308.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. BUTLER. I yield to the gentleman from Illinois (Mr. McCLORY).

Mr. McCLORY. Mr. Chairman, I would point out I think it is important that we have legislation which spells out in statutory form the very explicit and very appropriate guidelines that are contained in the Executive orders of former President Ford and now President Carter, and that this kind of control is extremely important and we should retain congressional oversight, as we do retain substantial congressional oversight in the Senate and House Intelligence Committees.

But by establishing a special court and involving the Judiciary is unique. As a matter of fact, it is unique in the world. There is no other nation in the world that imposes a restriction on the Executive such that there is here of transferring to the Judiciary the decision as to whether or not electronic surveillance should or should not take place.

So it seems to me what we are proposing to do here, we are doing not only to ourselves but also with respect to our surveillance of foreign agents and foreign powers in our country, something that no other country imposes on itself with respect to its own citizens or with respect to the electronic surveillance of others.

Mr. MURPHY of Illinois. Mr. Chairman, I yield 5 minutes to the gentleman from Kentucky (Mr. MAZZOLI).

Mr. MAZZOLI. Mr. Chairman, I thank my chairman, the gentleman from Illinois (Mr. MURPHY), for yielding me this time.

Mr. Chairman, first of all I would like to bring to the attention of the committee the fact that in this morning's paper, the Washington Post, there was, I think, a very appropriate and solid editorial in behalf of passage of the bill before this body, and I would like to read the last paragraph, because I think it succinctly states the case:

The proposed legislation—

Which, of course, is the legislation that is now before us, H.R. 7308—

would put a stop to abuses—

And that refers to abuses of electronic surveillance—

of that kind without hampering legitimate national security investigations. It would simply put an impartial arbitrator—in the person of a judge—between every citizen's privacy and the desire of the government to penetrate it. That would not be a new role for Federal judges; they serve constantly as buffers between the government and the individual. But it would provide a new kind of protection that events of the recent past have shown is sorely needed.

I think that is an important editorial.

Also, Mr. Chairman, I would like to mention that on June 29, the New York Times—which was still publishing then—had an editorial in behalf of H.R. 7308 which was, at that time, before the subcommittee chaired by the gentleman from Wisconsin (Mr. KASTENMEIER). In the Times editorial it was stated that this bill, notwithstanding its problems, was still an important bill which should pass. The case is succinctly stated in the final paragraph of that editorial:

The Foreign Intelligence Surveillance Act is a wise solution to a problem that for years looked politically impossible to solve. To lose it now would turn a potential model of legislation into a travesty of the legislative process.

Mr. Chairman, I would like to make one comment. It was discussed earlier in the debate between the gentleman from Illinois (Mr. McCLORY), the gentleman from Wisconsin (Mr. KASTENMEIER), and the gentleman from Pennsylvania (Mr. ERTEL) that the President does possess a unique power, an inherent power to conduct foreign intelligence wiretapping, and that there is no way that the Congress can limit this constitutional power.

I think that the gentleman from Wisconsin (Mr. KASTENMEIER) in his discussion with the gentleman from California (Mr. EDWARDS) described the reason why Congress can, indeed, circumscribe that power.

But I think that the Committee on Intelligence, in its report on page 18, and the pages which ensue, is also worth reading. It shows that no holding of the Supreme Court has confirmed that the President has this inherent power to wiretap. The Keith case just simply

passed on that point and left the final determination to another day and another court. And so, without a specific holding, I think this is certainly an opportune time to legislate on the issue of a President's inherent right to electronically surveil.

And as the gentleman from Wisconsin (Mr. KASTENMEIER) said, if there is a future President who orders a wiretap without a specific court order, that President would be walking in the face of what this Congress will have said is the proper mode of conduct. This certainly guarantees that there will be a challenge taken to the highest court in the land.

So, Mr. Chairman. I think it would serve the Members well to read pages 18, 19, and 20 of the Intelligence Committee's report. I think they are very instructive on this point.

Mr. Chairman, I would like to also mention something that I believe the gentleman from Pennsylvania (Mr. ERTEL) brought up.

Let me say first that the gentleman from Pennsylvania (Mr. ERTEL) has been a valuable member of the House Committee on the Judiciary, in his first term, and was also a contributing member in the subcommittee during its deliberations on this bill.

The gentleman from Pennsylvania (Mr. ERTEL) brought up the fact that the special courts would not be writing any decisions and, therefore, there would be nothing for this House nor for these two Intelligence Committees to be looking into to evaluate the actions of the warrant procedure.

But, if the gentleman would refer to pages 95 and 96 of the Intelligence Committee report, which discusses section 108 of the bill, the gentleman would be reasonably satisfied the Intelligence Committee, the committee chaired by my friend the gentleman from Massachusetts (Mr. BOLAND) has unequivocably stated its intention and, indeed, its determination, to play a very intimate role in the future unfolding actions of the special courts.

I would especially, as a matter of fact refer to page 95 of the committee report.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MURPHY of Illinois. Mr. Chairman, I yield 1 additional minute to the gentleman from Kentucky (Mr. MAZZOLI).

Mr. MAZZOLI. Mr. Chairman, I thank the gentleman for yielding.

I think the second full paragraph on page 96, is important. It states:

As interpreted by the committee, the word "fully" means—

And that "fully" refers, of course, to full information—

that the committee must be given enough information to understand the activities of—

And then, with some words deleted—

of all electronic surveillances. To preserve the Intelligence Committee's right to seek further information, when necessary, section 108 makes clear that nothing in this title shall be deemed to limit the authority of those committees to obtain such additional information as they may need to carry out their respective functions and duties.

Mr. Chairman, I would like to assure the gentleman from Pennsylvania (Mr. ERTEL) that if the gentleman from Kentucky remains on the Committee on Intelligence, I certainly would be determined to seek from these special courts the kind of full information which would give us a chance to develop exactly how they are functioning under the law.

Mr. ERTEL. Mr. Chairman, if the gentleman will recall the colloquy, there is no written opinion by a court; there are no opinions which are recorded for the next court to consider the next case. There is no stare decisis.

Does the gentleman suggest that there are going to be written opinions to provide for stare decisis?

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. MAZZOLI) has expired.

Mr. MURPHY of Illinois. Mr. Chairman, I yield 1 additional minute to the gentleman from Kentucky (Mr. MAZZOLI).

Mr. FOWLER. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Georgia.

Mr. FOWLER. In response to the continued questions of the gentleman from Pennsylvania (Mr. ERTEL), under the special court provision of this legislation, section 103 on pages 41 and 42 of the bill, may I read specifically subsection (e), beginning on line 21, as follows:

Proceedings under this title shall be conducted as expeditiously as possible. If any application to the Special Court is denied, the court shall record the reasons for that denial, and the reasons for that denial shall, upon the motion of the party to whom the application was denied, be transmitted under seal to the Special Court of Appeals.

And then subsection (f) says the following:

Decisions of the Special Court of Appeals shall be subject to review by the Supreme Court of the United States in the same manner as a judgment of a United States court of appeals as provided in section 1254 of title 28, United States Code, except that the Supreme Court may adopt special procedures with respect to security appropriate to the case.

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. MAZZOLI) has again expired.

Mr. MURPHY of Illinois. Mr. Chairman, I yield 1 additional minute to the gentleman from Kentucky (Mr. MAZZOLI).

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. Mr. Chairman, that provision only applies to a denial of an application. If there is a granting of the application, there is no written opinion stating why there is a granting of an order. There is no setting out of the standards which apply.

It only says, "I deny this because, one, I do not find that there is a sufficient evidence, period." That is it.

When an order is granted, the court says, "Here it is," and the reasoning and the standards are not set out.

The bill does not provide for that in any way, shape, or form.

Mr. MAZZOLI. I think the gentleman is going to find that the actual practice will be what the gentleman from Georgia (Mr. FOWLER) has suggested. The gentleman from Kentucky and the gentleman from Georgia, to the extent we remain on the Intelligence Committee, we will attempt to see that this special court does not become either a rubber stamp or an impediment.

Mr. ERTEL. Is the gentleman suggesting that he can demand from the court written opinions be provided to a legislative committee, thereby interfering with the Judiciary?

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. MAZZOLI) has again expired.

Mr. MURPHY of Illinois. Mr. Chairman, I yield 1 additional minute to the gentleman from Kentucky (Mr. MAZZOLI).

Mr. MAZZOLI. Mr. Chairman, I again say that I support H.R. 7308, the Foreign Intelligence Surveillance Act of 1978.

This uniquely important—and much needed—legislation was first proposed by President Gerald Ford and Attorney General Levi in 1975. It is supported with equal vigor by President Jimmy Carter and Attorney General Bell.

It has been the subject of lengthy hearings and careful study by several Senate and House committees, including two committees on which I am honored to serve—the House Intelligence and Judiciary Committees.

Drawing on this detailed record, the House Intelligence Committee, ably led by Chairman BOLAND and Chairman MURPHY, spent many hours subjecting each of the bill's provisions to searching scrutiny. Our committee heard from all interested parties.

This is as it should be. There are no issues of more basic importance to our country than those involving the national security and individual civil liberties.

The bill before you, then, is, in my opinion, a product of mature reflection and reasoned deliberation.

As reported by the Intelligence Committee, H.R. 7308—except in three narrowly defined circumstances, not likely to involve U.S. persons—would require a judicial warrant for all electronic surveillance conducted in the United States for foreign intelligence purposes.

Under H.R. 7308, surveillance could be undertaken only to collect foreign intelligence information and could be targeted only against foreign powers or agents of a foreign power. Both "foreign power" and "agent of a foreign power" are terms carefully defined in the bill.

A U.S. person—a term also carefully defined in H.R. 7308—can be considered an agent of a foreign power only if he engages in certain activities on behalf of a foreign power which involve or may involve criminal acts.

To further protect U.S. persons, the bill requires a judge to approve procedures to minimize the acquisition, retention, and dissemination of information about a U.S. person which is collected as incidental result of foreign intelligence surveillance.

H.R. 7308 establishes a national policy that a judicial warrant authorizing foreign intelligence electronic surveillance is the proper means to insure that the rights of all persons involved are protected while, at the same time, legitimate foreign intelligence activities are not impeded.

Over the years, foreign intelligence electronic surveillances have been conducted at the discretion of executive branch officials. As this House is all too aware, this arrangement has not prevented serious abuse from occurring.

It has been argued that all of these abuses, though unfortunate and indefensible, are now past history. It is further argued that the current guidelines imposed by former Attorney General Levi and refined by Attorney General Bell effectively preclude any recurrence of past abuses.

And so, this argument goes, there is no need to establish a procedure calling for issuance of a judicial warrant before a foreign intelligence electronic surveillance can take place.

The short answer here—in behalf of the warrant approach—is that administrations come, and administrations go. Guidelines are written and they are revoked. The Department of Justice may not always be led by men and women of character and integrity who are dedicated to the preservation of fourth amendment rights.

The American people—for good reason—have over the years been skeptical about the commitment of the executive branch of Government to honor their individual liberties and personal rights. By contrast, the people have demonstrated a strong faith in the ability and willingness of the judicial branch to protect these cherished rights.

The American people, in my judgment, will more readily support a national program or foreign intelligence electronic surveillance if they know that no surveillance can take place unless a neutral, detached magistrate has studied the case and found that the detailed statutory standards for a surveillance have been met.

H.R. 7308 does not protect non-U.S. persons and foreign agents from intelligence surveillances conducted in the United States. Nor does this warrant protection impede necessary intelligence gathering activities.

H.R. 7308 carefully distinguishes between surveillances. It requires that the judge make fewer specific findings and receive less information from those officials requesting the warrant in the former case than in the later cases.

Others of our colleagues, Mr. Chairman, have argued against the warrant requirement saying it would lead to a wholesale intrusion of the judiciary into the day-to-day operation of the intelligence agencies.

With all due respect, this is simply not the case.

As H.R. 7308 and the committee report accompanying it make abundantly clear, the judges of the special court established to hear applications for foreign intelligence electronic surveillance warrants will be engaged in a traditional judicial function: Examining a set of facts against a statutory framework and then deciding whether the law allows or disallows the action sought.

No special expertise in intelligence matters is expected or required of the special court. Furthermore, no lawful intelligence activities will be endangered by leaks under H.R. 7308.

Some of our colleagues, in opposing H.R. 7308, profess to favor a warrant requirement where a U.S. citizen is the subject of an electronic surveillance, but to oppose such a warrant where non-American citizens, diplomats, foreign embassies, and the like are targeted for a foreign intelligence surveillance.

Mr. Chairman, I suggest that these colleagues read the report of the Church committee. This report is replete with instances where U.S. Presidents—of both party affiliations—have used embassy surveillances as a pretext to acquire political and personal information about U.S. citizens.

The judicial warrant requirement established in H.R. 7308 insures that any future foreign embassy surveillance will be only for the purpose of obtaining foreign intelligence information necessary to the security of our Nation.

Furthermore, the judge, before issuing the warrant authorizing a surveillance, has to review and approve proposed minimization procedures. These are procedures designed to minimize the likelihood that conversations of U.S. persons will be intercepted. If they are intercepted, the minimization procedures assure that such information will be utilized for no other purpose than for its foreign intelligence mission.

Under H.R. 7308, individual intelligence agents will know to the letter what is required of them. They will know that what they do pursuant to a warrant is lawful. And, they will be protected in the future against criminal prosecutions and civil suits arising from the surveillance as long as they do not exceed their lawful authority.

Another objection raised against the warrant provision is that it poses harm to the national security.

The harm, it is argued, could result in two ways: Intelligence activities could be impeded because of redtape and court delays; and, the court procedures established under H.R. 7308 could result in unintentional disclosure of sensitive intelligence information.

The House Intelligence Committee subjected both of these concerns to lengthy and detailed inquiry.

The committee concluded on the basis of testimony of members of the intelligence community that H.R. 7308 will not impede or unduly complicate foreign intelligence gathering. There will be no excessive redtape.

As to the second situation—the danger of disclosure and leaks of sensitive information—most of the intelligence community's concerns have been received by the committee's decision to exempt from the warrant requirement two particular sensitive types of surveillance.

However, it cannot be denied that under H.R. 7308 a judge will be involved in the surveillance process where none is today. There is risk here, but is the risk manageable?

First, an application for a warrant to surveil is made to but one judge. At the time the application is made, a large number of executive branch personnel will necessarily already know the details of the proposed surveillance.

Information to but one additional person seems an acceptable risk in view of the protection the warrant process offers to the American people and to the intelligence field agent.

Second, judges are constantly exposed to sensitive and volatile information. They have not, as a class, abused the trust placed in them. I doubt they would show themselves unworthy to handle sensitive intelligence information.

Also, the bill directs the special court to adopt security procedures for handling the sensitive information provided to it under H.R. 7308. These procedures will be instituted in consultation with the Attorney General and the Director of Central Intelligence.

The bill also makes clear that such security procedures may include the use of executive branch personnel—already cleared to handle secret material—to perform clerical duties for the court. This would minimize the danger of leaks of sensitive material.

Also, it is contemplated that sensitive intelligence material will be stored for the court in facilities maintained by cleared executive branch personnel.

Furthermore, the Attorney General, the Director of Central Intelligence, the Director of the National Security Agency, and the Director of the Federal Bureau of Investigation have all actively participated in the drafting of H.R. 7308. They all urge that it be passed.

These officials—charged with the singularly important mission of protecting the security of the country—would not support H.R. 7308 if they felt its warrant procedure would jeopardize national security.

In summary, Mr. Chairman, H.R. 7308 is good legislation.

It protects the constitutional rights of American citizens and the legitimate rights of all individuals. It does not obstruct or impede necessary foreign intelligence collection activities.

It will enhance the effectiveness of the intelligence field agent, who, in most cases, under H.R. 7308, will have a court order to guide the agent's actions which today is not available.

And, it should restore the public's confidence in the intelligence community since no U.S. person can be subjected to foreign intelligence electronic surveillance unless a judge has previously found probable cause that the individual is involved—or may be involved—in a criminal activity.

Admittedly, H.R. 7308 is a compromise bill. Any legislation that can bring together two administrations of differing political philosophies, three congressional committees, the intelligence com-

munity and most of its critics must be the product of compromise and adjustment. Thus, not every provision will be supported with equal vigor by each interested party.

As my supplemental views to the committee report note, I voted against the amendment adopted by the committee which exempted certain intelligence activities from the judicial warrant process.

I remain convinced of the necessity and realism of an across-the-board warrant in foreign intelligence electronic surveillance.

But, I am equally convinced that H.R. 7308 should not be opposed because it is imperfect by my standard. It is still a bill which deserves the House's strong support.

In closing, Mr. Chairman, let me quote briefly two strong supporters of the judicial warrant procedure for authorizing foreign intelligence electronic surveillance.

Senator BIRCH BAYH, chairman of the Senate Intelligence Committee, said on the Senate floor when H.R. 7308's counterpart, S. 1566, was adopted by a vote of 95 to 1:

> The bill before the Senate today . . . is the first major intelligence reform measure to be considered by the Congress. It will bring an end to the practice of electronic surveillance by the executive branch without a court order in the United States. It establishes standards for issuing court orders that reconcile the interests of personal privacy and national security in a way that is fully consistent with the fundamental principles of the fourth amendment and due process of law.

Senator JAKE GARN was quoted on the same occasion:

> Some have wondered what a conservative Senator such as myself was doing co-sponsoring what they thought was a liberal bill. The answer is quite simple. This is not a liberal bill. It is neither a Democratic nor a Republican bill. The tasks of balancing cherished constitutional liberties with increasingly threatened national security needs is too important to be left to partisanship.

Mr. KASTENMEIER. Mr. Chairman, I yield such time as he may consume to the distinguished chairman of the Committee on the Judiciary, the gentleman from New Jersey (Mr. RODINO).

Mr. RODINO. Mr. Chairman, as the sponsor of H.R. 7308 I strongly urge its enactment. The bill was officially reported by the permanent Select Committee on Intelligence. And it reflects the thinking of a great many individuals other than the membership of that committee. It is important that we pass it now.

To begin with H.R. 7308 in its present form is largely a product of the previous administration. I originally introduced the bill during the 94th Congress following a request from the Ford administration to do so. Since that original introduction the legislation has been further scrutinized and refined. Not one change was made in either the Senate, which has already passed the bill by a vote of 95 to 1, or by the House Intelligence Committee without consultation and approval by the FBI, the CIA, and the NSA. Furthermore, the American Civil Liberties Union has endorsed the bill.

The measure is also supported by working agents in the field. I have received a letter of endorsement from the association of Federal investigators which attests to this fact. Perhaps one reason such divergent groups have united in strong common support of this bill is because its enactment is necessary to the continued security of our Nation. This legislation will remove the mist of uncertainty which envelops so much of our intelligence collection activity today and provide to intelligence professionals the guidelines they need to do their job properly. In addition, it will assure Americans generally that we in Congress have acted to assure that the resources of the Nation's intelligence agencies will be used ethically and in a manner which will not threaten their basic liberties. The bill was closely scrutinized by the Kastenmeier subcommittee. Given the sensitive and complex nature of the subject matter of H.R. 7308, I honestly believe that it would not be appropriate to amend it on the floor. When amendments are considered, I hope they will be resisted and the bill will be passed as reported.

Mr. McCLORY. Mr. Chairman, will the gentleman yield to me?

Mr. RODINO. I yield to the gentleman from Illinois.

Mr. McCLORY. I thank the gentleman for yielding.

As the ranking minority member on the gentleman's committee, I joined and applauded the gentleman when he communicated with the Speaker advising that it was inappropriate to bypass the Committee on the Judiciary with regard to important legislation. I notice that this bill of which the gentleman is the principal sponsor was referred to our committee, and yet it was never considered by our committee in formal session. With the very serious constitutional and legal questions that are involved, and the many implications that are involved, the court decisions upon which various provisions of the bill depend, it seems to me so entirely inconsistent with the gentleman's position upholding the prerogatives of our committee that he would not have wanted a markup session by our committee on this legislation, and does not want the bill to be amended now on the floor of the House.

Mr. RODINO. I would respond to the gentleman by reminding him that this legislation had been under study by the subcommittee, chaired by the gentleman from Wisconsin (Mr. KASTENMEIER) for a period of time, and that when the legislation was referred to the Committee on the Judiciary, we considered it because of the urgency of the matter, and we considered it important to get the bill to the floor because we felt that the matter had been studied very carefully. We consulted with the gentleman who is now on his feet speaking. There were hearings at the time, and by a vote of 4 to 3 the subcommittee decided to table any further requests for hearings or for any action that would prevent the expedition of the legislation. We decided by that vote to come to the floor with the work which had been the handiwork and fine work of the Intelligence Committee. I believe that this is what we have now.

Mr. McCLORY. If the gentleman will yield further, I do acknowledge that there were hearings, but there was no consideration given by the committee. It was not reviewed in a markup session.

Mr. RODINO. I believe the subcommittee vote speaks for itself—the subcommittee of the Judiciary Committee—by a vote of 4 to 3 to table any further action.

Mr. McCLORY. If the gentleman will yield further, those who supported the motion to table the bill expressed themselves in strong opposition to the bill, so the bill does rest in the committee right now.

Mr. RODINO. Mr. Chairman, I might say to the gentleman that had those Members decided that they wanted to review the matter any further, they would have voted otherwise.

We must remember that the Committee on the Judiciary does retain its oversight responsibility, and, therefore, we will be able to continue to do what is necessary in order to insure the best interests of our country. But I just wanted to point out that had those Members had any special concern, they would have voted otherwise.

Mr. McCLORY. Mr. Chairman, if the gentleman will yield, let me ask, is there any provision in the bill that says the Committee on the Judiciary shall have oversight?

Mr. RODINO. Mr. Chairman, the Attorney General, when he appeared before the committee, stated expressly and succinctly that the responsibility for oversight would still be with the Committee on the Judiciary.

Mr. McCLORY. Mr. Chairman, if the gentleman will yield further, the report does not include any provisions as to reporting to the Committee on the Judiciary.

Mr. RODINO. Mr. Chairman, I would also add that in view of the inherent jurisdiction of the Committee on the Judiciary, we are protected by the Rules of the House, and we will retain our oversight and legislative responsibility under rule X.

Mr. SANTINI. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman from Nevada.

Mr. SANTINI. Mr. Chairman, with reference to the gentleman's expressed concern about the disposition of the subcommittee, I think the gentleman's question is a valid one. It is a question I asked myself before making the decision on the subcommittee to support the position of the chairman, and if we had not done that at that time, I think the gentleman well appreciates that this legislation to all rational intents and purposes would be dead.

If the objective is to kill the legislation, we could then have protected its consideration in the full committee. The full committee consideration would have, I

think, by any reasonable assessment killed the bill. There simply is not the legislative time remaining in order to get this bill through the full Committee on the Judiciary and to the House floor for consideration.

Mr. Chairman, if the gentleman will yield further, at that juncture I made a particular point of phoning representatives of the FBI and asking them this question:

> We are now postured at this juncture of either killing the bill or, as an alternative, passing over full consideration by the Committee on the Judiciary and getting it to the House floor for consideration. What is your preference as a representative of the entity which is going to be most emphatically and dramatically impacted by the legislation?

The answer to my question was, emphatically, to "get that bill to the House floor as rapidly as you can. We need this bill as an investigative entity."

They are in a no man's land—excuse me, I should say, no person's land—and they do not know which way to turn or how to get there. The critical issues of national intelligence are being abandoned through the emasculation of inaction and the situation they are placed in.

The answer I got was this: "We have to have that legislation if we are to act and aggressively do the job that is assigned to us."

Mr. RODINO. Mr. Chairman, I want to thank the gentleman for his remarks. The gentleman serves on the committee, and I believe he has made a valuable contribution. He has stated the case clearly, and I think there is nothing more I can add.

Mr. Chairman, I yeld back the balance of my time.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. KASTENMEIER) has expired.

Mr. McCLORY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I take this time merely for the purpose of making this statement: It was more than 6 weeks ago that this matter was before the Committee on the Judiciary of the House.

There was ample time for the Committee on the Judiciary to consider this legislation, to consider all these complex legal and constitutional questions, and to bring a measure to the floor which would not be in this kind of a confused state as we now find this legislation in.

As a matter of fact, it was represented to us that if the measure was brought to the floor, we would be able to amend it on the floor; yet the chairman of the full Committee on the Judiciary now states he wants this measure passed without amendment. So we are not only denying ourselves the opportunity in the Subcommittee of the Committee on the Judiciary and in the full committee of providing amendments to this legislation, but now we are denying ourselves the opportunity on the floor of the House to entertain amendments. It seems to me that is a tremendous disservice to our committee and to the Members of the House.

Mr. Chairman, I now yield 5 minutes to the gentleman from Massachusetts (Mr. DRINAN).

Mr. DRINAN. Mr. Chairman, I rise very diffidently and feeling very much alone in opposition to this bill. I share the misgivings just expressed by the gentleman from Illinois (Mr. McCLORY) that this is being pushed through without having thought the thing through. In fact, the pressure is almost unbelievable, because people think that we have to do something about the abuses.

But everybody here is very uneasy. Mr. Chairman, I have listened very carefully; everyone is suspicious that this is not the way to go about it. And I think that they suspect, as I know, that this is a capitulation to things that we really should not be doing.

The basic assumption, today is that wiretapping yields information indispensable to the protection of our national security.

I have served on the committee chaired by the gentleman from Wisconsin (Mr. KASTENMEIER) for 7 years and I have relentlessly asked people to give information that would prove that assumption. But that is the unproven assumption today.

This bill will legalize useless wiretapping. It will erode the fourth amendment. It will institutionalize the Nation's worst xenophobic prejudices. The CIA can now get a warrant if there is any probable cause of crime. But in view of the determination of the CIA and the FBI and the intelligence community to go on with their warrantless surveillances, somehow people have come to the conclusion that we will offer them an unorthodox warrant. It is called a "funny" warrant. It is not really a warrant. It is not a "case or controversy." It is an abuse of the Constitution. We pretend that this is going to bring control. The warrant that judges cannot refuse will not clean up surveillances that we cannot control.

H.R. 7308 does three bad things. It imposes duties on Federal courts totally at variance with anything that we know as a "case or controversy." This is an alteration of something very fundamental. Likewise, we will have something that is very foreign to our courts; namely, secret decisions.

Second, H.R. 7308 contains no requirement that Americans whose conversations are unavoidably recorded need be informed of that massive invasion of their privacy.

Third, H.R. 7308 violates the Vienna treaty, solemnly ratified by the Senate. That treaty guarantees that diplomatic offices are to be "inviolable."

Mr. Chairman, I will offer some amendments at the appropriate time, one on behalf of the telephone industry that does not want to have its agents or any Americans compelled to deal in the clandestine wiretapping that under the bill they will be required to do.

I will also propose a sunset provision of 5 years so that when we understand that what this frightening experiment on our civil liberties really will do, we will have the opportunity, in fact we will be required, to put into effect this sunset provision.

Even if those two amendments and other amendments are adopted, Mr. Chairman, I feel very strongly that this bill will be a self-inflicted wound and a capitulation to the imperious and unjustified demands of the CIA and the intelligence community.

H.R. 7308 has a number of serious defects and is far from the "model wiretap bill" as the New York Times asserted in its editorial of June 29. It permits surveillance of Americans, in certain circumstances, without a court order. It does not contain adequate safeguards to minimize the acquisition of the conversations of innocent people. It requires telephone company employees, custodians, landlords, and others to assist, against their wills, the CIA, the FBI, and other agencies which are engaging in electronic surveillance. And it gives no notice to persons who are overheard that their conversations have been recorded.

Since 1968, many observers have studied the matter of electronic surveillance very carefully. Among others, the Judiciary Subcommittee on Courts, Civil Liberties, and the Administration of Justice has conducted numerous hearings over the past several years. Indeed this subcommittee has successively examined the predecessors to H.R. 7308, beginning in 1976 with the Ford administration bill. We received testimony which was quite critical of the various proposals which have been before us. While proponents sought to discount such adverse comment, they have failed, in my judgment, to carry the burden of persuading us that this bill is needed. When the rights of Americans under the Fourth Amendment are at stake, the Congress should not readily agree to invade them without evidence of the most compelling nature. The advocates of this bill have not adduced testimony anywhere near that level. Based on that hearing record, as well as my experience as a teacher of constitutional law, I would, if given the opportunity, seek to amend H.R. 7308 to effectuate fully the protections of the fourth amendment.

#### (1) THE NEED FOR H.R. 7308

It is critical that the House not assume as correct any of the premises which undergird this bill. Each of the assumptions must be examined thoroughly and without any preconceived notions about the need for employing electronic surveillance to gather so-called foreign intelligence information. In testimony before the Judiciary Subcommittee, the Ford administration provided very little hard evidence of the necessity for this measure. Official representations, both in public and executive sessions, amounted to little more than generalities couched in terms of protecting the Nation from foreign attack. That is not a sufficient basis upon which to authorize the broad

powers sought by the executive branch. The national experience and disclosures of the recent past show all too clearly that Presidents and Attorneys General have used national security as a pretext for snooping into the lawful activities of political opponents or persons perceived to pose a threat to their political security.

The House must weigh the value of and the need for intelligence information gathered from electronic surveillance against the intrusions into constitutionally protected rights, such as privacy, association, and speech. I continue to believe that any electronic surveillance, whether approved by a court or not, violates the Constitution because such interceptions of private conversations can never satisfy the particularity requirement of the fourth amendment. It should be recalled that, to obtain a warrant under the fourth amendment, the applicant must submit a sworn statement, "particularly describing the place to be searched, and the person and things to be seized." Invariably an application for a bug or a tap cannot be that specific; it cannot describe with particularity all the persons to be overheard and all the conversations to be recorded.

This is the real evil of electronic surveillance; it is indiscriminate. It brings within its scope conversations of the innocent as well as the allegedly guilty. It is this indiscriminate quality of electronic surveillance that is most to be feared. Even physical surveillance, which some find offensive, is a much more targeted intelligence gathering technique than electronic surveillance. At least physical observation is more or less restricted to the person who is the object of the Government's interest. Electronic surveillance does not have these inherent limitations. Minimization provisions, which attempt to reduce the unnecessary intrusions into privacy, are generally inadequate.

H.R. 7308 does not uniformly require a criminal standard of probable cause in order to obtain a surveillance authorization. That is its major deficiency, as many witnesses have testified. Indeed the Intelligence Committee frankly concedes that the purpose of the bill is to obtain intelligence information which is not of a criminal nature.

> Although there may be cases in which information acquired from a foreign intelligence surveillance will be used as evidence of a crime, there cases are expected to be relatively few in number, unlike chapter 119 interceptions [title III of the 1968 act], the very purpose of which is to obtain evidence of criminal activity. Committee Report at 60.

With that purpose clearly stated, it should come as no surprise that the fourth amendment probable cause standard is not applied to all cases under this bill. What should come as a surprise, though, is the major break with fourth amendment doctrine that H.R. 7308 would effect.

Indeed, in some respects, H.R. 7308, as reported by the Intelligence Committee, is less restrictive than the earlier bills. For example, the earlier version defined "agent of a foreign power" to include, among others:

> * * * any person who knowingly engages in clandestine intelligence activities for or on behalf of a foreign power, which activities involve or will involve a violation of the criminal statutes of the United States.

The bill, as amended by the Intelligence Committee, would insert the word "gathering" between "intelligence" and "activities," and would substitute the word "may" for "will." Insertion of the word "gathering" arguably narrows the scope of the section, but replacing "will" with "may" arguably broadens it.

There are, to be sure, other objections to H.R. 7308. The definitions of "foreign intelligence information" and "foreign power" are much too broad. For example, "foreign intelligence information" includes any "information with respect to a foreign power or foreign territory that relates to and, if concerning a United States person, is necessary to . . . the conduct of the foreign affairs of the United States." Section 101e(2)(B). That definition has virtually no limits. There are many topics of conversation which every Secretary of State would determine "relates" or is "necessary" to the conduct of foreign policy.

The definition of "foreign power" is also overly broad. It includes, among others, foreign governments, factions of foreign governments, foreign political parties, and foreign military forces. This means that a conversation between an American citizen and an officer or employee of a foreign political party is potentially a subject for surveillance. The reach of that section is far too expansive. The definition, in fact, raises the question whether the bill could be used to engage in surveillance involving so-called third country disputes which spill over into the United States. As I read the bill, the Attorney General could obtain a court order to overhear conversations of persons belonging to "a faction of a foreign nation" even though the subject matter only marginally related to the direct interests of the United States. In short, the critical definitions are too broad to be meaningful restrictions on the Attorney General's authority, either with or without a warrant, to engage in electronic surveillance.

Furthermore H.R. 7308 does not appear to require any criminal standard for agents of foreign governments who are not U.S. citizens or resident aliens. The bill would impose a criminal standard in some circumstances, but it would not impose one across-the-board. Consequently my criticism of earlier bills that they authorized surveillance without probable cause relating to criminal activity is equally applicable to H.R. 7308.

It should be noted in passing that the distinction drawn in H.R. 7308 between citizens and resident aliens on the one hand, and all other persons within the United States on the other has little constitutional support of which I am aware. The protections of the fourth and fifth amendments, for example, extend to all persons, not merely citizens and resident aliens. See *Abel* v. *United States*, 362 U.S. 217 (1960). Many people in the United States are neither citizens, nor resident aliens, nor spies. Tourists, lecturers, business people, scholars, and many others regularly visit this country for purposes unrelated to clandestine activity. As I understand the bill they would not receive the special protection which the proposal appears to give to citizens and resident aliens ("United States persons"). The committee report makes that very clear with respect to the minimization provisions, for example. It states that "only information concerning a United States person need be minimized." *Id.* at 57. This double standard is constitutionally unacceptable and represents the xenophobia of a by-gone day. In testimony before the Judiciary Subcommittee on May 22, 1975, former Secretary of State Dean Rusk attempted to draw a distinction between diplomatic personnel, who are immune from criminal prosecution, and all other U.S. residents. Although I reject that distinction also, it does have some greater logic than the distinctions drawn in H.R. 7308 between citizens and resident aliens and all other persons in the United States.

H.R. 7308 does not limit the use of overhead conversations which are unrelated to the purpose of the surveillance. In fact the bill expressly permits the use of such acquired information in a criminal prosecution regardless of the remoteness of the crime from the surveillance. Section 101(h)(3) of the bill authorizes

> * * * procedures that allow for the retention and dissemination of information that is evidence of a crime which has been, is being, or is about to be committed and that is to be retained or disseminated for the purpose of preventing the crime or enforcing the criminal law.

Thus evidence of crime, obtained accidentally through a foreign intelligence tap, may now be used to prosecute the hapless victim of the surveillance, even though she or he may not even have been the "target" of the surveillance.

When Government agents obtain incriminating evidence through electronic surveillance which is not intended for that purpose, and which may be totally unrelated to the alleged criminal activity, they should not be allowed to use it for prosecutorial purposes. Such "fruit of the forbidden tree" should not be available to prosecute the party for conduct which may not be even remotely connected to the object of the surveillance. This is especially true when it is considered that the criminal standard, where it does appear in these bills, is not uniformly required for obtaining a surveillance warrant in the first instance.

In this same vein, H.R. 7308 makes no provision for notifying innocent persons whose conversations have been recorded or overheard merely because, for example, they called the embassy of a foreign country for travel information. Any time these "foreign intelligence" taps result in the interception of conversation unrelated to the subject of the surveillance, the innocent victim should be notified, or the records destroyed, or both. The minimization provisions of H.R. 7308, as noted earlier, are not strong enough to insure the destruction of data or recordings which are worthless or unrelated to the purpose of the surveillance.

In this context, the bill should provide for a public advocate to protect the rights

of innocent parties. Since H.R. 7308 authorizes ex parte applications to a special court and permits ex parte extensions of existing bugs or taps, some mechanism is necessary to protect the rights of third parties who are unwittingly caught in the Government's dragnet surveillance. If such an office were established, I would have greater confidence that the privacy of persons within the United States would be more fully secured.

A provision for a public advocate takes on added importance when the "renewal" features of H.R. 7308 are examined. The Government may seek an unlimited number of 90-day extensions for any surveillance authorized under the bill. Thus the intrusion into the privacy of persons in the United States could go on for years, without anyone knowing about it. In addition the bill also authorizes the Attorney General to approve emergency surveillance when a court order cannot be obtained in the needed period of time. The Attorney General must then submit the normal application to the judge within 24 hours. If the judge denies the application, the bill gives the court the discretion to notify the innocent victims of the initial 24-hour surveillance, but the Government, again at an ex parte proceeding, may request that such notice be postponed for 90 days (the original Levi bill had a 30-day provision). Thereafter, once more through an ex parte proceeding, the court is prohibited from serving notice if the Government has made a further showing of "good cause." This exception makes a mockery of the limited notice rule in emergency surveillance situations, and further supports the need for a public advocate to be present at all these ex parte hearings.

H.R. 7308 has been criticized because it assigns duties to the judiciary which are not within the traditional definition of "judicial power." The argument proceeds from the settled doctrine that article III of the Constitution restricts the exercise of judicial authority to "cases or controversies." The Supreme Court has explained that limitation as being based, in part, on the need "to assure that concrete adverseness which sharpens the presentation of issues upon which the court so largely depends for illumination of difficult constitutional questions." *Baker* v. *Carr*, 369 U.S. 186, 204 (1962). If the application for a warrant is conducted in secret and without the presence of any opposing party, as is the case under H.R. 7308, how can this constitute a "case or controversy" within the meaning of the Constitution?

Proponents of this legislation contend that the warrant procedure under this bill is no different than the warrant procedure under title III of the 1968 act. Thus, they reason, that since the 1968 act is constitutional, so is H.R. 7308. First, it should be observed that, to my knowledge, the warrant procedures of the 1968 act have never been challenged on the ground that they do not present a case or controversy within the judicial power of the United States. Second, the warrant procedures in the 1968 act are different in critical aspects from the procedures in H.R. 7308.

The warrant process under title III is viewed as ancillary to another proceeding, the investigation and prosecution of crime. If the information obtained through the surveillance leads to a prosecution, the defendant will have the opportunity to challenge, in an adversarial context, the legality of the tap or bug. If the information does not lead to a criminal prosecution, the person who is the subject of the surveillance is notified and given the opportunity to contest the validity of the surveillance in a civil suit. In either case, the initial application for a warrant may be viewed as a part of the case or controversy, either civil or criminal, which ordinarily follows the granting of the surveillance authorization. This is not the case under H.R. 7308.

First, as noted earlier, H.R. 7308 is not designed to procure information in connection with any criminal proceeding. As the committee report notes:

> Although there may be cases in which information acquired from a foreign intelligence surveillance will be used as evidence of a crime, these cases are expected to be relatively few in number . . . *Id.* at 60.

Thus the person whose conversations have been overheard will not have the opportunity to contest the lawfulness of the surveillance in any criminal proceeding.

Second, the bill does not provide any notification to such persons, as title III of the 1968 act does. Thus the victim of unlawful surveillance under the bill may never know of the illegality. Even a blind request by a suspecting individual under the Freedom of Information Act will not determine whether the requesting person has been the subject of a foreign intelligence surveillance. Both the FOIA and the Privacy Act contain exemptions for records ordered by the executive branch "to be kept secret in the interest of national defense or foreign policy." 5 U.S.C. 552(b)(1). The Privacy Act contains a general exemption for the records of the CIA. As I read this bill, there is no way for an American citizen or any other person who has been the subject of an unlawful surveillance to find out about the illegality. The only barrier standing between the victim of illegal wiretapping or bugging and a warrant is the special courts created by H.R. 7308. And there is no subsequent check on the behavior of the courts or the Executive under this bill. In the absence of the procedures, contained in title III of the 1968 act, which ordinarily lead to a case or controversy. I think the argument that this bill raises serious questions under article III is substantial.

Apart from the constitutional contentions against the warrant procedures contained in this bill, I do not understand why the judges assigned to these special courts would not take offense at the duties and limitations imposed upon them. They are not free to examine all the evidence presented by the Attorney General as they are in the ordinary warrant application process under title III. Certain critical determinations of the Executive are reviewable only on a "clearly erroneous" standard. See section 105(a)(5) of H.R. 7308. All the materials submitted for their examinations, as well as the proceeding itself, are wrapped in a great shroud of secrecy. It appears that even the court clerks, reporters, and other necessary support personnel will be executive branch employees with security clearances. Such procedures, I should have thought, would be a tremendous affront to the independence of the judiciary, which is a hallmark of our system of democratic government. I would hope that the judges would reject the commission imposed upon them under this bill, just as their brethren did in the first days of the Republic when Congress sought to foist upon the judiciary duties not within the "judicial power of the United States." See *Hayburn's Case*, 2 U.S. (2 Dall.) 409 (1792).

It is said that the bill establishes legal standards for foreign intelligence surveillance which are better than current law. That is hardly persuasive, in part, for the same reason that we did not glorify Mussolini because he made the trains run on time. Improvement is fine, but at what price? When the myriad infirmities of H.R. 7308 are added together, what real advances have we made in protecting fourth amendment values? None, in my judgment. I fear the bill leaves us with a secret judicial proceeding conducted under the most secret circumstances to sanction current executive practices to engage in electronic surveillance to gather foreign intelligence information. Only the self-restraint of the special judges, who should be offended by this imposition of nonjudicial duties, stands between the potential victim and unbridled administrative discretion. And the victim will, under this bill, never know that she or he has been the subject of this extraordinary proceeding to authorize Government agents to overhear conversations or intercept nonverbal communications. And that, it is said, is better than current law.

The administration claims to support this bill with all its heart and soul, including those of the intelligence community. One has to question the sincerity of that commitment when current executive branch practices regarding surveilance are examined. If the Carter administration is four-square behind this bill, why has it not adopted each and every provision of it on an administrative basis? Surely it could have administratively adhered to the strictures of the bill without Congress enacting any legislation. That, at least, would have demonstrated the good faith of the executive branch's support for this bill. I suspect the administration has not done so simply because it thought Congress might begin at that point and impose greater restrictions. When one starts at such a low level of protection for privacy, which is the present state of executive branch practice, it is quite easy to make the case that H.R. 7308 is better than current law. But that hardly meets the argument that current practice is unauthorized and unconstitutional, and that the bill contains similar deficiencies. In urging Congress to enact this law, the administration really seeks to have us approve its dubious practices involving foreign intelligence surveillance.

H.R. 7308 does more to sanction current practice than it does to impose new and sufficient protections for all persons within the jurisdiction of the United States against unwarranted intrusions into privacy and doubtfully legal use of electronic surveillance.

Finally I should add that unsupported appeals to "national security" should not determine whether H.R. 7308 or any other bill becomes public law. Our national security is adequately safeguarded through the use of other, less intrusive methods of gathering foreign intelligence information. After all, our country did survive prior to President Roosevelt's authorization of limited electronic surveillance for national security purposes. It should be remembered too that the liberty of the people is at least as important as the marginal increment in intelligence information which we acquire through the inherently indiscriminate method of electronic surveillance. As the District Judge in the Pentagon Papers case cogently observed:

> The security of the Nation is not at the ramparts alone. Security also lies in the value of our free institutions. 328 F. Supp. at 331.

An integral part of our free institutions is the security of the people from unwarranted intrusions by Government agents in their privacy, intrusions which H.R. 7308 would unnecessarily authorize. I will oppose enactment of H.R. 7308 and the unprecedented, unwarranted violations of our most cherished rights which it sanctions.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. DRINAN. I yield to the gentleman from Illinois.

Mr. McCLORY. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman on the position he has taken. I do want to say, with regard to the intelligence activities that are taking place currently, they are in accordance with strict Presidential guidelines. We are not dealing in any no-man's land or no-person's land. If the suggestion of the gentleman is that intelligence activities or electronic surveillance are being withheld until we get this legislation through and from then on we are going to have open field day for unlimited electronic surveillance, I think it is a more horrendous experience that we are going through here today than if we had no legislation whatever. So I just think the arguments in support of this legislation just do not hold water at all.

Mr. DRINAN. Mr. Chairman, I agree with the gentleman.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. DRINAN. I yield to the gentleman from Illinois.

Mr. RAILSBACK. I thank the gentleman for yielding.

Mr. Chairman, what bothers me, in the absence of some statute, is that I am not at all convinced that what happened back in the later years of the Nixon administration, when there were certain wiretaps executed that were warrantless would be corrected.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. DRINAN) has expired.

Mr. McCLORY. Mr. Chairman, I yield 1 additional minute to the gentleman from Massachusetts (Mr. DRINAN).

Mr. RAILSBACK. If the gentleman will yield further, what really bothers me is that I am afraid that I do not know of any court decision that would rule it mandatory that there be a warrant in case of a wiretap where even an American citizen is engaged in foreign intelligence gathering. I think the gentleman in the well will agree with me that that in itself is bad. There is a need, at least to an extent, to correct what happened not too long ago.

Mr. DRINAN. I agree with the gentleman that reform is necessary. But this is not the way to bring about reform.

Mr. MURPHY of Illinois. Mr. Chairman, will the gentleman yield?

Mr. DRINAN. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. Mr. Chairman, just to answer the gentleman's question, if he remembers, the Supreme Court in the Keith case clearly indicated that Congress could provide for warrant applications for intelligence purposes in domestic surveillance, and that is all we are doing here.

Mr. McCLORY. Mr. Chairman, if the gentleman would yield further, we are not involved here today in domestic surveillance. What the Court said in the KEITH case is that they were not passing on the subject of foreign intelligence surveillance, which is what we are considering in this legislation.

Mr. DRINAN. Mr. Chairman, I yield back the balance of my time.

Mr. McCLORY. Mr. Chairman, I yield 4 minutes to the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. Mr. Chairman and members of the committee, I can understand why there is a great deal of controversy surrounding H.R. 7308, and I think it is very understandable. On this point I do want to make it very clear in pointing out that this is not this administration's particular initiative.

I remember when Attorney General Levi summoned us to the White House for a meeting with President Ford preparatory to introducing a bill that really was very similar to the legislation that we are considering. There are two major differences between the Ford-Levi bill and H.R. 7308. The Ford-Levi bill appeared to recognize the constitutionally inherent power of the President to authorize warrantless electronic surveillance under circumstances not contemplated by the bill.

A second difference between the two bills is that the standard for surveillance under H.R. 7308 utilizes kind of a quasi-criminal standard, while the Ford-Levi bill did not. But, a letter has been sent and received from the former president, Gerald Ford, that in effect endorsed H.R. 7308 in that it has the thrust of what the Ford administration endorsed.

In all likelihood, I will end up supporting the bill reported out by the Intelligence Committee, but at the same time I do want to voice my objection to the manner in which the bill was handled. Beginning in 1976 with the Ford administration bill, the Subcommittee on Courts, Civil Liberties, and the Administration of Justice, of which I am a member, has successfully considered the predecessors to this particular bill. Most recently, on June 22, 1978, the subcommittee began a series of three hearings on the current bill.

It is clear that the subcommittee has carefully studied the issue of foreign intelligence surveillance. However, rather than utilizing their developed expertise, the subcommittee on June 29 voted by a margin of 4 to 3 to table H.R. 7308, and I happen to believe that that was a mistake. Inasmuch as that action was taken, I must disagree with the comments of the chairman of the full Committee on the Judiciary when he indicated that he thought there ought not to be any amendments considered on the floor of the House. I feel that way particularly because the subcommittee of the Judiciary Committee never marked up the bill, nor did we have a chance to introduce any amendments.

My feeling is that even though I may end up supporting this bill, even with some amendments, I think that the full House ought to have an opportunity to consider amendments that may be offered, and particularly those offered by members of the Judiciary Committee who have not had an opportunity in the committee this year to offer amendments.

Mr. KASTENMEIER. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. I did not say—I think the record bears me out—that the House ought not to consider these amendments.

Mr. RAILSBACK. I was talking about the comments of the chairman of the full committee, Chairman RODINO. As I understood Chairman RODINO, his position was that no amendments should be considered.

Maybe he said no amendments should be adopted, but in any event inasmuch as we precluded Judiciary Committee action, I would hope that on the floor Judiciary would have the opportunity to amend the bill.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. RAILSBACK) has expired.

Mr. KASTENMEIER. Mr. Chairman, would the gentleman from Illinois (Mr. McCLORY) yield additional time, perhaps 1 minute to the gentleman from Illinois (Mr. RAILSBACK)?

Mr. McCLORY. I yield 1 additional minute to the gentleman from Illinois (Mr. RAILSBACK).

Mr. KASTENMEIER. I asked the gentleman to yield the further time, because the gentleman was with me I believe when we went to the Rules Committee, and of course we contemplated an open rule and we contemplated the

amendments being considered on the floor, and of course that is appropriate. I do not believe that I or the chairman of the full committee should be characterized as believing no amendments should be considered. We may believe that no amendments should be adopted, but certainly not that they should not be considered.

Mr. RAILSBACK. I understand what the chairman of the subcommittee was saying and I was not referring to the gentleman but rather to remarks I had heard earlier.

Let me express my hope that this does not become some kind of partisan issue. As has been pointed out, this at one time was a Republican initiative, although there have been some changes. But I hope all of us consider the bill on its merits and do not make it into any kind of partisan issue.

Mr. McCLORY. The gentleman does not want it to become a partisan issue.

Mr. RAILSBACK. Yes. I do not want it to become a partisan issue and I hope that we should consider it to be a bipartisan issue.

Mr. McCLORY. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania (Mr. ERTEL).

Mr. ERTEL. Mr. Chairman, the basic concept of a civilized nation is the rule of law. This country is a civilized nation and we do believe in the rule of law.

The Judiciary Committee has honored that principle and has continued to work for the establishment of a viable court system in this Nation. It is obvious that the intelligence agencies have abused their privileges and their rights in accordance with the Constitution and they need to be corrected, but I do not believe that this bill as written will correct the abuses which we have seen in the intelligence community before.

What we are doing here is compromising what is basically the rule of law as established in this country for 200 years. We are compromising our Constitution. In this bill for the first time in the history of our Nation we are setting up a secret body of law which no person in this Nation will know about other than a very select few. Decisions will be made in secret and they will continue to be made in secret. There will be no exposure to the public, no way to review them. No one will know what has happened or how it took place.

In fact, in this bill we do not have substantive guidelines as to whether or not intelligence agencies can tap lines or enter houses or establish electronic bugs. All we have is a procedure, how they go to a secret court and get a warrant. We do not tell the court what basic standards they should apply. We say: "You make the decision based on the totality of circumstances," and we set out no guidelines when they shall issue the amount. We set out no standards whatsoever. But yet we are saying to the courts: "You issue an order allowing a tap or an intrusion into somebody's privacy," and we do not tell them what standards to apply.

In fact we say to the court: "You can modify an application." So what does a court have to do? The court at that point becomes the manager of our foreign intelligence operation because they have to know what our intelligence people are seeking, they have to look at it, they can consider it, and they can modify what they are doing through the minimization procedures. They become the managers of our foreign intelligence operations. They are not making judicial decisions.

I suggest to the Members that it is a compromise of our judiciary and our constitutional form of government. We have the obligation to set out the substantive guidelines—not the courts—and we have not done that.

Let us assume for the moment that one judge just issues all the orders that the intelligence community asks for and another may deny them. There are no set guidelines under which they perform. They do not write out why they grant a warrant. They do not set out any standards. They do not say why they allow them to be tapped.

What we have done, we have just established a procedure where we have sanctioned the activities of the intelligence community with a court order without any particular reason being given by the courts.

It seems to me we have compromised our judiciary, we have compromised our rule of law and in addition to that we have compromised the intelligence agency because we are setting up a special court, itself, in Washington, that is located in one spot. All of this information must be funneled through that court. If somebody wants to find out what our counterintelligence agency's efforts are, all they have to do is to penetrate that one court and they will then know our entire counterintelligence efforts in this country. If they can get one person inside that court then our entire counterintelligence efforts are compromised.

No one can be seriously content that to centralize all of our counterintelligence collecting information at one point is a sound policy—it is a bad policy.

It seems to me we would be better off in setting up statutory guidelines for an intelligence community when we allow intrusion into the affairs of American citizens, or anyone else, and that the executive can present it for oversight to our committee of the House instead of having the judiciary involved.

I thank the gentleman for yielding me this time.

Mr. McCLORY. Mr. Chairman, I yield 5 minutes to the gentleman from Florida (Mr. SIKES).

Mr. SIKES. Mr. Chairman, in Congress, we speak often about too much government, about overlapping Federal agencies, about additional layers of bureaucracy, about redtape, regulations, and form filling. We say we are opposed to all of them and just about every day we pass new legislation that adds to each of these things we call objectionable.

I think that is exactly what will happen if H.R. 7308 is passed today. A surprising amount of pressure has been brought on Congress in support of this bill from the administration. I am puzzled by this situation. To me, the bill, beyond question, weakens America's intelligence gathering capabilities. It would dilute and slow down the process of using electronic means to gather, in the United States foreign intelligence information vital to our foreign policy and security interests. It would take away Presidential prerogative, based on sound constitutional principles, and establish a "special court." This special court would be made up of people of no particular training and background for deciding on foreign intelligence questions. Apparently, the judges would alternate in making decisions to authorize or refuse to authorize foreign intelligence electronic surveillance. We could have as many approaches and as many different viewpoints on propriety as there are judges.

Instead of this confusing approach, it would appear to me that abuses in the present system can be regulated by a set of strict guidelines mandating written authorization on the most senior members of the executive branch plus meaningful congressional oversight. Without question, there could be abuses through the operation of a special court just as readily, even more readily, than the abuses that are charged today.

This subject needs sensitive treatment, for we are dealing with important intelligence and counterintelligence activities which are vital to our foreign policy and security interests. The unprecedented injection of the courts is unnecessary and unwise, and it could very well unduly burden the legitimate activities of our intelligence agencies.

Under the guise of reform, this bill is an overreaction. In our zeal in today's world to overregulate, we would create a new agency and, in my opinion, the new procedure would further weaken intelligence gathering processes. They have already been seriously damaged by the drive to reveal every phase of intelligence operations in our country, to open all of our secrets to the press, and to make it more difficult for foreign nations to cooperate with the United States for fear that their own intelligence gathering operations would be compromised.

There is no other country which requires such judicial intervention before engaging in national security electronic surveillance. Our country does not need it.

In summary, as I understand the bill: It solves no known problems and corrects no known abuses; diminishes the effectiveness of intelligence; creates substantial new security hazards; does not establish new safeguards for the rights of Americans; injects the judiciary into foreign intelligence in a manner inconsistent with the Constitution as interpreted by the judiciary for over 100 years; establishes a special court which may be unconstitutional and requires a judicial warrant be based on a criminal standard when the purpose is to collect foreign intelligence.

Mr. McCLORY. Mr. Chairman, I yield 2 minutes to the gentleman from Massa-

chusetts (Mr. BOLAND), the chairman of the Permanent Select Committee on Intelligence.

Mr. MURPHY of Illinois. Mr. Chairman, I yield an additional 3 minutes to the gentleman from Massachusetts (Mr. BOLAND).

The CHAIRMAN. The gentleman from Massachusetts (Mr. BOLAND) is recognized for 5 minutes.

Mr. BOLAND. Mr. Chairman, first of all I want to offer my congratulations to the distinguished gentleman from Illinois (Mr. MURPHY), the chairman of the legislative subcommittee of the Permanent Select Committee on Intelligence, and to the gentleman from Kentucky (Mr. MAZZOLI), who is another member of that subcommittee. I also wish to offer my congratulations to the gentleman from Illinois (Mr. MCCLORY), who is the ranking Republican member on that subcommittee, and, in fact, to all of the Members on both sides of the aisle who are on the Intelligence Subcommittee for the work they have been putting in, not alone on this bill, but on so many, many other matters that have come to the attention of that subcommittee, the many, many hours of briefing, the many, many hours of information which has been given to this committee, the many, many hours that all of the Members, all 13 Members, have spent in the Committee on Intelligence to insure that the kind of oversight which the Congress demands in this day and age is being obtained by the Congress. I think that is so. Therefore, I am grateful to all of the Members who have served here on this committee.

I know that none of the members of this committee and assuredly, the chairman of the subcommittee did not assume the task of chairing this committee lightly. I know that the members who served with me did not assume this task for the purpose of diluting the ability of our intelligence community to gather the kind of intelligence necessary to protect this Nation in the very difficult world in which we live. It is a difficult world. If we had a real world in which we were all angels, I imagine one could say that this particular piece of legislation would not be necessary.

Others have talked about the history of the legislation. It has been before the Congress now for a couple of years. The bill itself was finally offered in the Senate and the House after a ceremony at the White House which I attended along with a lot of other members of committees on both sides of the Capitol.

Mr. Chairman, I must say that my friend, the gentleman from Illinois, is perhaps the most consistent and the most persistent opponent of this bill of which we are aware, and that is good. I think he has brought to the attention not alone of the Permanent Select Committee on Intelligence, but of the House generally some of the problems that he sees in the bill itself.

Mr. Chairman, we have had a rather healthy discussion within the committee, and the gentleman from Illinois has had some very healthy discussions within the Committee on the Judiciary with respect to the matters that are being talked about today.

I am grateful for the contribution that the distinguished gentleman from Nevada (Mr SANTINI) makes on what happened with respect to action within the Committee on the Judiciary itself. I think he is absolutely right. We never would have had this bill this year. It would have been death by delay; there is no doubt about it. The Senate has moved on this bill. The Senate passed it 95 to 1, and the only Member of the Senate to vote against it was the junior Senator from Virginia. So there is a broad consensus of support for the bill itself.

As my friend, the gentleman from Ohio (Mr. ASHBROOK) has indicated, I guess there is a broad consensus of opposition to it, too. He named some of the organizations that are opposed to it. He named an organization—I guess it is known as the Former Intelligence Officials. But, I think we have to look at that opposition to this bill vis-a-vis: Those who are now serving as our current intelligence officials, those who really have the burden today, those who really have the job today of insuring that the kind of intelligence we collect will serve the best interests of the United States. I think they are the people we have to depend upon—their judgment of what this bill does or does not do.

Let me call to the attention of the members of this committee that this bill is supported—again, it has been said many times and I will say it again; it deserves repetition—by the Department of Justice, by the Attorney General of the United States. It is supported by the Director of the Federal Bureau of Investigation, Judge William Webster. It is supported by the Director of the Central Intelligence Agency, Admiral Turner. It has the complete support of perhaps the one official who is most involved in the collection of foreign intelligence, and that is the Director of the National Security Agency, Adm. Bobby Inman. Those are all the people who are concerned with the collection of foreign intelligence, and they are the people who support this bill.

I know my friend, the gentleman from Massachusetts, my colleague, opposes the bill, but he opposes electronic surveillance in any respect. so I do not agree that we have a strange collection of bedfellows here. All I am saying is that people who oppose the bill oppose it for different philosophical reasons.

The gentleman from Illinois (Mr. MCCLORY) opposes the bill because he does not want the judiciary in on determining whether or not warrants ought to be issued in these particular cases where we establish special courts to do it—11 judges picked from the 11 judicial districts throughout the United States who will be sitting here in Washington, who will be appointed by the Chief Justice of the United States and also the 6 members of the appeals court.

The gentleman from Illinois (Mr. MCCLORY) makes the point that no other nation in the world—no other nation in the world—has a special court to consider this kind of a matter and this kind of a problem. May I just put an addendum to that by saying I do not know of any other nation in the world that has a bill of rights either. So we have the obligation here to protect not only the national security of the Nation itself; we have the obligation here of protecting the constitutional rights of the people who live within our borders, U.S. citizens and permanent resident aliens, and nobody could disagree with that.

Why is the bill here? It is here because it was supported by the Ford administration. President Ford supports this bill. It is supported by the Carter administration, supported by everyone who is connected with intelligence, at least on the part of Government officials who have anything to do with intelligence. All of the intelligence collectors who are now doing the job believe that the bill does not impact upon their ability and might very well insure the ability of those particular agencies to better collect intelligence because there will be offered to those who collect intelligence freedom from the fear that in collecting that intelligence where they do not have a warrant they will be subjected to lawsuits.

Mr. MCCLORY. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I will yield to the gentleman in a minute.

Mr. Chairman, I do not claim that this legislation satisfies every concern. I only claim that it is an exceedingly reasonable attempt to legitimize operations that have come under fire, to shield those who perform them, and to protect those who are innocently intercepted in the process. I believe that Senator JAKE GARN of Utah put it best when he spoke on the Senate floor on the day this bill's counterpart was passed in the Senate. If I may, I will quote his words.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. BOLAND) has expired.

Mr. MCCLORY. Mr. Chairman, I yield 2 additional minutes to the gentleman from Massachusetts (Mr. BOLAND), and later I will ask him to yield to me.

Mr. BOLAND. Mr. Chairman, I will yield to the gentleman if he will just let me finish this first.

Here is what Senator GARN said:

> Some have wondered what a conservative Senator such as myself was doing cosponsoring what they thought was a liberal bill. The answer is quite simple. This is not a liberal bill, it is not a conservative bill, it is neither a Democratic nor a Republican bill.

And this, Mr. Chairman, I think, is the crux of his statement:

> The task of balancing cherished constitutional liberties with increasingly threatened national security needs is too important to be left to partisanship.

Mr. Chairman, I am glad at this time to yield to my friend, the gentleman from Illinois (Mr. MCCLORY), who has done such a magnificent job in opposing this bill. I am delighted to yield to him.

Mr. MCCLORY. Mr. Chairman, I thank the gentleman for yielding, and I appreciate the constitutional points he is making.

However, the fourth amendment, with regard to unreasonable searches and seizures, does not apply to foreign powers or foreign agents, and yet what the gentleman is suggesting in supporting this bill is that in regard to foreign agents and foreign powers, in order for us to engage in electronic eavesdropping in regard to those entities, we would require a judicial warrant.

It seems to me that what we are doing is we are providing something which is not constitutionally required and which is, I think, something that is constitutionally inimical to the citizens of the United States under our great Constitution and our great Bill of Rights.

Mr. BOLAND. Mr. Chairman, the gentleman is stating his opinion on the matter. That is not the opinion of a lot of others, including constitutional lawyers, in this Nation, but the gentleman has a right to state his opinion.

I might also state that when we were considering this bill in the markup—and it was not an easy task, as all the members of that subcommittee would agree—we did come to some agreement on what we ought to do with reference to changes that would be made in the Senate bill. The gentleman from Illinois (Mr. McCLORY) knows that he sat down with me and chatted with me, and one of the important amendments that we offered was one which would not require warrants to target foreign powers.

So, Mr. Chairman, this bill is in essence a better bill than the Senate bill, and I ask for its support by the members of this committee.

Mr. Chairman, much has been said about what this bill does and does not do. It is important to put this legislation in historical context.

President Ford first sponsored legislation which required a judicial warrant to perform foreign intelligence surveillances in 1976. His Attorney General, Edward Levi, worked closely with both House and Senate in drafting a bill which sought to balance national security concerns with protection for the civil liberties of Americans. Both the Senate Intelligence and Judiciary Committees favorably reported the Ford/Levi bill but the 94th Congress ended before it could be considered by the full Senate.

In the 95th Congress both committees again reported out the legislation and the Senate did act. It passed S. 1566, the companion bill to H.R. 7308, by a margin of 95 to 1. In the House, the Permanent Select Committee on Intelligence held 5 days of hearings of H.R. 7308. It went through an extended markup of the bill that included a briefing from Attorney General Bell, Admiral Turner, Director of Central Intelligence, Admiral Inman, Director of the National Security Agency, and Director Webster of the Federal Bureau of Investigation. Based on this briefing, the committee proceeded to final markup of H.R. 7308. The bill, as amended, is preferred by the administration over the Senate bill.

What does this bill do? Very simply, it authorizes the use of electronic surveillance in this country to collect foreign intelligence information. In all those cases where U.S. persons—that is, American citizens or permanent resident aliens—would be a communicant, a warrant is required. That approach is a simple and a straightforward one. It involves a basic policy choice—whether a judge or some executive branch official will authorize such surveillances. H.R. 7308 opts in favor of a disinterested third party using a process traditional to searches, and particularly intrusive electronic searches—that of a judicial warrant.

Nonetheless, the legislative package before us today is a complex one. The complexity results from trying to insure that the role judges play is limited to making findings of fact under statutory standards. Judges are insulated from foreign policy or political decisions. Further, the operation of the special court which will hear these warrant applications will be controlled under strict security procedures agreed upon by the Attorney General and the Director of Central Intelligence.

The bill's draftsmen, therefore, have gone to great lengths to provide a statutory basis for foreign intelligence electronic surveillance. Why is it necessary? There are two different and in some ways conflicting purposes that underlie H.R. 7308. The first grew out of the reports of the Church committee. The committee detailed the misuse of foreign intelligence surveillance in three areas. Between the period of 1967–1972, 1,200 Americans were targeted by NSA "watchlisting" activities. Regular biweekly reports, on the political opinions and activities of hundreds of prominent Americans—including Members of Congress—from FBI embassy wiretaps were provided to the President of the United States. Finally, dozens of FBI wiretaps were targeted at individual Americans, under the guise of national security, but for purely political or personal reasons. This record left a strong feeling in the country—and in this House—that legitimate foreign intelligence collection activities ought not to be prostituted like that again.

Since that time, as we all know, there has been an increased scrutiny of intelligence agencies and their activities. Civil suits and prosecutions have resulted. Agents are afraid—and rightly so in my view—to accept orders which they never would have questioned years ago. This hesitancy has reached the highest offices of this land and so today intelligence that perhaps should be collected is not. Even the Attorney General has been sued. Citizens are less willing to cooperate with their Government for the same reason.

All of these facts argue for legislation authorizing foreign intelligence surveillance. The committee agreed with the Carter administration—and the Ford administration—that a warrant ought to be required—because it would offer an impartial finder of fact, because it has been traditionally used in criminal electronic surveillance and the Government thus felt comfortable with it but principally because it was felt, that a judicial warrant would provide appropriate reassurance to Americans that their Government would not spy on them indiscriminately as it had in the past.

The choice of a judicial warrant has provoked the opposition of the gentleman from Illinois (Mr. McCLORY). He is opposed to any involvement of the judiciary in foreign intelligence collection. His numerous amendments will make that point in many ways. He is joined in his opposition by others who oppose electronic surveillance of any kind, for whatever purpose. This combination of strange bedfellows, who oppose the bill for entirely opposite reasons, points out the difficult task that the committee has faced in considering H.R. 7308. It has sought in every case that middle ground where the interests of the national security ran parallel with those of individual privacy.

I do not claim that this legislation satisfies every concern. I only claim that it is an exceedingly reasonable attempt to legitimize operations that have come under fire, shield those who perform them and protect those who are innocently intercepted in the process.

I believe Senator JAKE GARN of Utah put it best when he spoke on the Senate floor the day this bill's counterpart was passed by the Senate 95 to 1. Here are his words:

> Some have wondered what a conservative Senator such as myself was doing cosponsoring what they thought was a liberal bill. The answer is quite simple. This is not a liberal bill. It is not a conservative bill. It is neither a Democratic nor a Republican bill. The tasks of balancing cherished constitutional liberties with increasingly threatened national security needs is too important to be left to partisanship.

Senator BIRCH BAYH, chairman of the Senate Intelligence Committee, also chose some appropriate words. He quoted James Madison in the Federalist Papers thusly:

> If men were angels, no government would be necessary. If angels were to govern men, neither external nor internal controls on government would be necessary. In framing a government which must be administered by men over men, the great difficulty lies in this: you must first enable the government to control the governed; and in the next place oblige it to control itself. A dependence on the people is, no doubt, the primary control on the government; but experience has taught mankind the necessity of auxiliary precautions.

Mr. Chairman, this legislation offers a reasonable, carefully considered approach to authorizing an essential intelligence gathering technique under conditions which help guarantee that it is properly used to gather foreign intelligence information and nothing else. I appeal to the commonsense of the members of this House to appreciate it for that and not any of the horrors that its opponents have conjured up for us.

Mr. McCLORY. Mr. Chairman, I yield 4 minutes to the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. Mr. Chairman, I asked for this time although I had already spoken because the name of the former President of the United States has been brought up. I could not help but wonder which "Gerald Ford" they

were referring to. I thought possibly somebody in that unique coalition got hold of his signature, because when I read that letter, I found it did not really square with what he had been saying before.

As a matter of fact, on Law Day at the University of South Carolina the President made this statement, and I think that anybody who knows much about it has to figure that when we make a speech, we come a lot closer to what we think than we do when somebody asks, "Will you send a letter supporting the bill?" and you say, "Yes." Here is what the former President of the United States said in a speech on March 17, 1978, when he was talking about this precise bill:

The current proposals to deal with national security wiretaps and other forms of electronic surveillance dealing with foreign threats is an excellent example.

There he is talking about judicial overkill.

The Carter Administration has asked the Congress to pass much of that responsibility to the courts. The conduct of foreign policy is not a judicial function. Moreover, after this responsibility is split, it will no longer be possible for the American people to hold the President, his political appointees, and any involved Members of Congress responsible for misdeeds in this area.

Mr. Chairman, I saw the letter that was referred to, and I know my colleague, the gentleman from Illinois, drafted a letter which I signed, to the President asking him in effect if he was somewhat taking leave of his senses. I just read what he originally said, and this is his original speech. Where the letter came from, I do not know.

We have also had Admiral Turner mentioned. I have been around a long time, and I know that Republican administrations sometimes put the heat on you, and I know that sometimes Democratic administrations put the heat on you. I know when someone under these pressures sends out signals. I believe Admiral Turner and Admiral Murphy both sent out signals to us.

Admiral Turner was saying he was for the bill, but let us listen to the signals he sent out. Here is what he said before our committee:

I have said before that there are certain risks associated with the statutory approaches in these two bills.

Those were the risks he was talking about and the signals he was sending.

The proliferation of sensitive information always involves risks—

And that is the point the gentleman from Pennsylvania was making—

and the statutory procedures will unquestionably lead to such a proliferation.

That was Signal 1 he was sending to us.

But on balance, I believe that the risks can be accepted.

That is another signal.

While compliance will be somewhat onerous—

That was a third signal he was sending—

I cannot say that any proper or necessary governmental purposes will be frustrated by these statutes or that vital intelligence having such value as to justify electronic surveillance as a method of collection will be lost.

He could not say the opposite so he put his positive statement in a negative stance. We all know what that illustrates.

That is about as much a signal as a person can send when he is under the restraint of a policy of his administration.

He told the Senate the same thing:

I cannot say to you flatly that there will not be such costs. It is possible, for example, that the bill's definitions of foreign intelligence information will prove to be too narrow—

There is a signal—

or will be too narrowly construed, to permit the acquisition of genuinely significant communications. It is likewise possible that justified warrant applications will be denied, or that the application papers will be mishandled and compromised. Those possibilities are difficult to measure, but they are risks. In the end, however, I think they are risks worth taking.

Mr. Chairman, let me point out again that is about as close to getting minimum support for a bill as you can get.

I am not being partisan. If Gerald Ford were in the White House and Mr. Levi were the Attorney General, we would be getting precisely the same kind of general talk.

They are sending signals that they really are not that much behind this legislation. Compromise, yes. Parts of the H.R. 7308 needed? Yes. The whole package? No.

Mr. MURPHY of Illinois. Mr. Chairman, I yield 1 minute to the gentleman from Georgia (Mr. FOWLER).

Mr. FOWLER. Mr. Chairman, I rise today in strong support of H.R. 7308, the Foreign Intelligence Surveillance Act of 1978.

H.R. 7308 establishes statutory procedures to govern the use of electronic surveillance in the United States for foreign intelligence purposes. The bill contains specific and precise language detailing who may be monitored and under what circumstances, and sets forth long overdue procedures by which surveillances are to be authorized, approved and implemented.

This landmark legislation is the product of over 3 years of research, debate and refinement and has involved the criticism and cooperation of individuals representing a remarkable diversity of outlook and political philosophy, and including Presidents Ford and Carter, Attorneys General Levi and Bell, our intelligence agencies, and the American Civil Liberties Union.

This is as it should be, for the matters addressed by H.R. 7308 involve two of the most fundamental purposes of our Republic: to "provide for the common defense," and to "secure the blessings of liberty to ourselves and our posterity."

The fourth amendment to the Constitution clearly states that—

The right of the people to be secure in their persons, houses, papers and effects, against unreasonable searches and seizures, shall not be violated.

In his dissent in the 1928 Olmstead case, Justice Brandeis termed this provision "the right to be let alone—the most comprehensive of rights and the right most valued by civilized man." We now know that this precious right has been infringed upon for almost 50 years by 9 different administrations, through the practice of domestic national security surveillances. The courts and the Congress have over the past 10 years moved to correct these abuses. In 1967, the Supreme Court ruled in the Katz case that the Fourth Amendment did apply to electronic surveillance, although the Court did not extend this finding to national security cases. In 1968, the Congress passed the Omnibus Crime Control and Safe Streets Act, which included a requirement for judicial authorization of elecrtonic monitoring for criminal investigations. Then, in the Keith case of 1972 the Supreme Court found that a warrant is required in domestic security surveillance cases.

H.R. 7308 represents continuation of this effort to bring electronic spying under the rule of law by requiring a judicial warrant for all electronic surveillance conducted in the United States for foreign intelligence purposes, when aliens are likely to be involved. It will insure that the constitutional rights of American citizens will not be swept aside, and disregarded, in the name of national security.

However, in addition to protecting individual rights, this legislation is also aimed at clearing up the legal uncertainty and ambiguity that has hampered U.S. intelligence gathering over the past few years. The bill provides, for the first time, legislative authorization and regulation of foreign intelligence electronic surveillance conducted within the United States. Ideally such intrusions into the lives of individuals would never be necessary, but we live in an imperfect world and we need a strong intelligence gathering capability in order to protect our country and our society against forces that seek to destroy them. Therefore, it is extremely significant that the directors of all U.S. intelligence agencies have vigorously supported H.R. 7308.

Thus, the Foreign Intelligence Surveillance Act of 1978 is designed to strike a balance between individual rights and liberties on the one hand and legitimate national security needs on the other. This legislation is necessarily the product of compromise and few people will be completely satisfied with its provisions; but, I am firmly convinced that it is sound legislation and that it well serves our national interests.

The two key principles of the bill are that a prior judicial warrant is required for all foreign intelligence surveillance in the United States, with narrow exceptions, and that a criminal standard is required in the issuance of warrants directed against U.S. citizens or permanent resident aliens.

The warrant requirement is waived only in three cases. First, the President, through the Attorney General, may au-

thorize warrantless electronic surveillance when the surveillance is solely directed at—

(i) communications exclusively between or among foreign powers. . . ; or (ii) the acquisition of technical intelligence from property or premises under the open and exclusive control of a foreign power. . . .

Second, the Attorney General may authorize the emergency employment of electronic surveillance under certain circumstances, but must obtain a warrant within 24 hours after the surveillance has begun. Finally, no warrant is required when the surveillance is to be undertaken to test equipment, train personnel, or detect unlawful electronic surveillance. In this case, the agency performing the warrantless surveillance must adhere to stringent rules to insure that no information concerning U.S. citizens or permanent resident aliens is improperly disseminated, used, or retained.

These limited exceptions were meant to provide the broadest possible protection of civil liberties without unduly damaging the ability of our intelligence agencies to obtain information vital to our national defense. In commenting on H.R. 7308, Admiral Turner of the CIA states:

I cannot say that any proper or necessary governmental purposes will be frustrated by the bill or that vital intelligence information, having such value as to justify electronic surveillance as a method of collection, will be lost. For these reasons I strongly urge that this legislation be enacted as soon as possible.

The criminal standard for surveillance of U.S. persons is perhaps the most controversial, and most important, of the provisions of H.R. 7308. Without it, the bill's attempt to protect the constitutional rights of Americans is largely meaningless. As the committee report states:

A citizen in the United States should be able to know that his government cannot invade his privacy with the most intrusive techniques if he conducts himself lawfully.

Yet this provision was not drawn up in a vacuum divorced from the real world. Foreign spies, be they American nationals or not, employ sophisticated techniques to avoid discovery and, therefore, it would be most difficult to meet an ordinary criminal standard in this area.

To resolve this difficulty, H.R. 7308 establishes a lesser standard for criminal conduct than the customary "probable cause that a crime is being committed." In order to fall under this revised criminal standard, a U.S. citizen or permanent resident alien would have to knowingly engage in: first, clandestine intelligence-gathering activities which do or may violate U.S. law; second, other clandestine intelligence activities which do or will violate U.S. law; third, sabotage or international terrorism; or fourth, aiding and abetting, or conspiring, with any other person engaged in such activities.

H.R. 7308 also establishes the methods for authorizing, approving and implementing foreign intelligence surveillance.

In all cases, other than the limited exceptions noted earlier, the Attorney General must make applications to a special court for a court order approving the use of electronic surveillance. Each application must include: the identity of the Federal officer making the application; Presidential authorization and Attorney General approval of the application; the identity of the target of the surveillance; a statement by the applicant of the factual and circumstantial basis for the belief that the target is a foreign power or agent of a foreign power and that the location to be monitored is being used by a foreign power or agent of a foreign power; the proposed time period for the surveillance; information concerning previous surveillance applications that involve the same persons, facilities, or places; and certification by a high-level executive branch official that the purpose of the surveillance is to obtain foreign intelligence information and that this information cannot be obtained by normal investigative techniques. Also, the application must contain a statement of the proposed procedures for minimizing the acquisition, retention and dissemination of information concerning U.S. persons consistent with our country's need for foreign intelligence information. Lastly, additional information is required concerning surveillance techniques and the communications to be monitored, with the extent of the information required dependent on the type of target to be surveilled.

To review and approve these applications, H.R. 7308 creates a special court in Washington, D.C., made up of at least one judge from each of the Federal judicial circuits and a special court of appeals composed of six Federal judges from the Washington, D.C., area.

One of the primary criticisms of this legislation is directed at the involvement of the judiciary in the field of foreign intelligence. However, the judicial role established by H.R. 7308 is the same as is alrady the case in criminal and domestic security warrant procedures. In approving any kind of surveillance, the court does not make substantive judgments or policy decisions as to the propriety or need for that surveillance. What the court does do is to decide whether the facts contained in a warrant application meet the statutory criteria required for the particular type of surveillance.

Enactment of H.R. 7308 would establish congressional standards for foreign intelligence surveillance defining what targets may be surveilled, what information requirements justify a surveillance, and what controls must be applied to the information obtained. Specifically, under this bill a judge may only rule on—

Whether probable cause exists that the target is a foreign power or foreign agent, as defined in the bill, and that the location to be monitored is being used by a foreign power or foreign agent;

Whether the proposals for minimizing the retention or distribution of information satisfy the statutory standards; and

In the case of U.S. persons, whether the executive branch certification that the information sought is foreign intelligence information is "clearly erroneous" or not.

Thus, the judiciary will be operating within well-defined legislative limits under the provisions of H.R. 7308. However, if those limits prove to be inadequate, the Congress has the right, and the duty, to enact stronger and even more precise statutory standards.

Some observers have commented that the safeguards concerning foreign intelligence surveillance that have recently been established within the executive branch render this legislation unecessary. I would certainly acknowledge that these new procedures have substantially reduced the chances for abuse, but I would also point out that both the current administration and its predecessor have strongly endorsed legislative safeguards in this area. What is done by executive order can be undone by Executive order and we in the Congress have a responsibility, not only to ourselves as an institution but also to the people who sent us here, to fulfill our constitutional duty and to legislate national policy.

I urge the Members of this House to give H.R. 7308 a strong, and bipartisan, endorsement.

Mr. MURPHY of Illinois. Mr. Chairman, I yield 2 minutes to the gentleman from North Carolina (Mr. ROSE).

Mr. ROSE. Mr. Chairman, from all of the debate that we have heard here today, it might appear to some that we are about to require the intelligence community to go to this special court for the gathering of all its intelligence. That simply is not so. There is a great body of electronic intelligence information that is gathered constanty that will not come anywhere close to this legislation. And while I sincerely appreciate the concerns that have been expressed by those who oppose this legislation, I believe that the very strong arguments that have been made here today in support of what those charged with the responsibility of gathering this intelligence say they must have far outweighs the fears that some may have that this procedure may be cumbersome.

Mr. Chairman, I urge my colleagues to look at the fact that this bill is not the bill that passed the Senate 95 to 1.

With the great help of many of us on the committee, Mr. MCCLORY—and I at his side—we passed this bill with an amendment exempting, as the Senate did not do, the activities of the National Security Agency. Congressman MCCLORY alluded to that in his opening remarks here today. I wish we could describe in this place what has been excluded by that action. We cannot. I urge my colleagues to vote for this important legislation.

Mr. MURPHY of Illinois. Mr. Chairman, I yield 2 minutes to the gentleman from Nevada (Mr. SANTINI).

Mr. SANTINI. Mr. Chairman, I wish to speak briefly, since that is the inherent limitation of 120 seconds. I'll address the specific observations of the very able advocate from Ohio, Mr. ASHBROOK. He indicated that "signals" were being sent out. I can tell you that I have

been on the receiving end of some of those signals. The signal is, "SOS." The signal is, "Help." And the signal is coming from the Director of the FBI.

They need this bill. They need this help. That is the signal that ultimately I think anyone, on balance, would find persuasive in responding to the concerns that have been so well expressed by some of those in opposition to this legislation.

I will quote now from the written SOS that was sent to me from William H. Webster, Director of the FBI.

The letter follows:

WASHINGTON, D.C.,
*August 9, 1978.*

HON. JAMES SANTINI,
*House of Representatives,*
*Washington, D.C.*

DEAR CONGRESSMAN SANTINI: This will confirm your conversation yesterday with Inspector John B. Hotis, concerning my position on H.R. 7308, the Foreign Intelligence Surveillance Act.

I would like you to know that I support the bill as reported by the Permanent Select Committee on Intelligence. I so testified in closed session before that Committee having personally studied the bill in-depth. The Agents of this Bureau involved in foreign intelligence activities deserve and need this legislation in order that they can be assured that both Congress and the courts have sanctioned the legality and propriety of their actions. I believe this bill represents a careful and workable balance between the vital interests of protecting the national security and civil liberties.

For your further information, I have attached a copy of a fact sheet prepared by the Department of Justice which outlines the purposes and general provisions of the bill. Should you have any questions about the bill as it affects the FBI, I or a member of my staff would welcome the opportunity to discuss the matter further.

Sincerely yours,

WILLIAM H. WEBSTER,
*Director.*

Now, it is my hope that we in this body will not find ourselves caught up in the understandable preoccupation with the nuances and ignore the tremendous nuisance that is present, because of the existing impaired climate, of investigation for the FBI and the CIA.

I pursued this question personally with Inspector John B. Hotis on the phone. I asked the question that has been raised here, "Are you simply responding to internal administrative heat that is generated within the executive departments day in and day out?"

He said:

I am not. I am responding personally to a very critical national need that the FBI must respond to in this country, our national security.

He urged:

I hope Congressman Santini will support this bill. Again, he stated this is both my personal conviction and the official position of the FBI.

Mr. RUDD. Mr. Chairman, will the gentleman yield?

Mr. SANTINI. I am happy to yield to the gentleman from Arizona, who I know distinguished himself in employment in this very agency in former times.

Mr. RUDD. I thank my very distinguished barrister from Nevada for yielding me this time.

Let me ask him this, if I may: In this bill, is it really thrusting a responsibility on the courts again? Are we abdicating our responsibilities to allow the courts to judge whether or not we should issue a warrant to assure the security of our Nation? And if that is a possibility—and I think it is true—if it is a possibility, does this then act as a buffer for the President of the United States, the Attorney General of the United States, who can then point their fingers at the court if something goes wrong, because the court did not have all the facts or was not schooled in intelligence? Is it to give them the responsibility for having something go wrong where otherwise that responsibility should really rest with the President and the Attorney General of the United States?

The CHAIRMAN. The time of the gentleman from Nevada has expired.

Mr. McCLORY. Mr. Chairman, I yield 1 additional minute to the gentleman from Nevada.

Mr. SANTINI. The gentleman's question is a fair one. No one on this House floor at any time can answer that question unequivocally one way or the other. I would suggest that in this context I am willing to rest my hope and expectation and judgment in those who have the practical responsibility of implementing the national security needs of our Nation, the FBI, and CIA. They have the practical experience and the legislative duty to protect our Nation. In response to the gentleman's question, our investigation agencies need help. They are compelled to fulfill their duties in a confused and hazy legal environment. The Director of the FBI has turned to the Senate and the House with the plea, "Please help us," and I think this legislation is that help.

Mr. McCLORY. Mr. Chairman, I yield myself 3 minutes.

I take this time because some very significant statements have been made particularly by the gentleman from South Carolina, who made reference to the fact that this bill is substantially different from that which was passed over in the Senate, and yet we are making statements here today that this is a desirable bill because it passed overwhelmingly and with only one negative vote, and yet the bill was so bad we undertook to amend it by agreement on both sides of the aisle, and I laud the majority for their support of this very extremely significant amendment.

The question I ask myself is this: Why if this exemption is so important to one of the intelligence agencies, why is this exemption not important to the other intelligence agencies? I think that is a very difficult question to answer, particularly when we are targeting in on a foreign power or foreign agent, whether it is by the FBI or CIA or NSA, or any other of the intelligence agencies. It seems to me an important question to ask if we are desiring to secure the national security through intelligence information—and most of it is information. Then it seems to me that the other intelligence agencies should have the same exemption as the exemption we accorded to this one agency.

Let me say this: We have heard reference to the Post editorial this morning, and I think there is a great deal of misunderstanding about this. The Post editorial says this would enable 11 Federal judges to intervene before we begin any eavesdropping or wiretapping of American citizens in connection with national security. If that were the impact, if that were what this legislation were doing, I do not think I would be here opposing it.

What this legislation does is not to merely require a judicial warrant with respect to an American citizen. This bill requires a judicial warrant with respect to a foreign power, foreign entities, and foreign agents.

It seems to me if we want to provide for the protection of American citizens or U.S. persons—and that will be the subject of an amendment—then we will have the opportunity to protect U.S. persons against any electronic surveillance unless there is a warrant obtained.

But then I ask the question: Well, why do we need this new unprecedented special court arrangement? Do we need 11 judges gathered from all around the country in order to sit here in Washington, D.C., if we are only going to seek electronic surveillance intervention of a court with respect to U.S. persons?

It seems to me we should do the same as we do under title III and use the district court. There is nothing wrong with that. We do not need a special court. We can provide for protection of U.S. persons without the presence of this improvised court mechanism. Therefore, it seems to me the arguments made in support of this legislation just do not hold water insofar as U.S. persons or U.S. citizens are concerned.

Mr. MURPHY of Illinois. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. MINETA).

Mr. MINETA. Mr. Chairman, I rise to voice my full support for H.R. 7308, as reported by the House Permanent Select Committee on Intelligence, and to commend the chairman of the full committee, the chairman of the subcommittee, and my colleagues on the committee for their dedicated and statesmenlike work in crafting this importing legislation.

Though the legislative foundation for this bill was ably laid by the Subcommittee on Legislation, I and the other members of the full committee would have been remiss in our duty to the House and the country if we had not also subjected this bill to searching scrutiny.

In so doing, we conducted several days of markup over the period of a month. We heard from the heads of the intelligence agencies several times both in closed and open session. We were briefed by other interested parties.

As a result, we were able to perfect the already solid piece of legislation reported to us by the subcommittee.

The product of our efforts is now before us and it is deserving of our support.

Those officials charged with conducting our intelligence activities—Attorney General Bell, Admiral Turner, Admiral Murphy, Admiral Inman, Director Webster—say that the bill would help them conduct legitimate and necessary intelligence activities and poses no threat of harm to the national security. I take them at their word.

Of equal importance, the bill will protect the civil liberties of our citizens and prevent the recurrence of past abuses.

Before any American citizen or permanent resident alien can be subjected to electronic surveillance for national security reasons, a judge must find probable cause to believe that he is an agent of a foreign power engaged in clandestine intelligence activities, sabotage, or terrorism and that his activities are connected with a violation of the criminal statutes.

Before any information concerning an American citizen or permanent resident alien, derived from any foreign intelligence electronic surveillance, can be disseminated within or without the Government, or used for any purpose, such dissemination or use must be in conformity with procedures approved by a judge.

No longer will it be possible for 17 newsmen and Government employees to be wiretapped at the whim of executive officials.

No longer will the Executive be able to use an embassy surveillance as a pretext to collect political or personal information on Americans who communicate with an embassy.

And no longer will Americans find themselves on a hit list that insures that their international communications will be intercepted solely because they are engaging in antiwar activities.

Some may argue that, yes, these abuses did occur, and it is regrettable; but they are not occurring now, so, do we need any legislation?

To this, I would reply that the times and political climate will change again. That change may not come tomorrow, or next year, but it will come. It is to that time, 5, 10, 15 years from now, or whenever it might ever come, to which we must also address ourselves. There must be a check on the unbridled exercise of executive branch discretion—and the best check is a neutral and impartial magistrate applying congressionally enacted standards to executive requests for electronic surveillance orders.

The bill, of course, also addresses itself to the present time, and to the capability of the intelligence agencies to carry out their important functions.

At the present time, there is a considerable amount of needed intelligence not being collected.

It is not being collected because of the uncertainties of current law and the vagaries of the political climate. Intelligence officials and agents are constantly subjected to civil suits and held up to public scorn. What was legal one day is considered unconscionable the next. In such a climate, any sensible person would be chary of performing his duties aggressively.

Thus, it is time to settle that law relating to foreign intelligence electronic surveillance once and for all.

It is time to enact legislation that will state clearly what can be done and what cannot be done.

It is time to provide both our people and our intelligence agents with the protections a judicial warrant will afford them.

In conclusion, Mr. Chairman, I would say to my colleagues that the bill before the House today provides us with a unique opportunity to protect and further both our civil liberties and our national security.

The civil liberties groups support it. The administration supports it. The intelligence agencies enthusiastically support it. Such a consensus is rare in these times. This opportunity to enact good legislation should not be lost because of the unsupported claims of a few well-meaning individuals who seem to suggest that their knowledge and grasp of our intelligence collection activities exceed that of those intelligence community officials whose daily task it is to protect the security of our country.

I urge that H.R. 7308, as reported by the Select Committee on Intelligence, be passed.

Mr. McCLORY. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, I have yielded myself this time because I want to respond to another charge that was made and that is that the FBI and the FBI agents need this legislation in order to protect themselves. Let me say we have pending before the Judiciary Committee the Federal Tort Claims Act Amendments which are intended to protect FBI agents and all intelligence agents, all intelligence officers, all law enforcement officers of the Federal Government, against actions that are brought against them where they are acting in good faith and within the scope of their authority. That is desirable legislation. As a matter of fact, that is inherent in the substitute bill that I have, as well, because it is true that we do need to translate the existing executive order guidelines into appropriate legislation.

Mr. Chairman, I would like to point out that when the Attorney General testified before our committee on January 10, 1978, he stated with respect to my substitute bill:

> I have nothing against Congressman McCLORY's bill. That would be an improvement over the present system. The question is do we want to bring the Judiciary in?

That is indeed the question, do we want to bring the Judiciary in, do we want to have the Judiciary act as interceptors between the authority that the executive has, in my view, the inherent power to exercise, and the exercise of that authority? Do we want to put that ultimate decisionmaking authority in the Judiciary and not in the executive where it has traditionally been?

I can assure the Members that the bill I am supporting, the substitute bill, would impose that responsibility on the executive. It would provide the kind of protection that we want, so that they can carry out these important intelligence activities.

The CHAIRMAN. The time of the gentleman has expired.

Mr. McCLORY. I yield myself 1 additional minute.

Mr. Chairman, I have yielded myself this additional time because I noticed that the gentleman from Virginia (Mr. ROBINSON) left the floor and did not have an opportunity to express himself in support of this legislation. However, I also want to point out that, as a member of the Committee on Intelligence, the gentleman from Virginia (Mr. ROBINSON) is in strong support of this legislation and, if present, he would be expressing himself, in his own way, in support of the measure and in opposition to the committee bill and in support of the substitute.

The CHAIRMAN. The time of the gentleman has again expired.

● Mr. WEISS. Mr. Chairman, for the benefit of our colleagues in their deliberations on H.R. 7308, the Foreign Intelligence Surveillance Act, I would like to share with them an article authored by our distinguished colleague, the gentleman from Massachusetts (Mr. DRINAN), which was printed in the September 1 Boston Globe.

The article follows:

[From the Boston Globe, Sept. 1, 1978]

WIRETAP BILL AN ATTACK ON FOREIGNERS

(By Robert F. Drinan)

On Thursday the US House of Representatives is expected to pass the Foreign Intelligence Surveillance Act (HR-7308). This bill will allow the CIA and the FBI to wiretap any agent of a foreign power with a warrant obtained from a federal judge on the contention that information from the wiretap would be helpful in formulating US foreign policy.

This measure, already passed by the Senate, is billed as a "reform" of the existing CIA practice of clandestinely wiretapping the Washington embassies of hostile nations. The introduction of the warrant requirement is deemed to be an improvement in a system of intelligence gathering alleged to be essential to national security.

The dismaying fact is, however, that the passage of HR-7308 will be a calamity. It will legalize largely useless wiretaps, erode the Fourth Amendment regulating the right of search and seizure and institutionalize the nation's worst xenophobic prejudices.

Proponents of the bill rely upon the unproven assumption that wiretapping yields information indispensable to the protection of our national security. No evidence has ever been offered to support this position in the extended hearings conducted over a period of three years by a House Judiciary subcommittee. When pressed for specifics, intelligence agents assert the sacredness of their secrets.

Confronted with this series of closed circles, those who want to control the appalling abuses of the intelligence agencies conclude that the agencies are determined to continue their surveillance and that therefore even an unorthodox warrant from a court offers some control of the frightening invasions of privacy which are now in place.

Even the American Civil Liberties Union, foe of all wiretapping before and after it was legalized for suspected criminals by Congress in 1968, has acquiesced in the specious and erroneous reasoning that somehow the establishment of secret court proceedings will control clandestine eavesdropping. And yet the grim fact is that the requirement of a meaningless judicial warrant for a wiretap will allow the CIA to deepen its refusal to

talk by transferring the responsibility to the courts. At the same time the courts will cite the Draconian penalties in HR–7308 for judges who mention anything about their secret dealings with intelligence agents in their chambers.

Most civil libertarians in the Congress have capitulated to the delusion that warrants that judges cannot refuse will clean up surveillances we cannot control, and ironically most of the opposition to the very bad idea of involving a small number of federal judges in the legalization of tapping foreigners' phones comes from members of Congerss who feel that the President, the National Security Council and the CIA have inherent constitutional power to maintain our national security and that this power should not be limited by judicial restrictions.

The clamor for "reform" of the intelligence agencies has reached such a point of hysteria that most people do not recognize that HR–7308:

Imposes duties on federal courts totally at variance with the "case or controversy" always hitherto required for judicial intervention.

Contains no requirement that Americans whose conversations are unavoidably or inadvertently recorded be informed of the invasion of their privacy.

Violates the Vienna Treaty ratified by the Senate in which this nation pledged that diplomatic missions in this country would be "inviolable."

I will offer amendments to HR–7308 on the House floor. One amendment will support the request of the telephone industry for the deletion of a provision compelling communications employees to participate in arranging a clandestine wiretap. Another will propose a sunset provision so that this frightening experiment on our innermost thoughts will terminate after five years. As a House-Senate conferee. I will seek other ways to improve this bill.

Even if these amendments and improvements prevail, HR–7308 will still be a perversion of the Fourth Amendment, a radical departure from any established norm in American jurisprudence and an abject sellout by Congress and the Administration to the imperious and unjustifiable demands of the CIA and the FBI.●

● Mr. SEIBERLING. Mr. Chairman, I support the Intelligence Committee's bill and I commend the chairman (Mr. BOLAND) for developing an excellent compromise bill which protects individual rights without jeopardizing our legitimate national security interests in any way.

Just 2 years ago, I had the honor of serving as a member of the National Wiretap Commission. Several other members of the Commission and I tried in vain to get the Commission to review national security wiretap practices and procedures. The Intelligence Committee has now conducted just such a review and its conclusions support the views expressed in the National Wiretap Commission report by Mr. KASTENMEIER, Senator ABOUREZK, and me, along with Commissioner Alan F. Westin, who is perhaps the Nation's leading expert in the right of privacy. We made the following statement, which explains my support for the Intelligence Committee's bill:

"Security is like liberty," Supreme Court Justice Robert H. Jackson once wrote, "in that many crimes are committed in its name."

"National Security" wiretapping is probably the most easily abused area of electronic surveillance. The public record is replete with abuses during the period 1968–1974. . . .

Warrantless electronic surveillance cannot be constitutionally justified by a mere assertion of the magic words "national security," a vague phrase subject to differing interpretations. . . .

The record developed by the House Judiciary Committee during the impeachment proceedings is filled with evidence of abuses involving "national security" wiretaps against newsmen, against past and present employees of the National Security Council and against employees of the White House without access to NSC information. . . .

We support a warrant procedure for all electronic surveillance, including security wiretaps. We are not ready to say absolutely that the specific procedures to be followed should be the same in national security cases as in criminal investigations. But we do feel very strongly that there must be some system of accountability, with proper checks and balances. As long as the President and his designees have absolute, unreviewable discretion in this area, there will remain an unreasonable likelihood of abuse. Such a claim of unbridled power is inconsistent with the Constitution and the public interest.

Finally, we believe that national security wiretaps may be necessary in certain circumstances. We believe that the concept of national security, however, has been so abused by recent presidents that the public has little confidence when a President claims an action—whether foreign or domestic—is based upon national security grounds. The best place to begin restoring public confidence, we believe, is in the area of electronic surveillance for national security purposes. Judicial security of national security wiretaps is, in our opinion, necessary from a constitutional standpoint and an appropriate way to restore public confidence in our governmental institutions.●

Mr. MURPHY of Illinois. Mr. Chairman, I have no additional requests for time.

The CHAIRMAN. Does the gentleman yield back the balance of his time?

Mr. MURPHY of Illinois. I do, Mr. Chairman.

The CHAIRMAN. Does the gentleman from Illinois (Mr. MCCLORY) yield back the balance of his time?

Mr. MCCLORY. Yes, Mr. Chairman, I have no further requests for time.

The CHAIRMAN. All time has expired.

Pursuant to the rule, the Clerk will now read, by title, the substitute committee amendment recommended by the Permanent Select Committee on Intelligence now printed in the bill as an original bill for the purpose of amendment; said substitute shall be read for amendment by titles instead of by sections. No amendment to said substitute shall be in order except germane amendments printed in the CONGRESSIONAL RECORD at least 3 legislative days before their consideration, pro forma amendments for the purpose of debate, and amendments recommended by the Permanent Select Committee on Intelligence. It shall be in order to consider en bloc amendments to said substitute printed in the CONGRESSIONAL RECORD of July 17 by Representative MCCLORY of Illinois.

The Clerk will read.

H.R. 7308

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Foreign Intelligence Surveillance Act of 1978".

TABLE OF CONTENTS

TITLE I—ELECTRONIC SURVEILLANCE WITHIN THE UNITED STATES FOR FOREIGN INTELLIGENCE PURPOSES

Sec. 101. Definitions.
Sec. 102. Authorization for electronic surveillance for foreign intelligence purposes.
Sec. 103. Special courts.
Sec. 104. Application for an order.
Sec. 105. Issuance of an order.
Sec. 106. Use of information.
Sec. 107. Report of electronic surveillance.
Sec. 108. Congressional oversight.
Sec. 109. Penalties.
Sec. 110. Civil liability.

TITLE II—CONFORMING AMENDMENTS

Sec. 201. Amendments to chapter 119 of title 18, United States Code.

TITLE III—EFFECTIVE DATE

Sec. 301. Effective date.

TITLE I—ELECTRONIC SURVEILLANCE WITHIN THE UNITED STATES FOR FOREIGN INTELLIGENCE PURPOSES

DEFINITIONS

SEC. 101. As used in this title:

(a) "Foreign power" means—

(1) a foreign government or any component thereof, whether or not recognized by the United States;

(2) a faction of a foreign nation or nations, not substantially composed of United States persons;

(3) an entity that is openly acknowledged by a foreign government or governments to be directed and controlled by such foreign government or governments;

(4) a group engaged in international terrorism or activities in preparation therefor;

(5) a foreign-based political organization, not substantially composed of United States persons; or

(6) an entity that is directed and controlled by a foreign government or governments.

(b) "Agent of a foreign power" means—

(1) any person other than a United States person, who—

(A) acts in the United States as an officer, member, or employee of a foreign power; or

(B) acts for or on behalf of a foreign power which engages in clandestine intelligence activities in the United States contrary to the interests of the United States, when the circumstances of such person's presence in the United States indicate that such person may engage in such activities in the United States, or when such person knowingly aids or abets any person in the conduct of such activities or knowingly conspires with any person to engage in such activities; or

(2) any person who—

(A) knowingly engages in clandestine intelligence gathering activities for or on behalf of a foreign power, which activities involve or may involve a violation of the criminal statutes of the United States;

(B) pursuant to the direction of an intelligence service or network of a foreign power, knowingly engages in any other clandestine intelligence activities for or on behalf of such foreign power, which activities involve or are about to involve a violation of the criminal statutes of the United States;

(C) knowingly engages in sabotage or international terrorism, or activities that are in preparation therefor, for or on behalf of a foreign power; or

(D) knowingly aids or abets any person in the conduct of activities described in subparagraph (A), (B), or (C) or knowingly conspires with any person to engage in activities described in subparagraph (A), (B), or (C).

(c) "International terrorism" means activities that—

(1) involve violent acts or acts dangerous to human life that are or may be a vio-

lation of the criminal laws of the United States or of any State, or that might involve a criminal violation if committed within the jurisdiction of the United States or any State;

(2) appear to be intended—

(A) to intimidate or coerce a civilian population;

(B) to influence the policy of a government by intimidation or coercion; or

(C) to affect the conduct of a government by assassination or kidnapping; and

(3) occur totally outside the United States, or transcend national boundaries in terms of the means by which they are accomplished, the persons they appear intended to coerce or intimidate, or the locale in which their perpetrators operate or seek asylum.

(d) "Sabotage" means activities that involve or may involve a violation of chapter 105 of title 18, United States Code, or that might involve such a violation if committed against the United States.

(e) "Foreign intelligence information" means—

(1) information that relates to and, if concerning a United States person, is necessary to the ability of the United States to protect against—

(A) actual or potential attack or other grave hostile acts of a foreign power or an agent of a foreign power;

(B) sabotage or international terrorism by a foreign power or an agent of a foreign power; or

(C) clandestine intelligence activities by an intelligence service or network of a foreign power or by an agent of a foreign power; or

(2) information with respect to a foreign power or foreign territory that relates to and, if concerning a United States person, is necessary to—

(A) the national defense or the security of the United States; or

(B) the conduct of the foreign affairs of the United States.

(f) "Electronic surveillance" means—

(1) the acquisition by an electronic, mechanical, or other surveillance device of the contents of any wire or radio communication sent by or intended to be received by a particular, known United States person who is in the United States, if the contents are acquired by intentionally targeting that United States person, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes;

(2) the acquisition by an electronic, mechanical, or other surveillance device of the contents of any wire communication to or from a person in the United States, without the consent of any party thereto, if such acquisition occurs in the United States;

(3) the intentional acquisition by an electronic, mechanical, or other surveillance device of the contents of any radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes, and if both the sender and all intended recipients are located within the United States; or

(4) the installation or use of an electronic, mechanical, or other surveillance device in the United States for monitoring to acquire information, other than from a wire or radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes.

(g) "Attorney General" means the Attorney General of the United States (or Acting Attorney General) or the Deputy Attorney General.

(h) "Minimization procedures", with respect to electronic surveillance, means—

(1) specific procedures, which shall be adopted by the Attorney General, that are reasonably designed in light of the purpose and technique of the particular surveillance, to minimize the acquisition, retention, and dissemination of nonpublicly available information concerning unconsenting United States persons consistent with the need of the United States to obtain, produce, and disseminate foreign intelligence information;

(2) procedures that require that nonpublicly available information, which is not foreign intelligence information, as defined in subsection (e)(1), shall not be disseminated in a manner that identifies any individual United States person, without such person's consent, unless such person's identity is necessary to understand foreign intelligence information or assess its importance;

(3) notwithstanding paragraphs (1) and (2), procedures that allow for the retention and dissemination of information that is evidence of a crime which has been, is being, or is about to be committed and that is to be retained or disseminated for the purpose of preventing the crime or enforcing the criminal law; and

(4) notwithstanding paragraphs (1), (2), and (3), with respect to any electronic surveillance approved pursuant to section 102(a), procedures that require that no contents of any communication to which a United States person is a party shall be disclosed, disseminated, or used for any purpose or retained for longer than twenty-four hours unless a court order under section 105 is obtained or unless the Attorney General determines that the information may indicate a threat of death or serious bodily harm to any person.

(i) "United States person" means a citizen of the United States, an alien lawfully admitted for permanent residence (as defined in section 101(a)(20) of the Immigration and Nationality Act), an unincorporated association a substantial number of members of which are citizens of the United States or aliens lawfully admitted for permanent residence, or a corporation which is incorporated in the United States, but does not include a corporation or an association which is a foreign power, as defined in subsection (a)(1), (2), or (3).

(j) "United States", when used in a geographic sense, means all areas under the territorial sovereignty of the United States and the Trust Territory of the Pacific Islands.

(k) "Aggrieved person" means a person who is the target of an electronic surveillance or any other person whose communications or activities were subject to electronic surveillance.

(l) "Wire communication" means any communication while it is being carried by a wire, cable, or other like connection furnished or operated by any person engaged as a common carrier in providing or operating such facilities for the transmission of interstate or foreign communications.

(m) "Person" means any individual, including any officer or employee of the Federal Government, or any group, entity, association, corporation, or foreign power.

(n) "Contents", when used with respect to a communication, includes any information concerning the identity of the parties to such communication or the existence, substance, purport, or meaning of that communication.

AUTHORIZATION FOR ELECTRONIC SURVEILLANCE FOR FOREIGN INTELLIGENCE PURPOSES

SEC. 102. (a)(1) Notwithstanding any other law, the President, through the Attorney General, may authorize electronic surveillance without a court order under this title to acquire foreign intelligence information for periods of up to one year if the Attorney General certifies in writing under oath that—

(A) the electronic surveillance is solely directed at—

(i) communications exclusively between or among foreign powers, as defined in section 101(a)(1), (2), or (3); or

(ii) the acquisition of technical intelligence from property or premises under the open and exclusive control of a foreign power, as defined in section 101(a)(1), (2), or (3); and

(B) the proposed minimization procedures with respect to such surveillance meet the definition of minimization procedures under section 101(h); and

if the Attorney General shall report such minimization procedures and any changes thereto to the House Permanent Select Committee on Intelligence and the Senate Select Committee on Intelligence at least thirty days prior to their effective date, unless the Attorney General determines immediate action is required and notifies the committees immediately of such minimization procedures and the reason for their becoming effective immediately.

(2) An electronic surveillance authorized by this subsection may be conducted only in accordance with the Attorney General's certification and the minimization procedures adopted by him.

(3) With respect to electronic surveillance authoriz d by this subsection, the Attorney General may direct a specified communication common carrier to—

(A) furnish all information, facilities, or technical assistance necessary to accomplish the electronic surveillance in such a manner as will protect its secrecy and produce a minimum of interference with the services that such carrier is providing its customers; and

(B) maintain under security procedures approved by the Attorney General and the Director of Central Intelligence any records concerning the surveillance or the aid furnished which such carrier wishes to retain.

The Government shall compensate, at the prevailing rate, such carrier for furnishing such aid.

(b) Applications for a court order under this title are authorized if the President has, by written authorization, empowered the Attorney General to approve applications to the Special Court having jurisdiction under section 103, and a judge to whom an application is made may, notwithstanding any other law, grant an order, in conformity with section 105, approving electronic surveillance of a foreign power or an agent of a foreign power for the purpose of obtaining foreign intelligence information, except that the Special Court shall not have jurisdiction to grant any order approving electronic surveillance directed solely as described in paragraph (1)(A) of subsection (a) unless such surveillance may involve the acquisition of communications of any United States person.

SPECIAL COURTS

SEC. 103. (a) There is established a Special Court of the United States with jurisdiction throughout the United States to carry out the judicial duties of this title. The Chief Justice of the United States shall publicly designate at least one judge from each of the judicial circuits, nominated by the chief judges of the respective circuits, who shall be members of the Special Court and one of whom the Chief Justice shall publicly designate as the chief judge. The Special Court shall sit continuously in the District of Columbia.

(b) There is established a Special Court of Appeals with jurisdiction to hear appeals from decisions of the Special Court and any other matter assigned to it by this title. The Chief Justice shall publicly designate six judges, one of whom shall be publicly designated as the chief judge, from among judges nominated by the chief judges of the district courts of the District of Columbia, the Eastern District of Virginia and the District of Maryland, and the United States Court of Appeals for the District of Columbia, any three of whom shall constitute a panel for purposes of carrying out its duties under this title.

(c) The judges of the Special Court and the Special Court of Appeals shall be designated for six-year terms, except that the Chief Justice shall stagger the terms of the members originally chosen. No judge may serve more than two full terms.

(d) The chief judges of the Special Court and the Special Court of Appeals shall, in consultation with the Attorney General and the Director of Central Intelligence, establish such document, physical, personnel, or communications security measures as are necessary to protect information submitted to or produced by the Special Court or Special Court of Appeals from unauthorized disclosure.

(e) Proceedings under this title shall be conducted as expeditiously as possible. If any application to the Special Court is denied, the court shall record the reasons for that denial, and the reasons for that denial shall, upon the motion of the party to whom the application was denied, be transmitted under seal to the Special Court of Appeals.

(f) Decisions of the Special Court of Appeals shall be subject to review by the Supreme Court of the United States in the same manner as a judgment of a United States court of appeals as provided in section 1254 of title 28, United States Code, except that the Supreme Court may adopt special procedures with respect to security appropriate to the case.

(g) The Chief Judges of the Special Court and the Special Court of Appeals may, in consultation with the Attorney General and Director of Central Intelligence and consistent with subsection (d)—

(1) designate such officers or employees of the Government, as may be necessary, to serve as employees of the Special Court and Special Court of Appeals; and

(2) promulgate such rules or administrative procedures as may be necessary to the efficient functioning of the Special Court and Special Court of Appeals.

Any funds necessary to the operation of the Special Court and the Special Court of Appeals may be drawn from appropriations for the Department of Justice. The Department of Justice shall provide such fiscal and administrative services as may be necessary for the Special Court and Special Court of Appeals.

APPLICATION FOR AN ORDER

SEC. 104. (a) Each application for an order approving electronic surveillance under this title shall be made by a Federal officer in writing upon oath or affirmation to a judge having jurisdiction under section 103. Each application shall require the approval of the Attorney General based upon his finding that it satisfies the criteria and requirements of such application as set forth in this title. It shall include—

(1) the identity of the Federal officer making the application;

(2) the authority conferred on the Attorney General by the President of the United States and the approval of the Attorney General to make the application;

(3) the identity, if known, or a description of the target of the electronic surveillance;

(4) a statement of the facts and circumstances relied upon by the applicant to justify his belief that—

(A) the target of the electronic surveillance is a foreign power or an agent of a foreign power; and

(B) each of the facilities or places at which the electronic surveillance is directed is being used, or is about to be used, by a foreign power or an agent of a foreign power;

(5) a statement of the proposed minimization procedures;

(6) a detailed description of the nature of the information sought and the type of communications or activities to be subjected to the surveillance;

(7) a certification or certifications by the Assistant to the President for National Security Affairs or an executive branch official or officials designated by the President from among those executive officers employed in the area of national security or defense and appointed by the President with the advice and consent of the Senate—

(A) that the certifying official deems the information sought to be foreign intelligence information;

(B) that the purpose of the surveillance is to obtain foreign intelligence information;

(C) that such information cannot reasonably be obtained by normal investigative techniques;

(D) that designates the type of foreign intelligence information being sought according to the categories described in section 101(e); and

(E) including a statement of the basis for the certification that—

(i) the information sought is the type of foreign intelligence information designated; and

(ii) such information cannot reasonably be obtained by normal investigative techniques;

(8) a statement of the means by which the surveillance will be affected;

(9) a statement of the facts concerning all previous applications that have been made to any judge under this title involving any of the persons, facilities, or places specified in the application, and the action taken on each previous application;

(10) a statement of the period of time for which the electronic surveillance is required to be maintained, and if the nature of the intelligence gathering is such that the approval of the use of electronic surveillance under this title should not automatically terminate when the described type of information has first been obtained, a description of facts supporting the belief that additional information of the same type will be obtained thereafter; and

(11) whenever more than one electronic, mechanical or other surveillance device is to be used with respect to a particular proposed electronic surveillance, the coverage of the devices involved and what minimization procedures apply to information acquired by each device.

(b) Whenever the target of the electronic surveillance is a foreign power, as defined in 101(a) (1), (2), or (3), and each of the facilities or places at which the surveillance is directed is owned, leased, or exclusively used by that foreign power, the application need not contain the information required by paragraphs (6), (7)(E), (8), and (11) of subsection (a), but shall contain such information about the surveillance techniques and communications or other information concerning United States persons likely to be obtained as may be necessary to assess the proposed minimization procedures.

(c) The Attorney General may require any other affidavit or certification from any other officer in connection with the application.

(d) The judge may require the applicant to furnish such other information as may be necessary to make the determination required by section 105.

ISSUANCE OF AN ORDER

SEC. 105. (a) Upon an application made pursuant to section 104, the judge shall enter an ex parte order as requested or as modified approving the electronic surveillance if he finds that—

(1) the President has authorized the Attorney General to approve applicants for electronic surveillance for foreign intelligence information;

(2) the application has been made by a Federal officer and approved by the Attorney General;

(3) on the basis of the facts submitted by the applicant there is probable cause to believe that—

(A) the target of the electronic surveillance is a foreign power or an agent of a foreign power: Provided, That no United States person may be considered a foreign power or an agent of a foreign power solely upon the basis of activities protected by the first amendment to the Constitution of the United States; and

(B) each of the facilities or places at which the electronic surveillance is directed is being used, or is about to be used, by a foreign power or an agent of a foreign power;

(4) the proposed minimization procedures meet the definition of minimization procedures under section 101(h); and

(5) the application which has been filed contains all statements and certifications required by section 104 and, if the target is a United States person, the certification or certifications are not clearly erroneous on the basis of the statement made under section 104(a)(7)(E) and any other information furnished under section 104(d).

(b) An order approving an electronic surveillance under this section shall—

(1) specify—

(A) the identity, if known, or a description of the target of the electronic surveillance;

(B) the nature and location of each of the facilities or places at which the electronic surveillance will be directed;

(C) the type of information sought to be acquired and the type of communications or activities to be subjected to the surveillance;

(D) the means by which the electronic surveillance will be effected;

(E) the period of time during which the electronic surveillance is approved; and

(F) whenever more than one electronic, mechanical, or other surveillance device is to be used under the order, the authorized coverage of the devices involved and what minimization procedures shall apply to information subject to acquisition by each device; and

(2) direct—

(A) that the minimization procedures be followed;

(B) that, upon the request of the applicant, a specified communication or other common carrier, landlord, custodian, or other specified person furnish the applicant forthwith any and all information, facilities, or technical assistance necessary to accomplish the electronic surveillance in such manner as will protect its secrecy and produce a minimum of interference with the services that such carrier, landlord, custodian, or other person is providing that target of electronic surveillance;

(C) that such carrier, landlord, custodian, or other person maintain under security procedures approved by the Attorney General and the Director of Central Intelligence any records concerning the surveillance or the aid furnished that such person wishes to retain; and

(D) that the applicant compensate, at the prevailing rate, such carrier, landlord, custodian, or other person for furnishing such aid.

(c) Whenever the target of the electronic surveillance is a foreign power, as defined in section 101(a) (1), (2), or (3), and each of the facilities or places at which the surveillance is directed is owned, leased, or exclusively used by that foreign power, the order need not contain the information required by subparagraphs (C), (D), and (F) of subsection (b)(1), but shall generally describe the information sought, the communications or activities to be subjected to the surveillance, and the type of electronic surveillance involved, including whether physical entry is required.

(d)(1) An order issued under this section may approve an electronic surveillance for the period necessary to achieve its purpose,

or for ninety days, whichever is less, except that an order under this section shall approve an electronic surveillance targeted against a foreign power, as defined in section 101(a)(1), (2), or (3), for the period specified in the application or for one year, whichever is less.

Extensions of an order issued under this title may be granted on the same basis as an original order upon an application for an extension and new findings made in the same manner as required for an original order, except that an extension of an order under this chapter for a surveillance targeted against a foreign power, as defined in section 101(a)(4), (5), or (6), may be for a period not to exceed one year if the judge finds probable cause to believe that no communication of any individual United States person will be acquired during the period.

(3) At the end of the period of time for which electronic surveillance is approved by an order or an extension, the judge may assess compliance with the minimization procedures by reviewing the circumstances under which information concerning United States persons was acquired, retained, or disseminated.

(e) Notwithstanding any other provision of this title, when the Attorney General reasonably determines that—

(1) an emergency situation exists with respect to the employment of electronic surveillance to obtain foreign intelligence information before an order authorizing such surveillance can with due diligence be obtained; and

(2) the factual basis for issuance of an order under this title to approve such surveillance exists;

he may authorize the emergency employment of electronic surveillance if a judge designated pursuant to section 103 is informed by the Attorney General or his designee at the time of such authorization that the decision has been made to employ emergency electronic surveillance and if an application in accordance with this title is made to that judge as soon as practicable, but not more than twenty-four hours after the Attorney General authorizes such surveillance. If the Attorney General authorizes such emergency employment of electronic surveillance, he shall require that the minimization procedures required by this title for the issuance of a judicial order be followed. In the absence of a judicial order approving such electronic surveillance, the surveillance shall terminate when the information sought is obtained, when the application for the order is denied, or after the expiration of twenty-four hours from the time of authorization by the Attorney General, whichever is earliest. In the event that such application for approval is denied, or in any other case where the electronic surveillance is terminated and no order is issued approving the surveillance, no information obtained or evidence derived from such surveillance shall be received in evidence or otherwise disclosed in any trial, hearing, or other proceeding in or before any court, grand jury, department, office, agency, regulatory body, legislative committee, or other authority of the United States, a State, or political subdivision thereof, and no information concerning any United States person acquired from such surveillance shall subsequently be used or disclosed in any other manner by Federal officers or employees without the consent of such person, except with the approval of the Attorney General if the information may indicate a threat of death or serious bodily harm to any person. A denial of the application made under this subsection may be reviewed as provided in section 103.

(f) Notwithstanding any other provision of this title, officers, employees, or agents of the United States are authorized in the normal course of their official duties to conduct electronic surveillance not targeted against the communications of any particular person or persons, under procedures approved by the Attorney General, solely to—

(1) test the capability of electronic equipment, if—

(A) it is not reasonable to obtain the consent of the persons incidentally subjected to the surveillance;

(B) the test is limited in extent and duration to that necessary to determine the capability of the equipment; and

(C) the contents of any communication acquired are retained and used only for the purpose of determining the capability of the equipment, are disclosed only to test personnel, and are destroyed before or immediately upon completion of the test;

(2) determine the existence and capability of electronic surveillance equipment being used by persons not authorized to conduct electronic surveillance, if—

(A) it is not reasonable to obtain the consent of persons incidentally subjected to the surveillance;

(B) such electronic surveillance is limited in extent and duration to that necessary to determine the existence and capability of such equipment; and

(C) any information acquired by such surveillance is used only to enforce chapter 119 of title 18, United States Code, or section 605 of the Communications Act of 1934, or to protect information from unauthorized surveillance; or

(3) train intelligence personnel in the use of electronic surveillance equipment, if—

(A) it is not reasonable to—

(i) obtain the consent of the persons incidentally subjected to the surveillance;

(ii) train persons in the course of surveillances otherwise authorized by this title; or

(iii) train persons in the use of such equipment without engaging in electronic surveillance;

(B) such electronic surveillance is limited in extent and duration to that necessary to train the personnel in the use of the equipment; and

(C) no contents of any communication acquired are retained or disseminated for any purpose, but are destroyed as soon as reasonably possible.

(g) Certifications made by the Attorney General pursuant to section 102(a) and applications made and orders granted under this title shall be retained in accordance with the security procedures established pursuant to section 103 for a period of at least ten years from the date of the application.

USE OF INFORMATION

SEC. 106. (a) Information acquired from an electronic surveillance conducted pursuant to this title concerning any United States person may be used and disclosed by Federal officers and employees without the consent of the United States person only in accordance with the minimization procedures required by this title. No otherwise privileged communication obtained in accordance with, or in violation of, the provisions of this title shall lose its privileged character. No information acquired from an electronic surveillance pursuant to this title may be used or disclosed by Federal officers or employees except for lawful purposes.

(b) No information acquired pursuant to this title shall be disclosed for law enforcement purposes unless such disclosure is accompanied by a statement that such information, or any information derived therefrom, may only be used in a criminal proceeding with the advance authorization of the Attorney General.

(c) Whenever the Government intends to enter into evidence or otherwise use or disclose in any trial, hearing, or other proceeding in or before any court, department, officer, agency, regulatory body, or other authority of the United States, against an aggrieved person, any information obtained or derived from an electronic surveillance of that aggrieved person pursuant to the authority of this title, the Government shall, prior to the trial, hearing, or other proceeding or at a reasonable time prior to an effort to so disclose or so use that information or submit it in evidence, notify the aggrieved person and the court or other authority in which the information is to disclosed or used that the Government intends to so disclose or so use such information.

(d) Whenever any State or political subdivision thereof intends to enter into evidence or otherwise use or disclose in any trial, hearing, or other proceeding in or before any court, department, officer, agency, regulatory body, or other authority of a State or a political subdivision thereof, against an aggrieved person any information obtained or derived from an electronic surveillance of that aggrieved person pursuant to the authority of this title, the State or political subdivision thereof shall notify the aggrieved person, the court or other authority in which the information is to be disclosed or used, and the Attorney General that the State or political subdivision thereof intends to so disclose or so use such information.

(e) Any person against whom evidence obtained or derived from an electronic surveillance to which he is an aggrieved person is to be, or has been, introduced or otherwise used or disclosed in any trial, hearing, or other proceeding in or before any court, department, officer, agency, regulatory body, or other authority of the United States, a State, or a political subdivision thereof, may move to suppress the evidence obtained or derived from such electronic surveillance on the grounds that—

(1) the information was unlawfully acquired; or

(2) the surveillance was not made in conformity with an order of authorization or approval.

Such a motion shall be made before the trial, hearing, or other proceeding unless there was no opportunity to make such a motion or the person was not aware of the grounds of the motion.

(f) Whenever a court or other authority is notified pursuant to subsection (c) or (d), or whenever a motion is made pursuant to subsection (e) and the Government concedes that information obtained or derived from an electronic surveillance pursuant to the authority of this title as to which the moving party is an aggrieved person is to be, or has been, introduced or otherwise used or disclosed in any trial, hearing, or other proceeding, the Government may make a motion before the Special Court to determine the lawfulness of the electronic surveillance. Unless all the judges of the Special Court are so disqualified, the motion may not be heard by a judge who granted or denied an order or extension involving the surveillance at issue. Such motion shall stay any action in any court or authority to determine the lawfulness of the surveillance. In determining the lawfulness of the surveillance, the Special Court shall, notwithstanding any other law, if the Attorney General files an affidavit under oath with the Special Court that disclosure would harm the national security of the United States or compromise foreign intelligence sources and methods, review in camera the application, order, and such other materials relating to the surveillance as may be necessary to determine whether the surveillance of the aggrieved person was lawfully authorized and conducted. In making this determination, the Special Court may disclose to the aggrieved person, under appropriate security procedures and protective orders, portions of the application, order, or other materials if there is a reasonable question as to the legality of the sur-

veillance and if disclosure would likely promote a more accurate determination of such legality, or if such disclosure would not harm the national security.

(g) Except as provided in subsection (f), whenever any motion or request is made pursuant to any statute or rule of the United States or any State before any court or other authority of the United States or any State to discover or obtain applications or orders or other materials relating to surveillance pursuant to the authority of this title or to discover, obtain, or suppress any information obtained from electronic surveillance pursuant to the authority of this title, and the court or other authority determines that the moving party is an aggrieved person, if the Attorney General files with the Special Court of Appeals an affidavit under oath than an adversary hearing would harm the national security or compromise foreign intelligence sources and methods and that no information obtained or derived from an electronic surveillance pursuant to the authority of this title has been or is about to be used by the Government in the case before the court or other authority, the Special Court of Appeals shall, notwithstanding any other law, stay the proceeding before the other court or authority and review in camera and ex parte the application, order, and such other materials as may be necessary to determine whether the surveillance of the aggrieved person was lawfully authorized and conducted. In making this determination, the Special Court of Appeals shall disclose, under appropriate security procedures and protective orders, to the aggrieved person or his attorney portions of the application, order, or other materials relating to the surveillance only if necessary to afford due process to the aggrieved person.

(h) If the Special Court pursuant to subsection (f) or the Special Court of Appeals pursuant to subsection (g) determines the surveillance was not lawfully authorized and conducted, it shall, in accordance with the requirements of the law, suppress the evidence which was unlawfully obtained or derived from electronic surveillance of the aggrieved person or otherwise grant the motion of the aggrieved person. If the Special Court pursuant to subsection (f) or the Special Court of Appeals pursuant to subsection (g) determines the surveillance was lawfully authorized and conducted, it shall deny the motion of the aggrieved person except to the extent that due process requires discovery or disclosure.

(i) Orders granting or denying motions or requests under subsection (h), decisions under this section as to the lawfulness of electronic surveillance, and, absent a finding of unlawfulness, orders of the Special Court or Special Court of Appeals granting or denying disclosure of applications, orders, or other materials relating to a surveillance shall be final orders and binding upon all courts of the United States and the several States except the Special Court of Appeals and the Supreme Court.

(j) In circumstances involving the unintentional acquisition by an electronic, mechanical, or other surveillance device of the contents of any radio communication, under circumstances in which a person has a reasonable expectation of privacy and a warrant would be required for law enforcement purposes, and if both the sender and all intended recipients are located within the United States, such contents shall be destroyed upon recognition, unless the Attorney General determines that the contents may indicate a threat of death or serious bodily harm to any person.

(k) If an emergency employment of electronic surveillance is authorized under section 105(e) and a subsequent order approving the surveillance is not obtained, the judge shall cause to be served on any United States person named in the application and on such other United States persons subject to electronic surveillance as the judge may determine in his discretion it is in the interest of justice to serve, notice of—

(1) the fact of the application;

(2) the period of surveillance; and

(3) the fact that during the period information was or was not obtained.

On an ex parte showing of good cause to the judge the serving of the notice required by this subsection may be postponed or suspended for a period not to exceed ninety days. Thereafter, on a further ex parte showing of good cause, the court shall forego ordering the serving of the notice required under this subsection.

REPORT OF ELECTRONIC SURVEILLANCE

SEC. 107. In April of each year, the Attorney General shall transmit to the Administrative Office of the United States Courts and to Congress a report setting forth with respect to the preceding calendar year—

(a) the total number of applications made for orders and extensions of orders approving electronic surveillance under this title; and

(b) the total number of such orders and extensions either granted, modified, or denied.

CONGRESSIONAL OVERSIGHT

SEC. 108. On a semiannual basis the Attorney General shall fully inform the House Permanent Select Committee on Intelligence and the Senate Select Committee on Intelligence concerning all electronic surveillance under this title. Nothing in this title shall be deemed to limit the authority and responsibility of those committees to obtain such additional information as they may need to carry out their respective functions and duties.

PENALTIES

SEC. 109. (a) OFFENSE.—A person is guilty of an offense if he intentionally—

(1) engages in electronic surveillance under color of law except as authorized by statute; or

(2) violates section 102(a)(2), 105(e), 105(f), 105(g), 106(a), 106(b), or 106(j) or any court order issued pursuant to this title, knowing his conduct violates such an order or this title.

(b) DEFENSE.—(1) It is a defense to a prosecution under subsection (a)(1) that the defendant was a law enforcement or investigative officer engaged in the course of his official duties and the electronic surveillance was authorized by and conducted pursuant to a search warrant or court order of a court of competent jurisdiction.

(2) It is a defense to a prosecution under subsection (a) (2) that the defendant acted in a good faith belief that his actions did not violate any provision of this title or any court order issued pursuant to this title, under circumstances where that belief was reasonable.

(c) PENALTY.—An offense described in this section is punishable by a fine of not more than $10,000 or imprisonment for not more than five years, or both.

(d) JURISDICTION.—There is Federal jurisdiction over an offense under this section if the person committing the offense was an officer or employee of the United States at the time the offense was committed.

CIVIL LIABILITY

SEC. 110. CIVIL ACTION.—An aggrieved person, other than a foreign power or an agent of a foreign power, as defined in section 101 (a) or (b)(1)(A), respectively, who has been subjected to an electronic surveillance or whose communication has been disseminated or used in violation of section 109 shall have a cause of action against any person who committed such violation and shall be entitled to recover—

(a) actual damages, but not less than liquidated damages of $1,000 or $100 per day for each day of violation, whichever is greater;

(b) punitive damages; and

(c) reasonable attorney's fees and other investigation and litigation costs reasonably incurred.

Mr. McCLORY (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

AMENDMENTS OFFERED BY MR. MCCLORY

Mr. McCLORY. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. MCCLORY:

Page 39, strike out line 1 and all that follows down through line 12 on page 41 and insert in lieu thereof the following:

AUTHORIZATION FOR ELECTRONIC SURVEILLANCE FOR FOREIGN INTELLIGENCE PURPOSES

SEC. 102. (a) An application for a court order under this title is authorized if the President has, in writing, authorized the Attorney General to approve applications to the Special Court having jurisdiction under section 103. A judge to whom such an application is made may, notwithstanding any other law, grant an order in accordance with section 105 approving electronic surveillance of a United States person who is a foreign power or an agent of a foreign power for the purpose of obtaining foreign intelligence information.

(b)(1) If the target of electronic surveillance for the purpose of obtaining foreign intelligence information is not a United States person, such electronic surveillance may be authorized by the issuance of a surveillance certificate in accordance with subsection (c).

(2) Electronic surveillance authorized under this subsection may be authorized for the period necessary to achieve its purpose, except that—

(A) if the target of the surveillance is not a foreign power, the period of the surveillance may not exceed ninety days; and

(B) if the target of the surveillance is a foreign power, the period of the surveillance may not exceed one year.

(3) Electronic surveillance authorized under this subsection may be reauthorized in the same manner as an original authorization, but all statements required to be made under subsection (c) for the initial issuance of a surveillance certificate shall be based on new findings.

(4)(A) Upon the issuance of a surveillance certificate under this subsection, the Attorney General may direct a specified communication common carrier—

(i) to furnish any information, facility, or technical assistance necessary to accomplish the electronic surveillance in such a manner as will protect the secrecy of such surveillance and will produce a minimum of interference with the services that such common carrier provides its customers; and

(ii) to maintain any records concerning such surveillance or the assistance furnished by such common carrier that such common carrier wishes to retain under security procedures approved by the Attorney General and the Director of Central Intelligence.

(B) Any such direction by the Attorney General shall be in writing.

(C) The Government shall compensate any communication common carrier at the prevailing rate for assistance furnished by such common carrier pursuant to a direction of the Attorney General under this paragraph.

(c) A surveillance certificate issued under subsection (b)(1) shall be issued in writing and under oath by the Attorney General and an executive branch official or officials designated by the President from among those officials employed in the area of national security or national defense who were appointed by the President by and with the advice and consent of the Senate, and shall include—

(1) a statement—

(A) identifying or describing the target of the electronic surveillance, including a certification of whether or not the target is a foreign power or an agent of a foreign power; and

(B) certifying that each of the facilities or places at which the surveillance is directed is being used or may be used by a foreign power or an agent of a foreign power;

(2) a statement of the basis for the certification under paragraph (1)—

(A) that the target of the surveillance is a foreign power or an agent of a foreign power; and

(B) that each of the facilities or places at which the surveillance is directed is being or may be used by a foreign power or an agent of a foreign power;

(3) a statement of the proposed minimization procedures;

(4) a statement that the information sought is foreign intelligence information;

(5) a statement that the purpose of the surveillance is to obtain foreign intelligence information;

(6) if the target of the surveillance is not a foreign power, a statement of the basis for the certification under paragraph (4) that the information sought is foreign intelligence information;

(7) a statement of the period of time for which the surveillance is required to be maintained;

(8) a statement of the means by which the surveillance will be effected;

(9) if the nature of the intelligence gathering is such that the approval of electronic surveillance under subsecion (b) should not automatically terminate when the described type of information has first been obtained, a statement of the facts indicating that additional information of the same type will be obtained thereafter;

(10) a statement indicating whether or not an emergency authorization was made under section 105(e); and

(11) if more than one electronic, mechanical, or other surveillance device is to be involved with respect to such surveillance, a statement specifying the types of devices involved, their coverage, and the minimization procedures that will apply to information acquired by each type of device.

Page 47, strike out lines 4 through 14 and redesignate the succeeding subsections accordingly.

Page 48, line 24, strike out ", if the target is a United States person,".

Page 52, strike out lines 11 and 12 and insert in lieu thereof the following:

(2) the factual basis exists for the authorization of such electronic surveillance;

Page 52, beginning on line 14, strike out "if a judge" and all that follows through the period on line 20 and insert in lieu thereof the following: "if the otherwise applicable procedures of this title are followed as soon as practicable, but not more than twenty-four hours after the Attorney General authorizes such surveillance. In addition, if the target of such electronic surveillance is a United States person, the Attorney General or his designee shall at the time of such authorization inform a judge designated pursuant to section 103 that the decision has been made to employ emergency electronic surveillance.".

Page 52, beginning on line 23, strike out "for the issuance of a judicial order".

Page 53, line 5, insert "or a surveillance insert in lieu thereof "an".

Page 52, line 24, insert "or surveillance

Page 53, line 5, strike out "such" and certificate" after "a judicial order".

Page 53, line 6, insert "or surveillance cercertificate is not issued" after "approval is denied".

Page 59, line 3, strike out "application, order," and insert in lieu thereof "application tificate" after "order".

and order or the surveillance certificate".

Page 59, line 18, strike out "applications or orders" and insert in lieu thereof "applications, orders, or surveillance certificates".

Page 60, line 8, strike out "application, order," and insert in lieu thereof "application and order or surveillance certificate".

Page 60, line 14, insert "surveillance certificate," after "order,".

Page 68, line 12, insert "or surveillance certificate" after "order".

Mr. McCLORY (during the reading). Mr. Chairman, I ask unanimous consent that the amendments, with specific reference to amendment No. 2, be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. McCLORY. Mr. Chairman, this, it seems to me, is a very key amendment. Further, it should provide an opportunity for this chamber and for the committee to really get at the crux of this legislation.

My amendment would modify the virtual across-the-board warrant requirement, which is the measure which was passed in the Senate and which some Members do support. Assuming for the moment the need to protect the rights of U.S. persons, as indicated in my colloquy with the gentleman from Massachusetts (Mr. BOLAND), the chairman of the committee, I have serious concern over the provision of the bill which extends a judicial warrant requirement beyond situations where U.S. persons are targeted.

While the argument has been made that warrants are needed in all situations in which U.S. persons are targeted or might be incidentally intercepted, I believe that the provisions in the bill which strictly regulate the use of incidentally acquired information about U.S. persons adequately protect the privacy interests of U.S. persons. Furthermore, the balance struck by requiring a warrant only for U.S. persons better recognizes the role of the executive to protect our country from foreign aggression without undue entanglement involving another branch of Government, that is, the judiciary.

My belief is that the warrant requirement should not be extended to electronic surveillance directed at foreigners, and this is based on two alternative grounds:

First, the fourth amendment does not apply to foreigners.

Second, assuming for purposes of argument, that the fourth amendment does apply to foreigners, it is constitutionally reasonable to engage in electronic surveillance of foreigners without a judicial warrant or without judicial approval.

The fourth amendment to the U.S. Constitution provides—

The right of the people to be secure . . . against unreasonable searches and seizures shall not be violated.

Therefore, in addressing the issue of warrantless surveillances of foreigners, one must resolve who "the people" are.

The concept of "the people" is used several times in the Constitution. It is used in the Preamble—"We, the people of the United States"—and in several parts of the Bill of Rights.

Long ago, the Supreme Court declared in the Civil Rights Cases that "The words 'people of the United States' and 'citizens' meant the same thing, both describing the political body who, according to our republican institutions, form the sovereign people and a constituent member of this sovereignty."

First, since the rights afforded by the Bill of Rights do not protect the States as States, as held in South Carolina against Katzenbach, such are surely not available to foreign nations as foreign nations.

This view is shared by the Department of Justice. While some of the lower courts appear to feel that the amendment applies to aliens as individuals, the Supreme Court has not only not repudiated its earlier statements, but it seems to have gone out of its way to avoid declaring the amendment applicable to aliens. Note that in United States against United States District Court, the Keith case, the terminal case in this area, the Supreme Court stated:

Different standards may be compatible with the Fourth Amendment if they are reasonable both in relation to the legitimate need of government for intelligence information and the protected rights of our citizens. For the warrant application may vary according to the government interest to be enforced and the nature of citizen rights deserving protection.

In those cases where the fourth amendment applies, its single consistent demand is that Government searches and seizures be reasonable. In some cases it will demand compliance with the warrant clause. However, in other cases the legality of a particular search or seizure can be established without reference to the warrant clause—the true test is reasonableness.

As Mr. Justice Black noted in Collidge against New Hampshire:

The fourth amendment does not require that every search be made pursuant to a warrant. It prohibits only "unreasonable search and seizures." The relevant test is not the reasonableness of the opportunity to procure a warrant, but the reasonableness of the seizure under all the circumstances. The test of reasonableness cannot be fixed by per se rules; each case must be decided on its own facts.

We know of many instances of border crossings, and even in some investigative cases, of concerns where we have administrative bodies handling them that there is no requirement to secure a warrant in order to search or seize. So it seems to me that with regard to collecting electronic surveillance, whether it is by radio or television or whatever other means, there should be no requirement to go to a court and secure a warrant. So in effect all that this amendment does, is to exclude from the warrant requirement electronic surveillance authority with respect to foreign agents

and foreign powers. If we wanted to authorize surveillance of a foreign embassy, a foreign trade mission, or a foreign agent, a foreign spy—whoever the foreign element happens to be in this country—it seems to me that for an intelligence agency to be required to go to a judicial body and to get a warrant before such an electronic surveillance could take place is so absurd as to not even require our serious consideration here today.

I am hopeful that we will have overwhelming and resounding support for this amendment.

Mr. MURPHY of Illinois. Mr. Chairman, I rise in opposition to the amendments.

Mr. Chairman, I strongly oppose the gentleman's amendments.

No administration or intelligence agency official has requested it, nor do any of them support it.

Its adoption would not only eliminate most of the protections afforded the privacy rights of our citizens, it would also deal a severe blow to one of the bill's primary purposes, which is to provide needed assurances to intelligence field agents. The Intelligence Committee has already cut back on the warrant requirement; to reduce it any further would be counterproductive.

The arguments raised against eliminating the warrant requirement altogether are equally compelling here. Neither myself, nor the Intelligence Committee, nor the Senate, nor the administration wishes to protect foreign spies, diplomats, governments, or what have you.

We all do wish to protect those whom are entitled to protection: Americans, permanent resident aliens, and intelligence agents trying to do their job.

The best way to insure their protection is with H.R. 7308's warrant process. They deserve the best protection.

Americans and permanent resident aliens are in constant contact with foreign businessmen, tourists, and athletes, and with foreign embassies, trade missions, corporations, and political organizations. The warrant requirement will insure that surveillance of the foreign person or entity is for the proper purpose of obtaining foreign intelligence information and not an attempt to acquire personal or political information about Americans.

The warrant requirement will also insure that information lawfully acquired about Americans will only be disseminated for foreign intelligence purposes. The warrant requirement will further insure that agents performing a surveillance will not be later held up to scorn and ridicule or worse and will be able to perform their duties effectively and aggressively. It should be noted that the plaintiffs in the current suit against the Attorney General and FBI personnel, arising out of the Truong/Humphrey case, are not those who were the targets of the surveillance; rather, they are American citizens whose communications were incidentally overheard pursuant to the targeting of Truong and Humphrey.

According to the intelligence agencies officials, all of these things can be done, all the protections and assurances provided, without endangering our security or impeding intelligence collection activity.

I, for one, agree with these officials. There is no reason whatsoever to doubt their judgment—or their word. They are concerned about today's intelligence collection, not last year's or that of 5 years ago.

They are concerned about the problems facing today's field agents, not with how easy things were 5 years ago.

They must also look to the future, and prepare for it with the insights today's vision provides, not with yesterday's slogans.

These officials, unlike some of those whose letters we have recently read, bear the present responsibility for protecting our security. Retirement does afford the opportunity to spout slogans and holler half-truths. But that opportunity has not come yet for those with today's responsibilities.

In short, those intelligence officials presently running our intelligence agencies support the warrant requirement of H.R. 7308.

They and I oppose the gentleman's amendment.

Mr. STRATTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the McClory amendment. It seems like a very good amendment to me.

The amendment simply says that we do not have to go through this elaborate court procedure if the target of the surveillance happens to be a foreigner or some foreign installation in the United States.

Some of us on our Armed Services Committee had the occasion to visit the Soviet Union at Eastertime. We were told there were bugs in the telephone and there were bugs in the ceiling lights. We were told to be very careful about what we said; but nobody told us that the Soviet KGB had to go to a court in order to get permission to listen in on the casual conversations of even visiting Members of the U.S. Congress.

So it would seem to me that this very simple amendment ought to be adopted.

In fact, I must say I find some of the debate on this bill, and in fact on the whole subject, suggestive of a kind of never never land. I have served for some 34 years as a Naval Reserve intelligence officer. I have long been concerned with intelligence. I think we all recognize the fact that intelligence is our first line of defense.

If one does not have the muscles to stand up against a bigger guy, he has got to have faster reflexes. He has got to make sure his eyes are good and that he can move quickly.

We have tried to maintain a minimum defense in this country in recent years, and so we are going to have to have the very best intelligence in the world. We should be aware of the fact that intelligence can do a number of important things.

We even had intelligence that the Japanese were going to be attacking us at the time of Pearl Harbor, although we messed up on that one. If it had not been for intelligence, we would not have won the battle of Midway. And the British would probably not have won the battle of Britain if it had not been for the ultra intelligence gained from listening in on what the enemy was saying. That intelligence saved the lives of a number of Britons, and indeed it saved the British Empire.

Some Members might have read the book "A Man Called Intrepid," which deals with intelligence activities in the United States prior to the outbreak of World War II and tells how President Roosevelt cooperated with the British Secret Service to protect our country, although he is reported to have said to the "Man Called Intrepid":

If the American people knew what I was doing, I probably would be impeached.

But he helped to beat back the Nazi threat.

These are the advantages of intelligence. When we are in a wartime situation, or even a cold war situation, we have to take some unusual measures to insure our survival.

The bill we have before us today, however, is based essentially on the concept that intelligence is something bad, and that the major concern of Congress should be to prevent all those evil things that intelligence entails from happening. We went through a period recently when we were completely preoccupied with the abuses of intelligence. But let us not forget the lessons of "A Man Called Intrepid," and of "Ultra Secret."

For us to be concentrating primarily on trying to put limitations on intelligence, instead of trying to make sure that we have the best and most effective intelligence service in the world is, I think, about as sensible as putting a governor on a firetruck. Of course, if the firetruck goes too fast, it could conceivably run into somebody and have an accident.

But the purpose of a firetruck, after all, is to get to a fire in a hurry, and you cannot have an effective firetruck and at the same time put a governor on it that prevents it from going over 25 miles an hour. Yet that is precisely what we are doing here in this legislation.

To include the judiciary in the very delicate questions involved in intelligence is going to damage our intelligence performance, is going to jeopardize it. That is why a very substantial number of retired intelligence agents have come out against this bill.

Oh, they would not have spoken out if they were on active duty, just as the admirals over in the Pentagon have been told not to come out in opposition to the recent veto of the defense authorization bill. The intelligence professionals who are now in the CIA, or elsewhere, know that they cannot speak out against this bill.

The CHAIRMAN. The time of the gentleman from New York (Mr. STRATTON) has expired.

(By unanimous consent, Mr. STRATTON was allowed to proceed for 2 additional minutes.)

Mr. STRATTON. But Mr. Chairman,

these intelligence professionals, active or retired, know perfectly well that to put limitations of this kind on intelligence operations and to be required to disclose everything to a court of law, is certainly going to damage intelligence production. Considering the competition we are up against, I certainly don't think we ought to be taking those risks with our intelligence.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from New York.

Mr. KEMP. I thank the gentleman for yielding.

Mr. Chairman, I want to congratulate my friend for his statement, and certainly I agree with his conclusion. I do not consider the McClory amendment anything near extreme. I think it is a very sound and responsible amendment, and I certainly support it. While we are taking steps to protect Americans from domestic intelligence sources, it seems to me, as the gentleman I know is fully aware, while the Soviets are engaging in eavesdropping on American citizens, we ought to be equally concerned about protecting American privacy from Soviet eavesdropping.

Would my friend from New York not agree with that?

Mr. STRATTON. I would certainly agree with the gentleman. I think the McClory amendment is a very definite step in the right direction. I myself would not favor this whole idea of judicial review. I think it is contrary to the whole idea that intelligence is an executive responsibility. I do not see how the British could have won their war if they would have had to go through these procedures in World War II.

Mr. KEMP. If the gentleman will yield further, would the gentleman agree it is incumbent upon us to take steps to protect American citizens from Soviet eavesdropping?

Mr. STRATTON. I certainly do think it is incumbent upon us to do that.

Mr. MAZZOLI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the McClory amendment.

It is my privilege to serve on the Committee on the Judiciary and also my further privilege to serve on the Select Committee on Intelligence and on the subcommittee headed by the gentleman from Illinois (Mr. MURPHY), the chairman of the subcommittee which produced this piece of legislation. During its very laborious and, indeed, painstaking proceedings, our committee went over this bill with a fine-tooth comb. We discussed a number of amendments proposed in good faith by the gentleman from Illinois (Mr. MCCLORY), including this particular amendment.

I would ask my chairman, the gentleman from Illinois (Mr. MURPHY), to respond to this question.

Mr. Chairman, is it not the case that the Senate bill, which, if my memory is correct, was passed 95 to 1 by the Senate, contains a warrant procedure, a warrant requirement, covering the very kinds of cases that the gentleman from Illinois (Mr. MCCLORY) would seek to exempt?

Mr. MURPHY of Illinois. That is correct.

Mr. MAZZOLI. And is my statement correct, Mr. Chairman, that that bill passed the Senate 95 to 1?

Mr. MURPHY of Illinois. The gentleman is correct.

Mr. MAZZOLI. Would that vote indicate that the Senate, which is a very important deliberative body, was satisfied that the warrant requirement which the gentleman from Illinois (Mr. MCCLORY) seeks to exempt would not cause any danger to national security?

Mr. MURPHY of Illinois. That is correct. It covers every political philosophy in the Congress.

Mr. MAZZOLI. Let me ask the chairman this further question: Is it not true that if this exemption were to be ordered by the committee that this would mean that there would be situations where American citizens would be surveilled without protection of the warrant which currently is afforded American citizens under the present bill, H.R. 7308?

Mr. MURPHY of Illinois. That is right. Not only that, but the Pike and Church committees uncovered abuses which could still occur under the very exception Mr. MCCLORY is trying to make in this amendment. For instance, an American citizen talking to an embassy; a permanent resident alien talking to a foreigner within the domestic borders of this country could be surveilled without the protection of a warrant. That is why Mr. STRATTON's reference to those two books, "Ultrasecret" and "A Man Called Intrepid" has no application to this amendment whatsoever.

This bill is confined directly to U.S. borders. What happens overseas, NSA counterintelligence or the CIA, as Mr. ROSE aptly pointed out earlier, it is open season and anything can be done.

Mr. MAZZOLI. So we are dealing only with electronic surveillance.

Mr. MURPHY of Illinois. Foreign intelligence electronic surveillance within the borders of the United States.

Mr. MAZZOLI. I thank the gentleman. I think that is an important point to make.

Let me make this further point: If we go along with the McClory proposed exemption, this does in a sense remove the protection which we seek to afford to American citizens. The protection is the existence of a warrant before that person's conversations or activities can be surveilled. That would be removed if the gentleman's amendment prevails.

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. Mr. Chairman, I was curious about the gentleman's comments that this passed the Senate by a vote of 95 to 1, and by the implementation that since the Senate passed it by 95 to 1, then obviously this House ought to follow the Senate's proposal.

Mr. MAZZOLI. I think the gentleman misunderstands me.

Mr. ERTEL. What did the Gulf of Tonkin resolution pass the Congress by?

Mr. MAZZOLI. My point in asking that question of the chairman of our committee was that when the Senate passed its wiretap bill by 95 to 1, and the Senate bill has across-the-board warrants for foreign intelligence surveillance the Senate must have felt that warrants pose no potential harm to the national security. The House is supposed to pass our own bill, but I am just saying that the other body clearly indicated that they had no qualms with warrants.

Mr. ERTEL. I suggest that the Senate has been wrong before, and by how many votes did the Gulf of Tonkin resolution pass? I would suggest that was wrong also.

Mr. MAZZOLI. I think the Gulf of Tonkin resolution is not apposite to what we are doing today.

Mr. MCCLORY. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Illinois.

Mr. MCCLORY. Mr. Chairman, I would like to point out that the 95-to-1 vote in the Senate included the material we have already excluded from this bill.

The CHAIRMAN pro tempore (Mr. EVANS of Colorado). The time of the gentleman from Kentucky has expired.

(At the request of Mr. MCCLORY and by unanimous consent, Mr. MAZZOLI was allowed to proceed for 2 additional minutes.)

Mr. MCCLORY. If the gentleman will yield further, as the gentleman from North Carolina (Mr. ROSE) pointed out, we have excluded a substantial part of the intelligence-gathering activities under the amendment which both sides have agreed upon, but which was contained in the bill which the Senate passed by a 95-to-1 vote. In other words, we are rejecting what the Senate has done because we find it inconsistent with our best national security interests. Let me also point out that this amendment we are now discussing was before our subcommittee, and it lost on a 6-to-6 tie vote—the precise amendment I am offering now.

Mr. MAZZOLI. If I could reclaim my time momentarily, I think the gentleman is also aware that after the amendment was more fully explained—there was some early lack of complete appreciation of the significance of the gentleman's amendment—I think the vote was different.

Mr. MCCLORY. I think there may have been some other pressures applied, but I know that in the course of our hearings we had Mr. Morton Halperin in the room, and I said, "This amendment would only apply if we were targeting in on, for instance, the Soviet Embassy."

But then he said, "Yes, but what if I am telephoning the Soviet Embassy?"

I said, "I am very sorry about that, Mr. Halperin, but I would like to point out that we still, in this amendment, minimize prosecution so that if somebody makes an unrelated call to the Soviet Embassy, that is minimized even if we adopt the amendment."

Mr. MAZZOLI. I am not so sure as the

gentleman, because how would it be minimized? There is no minimization procedure.

Mr. McCLORY. Oh, yes. I would just say there are minimization procedures and they would be required and they would be imposed. As far as the "Man Called Intrepid" is concerned, the headquarters was right in the RCA Building in New York City, N.Y.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, I would like to know how under the bill the warrant process works.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

(On request of Mr. VOLKMER, and by unanimous consent, Mr. MAZZOLI was allowed to proceed for 2 additional minutes.)

Mr. VOLKMER. Mr. Chairman, if the gentleman will yield further, how, under the warrant process, will my telephone call be protected to a foreign embassy that is being electronically surveiled?

Mr. MAZZOLI. That will be protected ab initio, because when the Chief Executive or the delegate of the Chief Executive, the Attorney General, goes to court to seek the warrant, in the first place he or she has to make a listing of exactly what information is to be gathered and what minimization procedure will be followed. This is all done before the tap is ever installed, before the warrant is ever issued.

Mr. VOLKMER. But wait a minute. My telephone call is going to be picked up. They will not shut it off as soon as I call. So how will it be protected?

Mr. MAZZOLI. If the court is satisfied that the kind of tap which is asked for would routinely pick up American citizen calls those conversations could be minimized away sufficiently.

Mr. VOLKMER. The gentleman is saying the court probably would not permit a wiretap by telephone on a foreign embassy? Is that what the gentleman is saying?

Mr. MAZZOLI. No.

Mr. VOLKMER. That is the case with any embassy.

Mr. MAZZOLI. I am not so sure, because when we have such an embassy as the Soviet Embassy which has trade missions and economic missions and education missions they would have all kinds of calls.

Mr. VOLKMER. Take South Yemen, for instance.

Mr. MAZZOLI. But it would all come to the judges ahead of time for their determination.

Mr. VOLKMER. Does it say the judges will take that into consideration? In what section?

Mr. MAZZOLI. I am not sure what section, but it has a full series.

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. MAZZOLI) has again expired.

(By unanimous consent, Mr. MAZZOLI was allowed to proceed for 2 additional minutes.)

Mr. MAZZOLI. I will yield to the gentleman from Arizona in a moment if I may finish my point to the gentleman from Missouri.

There is a whole series of material and data which have to be submitted on the application for the warrant.

Mr. VOLKMER. But I do not find anything in there which would say if the electronic surveillance would pick up any number or amount or percentage of U.S. persons' conversations, that it should be denied. I do not find that in there.

Mr. MAZZOLI. No.

Mr. MURPHY of Illinois. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. Mr. Chairman, the situation the gentleman refers to, if he calls an embassy and he asks when is their ballet or circus coming to town, and it has nothing to do with foreign intelligence, there are provisions in this bill that provide that telephone call, that this conversation will be struck.

Mr. VOLKMER. That is not in the gentleman's amendment, I believe. I believe the gentleman has the same minimization procedure.

Mr. MAZZOLI. Mr. Chairman, let me reclaim my time and I yield to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Chairman, I thank the gentleman for yielding, but I think the point we are trying to make is whether or not a U.S. citizen's rights would be infringed on, and I would like to put an example. Supposing a U.S. citizen does call the Soviet Embassy, or whatever embassy, and he has a legitimate request. No one wants to infringe on his rights and obviously this would be taken care of because the person would be identified and interviewed and if he said he wanted a visa, it would be dropped. But on the other hand, let us take a person who has been in deep cover for 15 years and he has not been activated and he has been wondering why he has not been contacted by the embassy espionage network, then the only way for him to go is to the principal, the Soviet Embassy to be activated.

The CHAIRMAN. The time of the gentleman has again expired.

(By unanimous consent, Mr. MAZZOLI was allowed to proceed for 1 additional minute.)

Mr. RUDD. Mr. Chairman, if the gentleman will continue to yield, let me say that in that way there would be identification of a network of Soviet spying activities.

Mr. MAZZOLI. Let me try to answer the gentleman's question.

Mr. RUDD. This does not infringe on the rights of citizens, all it does is secure the Nation in a time of grave circumstances.

Mr. MAZZOLI. I would like to answer the gentleman in two ways. One is that I do not think that people who call up the Russian Embassy to ask about the Bolshoi ballet will be picked up for interviewing. Such a call would be routinely expunged from the record and would never be brought to anyone's attention.

Second, any bill Congress would pass is going to be imperfect. You cannot cover every hypothetical concern. Although I did not support the gentleman from Illinois' amendment, the committee accepted it in order to craft the best possible bill and the most passable bill. Anything like this is imperfect. But I do think, all things considered, we have written a very good bill which deserves the support of the committee.

Mr. ASHBROOK. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendments.

Mr. Chairman, I want to quote from a very knowledgable expert in this field.

Admiral Murphy spoke very directly to this bill, and I will read specifically from his testimony. Like Admiral Turner, he said, "I am in favor of H.R. 7308," and then you start getting the "buts" and the "ifs." Here is the statement, which I am going to read:

> In the comments set out below, the department outlines a number of significant problems . . .

And I am going to read it:

> . . . with the bill not to indicate a lack of support, but to demonstrate to the committee that the compromise represented by H.R. 7308 has been reached at substantial risk to the department's intelligence operations.

I spoke a little bit earlier in the debate about witnesses sending me a telegram. That is about as great a telegram as you can get. He said in effect that there was a compromise reached by people outside of the Defense Department. He said in effect that the Defense Department is constrained to support H.R. 7308, but we think you ought to know that it has been reached at substantial risk to the Department's intelligence operations. That is what he is clearly saying.

Let me go on and quote his testimony to you:

> This overall approach has two distinct weaknesses. First, the extension of coverage beyond American citizens, corporations and associations adds substantially to the risks of compromise of important intelligence sources and methods without any concomitant benefit for Americans. It is important that Americans have the assurance that when intelligence agencies seek information through electronic surveillance of Americans, there will be a judgment made by someone outside the Intelligence Community as to the importance, relevance and necessity of that surveillance to foreign intelligence purposes. However, when the intellignece agencies seek information through electronic surveillance of foreigners who are agents of foreign intelligence services or foreign entities that are directed and controlled by foreign intelligence services, there is no benefit to Americans from requiring such a judgment from someone outside the Intelligence Community.

That is the key. He is distinguishing between Americans and foreign entities, foreign sources, something which the gentleman from Illinois (Mr. MCCLORY) is trying to do in his amendment.

He went on to say this, and this is all one quote:

In many cases, the means of communication used by these foreigners and foreign entities are totally devoted to their intelligence work against the United States and Americans would have no access to them in any case.

The primary reason for extending coverage beyond American citizens and corporations to reach these foreign intelligence agents and the totally foreign organizations to which they belong or which they use is an attempt to provide an alternative to the use of the President's inherent power under the Constitution to conduct electronic surveillance without a warrant. If the bill covered only Americans, the President could exercise his inherent power, as consistent with the bill, with respect to foreigners. But by covering foreigners as well, the bill creates an alternative with a high risk and a very limited benefit for the rights of Americans.

Extension of the bill to cover foreigners carries with it very substantial risks of compromise of important and highly productive intelligence sources and methods.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. ASHBROOK) has expired.

(By unanimous consent, Mr. ASHBROOK was allowed to proceed for 1 additional minute.)

Mr. ASHBROOK. Mr. Chairman, that is probably a statement from the most knowledgeable official working in the field, Adm. Daniel J. Murphy.

Mr. MURPHY of Illinois. Mr. Chairman, will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Illinois.

Mr. MURPHY of Illinois. Mr. Chairman, I would like to read to the gentleman an additional statement from the most knowledgeable admiral in the field. The statement to which the gentleman referred was given when the subcommittee was considering the bill. Since then, we amended it; we adopted the McClory amendment.

Here is the admiral's language after the adoption of the McClory amendment, from the "Most Knowledgeable Man in the Field," to use the gentleman's own words:

When I appeared before the Legislation Subcommittee of your Committee, I testified that the Department of Defense supported H.R. 7308, as introduced. I also expressed our reservations about particular provisions which, in my view, posed risks to security which were not outweighed by the potential benefits to civil liberties that might be provided by those provisions.

In the course of your Committee's consideration of H.R. 7308 changes were made not only to the provisions I mentioned in my testimony but also to others. These changes minimize risks to security and effect important improvements in the system under which the Department of Defense would be required to operate. I have reviewed the bill reported by your Committee and wholeheartedly support its passage. The bill would directly facilitate certain intelligence activities of the Department of Defense while at the same time protecting the privacy rights of United States citizens.

Sincerely,

DANIEL J. MURPHY,
*Admiral, USN (Ret.)*

Mr. ASHBROOK. Admiral Murphy, I would say to my colleague from Illinois, was opposing it on January 10.

Mr. MURPHY of Illinois. He was speaking, in the instance cited by the gentleman from Ohio, before we adopted the McClory amendment.

Mr. ASHBROOK. Before the wagon circled.

Mr. MURPHY of Illinois. Now it is before the wagons circled. However, before the gentleman said that the admiral was the most knowledgeable man in the field.

Mr. ASHBROOK. He is still the most knowledgeable, but the most knowledgeable man in the field is constrained by policy, and administration policy very clearly is involved in this bill. His original statement is very clearly in favor of the McClory amendment. The gentleman is right. Once the wagons circled, he took that stand. In his letter, he retracted nothing, of his January 10 statement. It still stands. The amendment we adopted in committee only went part way.

Mr. MURPHY of Illinois. We adopted the McClory amendment in committee, and this is Admiral Murphy's subsequent statement. In the gentleman's own words, he is the last word on this subject.

Mr. ASHBROOK. I still think he is the most knowledgeable man in the field.

Mr. MURPHY of Illinois. If the gentleman is going to talk about the full circle, include his final letter on it.

Mr. ASHBROOK. I think that is only fair. That is right. What the admiral is saying, however, is that only a part of that gap was closed. If he had his way, he would not have warrants for surveillance of foreigners in this country. He was not satisfied before, and I think his statement stands. This is what the admiral says, as I say, before the circle was formed on the wagons.

Mr. FISH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment, offered by the gentleman from Illinois (Mr. MCCLORY), to limit court issued warrants to U.S. persons.

I share the reservations expressed by my colleagues today with regard to H.R. 7308 and disagree with the administration's belief, in the words of the Attorney General, that H.R. 7308:

Will strengthen the capability of our intelligence agencies dealing with foreign espionage.

On the contrary, Mr. Chairman, I believe that this measure as written will dangerously impede the progress of our foreign intelligence activities.

In the deliberations of the Republican Policy Committee, it was determined that the intrusion of the judicial system in the intelligence community is totally inappropriate. This is particularly true with respect to foreign spies. The provision in H.R. 7308, calling for a special Federal court to exercise primary oversight of the use of electronic surveillance, is a radical departure from the constitutional and legal precedents which have governed our intelligence activities up to now. There is no evidence of case law empowering the Federal courts to authorize or reject foreign intelligence gathering activities as proposed by the committee bill. The security of sensitive material would be seriously threatened by this unprecedented move and the resultant unnecessary delay and, more importantly, the unnecessary disclosure of sensitive information are problems which need not plague our intelligence activities.

In my judgment, the President is mistaken when he states that H.R. 7308 will establish the Nation's first legislative controls over foreign intelligence surveillance. It will establish artificial and unprecedented judicial controls over politically sensitive decisions related to intelligence gathering.

The totality of this amendment which will be offered by the gentleman from Illinois is a responsible and effective approach to foreign surveillance reform. The amendments recognize and respect the constitutional authority of the executive branch in its responsibility to protect our nation from foreign aggression. It also recognizes the appropriate congressional role in oversight by providing for the inspection of records by the House and Senate Intelligence Committees.

Deterrents to abuse are an integral part of this amendment which calls for surveillance approval in writing from the Attorney General and executive branch officials where a non-U.S. person is the target of an investigation. The McClory amendments assure responsible action on the part of those empowered to authorize foreign intelligence electronic surveillance.

Mr. RUDD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to support this important amendment.

I agree with our colleague from Illinois (Mr. MCCLORY) that intelligence-gathering involving only foreign citizens associated with a foreign government should not be tied to a judicial warrant requirement.

The minimization procedures involving U.S. persons are more than adequate to protect the privacy and the rights of our own people.

It makes absolutely no sense whatsoever for our intelligence personnel to be required to obtain judicial warrants to conduct electronic surveillance against foreigners visiting our country—when those persons might have known or suspected ties to Communist governments or terrorist organizations, and are possibly involved in clandestine activities about which the President must be fully informed on a highly classified basis.

I am sure that most Americans would consider it "unreasonable" to involve the courts in such a sensitive intelligence function with solely foreign policy importance to the President and the executive branch of Government.

I urge adoption of the amendment.

Mr. BOB WILSON. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, let's face it, from its very inception H.R. 7308 was never intended to facilitate the legitimate activities of the intelligence community. In the words of one witness who testified in favor of the bill he summarized its purpose by saying:

> The basic intention underlying H.R. 7308 is to minimize, not encourage electronic surveillance.

The purpose for this Foreign Intelligence Surveillance Act was and is to protect the rights of U.S. persons against future abuses. It is only recently that the advocates have realined their priorities to now argue that the underlying purpose is to help the intelligence agencies by eliminating doubts about legality.

Mr. Chairman, the truth is we could all support H.R. 7308 if it had limited itself to providing protection for U.S. persons, those who had allegedly been abused by illegal wiretaps. But no—the bill has been broadened with onerous judicial procedures to provide extraordinary protection for foreigners, spies, embassies, trade missions, travelers, et cetera. Incidentally the kind of protection that our Government agencies and citizens do not enjoy when in foreign countries.

Mr. Chairman, there is absolutely no justifiable reason to extend the judicial warrant requirement beyond situations where U.S. persons are targeted. To quote from the official position of the Department of Defense submitted to the committee on this matter:

> The extension of coverage beyond American citizens, corporations and associations adds substantially to the risks of compromise of important intelligence sources and methods without any concomitant benefit for Americans.
>
> If the bill covered only Americans, the President could exercise his inherent power with respect to foreigners.

Accordingly, I ask your support of the gentleman's amendment.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, the administration opposes this amendment. I know of no one in the intelligence-collecting agencies of the Government who favors the amendment. This amendment was considered in the committee, and it was defeated.

What this amendment would do would be to delete the warrant requirements for all targets except—except U.S. persons. It sounds great; does it not? Most of the abuses, or a great number of the abuses, which occurred some years ago—and there is no sense in rehashing those years and that period, as I am sure all of us are familiar with it—a number of those abuses occurred, because it was possible to survey embassies, foreign embassies without warrants, pick up the names of American citizens, pick up information on them when they were communicating with these foreign powers and foreign embassies.

History shows and the record proves that oftentimes the information which was collected under the guise of surveilling foreign powers, foreign embassies, and consulates was used against American citizens. That is the reason why we have an across-the-board warrant in this bill. That is one of the reasons why it has been asked for not alone by the Carter administration but by the Ford administration. That is the reason why it is contained in the Senate bill, and that is the reason why the distinguished chairman of the Committee on the Judiciary, the gentleman from New Jersey (Mr. RODINO) came in here under a lot of personal pressure to voice his opinion and his support of this bill.

That is the reason why they support this bill, to protect the constitutional rights of American citizens and so that the pretext of gathering information without warrants could not be used in the future.

I would think that those of us who recall history and who are familiar with what happened in the past ought to remember, and so, Mr. Chairman, on that basis I think this committee ought to reject the amendment offered by the gentleman from Illinois (Mr. MCCLORY).

The amendment has been gone over thoroughly by this committee. It has been studied by the subcommittee chaired by the distinguished and able gentleman from Wisconsin (Mr. KASTENMEIER), and it has been gone over carefully by many others, including those who are in the intelligence-collection business of our Government itself and who are interested in gathering the best intelligence to protect our national security and who are concerned with our national interests. They do not favor this amendment. Does that not say something to us? It says something to me.

Mr. MCCLORY. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. Of course, I will yield to the gentleman from Illinois.

Mr. MCCLORY. Mr. Chairman, I thank the gentleman for yielding.

I do not know of any abuses that have occurred with respect to U.S. ciitzens in the last couple of years. I think the references the gentleman makes are to Joseph Kraft and Mortimer Halpern, and those were not cases in which we were eavesdropping on foreign powers or foreign agents. They were indeed violations of existing guidelines at that time; they were abuses.

But we always hark back to the wiretaps in the cases of Joseph Kraft and Mortimer Halpern and one or two others that occurred more than 2 or 3 years ago but which are wholly unrelated to the subject of my amendment at this time.

Mr. BOLAND. Mr. Chairman, in response to my friend, the gentleman from Illinois (Mr. MCCLORY), let me say I am not aware of any abuses which occurres over the last couple of years. I think people have learned something from history.

But I am sure that gentleman is familiar with the abuses that have occurred, not over the last couple of years, but maybe over the last 10 or 12 years or so, all of which have been emphatically delineated by the Church committee and by the Pike committee, and all of those involved matters in this area. Certainly the gentleman is familiar with those abuses. A lot of those abuses came as a result of tapping or surveilling foreign embassies or consulates of foreign powers.

Mr. MCCLORY. Mr. Chairman, if the gentleman will yield further, it is possible that information might come with respect to intercepting communications from foreign powers which are exempted here.

Mr. BOLAND. That is what we are trying to do, I will say to the gentleman from Illinois (Mr. MCCLORY). The very fact is that when we are surveilling foreign powers or foreign embassies or foreign consulates or what-have-you, and some American citizens are involved and their names are brought out, they are caught in the trap, they are caught in the sweep of the surveillance, and they ought to be protected. This bill protects them.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. BOLAND) has expired.

(On request of Mr. STRATTON, and by unanimous consent, Mr. BOLAND was allowed to proceed for 3 additional minutes.)

Mr. STRATTON. Mr. Chairman, if the gentleman will yield, the gentleman's own committee is providing oversight and I have no quarrel to make with the committee's performance in that connection.

But the gentleman said a moment ago that some of the active intelligence officers were in support of this bill. I recall having the opportunity at the gentleman's invitation to sit in on the meetings, and when we had the heads of these intelligence agencies up in the gentleman's secure quarters discussing this bill, frankly, the impression I got was not one of enthusiasm.

What they said, the situation we are in now is chaotic because anytime anybody goes out to try to nail some foreign agent he gets arrested and has to go to court for violating some law.

Mr. BOLAND. We do not need a better argument than you are making here for the warrant. The FBI wants this.

Mr. STRATTON. If the gentleman will yield further, certainly this situation is better than what they are faced with now. But I think we need the best possible intelligence, and I do not think we will get it under this kind of an arrangement.

Mr. BOLAND. What we are trying to do is correct the situation with which we are faced now. We are losing, I think, some important intelligence, because we do not have this kind of legislation. And all of the intelligence community leaders agree with that.

Mr. STRATTON. We are trying to prevent the evils of the past, but we are forgetting about the problems of the future.

Mr. BOLAND. Let us correct the evils

of the past, because they might very well be the evils of the future.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

Mr. Chairman, is the gentleman saying that, under the provisions of the bill, the conversation that an American citizen may have with a foreign national, whether it be a consul, embassy, or wherever, will not be recorded by whatever type of electronic device is being used, because there is a warrant being used, they are not going to be recorded, is that what the gentleman is saying?

Mr. BOLAND. Oh, yes, they are picked up and they will be recorded.

Mr. VOLKMER. They will be recorded, wherever that occurs.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. BOLAND) has expired.

(On request of Mr. VOLKMER and by unanimous consent, Mr. BOLAND was allowed to proceed for 2 additional minutes.)

Mr. VOLKMER. Then the protection that we are talking about is not preventing the recording of them?

Mr. BOLAND. That is right.

Mr. VOLKMER. Or the hearing of them by some agent at a later time. We are talking about the use of them, the dissemination and the destruction of them.

Mr. BOLAND. That is right.

Mr. VOLKMER. The difference between the two the gentleman really objects to is the fact that the McClory amendment does not provide for that destruction or the nonuse thereafter, not the actual recording?

Mr. BOLAND. The gentleman had discussions with the gentleman from Kentucky.

Mr. VOLKMER. Yes. I agree with that. The difference is that that is exactly the minimization by the court. There is a difference. And that is basically the problem the gentleman sees with the McClory amendment; is that right?

Mr. BOLAND. That is right.

Mr. VOLKMER. The question then is that if the McClory amendment provided for a certification like he has, but a minimization procedure like the gentleman has, then the gentleman would have no objection to it; is that correct?

Mr. BOLAND. Oh, no. I object to the McClory amendment because, as I have indicated, he would delete the warrant requirement for all targets except U.S. persons. He would require a warrant which would surveil U.S. persons. He would eliminate a warrant requirement for the surveillance of aliens, foreign powers, foreign embassies, consulates, or what have you. But the real problem occurs when information concerning U.S. persons is picked up. If it is a sweeping surveillance of foreign powers, foreign agencies, that is where the information with respect to U.S. persons is picked up, and that is where the damage is done.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. BOLAND) has again expired.

(On request of Mr. VOLKMER and by unanimous consent, Mr. BOLAND was allowed to proceed for 2 additional minutes.)

Mr. VOLKMER. Is the gentleman saying, then, that warrants will not be permitted in areas where U.S. citizens' conversations are involved—because 50 percent of them will be by U.S. citizens or foreign nationals here as permanent resident aliens—is the gentleman now saying that those warrants will not be issued? That is what I got from the gentleman from Kentucky, if he were the judge. I am afraid a wiretap on the telephone where there are quite a few conversations, or, let us say, a bugging device, transmitting device, is put in the reception room in the embassy where they had a lot of traffic of U.S. citizens, if he were the judge the gentleman from Kentucky would say no warrant under this policy.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding.

Mr. Chairman, what the gentleman from Kentucky was endeavoring to say, perhaps lamely, from the floor a moment ago, was the fact that if the judge, having received the warrant application, finds there is going to be a succession of American citizens' calls or surveillances which occur, in a sense, incidental to the issuance of the main warrant, then I think the judge would have to sit down and say, "Well, you are really actually targeting American citizens under the guise of targeting a third party, so you better come back and tell me why you do not target American citizens directly and tell me how you intend to minimize these surveillances and what information you are looking for."

I think there is an essential difference here as to the gentleman from Illinois' amendment. There, I believe any minimization to be at the sufferance of the Attorney General. Here, we are talking about court approval for minimization, which means that if the court does sense that if there is a ruse being perpetrated it can expose that ruse.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I yield to the gentleman from Illinois.

Mr. McCLORY. I think it should be pointed out that the minimization applies whether the McClory amendment is adopted or not. The minimization is established and is put in place by the executive. It does, under the warrant requirement, require approval by the judge. In other words, a judge is going to decide whether or not minimization procedures are adequate. If he decides they are not adequate, they could go back and maybe reprogram the whole system with regard to minimization. This seems to be an absurd position.

Mr. ERTEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

I would like to make a couple of points for clarification, and perhaps Mr. McCLORY could clarify these for me.

As I understand the bill, if we are targeting foreign nationals such as a foreign embassy, a trade mission, or an agent of a foreign government, we must have a warrant which is not based on probable cause, but on some other slippery sort of concept where the court would authorize a wiretap or bug or electronic surveillance of that embassy or foreign mission. In that procedure we would have minimization so that if an American citizen were encountered as a participant in a phone conversation or in a room of a trade mission, it would be minimized as far as the extent of knowledge of his activities were concerned, and there would be a destruction order and it could not be used. Is that correct?

Mr. McCLORY. Exactly. If it is unrelated that would apply, whether they have a warrant or do not have a warrant.

Mr. ERTEL. Under the gentleman's amendment, as I understand it, his amendment says that instead of going to the court to get a warrant which is based on a concept we are not really sure of because the bill does not set it out, that the Attorney General will actually issue a surveillance certificate saying they can surveil that foreign trade mission or embassy, or a building a foreign government owns, and he will set out in that surveillance certificate minimization procedures. He will also destroy information from American citizens; is that correct?

Mr. McCLORY. Yes; the Attorney General is an executive officer who is required to be confirmed by the Senate.

Mr. ERTEL. The only question then is, practically everything is basically the same, except that you need a warrant when you are targeting foreign citizens under the committee bill?

Mr. McCLORY. Exactly.

Mr. ERTEL. What we are doing then is giving the foreign embassies, the foreign trade missions, the foreign citizens, rights under our Constitution which our citizens may not, and in fact in most countries in the world, do not enjoy in those countries.

Mr. McCLORY. The gentleman is precisely right. What we are doing under this legislation, unless my amendment is adopted, is requiring a judicial warrant to issue before we could engage in any kind of electronic surveillance. This could be by telephone, by radio, by microwave, or by telephone interception. We would require the executive department, specifically the Attorney General, to ask a judge to decide whether or not such electronic surveillance should take place.

Mr. ERTEL. Can the gentleman tell me anyplace in the world where there are American citizens receiving this kind of protection from the interception of their communications when they are in a foreign country?

Mr. McCLORY. There is no such comparable situation throughout the rest of the world. I might say that foreign powers in this country will not be subjected to this kind of restriction. We will have Americans subjected to surveillance by foreign agencies in this country, even though the Americans will not be enabled to engage in electronic surveillance of foreign agents of foreign powers without judicial approval.

We will be in a completely absurd situation unless we adopt the McClory amendment which would exclude foreign powers and foreign agents from this warrant requirement.

Mr. ERTEL. I ask one further question, if the gentleman will be good enough to respond. Under the procedure set out by the Executive order today, do we not have basically the same thing, rights with respect to the American citizens? We have to as provided in your amendment for foreign citizens have certification of the Attorney General to surveil American citizens do we not?

Mr. McCLORY. Yes; we do have that.

Mr. ERTEL. So what we are doing by this legislation is giving foreign nationals, if we do not adopt this amendment, the rights American citizens have today. We are really protecting foreign nationals, foreign people in the United States, contrary to the exclusion of rights the American people have in foreign countries?

Mr. McCLORY. We are according by statutes to the foreign nationals rights which they constitutionally do not have, and we are giving rights to foreign agents and foreign powers which are superior to the rights of U.S. persons.

Mr. ERTEL. In other words, what we are doing today is expanding the fourth amendment type protection of the American Constitution, as interpreted by the circuit courts, and extending it to protect foreign nationals.

Mr. McCLORY. Exactly.

Mr. ERTEL. I support the gentleman's amendment. I think it makes sense not to extend those protections to foreign citizens which may work to the detriment of the American people.

Mr. MURPHY of Illinois. Mr. Chairman, I rise in opposition to the amendment and I move to strike the last word.

The CHAIRMAN. Without objection the gentleman from Illinois is recognized for 5 minutes.

There was no objection.

Mr. MURPHY of Illinois. I cannot, Mr. Chairman, let that statement go by, that the fourth amendment only applies to American citizens. The Justice Department and the Attorney General in a number of instances have stated that the fourth amendment applies to everybody within the borders of the United States.

Mr. BOLAND. If the gentleman will yield, in fact the Supreme Court has said that very thing, that the fourth amendment does apply to people in the United States, to foreign visitors, teachers, athletes, and everybody else.

Mr. ERTEL. Does it apply to foreign embassies in the United States?

Mr. MURPHY of Illinois. To every person within the borders of the United States.

Mr. ERTEL. The foreign embassies I do not believe are considered to be American property.

Mr. LIVINGSTON. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendments.

Mr. Chairman, I only want to point out at this time that I am just appalled by this discussion and amazed that this matter is before the floor, such as it is.

I sincerely support the amendment offered by the gentleman from Illinois.

Being a lawyer, and a former prosecutor with about 6 years experience and having also worked as a defense attorney in several cases, I think one of the most important things that faces the future of this country is certainly our national security. What we have before us right now is a bill that would threaten that security.

We can talk about it all we want, but essentially we are saying the United States will play by the Queensberry rules when our opponents will have all the weapons available to them that they might want to throw at us. I think that flies in the face of all reason and commonsense, and I think this amendment would rectify that problem.

Mr. RHODES. Mr. Chairman, will the gentleman yield?

Mr. LIVINGSTON. I yield to the gentleman from Arizona.

Mr. RHODES. Mr. Chairman, I share the gentleman's amazement that this bill was even brought to the floor. I do not know any other nation in the world that has legislation like this to protect foreign nationals.

I might ask the gentleman from Illinois, if he will respond to the question: Is there any other nation in the world that has legislation whereby the foreign agents in that nation are protected by the laws of that nation?

Mr. McCLORY. Mr. Chairman, if the gentleman will yield, let me say there is a great deal of concern about the privacy and the protection of individuals. This is also a concern of a number of other nations, especially in Western Europe. Through our laws at the present time we have provided for the protection of the interests of privacy and provided for minimization of any incidental interception which applies with respect to U.S. persons. But there is no nation in the world which requires the Executive to go to a special court or anything resembling that in order to exercise what is an executive function. The gentleman is exactly right.

Mr. LIVINGSTON. Mr. Chairman, if I might recapture my time, might I ask the gentleman from Illinois: Is there anything in this amendment which would detract from the rights of a person under the Constitution of the United States, the fourth amendment, or any other amendment of the Constitution of the United States?

Mr. McCLORY. No. My amendment only applies to foreign agents or foreign powers. Even if that provision is retained in the bill, a warrant will be required when there is a desire to engage in electronic surveillance of a U.S. person.

Mr. LIVINGSTON. And certainly the exclusionary rule of evidence would apply to a U.S. citizen, would it not?

Mr. McCLORY. It would, yes.

Mr. ZABLOCKI. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of H.R. 7308, as reported by the Intelligence Committee.

H.R. 7308 as pointed out by the chairman is a complex piece of legislation carefully designed to deal with an ever more complex problem. The members of the Intelligence Committee and the Judiciary Committee and all those who had a hand in its drafting deserve our commendation and thanks. The bill as reported deals with perhaps the most important task facing this Congress—how to reconcile the often competing interests of civil liberties and national security.

Mr. Chairman, H.R. 7308 is a bill that accomplishes both objectives. Furthermore it is a bill that legitimizes much needed but often maligned intelligence collection activities while being responsive to the privacy interests of the American people. I have come to this conclusion, although at one time, as our colleague, the gentleman from Illinois (Mr. McCLORY), I had some reservations about the legislation.

Mr. Chairman, H.R. 7308 is also a bill that has drawn the support of the White House, the Justice Department, and the U.S. intelligence agencies, the American Bar Association, Common Cause, the American Civil Liberties Union, the New York Times, the Washington Post, and the Chicago Tribune.

If nothing else, this broad-based support from such divergent groups demonstrates the deliberate care taken in drafting this legislation.

Because such care was taken, we now have before us a bill that in my opinion strikes precisely the right balance in furthering both privacy interests and security interests.

Though it is the proper balance, it is a delicate balance, and any tampering with it could result in the collapse of the whole structure. The bill's opponents should know this. They also know that as we rush toward adjournment, the time of the House is precious. We are thus faced with approximately 50 proposed amendments to a bill that has already been subjected to several years of detailed study by the Congress.

No more than a handful of these amendments contain any substance, and even these few, if passed, would impair the balance—without contributing to the national security.

I would implore the committee to keep this fact in mind when debating and amending this bill. Let us not throw away this chance to pass good legislation. Let us not tell American people that this

House cannot resolve the crucial issues facing it.

This is not a partisan bill. It is a good bill that will strengthen our intelligence collection capabilities. It is worthy of our support and I urge my colleagues to reject crippling amendments and vote aye on H.R. 7308.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I thank the gentleman from Wisconsin (Mr. ZABLOCKI) for yielding to me. I appreciate the statement the gentleman has made. I might say that the precise amendment that I am offering now is an amendment for which the gentleman voted favorably in the committee. I just wondered what has transpired to change the gentleman's mind so that he now finds himself in opposition to the amendment?

Mr. ZABLOCKI. Yes, I voted for the gentleman's amendment. I am sure the gentleman will agree with me that consistency is the hobgoblin of little minds. It is not necessarily a virtue to stand fast and hold to a position and not to be pliant and change one's views or one's mind. After further study and consideration of the effect of the gentleman's amendment I changed my mind.

Mr. BOLAND. Mr. Chairman, if the gentleman will yield, before we put this particular amendment to bed I would just like to remind the members of the committee who are here that the warrant requirement for foreign embassies, or for trade missions, consulates or for whatever, that requirement which is in this bill—and I hope the members of the committee do not lose sight of this fact—is for the protection of American citizens too. I repeat, it is for the protection of American citizens.

Someone here asked whether there is any other country on the face of the globe that makes this sort of requirement? Probably not. Is there any other country on the face of the globe that has a Bill of Rights? England does not have one. They do not even have a Constitution, and a lot of the other countries do not.

I think we ought to keep our minds on the fact that the legislation requires a warrant for embassies and foreign powers where there is a likelihood that Americans will be involved, because they ought to have the protection that a warrant offers. So I hope we keep our eye on the ball.

That is precisely the reason that this bill requires a warrant for foreign embassies or trade missions or foreign powers where the likelihood of an American citizen's interests being involved is not present.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Illinois (Mr. McCLORY).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ASHBROOK. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 178, noes 176, not voting 78, as follows:

[Roll No. 727]

Messrs. BREAUX, DINGELL, and BRINKLEY changed their vote from "no" to "aye."

So the amendments were agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. MURPHY OF ILLINOIS

Mr. MURPHY of Illinois. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MURPHY of Illinois: On page 38, after line 24 add the following:

(o) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Trust Territory of the Pacific Islands, and any territory or possession of the United States.

Mr. MURPHY of Illinois. Mr. Chairman, this is essentially a technical amendment intended to correct an omission in the language of the committee reported bill.

The bill contains several references to "state", but the term was nowhere defined therein. A definition is necessary

since the District of Columbia, Puerto Rico, and territories and possessions are not usually encompassed by the word "State".

It is my understanding that the gentleman from Illinois (Mr. McCLORY) does not oppose this amendment.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of Illinois. I yield to my colleague from Illinois.

Mr. McCLORY. Mr. Chairman, we have examined the amendment. It is a technical amendment, as the gentleman states, and there is no objection to the amendment.

Mr. MURPHY of Illinois. I appreciate the gentleman's remarks.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. MURPHY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. M'CLORY

Mr. McCLORY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McCLORY: Page 32, strike out lines 4 through 25 and insert in lieu thereof the following:

(2) any person who—

(A) knowingly engages in clandestine intelligence activities for or. on behalf of a foreign power under circumstances which indicate such activities are or may be contrary to the foreign policy or security interests of the United States;

(B) knowingly engages in sabotage or international terrorism, or activities in preparation therefor, for or on behalf of a foreign power; or

(C) conspires with or knowingly aids or abets any person to engage in any activity described in subparagraph (A) or (B).

Mr. McCLORY. Mr. Chairman, what this amendment does is to eliminate the criminal standard with respect to intelligence-gathering activities, and to substitute language which provides that where a person is engaged in clandestine intelligence activities, whether he is a U.S. person or not, under circumstances which would indicate that his activities would be contrary to the foreign policy or security interests of the United States, that nevertheless he can be subjected to electronic surveillance.

This amendment, is important not only because it strikes from the bill wording which could negatively impact on our intelligence agencies' abilities to gather foreign intelligence information, but also because it would modify the tone of the bill so that it would be in keeping with its purpose—that is not to enforce Federal criminal statutes, but rather to regulate the use of electronic surveillance to gather foreign intelligence information.

Just as with the warrant procedure, the need for a criminal standard is nowhere to be found in the Constitution when the Government seeks to gather foreign intelligence information. The Supreme Court has recognized as recently as this past term in a case involving OSHA searches—Marshall against Barlows, Inc.—that the fourth amendment's probable cause provision does not require that all warrants be based on a finding of probable criminal activity.

Therefore, if a warrant is not required for this type of electronic surveillance—as the proponents of H.R. 7308 apparently admit—and if, as the Supreme Court has recognized—and as Attorney General Bell has testified—a warrant without a criminal standard can comport with the fourth amendment, then including in this bill a warrant requirement with a criminal standard is simply piling one overprotection and unnecessary requirement on top of another.

One very puzzling aspect of the genesis of the criminal standard in this bill is that when the other body was considering this bill's companion—S. 1566—in its Judiciary Committee Attorney General Bell testified that he opposed the criminal standard and posited six hypothetical situations in which it was the position of the Justice Department that a criminal standard would preclude the otherwise legitimate use of foreign intelligence electronic surveillance.

Judge Bell also testified against the criminal standard before the other body's Intelligence Committee:

When a United States person furtively, clandestinely collects or transmits information or material to a foreign intelligence service pursuant to the direction of a foreign intelligence service and where the circumstances surrounding this activity indicate that the transmission of the material or information would be harmful to our security or that the failure of the government to be able to monitor such activity would be harmful to the security of the United States, then I believe that whether or not that activity is today a violation of our criminal statutes, the Government has a duty to monitor that activity to safeguard the security and welfare of the Nation. There is a certain danger in extending the criminal law, the purpose of which is to prosecute, convict and normally incarcerate the perpetrator, merely to satisfy the priniciple that electronic surveillance should not be undertaken absent a criminal violation.

Apparently the Justice Department now supports a criminal standard though I am unaware of any public statement made by the Department that its past statements were in error.

If a criminal standard was unwise then because it precluded under certain circumstances the legitimate use of foreign intelligence electronic surveillance, then it seems to me that it is still unwise.

Now, it is clear to those who understand intelligence activities and capabilities that most intelligence relates not to criminal activities, but solely to the subject of gathering information which may be useful to our Nation. This kind of information may relate to the condition of the crop year or the harvest in some foreign country. It may relate to the development of some kind of a foreign aircraft or a new type of arms.

It does not necessarily relate to any criminal activity. Consequently, all that this amendment does is to eliminate the criminal standard with respect to electronic surveillance. It seems to me this is essential for the conduct of our intelligence activities, and that this is an amendment that should be adopted by the committee.

I know that the subject of a criminal standard is one that is sought by some of the civil liberties groups. They feel that no intelligence activity should be carried on unless a crime has been committed or is about to be committed. If we defer all intelligence gathering until somebody is about ready to commit a crime, we are going to be left without information which we need for our own national protection. It seems to me this is a vital amendment, which will make this a much better bill.

I might say the amendment we have already adopted enables this legislation to coincide with the recommendations of the former Director of the CIA, Bill Colby, and many others who have given attention to this subject. The fact that we will not require a warrant with regard to the targeting of foreign embassies and foreign powers is an intelligent decision for this body to make, and it would likewise be intelligent for us to decide not to require a criminal standard in order to gather intelligence information which might be useful to our own protection.

Mr. MANN. Mr. Chairman, I rise in opposition to the gentleman's amendment. The so-called criminal standard contained in H.R. 7308 represents a reasonable and proper solution to a complex problem, a problem which at one time seemed insoluble.

As introduced both in the Senate and the House, this legislation would have authorized a judge to approve the wiretapping of American citizens and permanent resident aliens even though no connection whatsoever with possible criminal activity had been demonstrated. This provision was adamantly opposed, and rightly so, by those who either felt that it was unconstitutional or felt as a matter of principle that there should be a higher standard for searching American citizens and permanent resident aliens.

On the other hand, both Attorney General Levi and Attorney General Bell, as well as many Members of Congress, were just as adamant, and again rightly so, in their belief that a rigid criminal standard would prevent the FBI from conducting much of the investigatory work which is so essential in counterintelligence activity.

This issue came to a head just as the House and Senate Intelligence Committees were preparing to begin markup on this legislation. After several weeks and many hours of discussion among the Attorney General, the FBI, the House and Senate Intelligence and Judiciary Committees, and civil liberties groups, consensus agreement was reached, one that in my judgment strikes that elusive and delicate balance between protecting individual liberties and giving our intelligence agencies the tools they need to protect our country. That agreement is reflected in the committee reported language. It is language which is accept-

able to civil liberties groups and which is preferred by the FBI.

The provision contains two sections. The first section deals with U.S. persons who are engaged in "clandestine intelligence gathering activities," meaning espionage. As the Intelligence Committee report notes:

Probably the most critical term in this provision is "clandestine intelligence gathering activities." It is anticipated that most clandestine intelligence gathering activities will constitute a violation of the various Federal criminal laws aimed at espionage either directly or by failure to register. . . . The term "clandestine intelligence gathering activities" is intended to have the same meaning as the word espionage in normal parlance, rather than as a legal term denoting a particular criminal offense. The term also includes those activities directly supportive of espionage such as maintaining a "safehouse," servicing "letter drops," running an "accommodation address," laundering funds, recruiting new agents, infiltrating or exfiltrating agents under cover, creating false documents for an agent's "cover," or utilizing a radio to receive or transmit instructions or information by "burst transmission."

To authorize the wiretapping of U.S. persons suspected of engaging in such activity, the judge must find probable cause to believe that the activity "may involve" a criminal violation. This is a great deal less than the probable cause required to obtain a law enforcement search warrant. There is no requirement that the person be actively engaged in the commission of a crime, or even that he is about to be so engaged.

What type of criminal might be encompassed in this standard?

This is what led Senator GARN to note the following during Senate floor debate on S. 1566, and I quote:

Mr. President, many of us have been concerned that the adoption of a criminal standard would make it impossible for the FBI to get a court order for surveillance of people obviously engaged in traditional spying activity. For example the FBI might observe someone making "drops," and then known Soviet intelligence agents coming along and picking up what was dropped. This is traditional spying tradecraft, but the FBI cannot determine what information is being secretly transmitted to the intelligence agents. That is the kind of case where a judge might not find probable cause that a specific crime is about to be, or will be, committed. However, the standard requiring probable cause that the activity may involve a crime would allow surveillance in such cases. Therefore, I support the new standard because it provides enough flexibility to deal with the real problem faced in counterintelligence investigations. I agree with my colleagues that the standard is intended to deal with what we traditionally call spying activities.

This point is further elaborated in the language of the report of the House Intelligence Committee, and again, I quote:

This "may involve" standard replaces the previous noncriminal standard which appeared in H.R. 7308, as introduced. Both the former provision, and the "may involve" standard, address the same problem. The committee has concluded that it is necessary in order to permit the Government to investigate adequately in cases such as those where Federal agents have witnessed "meets" or "drops" between a hostile foreign intelligence officer and a citizen who might have access to highly classified or similarly sensitive information; information is being passed, but the Federal agents have been unable to determine precisely what information is being transmitted. Such a lack of knowledge would of course disable the Government from establishing that a crime was involved or what specific crime was being committed. Nevertheless, the Committee believes that the circumstances might be such as to indicate that the activity may involve a crime. The crime involved might be one of several violations depending, for example, upon the nature of the information being gathered.

In addition to the espionage and the foreign agent registration laws, other criminal laws whose possible connection to the U.S. person's activities would justify a wiretap under the "may" standard are the interstate transportation of stolen property statute and the Export Administration Act. Thus, those engaged in collecting industrial or technological information which, if disclosed to a foreign power, might present a threat to the national security, could be wiretapped.

The second section of the "criminal standard" deals with U.S. persons engaged in "other clandestine intelligence activities," that is, activity other than those connected with spying or espionage. As has been pointed out, these other activities are meant to include covert actions, propaganda, lobbying, and other actions designed to influence events in this country. As was noted by former Director Colby in his testimony before the Judiciary Committee, this is a gray area where it is sometimes difficult to distingush between legitimate activity protected by the first amendment and unprotected intelligence operators. For this reason, the standard here is higher, and the judge must find probable cause that the actions of the U.S. person "involve or are about to involve" a criminal violation.

Obviously, this standard would be more difficult to meet. However, the FBI has repeatedly stated that it has no objection to this provision. The Bureau is almost totally concerned with intelligence gathering and the lower standard of "may involve" is thus applicable to the area of greatest need for counterespionage coverage.

In summary, I believe that the criminal standard as reported by the Intelligence Committee, as does the whole bill, fully protects both our civil liberties and our national security, and I oppose any attempt to change it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. MCCLORY).

The amendment was rejected.

AMENDMENT OFFERED BY MR. DRINAN

Mr. DRINAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DRINAN: Page 40, strike out lines 9 through 23 and insert in lieu thereof the following:

(3) (A) The Attorney General may not require any communication common carrier to provide the Government with any information, facilities, or technical assistance with respect to any electronic surveillance authorized under this subsection.

(B) Any communication common carrier voluntarily providing any such information, facilities, or technical assistance—

(i) shall maintain any records concerning the surveillance or any such assistance which such common carrier wishes to retain under security procedures approved by the Attorney General and the Director of Central Intelligence; and

(ii) shall be compensated for providing such information, facilities, or technical assistance by the Government at the prevailing rate.

Page 50, strike out lines 3 through 21 and insert in lieu thereof the following:

(B) that any communication common carrier, supplier of communications facilities or devices, landlord, custodian, or other person voluntarily providing to the Government any information, facilities, technical assistance, or access to premises with respect to the electronic surveillance shall maintain any records concerning the surveillance or any such assistance which such person wishes to retain under security procedures approved by the Attorney General and the Director of Central Intelligence; and

(C) that any such communication common carrier, supplier of communications facilities or devices, landlord, custodian, or other person voluntarily providing to the Government any information, facilities, technical assistance, or access to premises with respect to the electronic surveillance shall be compensated therefor by the Government at the prevailing rate.

Page 55, after line 22, insert the following new subsection:

(h) An order under this section authorizing electronic surveillance may not require any communication common carrier, supplier of communications facilities or devices, landlord, custodian, or other person to provide the Government with any information, facilities, technical assistance, or access to premises to accomplish the authorized surveillance.

Mr. DRINAN. Mr. Chairman, this amendment removes those provisions of H.R. 7308 which grant to the Government the unprecedented authority to compel private citizens and corporations to provide unlimited assistance to intelligence agencies in all electronic surveillance related to foreign intelligence.

This amendment is commonly referred to as a "conscience clause," as it will permit any individual or corporation to follow its conscience and refuse to provide assistance to the Government in its surveillance activities. While every citizen owes some degree of loyalty to the U.S. Government, it is inconceivable that this loyalty extends so far as to embrace all matters related to electronic surveillance. The Government may spy if it must, but it does not have the right to force private citizens to help.

The Bell Telephone System strongly objects to this open-ended Government authority to force private individuals and corporations to provide assistance in surveillance activities. The Bell System has stated:

Certain language in the pending Senate and House bills could be interpreted to require greater telephone company involve-

ment such as: the placing of all cross connections; the furnishing of monitoring equipment; the use of telephone company identification cards to gain access to customer premises; or even the use of telephone company personnel. We feel that such a direct role in electronic surveillance is in drastic conflict with our responsibility for safeguarding the privacy of our customers.

As presently worded, section 102 of H.R. 7308 gives the intelligence agencies a blank check with which they can elicit any kind of assistance they desire from private citizens. This is in contrast with the kind of authority which the Government possesses in its domestic electronic surveillance. There, the Government can require the provision of information as to cables and terminals and, when requested by the Government, a private line channel from the terminal serving the telephone line under investigation to a terminal serving the listening post used by law enforcement personnel. The same standard applies to foreign intelligence surveillance, based upon authorizations by the Attorney General.

Section 102 would give the intelligence agencies the power to compel telephone company personnel, private security officers, or others to actually install, connect, and operate the electronic listening devices. The Bell Telephone Co. clearly does not wish to become an active partner with the intelligence agencies. Their objections to the language of section 102 of H.R. 7308 cannot be discounted.

In a more general sense, there is serious doubt as to the need for the broad authority to compel assistance from private citizens which H.R. 7308 provides to the Government. An individual or corporation which objects on moral or other grounds to a request by the Government for aid in the establishment or operation of a wiretap should, if at all possible, be able to refuse. In most instances, the Government could find another individual to provide the needed assistance. The only exception which comes to mind is the telephone company, which has already demonstrated its willingness to help in the provision of access to cables and terminals. Removal of the compulsory nature of section 102 would not seriously jeopardize the ability of the Government to conduct surveillance, but it would remove a potentially dangerous capability to force citizens to aid in wiretapping.

Mr. Chairman, we are all familiar with the very strong feeling by the American people that Government has become too large and too intrusive into their lives. If we are really serious about limiting unnecessary intrusions by the Federal Government, we will adopt this amendment and remove the very objectionable and intrusive power which H.R. 7308 grants the intelligence agencies.

Mr. MURPHY of Illinois. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, it is no secret the gentleman who offers this amendment considers electronic surveillance of any kind to be "dirty business." He has said this on many occasions. His position is well known. He now offers what he calls a conscience clause to this legislation.

In effect, he has put the decision as to whether or not foreign intelligence information will be collected not with the President, not with the judge, but with private telephone companies or landlords or other people who have been ordered to cooperate with the Government. It should be self-evident that if common carriers or other persons cannot be compelled to help the Government in conducting lawful foreign intelligence surveillances, such needed intelligence will not be collected in this country. That result is not in the interest of the Government nor of the individuals which this amendment purports to protect nor of the protection of civil liberties.

Taking the last point first, the Government cannot be assured of the cooperation of common carriers and others under this amendment. The result will be many more inadvertent interceptions as agents search for the right wire. That is exactly what the gentleman seeks to avoid, among other things.

Mr. Chairman, the telephone company and others have not asked for this amendment. They are willing to cooperate with the Government on the basis of a statutory warrant. The bill gives them immunity if they cooperate under the terms of a court order or Attorney General's order. If, however, they are given the opportunity to determine whether they will cooperate or not, can it be said that they retain their immunity since they cooperate, if at all, under their own volition? Further, this amendment removes any directive language from an order under the bill. Yet, the immunity clause is tied to the order. It just does not make sense.

Mr. Chairman, this amendment also eliminates the requirement that surveillances under this bill be accomplished in such a manner as to protect their secrecy. I am sure that there is no doubt in the minds of Members that these surveillances involve very sensitive national security matters which must be safeguarded from compromise. Eliminating this language puts in doubt whether or not they will remain secret and must be opposed.

Mr. Chairman, the effect of this amendment is not to significantly improve any rights or privileges for U.S. citizens. On the contrary, what it really does is make it possible that inadvertent surveillances of U.S. persons will occur and that important foreign intelligence information will not be collected. That combination is a very objectionable one, and on those grounds, I urge its defeat.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of Illinois. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding.

I would just like to commend the gentleman on his statement. I think he made a series of very important points in opposition to the gentleman's proposal. I think one of the most important is the immunity which is granted to these individuals, the landlords, and the telephone people. It might be well for the gentleman to emphasize to the House that these people, if they follow the instructions in the warrant, Mr. Chairman, are exempt from any liability; am I correct?

Mr. MURPHY of Illinois. If they perform their duties in good faith pursuant to the warrant, they are protected under the bill.

Mr. MAZZOLI. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. DRINAN).

The question was taken; and on a division (demanded by Mr. DRINAN) there were—ayes 6, noes 35.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. ASHBROOK

Mr. ASHBROOK. Mr. Chairman, I offer my amendment No. 4 which appeared in the RECORD on August 2, 1978.

The Clerk read as follows:

Amendment offered by Mr. ASHBROOK: Page 33, line 3, insert "or property" after "life".

Mr. ASHBROOK. Mr. Chairman, my amendment would expand the definition of "international terrorism" by describing it in terms of "acts dangerous to human life and property." The definition, as presently written, only refers to acts "dangerous to human life."

Terrorism is a violent act against noncombatants for a political purpose. However, it does not have to be against a person. Terrorism can also involve violent acts directed toward property. For instance, if a terrorist group threatened to blow up the Washington Monument unless certain actions were taken by the U.S. Government, this activity should be considered under the definition as "terrorism." In addition, the group that bombs an empty building today, could bomb an inhabited one tomorrow. The intelligence agencies should not be prevented from electronic surveillance because no one has been killed yet.

Mr. MURPHY of Illinois. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the committee has examined this amendment. We have been in consultation with members of the Committee on the Judiciary and members of the Permanent Select Committee on Intelligence, and we neither support nor oppose the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. ASHBROOK).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ASHBROOK

Mr. ASHBROOK. Mr. Chairman, I offer an amendment entitled "amendment No. 1," which also appeared in the August 2, 1978, CONGRESSIONAL RECORD.

The Clerk read as follows:

Amendment offered by Mr. ASHBROOK: Page 31, line 17, strike out "or".

Page 32, after line 3, insert the following new subparagraph:

"(C) There is a reason to believe has information which relates to the foreign policy or security interests of the United States; or".

Mr. ASHBROOK. Mr. Chairman, the purpose of this amendment is to enable our intelligence services to gather information from foreigners who may have information that relates to the foreign policy or security interests of the United States.

There is no expectation by most foreigners that their electronic communications are secure in their own countries, let alone this one. Positive intelligence gathering is a common practice all over the world. There is no reason that our country should be denied this valuable tool.

I am not suggesting in any of my amendments that the intelligence agencies must target everyone who falls into a particular category. Only that they have the opportunity where necessary. I want to make sure that we do not lose vital intelligence because the person holding it falls through the cracks in this legislation. Under this bill those activities not specifically permitted are forbidden. Therefore, the authorization should be broad enough to cover any eventual need for intelligence purposes.

Mr. MAZZOLI. Mr. Chairman, I rise in opposition to the amendment.

H.R. 7308 contains two standards authorizing surveillance of agents of foreign powers who are not U.S. persons, neither of which requires a nexus with criminal activity.

Section 101(b)(1)(A)—page 31, lines 16 and 17—defines an agent of a foreign power as any non-U.S. person who acts in the United States as an officer, member, or employee of a foreign power. All the court does is determine if the person is in this status.

Section 101(b)(1)(B)—page 31, lines 18 to 25; page 32, lines 1 to 3—authorizes surveillance of a foreign visitor if the country for which the visitor acts engages in clandestine intelligence activity in the United States, and the foreign visitor is in a class that in the past has engaged in intelligence activities in the United States, or other circumstantial or direct evidence can show that the foreign visitor may engage in such activities in the United States. No specific showing has to be made about the activities of the particular foreign visitor to be surveilled. Thus, for example, a Soviet seaman entering one of the many U.S. ports open to him could be surveilled upon no other showing than that he is a Soviet seaman.

The gentleman's amendment would go further and allow surveillance by electronic means of any foreigner visiting the United States upon no other showing than someone's "reasonable belief" that the visitor has information relating to the foreign policy of the United States.

This is no standard at all. What, in today's world, does not relate to the foreign policy of the United States? Does not every conversation a Member of Congress has with a prominent foreign visitor relate to the foreign policy of the United States?

I oppose the gentleman's amendment.

In the first place, the existing executive branch guidelines, authored by Attorney General Levi, do not permit such indiscriminate surveillance of foreign visitors. The FBI does not now engage in such indiscriminate surveillances, has not for a long time, and does not now wish to do so. It has not asked for this amendment. In fact, the existing language was inserted at the insistence of the Bureau.

Second, such surveillances are largely nonproductive and not worth the expense and manpower involved. Any useful information that the nongovernment related foreign visitor may possess can better be obtained by means other than electronic surveillance conducted in the United States.

Third, there is the basic policy issue of whether the United States wishes to announce to all nations that any of their citizens visiting our shores, for whatever purpose, will be subjected to indiscriminate electronic surveillance. To answer that the Russians do it is to beg the questions, and it suggests our willingness to suspend those attributes of our democracy that in fact distinguish us from the Russians.

Fourth, to lower the bill's standards to authorize a surveillance of any foreign visitor "reasonably believed" to possess information relating to the national security or foreign relations of the United States is to suggest no standard at all, and would undermine a basic purpose of the legislation—to establish objective legislative standards to guide the actions of both executive officials and judges.

The amendment is not necessary.

It runs counter to bill's purpose to help restore integrity to actions of intelligence agencies.

Finally, as was the case in the Senate, the existing provision was written in direct response to FBI testimony.

Mr. KASTENMEIER. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. I thank the gentleman for yielding, and I asked the gentleman to yield so that I could ask him a question, actually, because, tracking the Ashbrook amendment with the recently adopted McClory amendment, the recently adopted McClory amendment takes non-U.S. persons out of foreign protection, throws them in this category, in any event, and I suspect that this is a totally meaningless, useless addition to the language of the bill.

Mr. MAZZOLI. Mr. Chairman, I think that is an interesting point which the gentleman brings up. I think it makes a further case. To sum up my time, Mr. Chairman, we have tried—and the gentleman from Ohio was there—to draft a bill which would leave the judges in the special court in a position where they had severe and understandable and focused guidelines to which they could refer in determining the status of an individual, foreign power, U.S. person, visitor, what have you. I think the gentleman would expand that to sort of a subjective situation rather than the objective situation which we attempted to draft in our bill. We place the judge in the position of trying to crawl inside his head to find out what he is in America for, and I think it makes it much more difficult for the judge on the special court to do his job.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Ohio.

Mr. ASHBROOK. I thank the gentleman for yielding because I particularly wanted to respond to what my very learned colleague, the gentleman from Wisconsin (Mr. KASTENMEIER), has stated. There is only one problem with his argument.

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. MAZZOLI) has expired.

(By unanimous consent, Mr. MAZZOLI was allowed to proceed for 2 additional minutes.)

Mr. MAZZOLI. Mr. Chairman, I yield further to the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. Mr. Chairman, there are two tracks to the bill, one relating to warrants and one relating to purposes for which there could be surveillance.

The McClory amendment changed the portion which related to warrants, but you still have standing those individuals or entities who can be surveilled, and that is why I am adding this. So it certainly is not meaningless. Without this amendment, as I read the bill, you would not be entitled to surveil them because they do not come under the area where you are authorized. That is the thing that bothers me most about this legislation. Anything which is not specifically authorized is prohibited. My amendment would authorize the surveillance of foreign nationals where the intelligence-gathering agency has reason to believe that they have information which relates to our security interests or which relate to espionage.

Mr. MAZZOLI. Mr. Chairman, without predetermining what the gentleman from Wisconsin might say in rebuttal, I would say that the amendment of the gentleman from Ohio might be understandable to him, and I am sure it could, if he were on the special court or in charge of these, be quite easy to apply subjectively.

But, it does seem to me that there is some very broad language in this amendment which is subjective and which require value judgments on the part of the individual who would be in charge of the warrant process or the surveillance. I think that is all we endeavored to avoid. I think we attempted to avoid that in the way we drew the bill, so that there would be very few opportunities to have subjective judgments, but there would be a referral to the guidelines.

Mr. ASHBROOK. What my colleague has said is absolutely correct. I think the only problem, looking at it from the intelligence gathering operations viewpoint, is that we cannot possibly put them in a position of having to know what they are going to get before they

get it. Intelligence quite often is something that comes about piece by piece, and I do not think we can require that they absolutely know.

Mr. McCLORY. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I think one of the most significant statements that has been made and one of the most important efforts which has been undertaken, at least as expressed by the majority of the committee, is that this a carefully crafted and a very carefully worked out piece of legislation. It seems to me the amendment offered now by the gentleman from Ohio really fills an obvious defect, an omission in the bill which on careful consideration should be included at this time.

This was brought out very forcefully to the subcommittee chaired by the gentleman from Wisconsin (Mr. KASTENMEIER) when the former Director of the CIA, Mr. Colby, appeared before the committee. He pointed out, as the gentleman from Ohio has pointed out, that if this is to be the legislation authorizing electronic surveillance of foreign agents and foreign powers, as the bill is now amended, then of course we should include these individuals, these officers, and these other persons who otherwise are excluded from the legislation. Mr. Colby stated in his testimony before the Judiciary Committee, as follows:

> The principal responsibility of our intelligence services is to learn and understand the political, strategic, economic, and sociological forces, factions and dynamics in the world around us . . . large numbers of citizens of such nations visit the United States and have information of this type in their minds. To the extent that these secrets are not available openly, I believe it only wise and prudent to endeavor to obtain such information from them clandestinely here in America rather than going abroad to search for it.

It is important to note that a change in the definition of "agent of a foreign power" to allow positive intelligence gathering does not mean that every friendly foreign tourist or businessman would be subject to electronic surveillance in the United States. Information about free and open countries can be collected through perfectly normal means of inquiry, through publications and otherwise, but it is only when these nations engage in secreting their information that we have to indulge in electronic surveillance.

So, that is why it is extremely important to our intelligence agencies that the definition of foreign agents be enlarged, as the amendment offered by the gentleman from Ohio would do, so that this legislation may truly assist our intelligence agencies.

It is certainly not going to adversely affect any interest whatever of any American citizen or any U.S. person. It is only directed at foreign agents, and it seems to me to limit the definition to the extent that we might be limited from engaging in legitimate electronic surveillance, especially with regard to important information we should have. I would hope that the amendment would be accepted by the majority.

Mr. Chairman, a serious flaw exists in the definition of "agent of a foreign power" in that officers and employees of a foreign power not so acting in the United States are excluded from the definition. In the Intelligence Committee's report on the definition, it is clearly spelled out that this omission is deliberate, as noted on page 34:

> The definition excludes persons who serve as officers or employees or are members of a foreign power in their home country but do not act in that capacity in the United States * * * It is not intended to encompass such foreign visitors as professors, lecturers, exchange students, performers or athletes * * * The term "member" means an active knowing member of the group or organization which is a foreign power. It does not include mere sympathizers, fellow travelers, or persons may have merely attended meetings of the group or organization.

This exclusion precludes executive officials from collecting valuable positive foreign intelligence in the United States from foreign scientists, professors and businessmen, and so forth. There is no evidence that any other foreign country so limits its intelligence capabilities, and, in fact, we do not so limit out capabilities abroad.

Former CIA Director, William Colby, in testimony before the Subcommittee on Courts, Civil Liberties, and the Administration of Justice, pointed out that intelligence has the important function of collecting positive information through the fortuitous presence here of foreigners. As Mr. Colby stated:

> The principal responsibility of our intelligence services is to learn and understand the political, strategic, economic, and sociological forces, factions and dynamics in the world around us * * * large numbers of citizens of such nations visit the United States and have information of this type in their minds. To the extent that these secrets are not available openly, I believe it only wise and prudent to endeavor to obtain such information from them clandestinely here in America rather than going abroad to search for it.

It is important to note that a change in the definition of "agent of a foreign power" to allow positive intelligence gathering does not mean that every friendly foreign tourist or businessman would be subject to electronic surveillance in the United States. Information about free and open countries can be collected through perfectly normal inquiry and assembly of publications, involving no clandestine effort whatsoever. Thus electronic surveillance would only be needed with respect to countries in which such material is held in secret.

It is clear that the exclusion of officers and employees from the definition of "agent of a foreign power" does nothing to protect the rights of American citizens, while it does, in fact, severely handcuff the Nation's foreign intelligence gathering capabilities. I, therefore, urge my colleagues to support the amendment that would allow positive intelligence gathering by the United States.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Chairman, I appreciate the gentleman yielding, and I appreciate the sincere efforts he has been making over these past few months at trying to write a bill, but would the gentleman not agree virtually any foreign visitor to the United States from any foreign land whatever would under the terms of the gentleman's amendment be subject to surveillance?

Mr. McCLORY. I would say only to the specific extent the definition is enlarged. It seems to me we do want to include those individuals and engage in surveillance of them. It expands the definition and enlarges the scope for the intelligence agencies, as former Director Colby called to our attention we should do.

Mr. MAZZOLI. If the gentleman will yield further, with all due regard to Director Colby, that is his profession, and I would think any intelligence officer would want to include anybody in the universe that he could.

Mr. McCLORY. Let me point out that Mr. Colby is not in support of my substitute bill. He would support the amendment that the House has adopted but he would support this as well.

Mr. MURPHY of Illinois. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the existing Attorney General's guidelines do not permit the indiscriminate surveillance of foreign visitors that would be authorized by the Ashbrook amendment. A 1976 Justice Department memorandum states that the current policy of the Attorney General is to authorize warrantless electronic surveillance only when it is shown the subjects are the active conscious agents of foreign powers. This was the policy of former Attorney General Levi and it is the policy of the present Attorney General Bell.

I oppose the amendment.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of Illinois. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Mr. Chairman, I am sure my colleague did not mean to say the amendment would allow indiscriminate surveillance. It is only when there is reason to believe, and those administering the laws believe, and our intelligence agencies believe. I certainly hope the gentleman would not think it would allow indiscriminate surveillance.

Mr. MURPHY of Illinois. We are afraid that this is a door we would be opening, and the FBI does not want this. We specifically brought this up to them. I think the gentleman was there. They do not want this amendment.

Mr. ASHBROOK. Mr. Webster indicated he does not want this amendment?

Mr. MURPHY of Illinois. Definitely, on a number of occasions in discussing it with us in the committee and subcommittee.

Mr. ASHBROOK. I thank my colleague.

As I say, I hope the gentleman does not believe this would permit indiscriminate surveillance.

Mr. McCLORY. Mr. Chairman, I do not believe this amendment was offered in the committee. This was offered in the subcommittee during the testimony of former Director Colby when he pointed out a defect in the bill, and that is why the amendment was put together and why it is being offered. That is my understanding.

Mr. BOLAND. Mr. Chairman, if the gentleman will yield, would the gentleman from Ohio and the gentleman from Illinois agree that the existing provision which is now in this bill was written in direct response to the testimony of the Federal Bureau of Investigation?

Mr. McCLORY. Mr. Chairman, I do not know who wrote the provision. I know we had a lot of input as far as the language is concerned.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. ASHBROOK).

The amendment was rejected.

AMENDMENTS OFFERED BY MR. ERTEL

Mr. ERTEL. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendment offered by Mr. ERTEL:

Page 41, line 2, strike out "the Special Court having jurisdiction under section 103" and insert in lieu thereof "a United States district court".

Page 41, line 8, strike out "Special Court" and insert in lieu thereof "court".

Page 41, strike out line 13 and all that follows down through line 2 on page 44 and insert in lieu thereof the following:

JURISDICTION

SEC. 103. (a) The United States district courts shall have jurisdiction to receive applications for court orders under this title and to issue orders under section 105 of this title.

(b) Proceedings under this title shall be conducted as expeditiously as possible. If any application to the United States district court is denied, the court shall record the reasons for that denial, and the reasons for that denial shall, upon the motion of the party to whom the application was denied, be transmitted under seal to the United States court of appeals.

Page 52, line 14, strike out "a judge designated pursuant to section 103" and insert in lieu thereof "a judge having jurisdiction under section 103".

Page 55, beginning on line 19, strike out "shall be retained" and all that follows down through line 22 and insert in lieu thereof "shall be retained for a period of at least ten years from the date of the application and shall be stored at the direction of the Attorney General under security procedures approved by the Director of Central Intelligence.".

Page 58, line 16, strike out "Special Court" and insert in lieu thereof "court".

Mr. ERTEL. Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. ERTEL. Mr. Chairman, I ask unanimous consent that I present this second amendment inasmuch as it crosses jurisdictional lines. On page 5 of the typed amendment it goes into title III as well, in one section.

The CHAIRMAN. Is the gentleman asking that the amendments be considered en bloc?

Mr. ERTEL. That is correct, Mr. Chairman.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The CHAIRMAN. The Clerk will report the remaining amendment.

The Clerk read as follows:

Amendment offered by Mr. ERTEL: Page 68, beginning on line 14, strike out "the designation of the chief judges pursuant to section 103 of this Act" and insert in lieu thereof "such date of enactment".

Mr. ERTEL (during the reading). Mr. Chairman, I ask unanimous consent that the remaining amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

(Mr. ERTEL asked and was given permission to revise and extend his remarks.)

Mr. ERTEL. Mr. Chairman, I would like to explain so the Members will understand what has happened and that is that the first four pages of the amendment, as offered, go to title I, and page 5 of the typed amendment, inasmuch as the operational date of the bill depends on the establishment of the court, it would strike the section relating to that and make it effective upon enactment. That is why I made the unanimous consent request. So that there are really two different provisions, one is title I, one is title III.

The amendment basically is to strike from the bill the provision providing for the special courts under the bill. We will be establishing a special court to sit in the District of Columbia. Each chief judge of each circuit will designate a person who will sit here on the special court and will be here on a rotating basis and will decide on applications for surveillance or wiretapping warrants. Inasmuch as the amendment offered by the gentleman from Illinois (Mr. McCLORY) has been agreed to, which eliminates the need for the warrants for foreign nationals and foreign embassies and foreign trade missions, there is no reason to have this special court sit.

As I understand it, within the past few years there have only been two wiretaps on American citizens. So, for the few events, we are creating a special court to sit here in the District of Columbia, having a judge here at all times who may be designated from California, Oregon, or some other place, requiring this 11-man court to be impaneled at all time requiring a separate court of appeals, and then for having separate appeals to the Supreme Court. It is to have a special court for this limited purpose.

But, that is not my major objection to this special court, my major objection to this special court, assuming it were used, on a regular basis, then this special court concentrates in one point all of our counterintelligence activities as far as the collection of information concerning what is happening and what has happened in the past, thus all warrants would have to pass through this court. If this particular court were penetrated by any other intelligence operation in the world they would have complete knowledge of our entire counterintelligence operations.

So, Mr. Chairman, it would seem to me that one of the fundamentals of intelligence collection is not to concentrate this information but to disperse it so that the other counterintelligence people do not know where to concentrate their own efforts. Under this bill the information would be all concentrated in this court, and anyone who penetrated it would know all of our intelligence operations.

What my amendment would do is say, look, we have a court system, let us use it. You go to the district judge, he puts it under seal. He handles it secretly and the appeals lie with the circuit court of appeals in that district, going right on up the line.

I am not particularly wild about this warrant procedure that has been set up in the bill, but if we are going to have it, then it seems to me we should disperse it across the Nation.

Mr. DRINAN. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Massachusetts.

Mr. DRINAN. Mr. Chairman, I commend the insight of the gentleman, now that the McClory amendment has been agreed to there will be very little for this court to do. But now it is not needed, under the changed procedure, we do not need these courts, as the gentleman from Pennsylvania pointed out, for foreign intelligence or foreign powers, so, how many Americans are going to be subject to the CIA and the FBI only for intelligence reasons? I would add an additional reason for abolishing the courts is because they will have very little to do for the courts under the bill as it has been amended.

Mr. ERTEL. I agree with the gentleman and thank him for his comments.

Mr. MURPHY of Illinois. Mr. Chairman, I rise in opposition to the amendments.

Mr. Chairman, the special court is better than using existing district courts for reasons of both security and civil liberties.

By restricting the number of judges who are exposed to this material, it reduces risks. By centralizing the court in Washington, it enables cleared executive personnel to be present to assist the court in clerical functions, and it enables one secure repository for records, rather than using the insecure facilities of ordinary district courts and clerks around the country. It also insures that where speed is of the essence, a judge is immediately available, rather than perhaps 3,000 miles away.

From a civil liberties point of view, the court minimizes the ability of the executive to go judge shopping. Also, because these judges—who are existing Federal judges, not new ones—will have some experience with these applications, they are not as likely to be bowled over by the executive waving the banner of national security in a questionable case as a judge who has never dealt with such an application before.

Furthermore, there is ample precedent for such a special court. The temporary Emergency Court of Appeals was set up in 1970 by the Economic Stabilization Act to hear appeals from wage and price decisions. It is still in existence, hearing appeals from certain Department of Energy decisions.

Mr. Chairman, this special court is composed of Federal judges designated by the Chief Justice.

Finally, as the committee report notes, the establishment of a special court was said to be necessary by the General Counsel of the Administrative Office of the U.S. Courts for jurisdictional reasons.

Mr. Chairman, the FBI, the CIA, the National Security Council, and the Administrative Office of the U.S. Courts are the ones who requested the special court. The idea was to minimize any leaks that may occur if an official from the executive department had to travel to any outlying districts in the United States, in which case we would have the question of personnel not being cleared for security reasons. We would have the question of filing of papers in a clerk's office where there was no security for the papers or for the application for the order.

The bill would provide one court here in Washington where we could set up secure files in a safe and where only certain personnel could have access to those files. We would have one judge at one time sitting in Washington on an emergency basis.

Mr. Chairman, it has been suggested that with the adoption of the McClory amendment, we will not have much business here in Washington for this special court. This may be the case, but we will have a judge at all times.

For instance, if the FBI's Counterintelligence Department gets information from the NSA or the CIA that a Russian spy is meeting in some spot in the United States, under the bill they are allowed to install a surveillance for 24 hours. However, after that 24 hours, they have to apply to the special court if it involves an American citizen.

All we are providing for with this special court in Washington is the accessibility to that Federal judge to cleared personnel to assist him in handling the application and any secret, sensitive material that is presented to the court.

By dispersing this setup throughout the land, the very thing which the gentleman from Illinois (Mr. McCLORY), the gentleman from New York (Mr. STRATTON), and others have argued here today about security risks in bringing these matters before judges who are unsophisticated in intelligence affairs will be doubled or amplified tenfold.

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. MURHPY of Illinois. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. Mr. Chairman, may I ask the gentleman this question: Is it not true that under the existing law, the Official Secrets Act of 1968, I believe, we, in fact, do issue warrants in domestic criminal cases which remain secret and undisclosed except when required under that particular statute?

Mr. MURPHY of Illinois. That is correct.

Mr. ERTEL. Does the gentleman know of any compromise of that system which existed in the United States since the enactment of that law?

Mr. MURPHY of Illinois. No, but it was the FBI, the CIA, the National Security Council, and officials in the FBI who requested this setup. They had security concerns about these matters.

Mr. ERTEL. Does the gentleman know of any specifically?

Mr. MURPHY of Illinois. I know of none specifically. I am just quoting their testimony to us.

Mr. ERTEL. In fact, do they not go to the judge and meet with him and get the order? And is it not a fact that one of the doctrines of intelligence gathering is to try and disperse your information; do not keep your eggs all in one basket so that you do not lose everything if you get that one basket penetrated?

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. MAZZOLI, and by unanimous consent, Mr. MURPHY of Illinois was allowed to proceed for 2 additional minutes.)

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of Illinois. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding.

I would just like to make a point. I was listening to the discussion of the gentleman from Pennsylvania (Mr. ERTEL) in which he was saying that apparently the court processes work very well in domestic warrant procedures, and on the other hand he says let us get rid of the courts because they will not work in the other case. In one case he is saying we have great confidence: there have been no leaks and no problems in dispersing it. On the other hand, he says get rid of the courts. I think the gentleman cannot have it both ways.

It seems to me we are saying that if the gentleman from Illinois and I on our side carry the day, we are saying that the court procedure is a great guarantee, the best one we could think of to guarantee the rights of the American citizens and at the same time not put any unnecessary impediment into the path of intelligence-gatherers. That is all we are saying.

Mr. MURPHY of Illinois. There is no question that security and protection for the intelligence community is the reason that this provision is in the bill.

Mr. ERTEL. Mr. Chairman, will the gentleman yield, since my name was mentioned?

Mr. MURPHY of Illinois. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. I thank the gentleman for yielding.

I would like to clarify, since the gentleman stated my position, quite frankly we do have a security risk if all of our information is in one court. Why? Because they attempt to penetrate that court. If it is spread over the entire Nation, our security risk is less because they do not know where to go. That is the problem they would have.

Secondly, you know, we have got pretty good security in all our district courts because we have not had a compromise, but if we concentrate it and give them the target—and that would be this court here in Washington, D.C.—then they will concentrate on trying to penetrate it. So I think to put it back into the district courts is an excellent point.

Secondly, with all the district court judges, is the gentleman trying to say that we cannot find a secure district court judge in these United States? I think we can.

Mr. MURPHY of Illinois. I am not trying to say that at all. I appreciate and respect the gentleman's viewpoint, but I respectfully disagree.

Mr. KASTENMEIER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment. I do so mindful that both the gentleman from Pennsylvania (Mr. ERTEL) and the gentleman from Massachusetts (Mr. DRINAN) are esteemed members of my Subcommittee on Courts, Civil Liberties, and the Administration of Justice. I believe that the Select Committee on Intelligence has worked out a necessary formula for the court structure to handle these applications, and I am aware of the fact that they have come to learn that one of their witnesses, Carl Imlay, General Counsel of the Administrative Office of the U.S. Courts, stated that constitutional problems existed with respect to granting nationwide jurisdiction to individual judges. Drawing on the example of the temporary Emergency Court of Appeals, it is suggested that a special court be created and vested with the jurisdiction in Federal judges assigned to it, and that is what they have done.

It also should be pointed out that in the Keith case it is not just contemplated by the committee itself. The Supreme

Court said that a warrant in intelligence cases need not be based on the same type of standards and procedures required for law enforcement. In doing so the Court stated the request for prior court authorization could in sensitive cases be made to any member of a specially designated court. That is what has been provided here. But the question of forum shopping, finding a secure U.S. District court judge throughout the United States of 4 or 500—and after the judgeship bill there will be far more than 500 of them—may be possible, but if we are concerned about the people affected by this, such forum shopping would be the last thing on the Earth that we would want done in terms of the Government.

On the other hand, the Government has an interest in a secure court. This court can be provided in the District of Columbia. Just as the White House itself and the CIA are secure presumably, so this court will be made secure.

I think the formula provided by the bill is a reasonable one and should be supported. This is one of the particular ways in which the House committee bill is much better than that of the Senate.

Mr. ECKHARDT. Mr. Chairman, I move to strike the last word, and I rise in support of the amendments.

Mr. Chairman, I am not persuaded that we need a special court because our existing courts are not adequate to make the decisions here involved. I think that one of the bulwarks of our system in this country rests on tradition of judicial process, and I think that the reason that tradition of judicial process works is because cases are brought before judges experienced in trying all types of cases.

I understand that a special court would be nominated in each of the circuits, and that the ultimate selection then would be by the Chief Justice of the Supreme Court. I see no reason why the Government could not find at least one secure and dependable judge within a district of the United States. If need be, one could be appointed in each of those circuits for the purpose, but to appoint a new court, a group of persons who may try one case within a period of a year or two and then try no more, men who are not experienced in the general judicial process, it seems to me, would be a dangerous process.

I do not like special courts. Special courts throughout history have been courts which are amenable to tyranny. The thing that protects our Nation from tyranny, it seems to me, is the custom, the practice, and the experience of judges to operate within due process of law. A special court appointed for a special purpose is simply not as dependable in enforcing that kind of process as are judges who are sitting for general purposes.

Mr. KASTENMEIER. Mr. Chairman, would the gentleman yield on that point?

Mr. ECKHARDT. Surely, I yield to the gentleman from Wisconsin.

Mr. KASTENMEIER. Mr. Chairman, I wish to make this point, because I think there is a misapprehension as to what the bill provides.

These judges to be appointed for the special court are indeed district judges of general jurisdiction who are temporarily assigned for this purpose. They are rotated, and when they are rotated, they go back to their circuits. But they are not special for this purpose in any permanent sense. They are temporary, and they are assigned to the special courts ordinarily through general competence.

Mr. ECKHARDT. Mr. Chairman, may I reply and ask this: How long do they serve once they have been appointed, and how frequently do they rotate?

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Chairman, my understanding is that they could serve for only 6 years, and they could only serve two terms. They could serve no more than two terms.

Mr. ECKHARDT. Mr. Chairman, after 12 years, that makes a man pretty much a person of a special court.

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. ECKHARDT. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, the gentleman's argument is very sound, and the gentleman's argument is entirely consistent with the constitutional structure under which our courts are established.

The gentleman from Wisconsin (Mr. KASTENMEIER) has a misapprehension of what this bill provides, because originally there was provision for the appointment of special judges, and the administrator of the Federal court system advised the committee that we could not have special judges. Consequently, they changed the concept from a special judge to a special court, with this kind of unprecedented type of procedure for appointing these 11 judges from the 11 circuits through the operation of the judicial conferences in these cases which, as I understand it, have no authority whatever to designate any special members of a special court.

I do not know whether this is a title I or a title III court. Nobody could explain. It is provided in legislation which is related to the whole subject of national security, and it seems to me that this is the other part of the bill which should be eliminated because, as I might state further, since it was testified earlier in the year that there were no Americans who were subject to electronic surveillance, and later the Attorney General did notify our committee that one American had been subjected to electronic surveillance.

The CHAIRMAN. The time of the gentleman from Texas (Mr. ECKHARDT) has expired.

(On request of Mr. McCLORY and by unanimous consent, Mr. ECKHARDT was allowed to proceed for 1 additional minute.)

Mr. McCLORY. But certainly this case, or any case, for that matter, involving a U.S. person, can be adequately and competently taken care of, just as title III cases for warrants for domestic surveillance are taken care of at the present time by the district courts.

Mr. ECKHARDT. Do I understand, in order to clarify the terms of the bill and some of the questions that were asked me, that the selection may be a total of 6 years, during which time the judges engage in this activity alone?

Mr. McCLORY. That is correct.

Mr. KASTENMEIER. Mr. Chairman, if the gentleman will yield, that is not the understanding as I have been informed. You have 11 judges, one selected from each circuit, and one of them at a time serves in the District of Columbia on these cases. There are not that many cases. And that judge may serve temporarily for a period of 2 months, 4 months, and he is rotated out and another judge comes in. So when we are talking about a special court we should understand what is contemplated in terms of service of a judge. This is a judge of general jurisdiction, a U.S. district judge from each of the 11 circuits.

Mr. ECKHARDT. For how long a period of time is he assigned to a court? That is what I am trying to get at.

Mr. KASTENMEIER. He is assigned for a period of 6 years, but during that 6-year period he will sit in Washington by himself for a short period of time, perhaps 2 months, 4 months, and then be rotated off, and one of the other 10 colleagues would serve.

Mr. ECKHARDT. But he will be the exclusive judge for this purpose?

Mr. KASTENMEIER. That is correct; for that period of time.

Mr. ECKHARDT. During the period of 6 or 12 years. I still think that is unnecessary.

Mr. McCLORY. Mr. Chairman, I move to strike the requisite number of words, and I rise in strong support of the amendment.

Mr. Chairman, this strikes me as being a very important amendment for the Committee to adopt, because if there is a part of the bill which, it seems to me, is not only unprecedented but undesirable, it is this section which provides for the establishment of the special court.

As I indicated, there was an attempt, first of all, to assign special judges and, presumably, it was thought that if we had some special judge somehow or other they could be relied upon to provide approval for electronic surveillance such as the intelligence agencies might request. But then when the committee was informed that there was no authority for special judges in the Federal court system, this concept of a special court arose. There have been a number of variations of this provision proposed.

Mr. DRINAN. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Massachusetts.

Mr. DRINAN. Mr. Chairman, I am happy to concur in the gentleman's judgment. I voted against the McClory amendment, but I think the gentleman from Illinois (Mr. McCLORY) is right on target now. This would be a total alteration of the structure of the Federal courts. I think it would be a misuse.

Mr. Chairman, I concur in the statement made by the gentleman from Texas (Mr. ECKHARDT).

Mr. BOB WILSON. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from California.

Mr. BOB WILSON. Mr. Chairman, did I really hear correctly the colloquy a few minutes ago in which it was stated that a special court would be set up here in the District of Columbia and judges would be brought here in rotation every month or two?

I suppose they would have to be brought every month or two because they would go stir crazy because they have had nothing to do. They have only had one case in the last year or 2 years to even consider, so this is a ridiculous situation. I am fully in support of the amendment.

Mr. McCLORY. No one has any idea how long or how short a time they would sit here.

Mr. BOB WILSON. Or how expensive it would be.

Mr. McCLORY. This is a completely new concept. There is nothing constitutionally which authorizes a special court. As the gentleman from Texas (Mr. ECKHARDT) pointed out, we should be wary of special courts which have special prerogatives. It seems to me that when we designate by the Constitution a district judge, we empower that district judge to hear and entertain all types of cases, and to say that the rest of the judiciary cannot hear applications for warrants to engage in electronic surveillance of U.S. persons—except these special judges who may be considered patsies for some executive, it would seem to me to be a miscarriage of justice.

Mr. ECKHARDT. Mr. Chairman, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from Texas.

Mr. ECKHARDT. Mr. Chairman, I wish to read the language in section 103, which is the only language in the bill having to do with this question of special judges and their tenure:

> There is established a Special Court of the United States with jurisdiction throughout the United States to carry out the judicial duties of this title. The Chief Justice of the United States shall publicly designate at least one judge from each of the judicial circuits, nominated by the chief judges of the respective circuits, who shall be members of the Special Court and one of whom the Chief Justice shall publicly designate as the chief judge. The Special Court shall sit continuously in the District of Columbia.

Now, there is nothing in that language that says that these judges will continue with their duties elsewhere. I recognize that there is some language to that effect in the committee report, but it seems to me that we are setting afoot at least the possibility of a court which deals in only this subject matter. I think that is extremely dangerous.

Mr. McCLORY. The gentleman is correct. Let me say that if an application for electronic surveillance was made to a court in some other area of the country, because it was desired there, nevertheless it would be necessary to come to Washington, D.C., in order to have that application acted upon.

Mr. BOB WILSON. Mr. Chairman, if the gentleman will yield further, does the gentleman know whether any testimony was submitted from the administrator of the courts as to the costs of this special court? How many personnel would be there to justify the court?

Mr. McCLORY. It would be entirely speculation on that. Nobody knows how long or when such a special court might sit. That would depend entirely upon how many applications for warrants were provided for. Apparently, if the bill is only going to apply to U.S. persons, there are going to be virtually none.

Mr. MURPHY of Illinois. Mr. Chairman, I rise in opposition to the amendments.

The CHAIRMAN. The gentleman has already spoken.

Mr. MURPHY of Illinois. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. Without objection, the gentleman from Illinois (Mr. MURPHY) will be recognized for 5 minutes.

There was no objection.

Mr. MURPHY of Illinois. Mr. Chairman, I refer the gentleman from Texas to the language of the bill itself. It says that the court will sit continuously, not the judge. I think that is an important distinction. The court will be in existence; the judges are rotated.

That was the testimony before the committee, that they envision the judges sitting about a month or 2 months, and we asked what kind of court this would be. Would this require more than one? The response was that in the last year or two there have only been two cases, so I think this is a lot to do about nothing. The court will sit continuously; there will be rotating judges, the remaining judges will be hearing cases continuously back in their districts.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of Illinois. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. My recollection is a little dim, but it seems to me that at some point in our hearings we propounded these questions to our witnesses, who suggested that the judges should come to the District of Columbia to sit on the special court, which meets continuously, and could also hear other cases. They are competent for the jurisdiction, and they could be asked to sit in on the District of Columbia Appellate Court.

Mr. MURPHY of Illinois. The gentleman is correct.

Mr. MAZZOLI. That means—and it might answer the charge raised by the gentleman from California (Mr. BOB WILSON)—the cost will be minimal, because these jurists will be doing other work in addition to this.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Pennsylvania (Mr. ERTEL).

The question was taken; and the Chairman being in doubt, the Committee divided, and there were—ayes 74, noes 33.

RECORDED VOTE

Mr. MAZZOLI. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered .

The vote was taken by electronic device, and there were—ayes 224, noes 103, not voting 105, as follows:

[Roll No. 728]

Mr. OTTINGER and Mr. WOLFF changed their vote from "no" to "aye."

So the amendments were agreed to.

The result of the vote was announced as above recorded.

Mr. MURPHY of Illinois. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. YATES, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7308) to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information, had come to no resolution thereon.

## GENERAL LEAVE

Mr. MURPHY of Illinois. Mr. Speaker, I ask unanimous consent that all Members may be permitted to revise and extend their remarks, and include extraneous matter, on H.R. 7308, the bill just under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

## PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO HAVE UNTIL MIDNIGHT, MONDAY, SEPTEMBER 11, 1978, TO FILE REPORT, ALONG WITH ANY SEPARATE OR MINORITY VIEWS, ON H.R. 13750, SUGAR STABILIZATION ACT OF 1978

Mr. VANIK. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means may have until midnight, Monday, September 11, 1978, to file a report, along with any separate or minority views, on the bill (H.R. 13750) to implement the International Sugar Agreement between the United States and foreign countries; to protect the welfare of consumers of sugar and those engaged in the domestic sugar-producing industry; to promote the export trade of the United States; and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

## SALT PACT ILLUSTRATES NEED FOR BRICKER AMENDMENT

(Mr. ASHBROOK asked and was given permission to address the House for 1 minute.)

Mr. ASHBROOK. Mr. Speaker, the upcoming debate on the SALT agreement once again illustrates the need for swift enactment of the Bricker amendment. This important amendment which I am sponsoring would put constitutional safeguards on the use of executive agreements in conducting foreign policy.

As you may have read, the Carter administration is considering the possibility of submitting the SALT accord as an executive agreement requiring only a simple majority vote in Congress. This would get around the two-thirds vote needed for passage of a treaty. The goal, of course, would be to avoid a difficult battle for ratification such as occurred during the recent Panama Canal debate.

That the Carter administration would even consider this tactic is incredible. It is a thinly disguised attempt to evade the normal treatymaking process.

Call it what you will, the SALT agreement should require a two-thirds vote for ratification. It is too important an issue to be handled in a cavalier manner by President Carter.

We should call a halt to this game of words. Congress must not abdicate its responsibility on a matter as crucial as the security of our Nation.

The Bricker amendment which I have introduced for the past several Congresses would erect a safeguard for this type of problem. An executive agreement would be handled like a treaty. The name, whether the President calls it a treaty or an executive agreement, would not change the necessity of receiving a two-thirds vote.

The Bricker amendment would prevent unnecessary delegation of power by Congress to the President. It would help restore a proper congressional role in foreign affairs. It is time that this important amendment was added to our Constitution.

## THE LAST CLEAR CHANCE TO AVOID A COMMUNIST TAKEOVER IN RHODESIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. SIKES) is recognized for 30 minutes.

● Mr. SIKES. Mr. Speaker, the free world is confronted with its last clear chance to avert a bloodbath and a Communist takeover in Rhodesia. I am convinced of this following recent talks in that country with officials of several ministries and the U.S. Government.

Only the United States and Britain in the Western World now seem concerned. This interest still is directed more to bringing guerrilla leaders into the coalition than to helping the coalition establish an impressive record. Confidence in the government has deteriorated and it now appears necessary to bring one or both of the so-called patriotic front movements into the government to prevent a civil war which experts say could not be won by government forces.

Obviously it is important that we devote stronger efforts to shoring up the coalition while negotiations continue with guerrilla leaders. Nothing would have been more painful than recognition and an exchange of ambassadors. Apparently this is not being considered.

The entire situation is much too reminiscent of the Vietnam experience which Americans sadly remember.

The guerrilla leaders Mugabe, based in Mozambique, and Nkomo, in Zambia, have conducted terrorist raids in Rhodesia for many months. Now they are training larger forces for invasion when the time is ripe. Both are heavily supplied with Russian weapons. Cuban advisers and Russian experts have been identified as aiding them. At one time the Chinese were involved. This is no longer certain.

The guerrillas now have infiltrated most of Rhodesia and out of fear many local residents are quietly supporting them.

Rhodesian troops are effective but they cannot be everywhere at once and terrorist raids are becoming more effective, killing, and burning. At present the coalition government is not reaching the black populace, who want more evidence of change to black control. The people are becoming more and more resigned to a take-over by Nkomo or Mugabe supporters. Rhodesian officials feel strongly that British and United States are to blame for their country's problems. Some of them still hold the view that they can win despite today's gloomy prospects and delay a take-over by the foreign based blacks.

Nkomo and Mugabe are gaining converts rapidly. Support is falling away from the coalition. The government says it is through fear of reprisal—others say it is because of lack of action by Rhodesian Government following the establishment of a coalition. Probably both are contributing factors.

There is the possibility the civil war will find the forces of Nkomo and Mu-

gabe pitted against each other as well as against the Rhodesian Government forces. Such a development would leave the country almost totally destroyed and the white population killed or driven out.

The black nations which fear the spread of Communism are reluctant to speak out against the establishment of another black government, regardless of its leanings.

An election to establish a new government has been promised in December but there has been talk of postponement. To postpone the election would add fuel to the cause of Nkomo and Mugabe. Delay in writing a new constitution and submitting it to a vote will have a similar effect.

Unless there is an early move to meet black aspirations there will be an explosion which quickly can be destructive to an industrious and progressive country. Many of the whites are reluctant to accept the inevitability of change and are unwilling to share power.

The irony of the situation is that neither Nkomo nor Mugabe would offer the one man, one vote ideal of the West, which the West has been seeking to bring about in Rhodesia. Neither has indicated he would provide a true majority government.

In summary, Rhodesia is harassed from within by increasing terrorist attacks, threatened by civil war, and pressured by economic sanctions by the United States and other nations. We helped to create the situation and the Russians are taking advantage of it.

We should portray the Russian involvement in its true colors as another attempt to seize territory and control the lives of people. There is no excuse for U.S. ineptitude in dealing with Communist aggression. It has been demonstrated in Rhodesia. Time is running out for our interests. Only an immediate and vigorous and more meaningful effort will prevent Communist control there.●

## THE MOOD OF THE 20TH

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. GOLDWATER) is recognized for 5 minutes.

● Mr. GOLDWATER. Mr. Speaker, I am always gratified to return to my district during a recess of the Congress to discuss the concerns of my constituents. During the past 2 weeks I have had the opportunity to talk with the people of the 20th Congressional District in California about their priorities for Congress in these closing weeks of our term.

We have been given a tall order, Mr. Speaker. For some time there have been rumors that mail will not be delivered because of a threatened strike by postal workers. With a recently released Gallup poll showing decided disapproval of strikes by public service employees, Congress cannot stand idly by with such action by labor hanging over our heads.

A Harris poll which was also taken during the recess indicates that 3 out of 4 Americans believe that prices are rising faster now than a year ago. When this poll was taken in 1977, less than half of those questioned were of the opinion that the cost of goods and services at the marketplace were higher than in the previous year. With all the talk of pay raises for the American worker, it is interesting to note that better than 2 out of 3 union members would be willing to lower their pay hikes if there were some assurance that government was keeping the spiraling cost of living under control. But inflation simply wipes out any increase in the size of the worker's paycheck.

With the results of these polls in mind, and after talking with the residents of my district, I certainly plan to do my best as a Member of the House to make certain that every bill we consider is consistent with a sound fiscal policy. Already, 22 States have passed resolutions calling for a constitutional convention to mandate a balanced Federal budget as a constitutional requirement. As a Wall Street Journal editorial put it so eloquently last Friday, what these States are saying essentially, is that "Congress cannot be trusted with money." I take no sense of pride in this attitude toward the Congress. The only way we can shake this reputation is demonstrate our commitment to a sensible plan for Government spending.

Then too, there is the issue of ethics in Government. I thought our experience with Watergate a few years ago was an example of how not to behave in public office. But the recent disclosures of widespread corruption in the General Services Administration are infuriating the taxpayers in my district, and making many wonder when all of this will stop. I even saw one report just the other day of a worker who managed to get unemployment compensation by using his dog's name. For the Government to be unable to detect these illegal activities in its own house is a crime in itself.

It is no wonder that a Los Angeles Times poll conducted while I was in my district, revealed that at least as many people who voted for proposition 13 last June, are favorably impressed with its results. By the same token, nearly 70 percent of the people feel that their elected officials are not "making an honest effort" to carry out the provisions of the initiative.

So there is much to do as we prepare for adjournment. The mood of the 20th Congressional District in California reflects the impatience of its citizens. I think, Mr. Speaker, their mood is the mood of the Nation.●

## SELLING EFT SERVICES, NOT ACRONYMS

Th SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, what do Ginny the Green Machine, the Wizard of Ease, Homefolk's Honey, Goldie your Golden Teller, Girl Friday, and 24-hour Jill have in common?

These names all represent efforts by the banking industry to humanize the rapidly growing system of electronic fund transfers (EFT's)—the so-called "cashless, checkless society of the future."

The realities of this future society have fallen far short of the banking industry's original predictions. For banking by computer to be profitable to the industry necessitates a wide-scale acceptance of the systems. But, consumers remain wary of electronic banking and despite the conveniences, many consumers prefer to stick with a system they understand and trust, such as banking by check.

So, massive advertising campaigns have been launched and millions of dollars have been spent in an attempt to gain consumer trust. But, the industry is discovering that catchy names can only go so far in assuring consumers that their life savings are safe in electronic banking.

And, now, the banking industry is realizing that one of the most effective advertisements for EFT's is exactly what they have fought tooth and nail against for the past year—comprehensive legislation that guarantees proper consumer safeguards in EFT transactions.

This switch in policy is clearly seen in a recent editorial in the American Banker. The editorial admits the need for legislation in order to win over consumers to the systems. And ironically, the editorial appeared on August 11, the very day the House passed H.R. 13007, the Electronic Fund Transfer Act, by a overwhelming 314–2 margin.

The editorial goes as far as admitting that Wisconsin bankers are satisfied with an even stricter State law than the Federal legislation which passed the House last month. Wisconsin is the only State which allows reversibility in EFT transactions, and all reports are that the law is working for consumers and bankers alike.

The right to reversibility allows a consumer to stop payment on a EFT transaction within 3 days. This is a basic and accepted right of banking by check in purchasing goods and services. It protects a consumer who purchased faulty merchandise by allowing him the right to stop payment.

But, in committee markup, the lobbying against this section was tremendous. Tremendous enough to convince a majority of the Banking Committee members to delete the section of H.R. 13007 which allowed consumers the right of reversibility.

However, I am proud of the bill we reported and that passed the House. Despite the lack of a reversibility section, the bill protects consumers in other vital areas—such as limiting consumer liability to $50 and prohibiting the issuance of unsolicited, validated cards. But, without question, a percentage of consumers, however small, will not accept electronic banking because of a lack of a reversibility right.

The Electronic Fund Transfer Act still faces a tough battle in the Senate. Several amendments which substantially weaken the act have already been offered. These amendments could only further discourage consumers from trusting a system that lacks essential rights and protections.

Mr. Speaker, I submit the American Banker editorial in its entirety for the RECORD.

SELLING EFT SERVICES, NOT ACRONYMS

In the beginning of EFT, and that goes back only a handful of years, the task of winning consumer acceptance of electronic banking seemed almost impossible. Bankers uncautiously made it sound like they were selling acronyms instead of convenience, systems instead of services. The more visionary thinkers in the industry were talking in terms of a "cashless" or "checkless" society, and it rapidly became clear that the public was uneasy about losing its proven payment mechanism.

Consumer advocates, patterned in the image of Ralph Nader, reveled in the financial industry's openness to criticism. They saw banks trying to wrest financial power from the individual, to invade personal privacy, and to force consumers to use EFT or face second-class citizenship.

To their credit, most consumerists have come around to more responsible and thoughtful positions. Their attitudes on EFT now more accurately reflect public opinion: they are sometimes right, sometimes wrong, but always to be reckoned with. After all, the future of a more convenient and efficient payment system is uncertain as long as the population is wary.

Ever conscious of public opinion, some members of Congress were eager to legislate consumer protection regulations to govern EFT systems. The House and Senate versions of EFT bills which have made the most progress since the National Commission on EFT completed its work last winter attempt to define the rights, responsibilities and protections of consumers, financial institutions and third parties in an electronic transaction.

The consumer orientation of the original versions of the bills sponsored by Rep. Frank Annunzio, D., Ill., and Sen. Donald W. Riegle Jr., D., Mich., was unmistakable. But they helped create a series of additions to the banking lexicon which are now firmly ensconced with the acronyms that helped arouse consumer wrath in the first place.

The new terms include liability limitation, descriptive statements, error resolution, unsolicited debit cards, and reversibility. They are slightly more descriptive than three-letter acronyms like ATM or RSU, but one senses that to the uninitiated, they would be just as meaningless.

As an example, look at reversibility. It is simple enough to understand. It replaces the concept of stop payment which is a guaranteed right when a paper check is used for purchasing goods or services. In an EFT system where funds are transferred instantaneously, stop payment is impossible.

Both the Riegle and Annunzio bills contained reversibility provisions. Major banking industry lobbyists opposed them and prevailed after a fair amount of muscle-flexing. The American Bankers National Retail Merchants Association found themselves in rare agreement on this issue, and consumer advocates have not been satisfied by the outcome.

It is, in fact, academic what consumer advocates think. The more relevant question is, will the American consumer utilize EFT if he or she feels that rights existing in the older-generation payment system are being eliminated? Wisconsin bankers, the only ones in the country who have had to contend with a reversibility requirement, believe the answer is no.

Following enactment of the Wisconsin EFT law in 1976, state regulators wrote additions to the administrative code which embodied the wishes of one of the most activist consumer populations in the nation. The bankers and consumer advocates compromised on reversibility: transactions of $50 or more, effected electronically, can be reversed by the bank upon written notice from the consumer within three business days of the transaction. This is similar to what the original Riegle bill called for.

All parties are said to be satisfied. The $50 threshhold was adopted to emulate the current system, since irreversible cash is the usual means of payment for lesser amounts. Bankers and consumers clashed on the time limit and reached agreement on three days. Consumers wanted more.

J. Frederick Ruf, president of Wisconsin's TYME network to which more than 200 financial institutions belong, credits the consumer group participation with forestalling the public criticism faced elsewhere. "If a system is to succeed, it must satisfy the customers," he has said in support of reversibility, which places him at odds with the ABA.

Furthermore, Mr. Ruf says, after more than two million TYME system transactions in two years, there has not been a documented request for a reversed transaction. Inevitably, disputes arise, but they are being resolved between merchant and consumer without a bank interceding.

Lack of reversibility requests in Wisconsin is powerful testimony to the public acceptance of EFT. If major financial trade groups soften their line, as have consumerists, the dreams of visionaries may become reality.●

## AGING COMMITTEE RESOLUTIONS ADOPTED ON MENTAL HEALTH, GOVERNMENT REORGANIZATION AND MANDATORY RETIREMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 10 minutes.

● Mr. PEPPER. Mr. Speaker, I am pleased to present to my colleagues the background and text of three important resolutions overwhelmingly adopted by the House Select Committee on Aging, which I have the privilege to chair. These resolutions relate to the mental health care of the aging, the reorganization of Federal programs affecting the elderly, and an amicus curiae brief on a mandatory retirement case in the U.S. Supreme Court.

The resolutions' background statements and the resolutions themselves follow:

SELECT COMMITTEE ON AGING RESOLUTION ON PRESIDENTIAL REORGANIZATION OF FEDERAL PROGRAMS FOR THE ELDERLY

(Approved 24–2 Aug. 28, 1978)

BACKGROUND

The need for Reorganization of federal programs for the elderly has long been a concern of the Select Committee on Aging. Even before its first formal hearing on the subject in April 1977, the Committee and its staff had assisted the Carter transition team in setting out options for dealing with the confusing fragmented nature of federal efforts to assist older Americans.

In July 1977 a number of Committee members touched on the need for dealing with this problem during their meeting at the White House with President Carter. In September, the Chairman compiled a number of possible recommendations that grew out of the hearings and informal inquiries and transmitted them to the President's Reorganization Project (PRP). In January 1978, a bipartisan group of Committee staff members met with PRP officials and discussed these and other options.

The President's Reorganization Project task force working on services for the elderly is circulating a "working paper" describing options it may recommend to the President in early 1979. Initial review of the document indicates a very limited range of options is being considered.

If meaningful improvements are to be made anytime soon, it is imperative that a much broader attack on the problem of fragmentation in federal programs serving the elderly at least be among the options considered by the President.

RESOLUTION

Be it resolved, That the Select Committee on Aging—believes that the problem of fragmentation and lack of coordination among federal programs serving the elderly continues to be a serious one, and that a full range of options should be considered by the President in deciding what organizational, regulatory or statutory changes he recommends to Congress.

Be it further resolved, That the Committee—urges favorable consideration of a measure, such as the draft accompanying this resolution, expressing the sense of the House on this timely and important topic.

H. RES. —

Whereas, older persons are eligible to participate in hundreds of programs funded by federal, state and local governments and private organizations; and

Whereas, these programs conflict in eligibility criteria, administrative requirements and geographical coverage, and are not well coordinated with each other; and

Whereas older persons often find it impossible to come to grips with this bewildering maze of programs; and

Whereas the House Select Committee on Aging and other Congressional committees have recommended that the federal government take strong, positive steps to reorganize federal programs serving the elderly along more rational lines; and

Whereas the President's Reorganization Project, within the Office of Management and Budget, will be making recommendations to the President on how to restructure federal efforts to serve our older citizens; and

Whereas official comments on the general need for better coordination from the Office of Management and Budget and the Department of Health, Education, and Welfare call into question how well those agencies perceive the need for timely, meaningful restructuring of programs to serve the elderly;

Now, therefore, be it resolved by the House of Representatives that the Office of Management and Budget is urged to recommend changes in statutes, regulations and program structure commensurate with the sweeping need for reorganization among federal programs serving the elderly documented by the House Select Committee on Aging and other arms of Congress; and

Be it further resolved—that such recommendations address at least the following options or problem areas:

(1) swift development of common application and referral form to be available for use by all major programs serving the elderly;

(2) restructuring of those now fragmented programs providing home health or other in-home services to older Americans, perhaps as part of a system of community-based long-term care centers offering a wide range of services;

(3) transfer of aging-related programs to the Administration on Aging;

(4) personal approval by the President of all inter-agency agreements designed to promote better coordination among such programs; and

(5) designation of a high-level official in the Departments of Transportation, Labor, and Housing and Urban Development, with specific responsibility to assure the needs of the elderly in their respective agencies are

considered, and to foster better inter-agency coordination.

---

SELECT COMMITTEE ON AGING RESOLUTION ON MENTAL HEALTH CARE

(Approved 20–6 August 28, 1978)

BACKGROUND

Older Americans are among those in greatest need of treatment for mental illness. Although constituting only 11% of the total population, persons over 65 account for 25% of all suicides. Some 15–25% of older people have significant mental health problems, yet they make up less than 2% of those cared for in private psychiatric settings, and less than 2% of those seen in public outpatient clinics. Anywhere from 20–30% of older people labeled "senile" have specific conditions that can be diagnosed, treated and often reversed.

Current Medicare law severely restricts mental health coverage. The program offers only $250 annually for outpatient care costs, requires 50–50 copayments, and limits psychiatric hospital coverage to only 190 days in a person's lifetime. Moreover, clinical psychologists cannot deliver care unless a medical doctor has first prescribed it, a requirement that adds measurably to the cost of the service.

Congressman Pepper has introduced legislation, H.R. 13460, which addresses these shortcomings. It would (1) equalize mental health coverage under Medicare with that for physical illness, (2) permit direct reimbursement for clinical psychologists where they are licensed by their state, and (3) help states develop and enforce standards governing the discharge of mental patients and the adequacy of living conditions of SSI recipients in nursing and boarding homes.

Federal policy may also be contributing to widespread "dumping" of elderly mental hospital patients into community settings, so that states can shift the cost burden of supporting these persons to the federally funded Supplemental Security Income (SSI) program. A survey by the Select Committee on Aging revealed a 62% reduction in mental hospital patients from 1969 to 1977. The President's Commission on Mental Health, chaired by First Lady Rosalynn Carter, noted this situation and concluded, "Nowhere are the deficiencies of the Medicare program more apparent than in the area of financing mental health care."

RESOLUTION

Be it resolved, That in view of the results of the Select Committee on Aging's hearings and survey on the subject, and the findings of the President's Commission on Mental Health chaired by the First Lady, the Committee expresses its strong support for legislation such as H.R. 13460 to establish parity between physical and mental health services under Medicare, and to counter any incentives in current law to discharge older patients prematurely from state hospitals.

---

SELECT COMMITTEE ON AGING RESOLUTION ON AMICUS CURIAE BRIEF IN SUPREME COURT ON MANDATORY RETIREMENT

(Approved 20–5 August 28, 1978)

BACKGROUND

As part of the Age Discrimination in Employment Act (ADEA) Amendments of 1978, Congress repealed the mandatory retirement age of 70 for most federal employees.

Partly in order to avoid referral to other committees and the attendant delay, managers and sponsors of the bill agreed to accept an amendment which allowed statutes setting various mandatory retirement ages for other groups of federal employees, including the mandatory retirement age of 60 for most Foreign Service Officers, to remain intact. Another factor in the decision not to contest deletion of the Foreign Service Officers age was the recognition that a three-judge panel of the U.S. District Court in the District of Columbia had unanimously declared the retirement age an unconstitutional denial of equal protection under the Fifth Amendment. The case was *Bradley vs. Vance.*

Acting on the request of the State Department, the Solicitor General appealed the decision, the Supreme Court noted probable jurisdiction, and the case (now *Vance vs. Bradley*) has been set for argument in the upcoming fall term of the Court.

Among other arguments in the Government's brief to the Supreme Court is the contention that Congress, in enacting the 1978 ADEA amendments, reaffirmed the intent to keep the mandatory retirement age for Foreign Service Officers at 60 years.

Attorneys for the plaintiffs—ten employees of the Foreign Service, the U.S. Information Agency and the Agency for International Development—have asked Chairman Pepper to file a brief as *amicus curiae*, or friend of the court, to address this and other arguments arising in the case from his unique perspective.

The only costs attributable to such effort would be $300–500 for printing of the briefs; payable out of the contingent fund of the House after approval by the Committee on House Administration.

RESOLUTION

Be it resolved, That the Select Committee on Aging—authorizes and directs the Chairman to take appropriate steps to file an *amicus curiae* brief in behalf of the appellants in the case of *Vance vs. Bradley*, for himself and such other Members of Congress as desire to join in the brief.●

---

## "CLEVER SCHEME" TO PAY FOR QUIETER PLANES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. COTTER) is recognized for 10 minutes.

● Mr. COTTER. Mr. Speaker, last spring, when the House Ways and Means Committee approved legislation for an airport trust fund, I stated my opposition to the bill in the committee report. At the time, I expressed a fear that such a fund could start a dangerous precedent of big businesses dipping into Federal dollars to meet regulatory requirements.

Mr. Hobart Rowen, a renowned columnist for the Washington Post, recently wrote the following article on the airport trust fund bill, detailing the opposition arguments. I would like to bring this excellent column to the attention of my colleagues so that they will keep it in mind when the bill comes up for final passage.

"CLEVER SCHEME" TO PAY FOR QUIETER PLANES

(By Hobart Rowen)

If the airlines have their way, every time you buy a ticket for a flight in this country 25 percent of the taxes you pay would go directly to them to buy $3.3 billion worth of new aircraft and equipment. And every time you go abroad, $10 would go from your pocket to the airlines' treasuries—it wouldn't even go first to Uncle Sam—to finance their new equipment.

This rip-off is part of a clever scheme concocted by the airlines to have the public pay for the less noisy planes they are supposed to acquire. It is a lovely make-work project for the aircraft manufacturers. And among the more interesting aspects is that airline fares could be reduced by the amount of this bonanza to the industry if administration officials and congressional leaders have the guts to oppose the scheme.

Wage-price watchdog Barry Bosworth wrote a private internal memorandum to the Office of Management and Budget on Sept. 18, 1977, exposing the plan. But he has not been allowed to go public with it. The details of the proposed "Treasury raid" were first publicized by Rep. Gene Snyder (R-Ky.).

Here's what has happened: The airlines now collect, to pay for air-safety measures, an 8 percent tax on domestic tickets, 5 percent on domestic air freight, and a fixed $3 fee on each foreign departure.

Those monies go into a trust fund financing airport safety measures, including the salaries of personnel and the detection equipment used in the pre-boarding routines. But the money collected is said to be more than needed, suggesting that the 8 percent tax ought to be lowered to about 6 percent and the other charges accordingly. Wouldn't a 25 percent reduction in airline taxes be a nice anti-inflationary gesture?

But no. The airlines, required by a 1976 Federal Aviation Administration regulation to use less noisy aircraft after 1984, saw an opportunity to make the public pick up the check. Instead of lowering the tax bill by about $3.3 billion, the airlines' lobby has had two measures (H.R. 8729 and H.R. 11986) introduced in Congress.

They would divert 2 points of the 8 percent passenger tax (25 percent) and 2 points of the 5 percent freight charge (that's 40 percent) into a kitty to finance new planes. The $3 departure tax would be upped to $10, with all of it going to the airlines. And a brand-new 5 percent surcharge would be placed on international cargo—all going to the carriers.

So far, these measures appear to be moving with little opposition through the House Public Works and Ways and Means committees.

In 1976, the FAA estimated that the airlines could modify their planes to conform to anti-noise requirements for a total cost of $950 million. "Retro-fitting" a Boeing 727 by installing sound-absorbent material costs only about $225,000. A new plane can run to $12 million.

But if the airlines can squeeze $3.3 billion out of an unsuspecting public, they will have acquired all new equipment, by putting up barely over half or the total cost, estimated at $7 billion. You and I will pay for the rest.

If the airlines get away with this bad precedent, then the public should expect to be the victim—through taxes—of the cost of meeting any environmental standard.

But the devious nature of this particular proposal is extraordinary. The tax is sneaky, because it is already on the books for another purpose. Without publicity, the "raid" would have taken place, and no one would be the wiser.

This gift to the airlines ought to be vigorously contested by the Carter administration. Instead, it is keeping quiet, in the hopes that it will get some congressional votes as a trade-off for an airline regulation reform bill.

Privately, Carter aides hope to get the House bills weakened in the Senate. But if the White House really wants to control inflation, and be convincing in denials that it has muzzled Bosworth (whose jawboning has offended George Meany), it can do so easily. It can unleash Bosworth and others for an active role in whipping an inexcusable handout to the airline industry at the taxpayers' expense.●

## PANAMA CANAL: BISHOPS TRY TO COOL PANAMANIAN MARXISTS

The SPEAKER pro tempore. Under a previous order of the House, the gentle-

man from Pennsylvania (Mr. FLOOD) is recognized for 5 minutes.

● Mr. FLOOD. Mr. Speaker, on February 24, 1975, the administrative board of the National Conference of Catholic Bishops, with the best intentions, issued a press release urging the giving of full control over the U.S.-owned Canal Zone and Panama Canal to the Republic of Panama as a "matter of elemental justice."

That release was not overlooked by competent students of Isthmian Canal policy questions. One of them, Maj. Gen. Thomas A. Lane, a distinguished Catholic layman who had had Army engineering experience in the Canal Zone, analyzed the statement and in a thoughtful article, published in the highly respected Catholic paper, the Wanderer, disclosed some of its fallacies. I quoted his article in an address to the House of Representatives (CONGRESSIONAL RECORD, April 22, 1975, p. 11303).

It was, therefore, gratifying to learn recently that the bishops of Panama, headed by Archbishop Marcos G. McGrath, issued a pastoral letter on "The Situation of the Country" exposing the realities of the problem facing Panama. This letter was described at length in the July 30, 1978, issue of the San Diego, Calif., Union in a Hemispheric Report by William Giandoni of the Copley News Service.

Because the indicated report is quite revealing and should help correct some current misinformation, I quote it as part of my remarks and urge that it be read by all Members of the Congress:

HEMISPHERE REPORT—BISHOPS TRY TO COOL PANAMANIAN MARXISTS

(By William Giandoni)

Marxists are trying to take control of Gen. Omar Torrijos' dictatorship in Panama.

But prominent Panamanians, friends and foes alike of Torrijos, are girding for action to keep Panama and the strategic Panama Canal from falling into enemy hands.

The lates, and certainly the most respected, voices to be raised against the Marxist threat in the isthmian republic are those of Panama's nine Catholic bishops, headed by Archbishop Marcos G. McGrath of Panama City.

In a pastoral letter on "The Situation of the Country," the Catholic prelates objected to "the fact that certain Marxist cadres pretend to set themselves up as political spokesmen not only of the government but of the whole nation as well, imposing their opinions with all the authoritarian force they can muster."

The bishops went on to say that in some government offices jobs and opportunities "are handed out almost exclusively to those of one and the same ideological line."

The bishops did not name names or cite specific instances of the Marxist infiltration of the dictatorship. But, nevertheless, their protest had considerable impact in Panama and, presumably, will have elsewhere. The pastoral letter was not only read at all masses on Sunday, July 9, but was airmailed to other countries.

All of the bishops, from Archbishop McGrath, who is a native of Panama, on down, had appeared to support the Torrijos regime, particularly during the negotiations with the United States on a new canal treaty.

To some extent, it was the vocal backing of men of their caliber that calmed fears in Panama and abroad that Torrijos might turn out to be a hidden communist, as did Cuban dictator Fidel Castro, or that he might not be strong enough to hold his Marxist advisers in check. Now, it appears, they have come around to that point of view.

The situation that the bishops mentioned should not constitute any immediate threat to the Panama Canal. The presence of an estimated 15,000 U.S. troops within the 10-mile wide, 50-mile long Canal Zone should be enough to guarantee the security of the inter-oceanic waterway.

The bishops' warning against Marxist infiltration of the government brought a denial of sorts from Torrijos.

"I do not like that pastoral letter, the views of five (sic) respectable bishops before whom I bow my head with a respectful religious attitude, their attitude of insinuating that this nation is taking the course of communism," Torrijos said in a speech that was broadcast throughout the country.

"All we have been doing has been precisely so that the nation will not fall into or be involved in foreign schemes, in foreign-oriented or enslaving schemes," Torrijos said.

The bishops' criticism of the situation in Panama was not limited just to the signs of Marxist infiltration.

They complained of the great needs of the Panamanian people, "of the lack of jobs, of housing, of the basic guarantees of life." They voiced their concern over "the slight participation of the people, especially the poorest, in the efforts and decisions that affect their own development." They protested the recent violence in the university and elsewhere.

But the "serious defects in the current political structure" in Panama were what led the bishops to their protest against Marxist activities.

The first defect was "the lack of a clear and proper separation among the three branches of the government." That was a reference to the fact that the current Panamanian constitution grants Gen. Torrijos, as chief of government, virtually dictatorial powers.

Then the bishops "noted a lack of efficiency in public administration because of the duplication of functions, personalism and improvisation."

Next came "the lack of controls over the budgeting, investment and handling of public funds."

Finally, "the lack of representation in the system for election of (local) representatives" to the National Assembly was mentioned. The pastoral letter noted that "a recent study, based on official electoral statistics, reveals the possibility that five percent of the electoral population of the country could determine the election of the future president of the republic," under the current arrangement.

In truth, nothing the bishops said had not been said before, although probably it was expressed in more inflammatory language.

Since Torrijos relaxed restrictions on press, radio and television last year, since he authorized the return of political exiles, and since the opposition political parties regained the voices they lost in 1968 when the National Guard ousted President Arnulfo Arias, highly partisan critics of the Torrijos regime have been saying much the same.

However, as such charges were voiced by professional politicians who had been displaced by the military and who presumably were willing to go to extremes to get back into power, many Panamanians tended not to take them seriously.

That is not the case with Archbishop McGrath and Bishops Jose Carrizo, Carlos Lewis, Jesus Serano, Daniel Nunez, Jose Agustin Ganuza, Jose Dimas Cedeno, Martin Legarra and Marcos Zuluaga, all of whom signed the pastoral letter.

They are not suspected of having political ambitions.

Theirs are voices most Panamanians hear and heed.●

## PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. WHITE) is recognized for 5 minutes.

● Mr. WHITE. Mr. Speaker, I missed rollcall No. 723 on August 17 as I had to leave Washington to attend to official business in the 16th Congressional District of Texas. Had I been present for the vote on passage of the bill to authorize appropriations for the U.S. Railway Association for fiscal year 1979 (H.R. 10898), I would have voted "nay." ●

## CONGRESSIONAL MISSION TO VIETNAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 10 minutes.

● Mr. BINGHAM. Mr. Speaker, the congressional study mission that traveled to Vietnam during the recent congressional recess under the leadership of our distinguished colleague from Mississippi (Mr. MONTGOMERY) has performed a great service to the Congress, to the American people, and particularly to American MIA families, and I rise today to commend that group for its very productive effort.

Not only, Mr. Speaker, did the study mission obtain from Vietnamese officials the remains of another 11 Americans who died in Vietnam, it also continued a constructive dialog with Vietnamese officials that will hopefully one day result in concrete improvement in our relations with that country and further healing of the wounds on both sides of the tragic war we fought there.

Several members of the study mission, Mr. Speaker, have commented to the press that the Vietnamese are now ready to establish diplomatic relations with the United States. It would seem, from these statements and other sources, that the Vietnamese are now prepared to drop their demands for war reparations from the United States as a precondition to diplomatic relations.

As chairman of the House subcommittee with legislative jurisdiction over U.S. economic embargoes, including the current embargo of Vietnam, I look forward to reviewing in detail the study mission's report. Administration officials have reconfirmed to me very recently that President Carter's earlier policy statements with respect to Vietnam still stand—that the only precondition from the U.S. point of view to a lifting of our embargo is the establishment of diplomatic relations, and that the embargo will be lifted simultaneously with the opening of such relations.

Technically, Mr. Speaker, the embargo

of Vietnam could expire on September 14, 1978, unless the President determines that it is in the national interest to continue it. I presume he will make that determination. While I have long been in favor of terminating the embargo, I can understand why the President might want to extend it now, at least for the time being. The administration's linkage between diplomatic relations and a lifting of the embargo is certainly not unreasonable. Even assuming that both sides are now ready for diplomatic relations, it will take some negotiating to work out the details of those relations, particularly in view of the hostility that has so long separated us. Negotiation of the details of diplomatic relations cannot possible be accomplished before September 14, so I think it is only realistic to expect the embargo to be continued for a while longer.

I sincerely hope, however, that the administration will take the initiative very soon to resume talks with the Vietnamese to reach agreement on diplomatic relations and a lifting of the embargo. The Congress is clearly on record against any agreement for reparations or financial aid to Vietnam at this time. But that negative view does not necessarily extend to diplomatic relations and basic commercial trade relations with Vietnam. The apparent removal of reparations and aid from the list of Vietnamese preconditions would seem to remove the last obstacle to such progress and the main basis for congressional opposition.

Obviously, Mr. Speaker, improved U.S. relations with Vietnam has implications for other nations, particularly the Soviet Union, the People's Republic of China, and Japan. I believe we should consult with each of those governments before reestablishing diplomatic relations and permitting commercial trade.

Between now and the time when further negotiations might produce agreement on diplomatic relations, I believe it is important that we avoid provocative actions toward Vietnam that might make it difficult for that government to carry through with its apparent decision to seek improved relations with us. On the contrary, in view of the actions the Vietnamese have taken, particularly in returning the remains of MIA's and demonstrating their willingness to search for those still missing, it would be most appropriate for us to reciprocate. In particular, I think it would be appropriate for the State and Treasury Departments to increase the volume of exceptions to the embargo and allow certain transactions to go forward on a case-by-case basis. There are, for example, transactions that were frozen by the embargo involving goods that the previous Government of Vietnam had already purchased from American companies before the embargo went into effect. These goods, in some cases, had already been shipped from the United States before the embargo, but could not be delivered and have had to be stored at great expense since. I believe it would be most appropriate immediately to allow those transactions to be completed as reasonable exceptions to the embargo.

Again, Mr. Speaker, I commend the distinguished gentleman from Mississippi (Mr. MONTGOMERY) and all the Members of his congressional party on the constructive contribution to our foreign policy they have made, and I urge all Members of the House to study their recommendations seriously and sympathetically.●

## MILITARY AND FEDERAL PAY CAP UNFAIR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. HARRIS) is recognized for 5 minutes.

Mr. HARRIS. Mr. Speaker, today I am introducing into the House a resolution to disapprove President Carter's recommended 5.5 percent cap on military and Federal pay.

In seeking to impose an arbitrary pay cap on military and Federal employees below levels his own advisers have proposed, the President is placing an unfair burden on one segment of the work force, and circumventing the intent of Public Law 92–210, the Federal Pay Comparability Act of 1970. By adopting my resolution of disapproval, Congress can make the Pay Act work as it was intended, reaffirm its earlier vote this session against the pay cap in the budget resolution, live up to America's contract with her fighting men and women and public service employees, and avoid even bigger outlays for military and Federal pay next year.

### ARBITRARY WAGE CONTROLS ON MILITARY AND FEDERAL PERSONNEL
